COMPLETE INDEX PAGE 7
The new Keystone Electric Generating Station, a 175 Million Dollar Investment in the Future

Through the cooperation of 3 utility companies, work is beginning on the largest power generating station ever built in Pennsylvania, and one of the biggest in the nation.

It will serve as the “keystone” of a $250 million coordinated high-voltage-transmission and power plant construction program...one of the largest ever undertaken by the electric utility industry. Of equal importance to this area is the fact the plant will require up to 4.7 million tons of coal annually...to be produced within a 40-mile radius of the plant site...to be delivered by conveyor belts, truck and rail.

This multi-million dollar investment promises tremendous impact on the industrial economy in Southwestern Pennsylvania...in making available ample supplies of low-cost power...in providing new jobs and business for the coal industry.

WJAC-TV salutes the participating companies, and this tangible proof of their confidence in the future...and is proud to serve an area so clearly and definitely “on the move” toward a busy and prosperous tomorrow.

For market information on the Johnstown-Altoona area and WJAC-TV, contact Harrington, Righter and Parsons, Inc.
St. Louis finds KTVI the happy medium for entertainment and information accenting vitality. A lively curiosity for the conversational and controversial is now served with programs selected to answer a native 'show me' interest. Blended with the balanced ABC line-up, we add a mixture of the seasoned with the new — like:

Girl Talk
10:25 am Mon-Fri

The Steve Allen Show
10:15 pm Mon-Fri

... two programs the growing St. Louis audience looks for on Television 2. See what's on KTVI — it's selling!
Steve Allen comes to CHANNEL 4...

On December 17, 1962, KRLD-TV opened a new era in late-night television viewing for the Dallas-Fort Worth market — "The Steve Allen Show," seen Monday through Friday from 10:30 p.m. to midnight, premiered.

Local critical acclaim was immediate and viewer response was most gratifying, providing KRLD-TV advertisers with an automatically favorable product exposure. Take advantage of this built-in opportunity. See your Advertising Time Sales representative.

BROADCASTING, January 7, 1963
Transfers in transit

New year began with four known negotiations involving television station transfers totalling around $25 million. Three of stations are held by original licensees and fourth is outlet that changed hands five years ago. None has yet reached contract-signing, but handshake stage reportedly has been reached on two transactions.

Time, ABC-TV in news deal

In next fall’s schedule ABC-TV has all but buttoned up Tuesday 10-11 p.m. period for weekly information program hour. Deal is near for showing on alternate Tuesdays of hour-long documentaries produced by Robert Drew for Time-Life Broadcast, subsidiary of Time Inc. Speculation is that on other Tuesdays expanded version of Close-Up, now weekly half-hour on Tuesdays at 10:30-11 p.m., will be scheduled.

Some 10 Drew documentaries are already in the can, produced with original intention of syndication by Time-Life Broadcast. Mr. Drew, now independent producer financed by Time-Life, attracted attention with several documentaries on ABC-TV Close-Up in 1960-61, among them “Yanqui, No!” study of anti-American developments in Venezuela and Cuba. Interesting footnote: Deal for new Drew series on ABC-TV is being worked out with Tom Moore, vp in charge of network, not with Jim Hagerty, boss of news.

External calm

“Don’t rock the boat” approach to internal crisis precipitated last November by NAB President LeRoy Collins’ anti-cigarette speech prevailed week before NAB board meets in Phoenix for its winter meeting (story page 53). Subject of Gov. Collins’ contract extension is not on formal agenda, but will be handled by five-man negotiating committee. No one is happy about situation, but predominant pre-meeting view was that broadcasters should not air troubles publicly. Odds-on bet is that nothing will be resolved formally and that negotiating committee will still be negotiating when board adjourns its sessions Jan. 18.

Slow gestation

Special FCC “committee of commissioners” is trying to effect compromise on long-planned new tv program reporting forms. FCC is split several ways over latest recommendation of Broadcast Bureau Chief Kenneth Cox, soon to be commissioner himself, and it’s reported newest product will have little resemblance to form released for comments year and half ago. For this reason, FCC is expected to seek third round of industry comments since it first announced in July 1960 that new forms would be adopted “shortly.” Working on compromise are Commissioners Newton Minow, Frederick W. Ford and Robert T. Bartley. There will be separate program forms for am stations which will not be considered until tv questions are settled.

Help from the Hill

Under consideration at FCC is legislative recommendation to Congress that would authorize commission to extend hours of operation of daytime radio stations without affording dominant stations on channels opportunity to oppose degradation of service at formal hearings, as now is required. Some members of Congress who have been pressured by daytimers have asked FCC to find solution, and proposal under consideration is designed to appease them.

All alike

Wholesale changes in copy themes of aspirin and other analogous commercials may be in offing. Article in Dec. 29 Journal of American Medical Assn. reported that tests had found no significant differences in working speed, effectiveness and duration of Anacin, Bayer aspirin, Bufferin, Excedrin and St. Joseph’s aspirin. Bayer, working on advance reports, was on air same day with copy plugging Journal article and stressing that for speed and gentleness on stomach Bayer is as good as any—including some that cost more and, incidentally, concentrate their copy on exactly those virtues. Bayer agency: Dancer-Fitzgerald-Sample, New York.

Power play in Britain

Commercial television interests in Britain are dismayed by television bill that goes before Parliament this month. They say it would give Independent Television Authority, ruling body of commercial tv, powers far more dictatorial than were suggested by government White Paper (Broadcasting, Dec. 31, 24). If bill passes, ITA will be empowered to become as influential in commercial tv operations as BBC is in non-commercial, according to one informed view.

Here’s how one London observer has sized up ITA’s authority proposed in new legislation: “It’s [ITA’s] control over advertising will, if it chooses to make use of its powers, be as complete as if it were selling the advertising time itself. Its control over programs will be as complete, if it wishes, as if it were itself arranging them.”

Cliffhanger continued

General Electric Co. will have to do more explaining to FCC in its bid for license renewals of WRGB (TV), Westinghouse and WGF M (FM) Stations, N. Y., because of licensee’s conviction of non-broadcast connected criminal antitrust violations. Renewal applications were argued at length at last week’s meeting before FCC decided to require additional information from GE. Licensee already has been quizzed several times on applications that have been pending two years. Broadcast Bureau argued for renewal last week while general counsel’s office felt hearing is necessary.

Westinghouse Electric Co. was convicted at same time as GE, but its stations were renewed nine months ago (Broadcasting, March 5, 1962) because (1) licensee was Westinghouse subsidiary, not parent company; (2) programming on WBG’s stations was judged superior, and (3) Westinghouse showed what FCC spokesman described as “better attitude” at outset of investigation.

Counter-programming

Republicans are still kicking around ideas on best way to get broadcast exposure similar to that obtained by President Kennedy last month on all-network discussion program, A Conversation with the President (At Deadline, Dec. 31, 24). Although Governmental committee isn’t talking about “equal time” in legal sense, committee says top network news executives have said they would be “readily receptive” to program giving GOP viewpoint “offered in proper format.” GOP considers offer “money in the bank,” but is being cautious how to use it. Although discussion-interview format is cheapest, consideration of feature program such as films used at both parties’ national conventions in 1960 is not ruled out.

Minow’s choice

Sylvia Kessler, currently acting chief, is choice of FCC Chairman Newton N. Minow as chief of Renewal and Transfer Div. of Broadcast Bureau. Other commissioners, however, have own candidates for post and no action has been taken on chairman’s recommendation. Miss Kessler, former head of Opinions and Reviews, has been division’s acting chief since last August.
WFBC-TV SALUTES THE NEW "JET AGE"

GREENVILLE-SPARTANBURG

Airport

SERVING THE HEART OF ITS MARKET

AIRPORT FEATURES

- 7,600-ft. main runway
- First FAA-approved center-line and touchdown lighting
- $11½-Million Terminal Bldg., with every convenience for users
- 9-Story Control Tower has "jet-age" communications, radar, flight service and FAA training rooms
- Limousine service to Greenville & Spartanburg

$10-MILLION AIRPORT . . . MOST MODERN IN THE SOUTHEAST

Served by Eastern Air Lines and Southern Airways, the Greenville-Spartanburg Airport now has 42 scheduled flights daily, including Eastern's non-stop flight to New York. Located in the heart of the industrial Western Carolina's area, it is new evidence of this region's present importance and future growth.

WFBC-TV DOMINATES* ITS RICH MARKET OF 2-MILLION PEOPLE WITH $3-BILLION INCOMES

With Greenville, Spartanburg and Asheville as its metropolitan areas, this market embraces the industrial Western Carolinas, plus counties in Georgia and Tennessee. WFBC-TV's 61-county market ranks near Miami and Birmingham. It outranks Nashville, New Orleans and Richmond in population, incomes and retail sales.

BAR announces 75-market monitoring plan
SERVICE STARTS IN 10 CITIES, TO EXPAND MONTHLY

Continuous, year-round monitoring of TV stations was started by Broadcast Advertisers Reports on Jan. 1 and will encompass all stations in top 75 markets by next January, BAR is announcing today (Jan. 7).

Fulltime program now covers TV stations in top 10 markets; list will be expanded by about six markets per month, starting in March. In past BAR has monitored stations for week at a time, four or six times per year, and this pace will continue until all 75 markets are on fulltime basis. Monitored hours will rise from current 160,000 per year to more than 1.5 million.

In fulltime program BAR will issue weekly reports showing, by product category, all TV commercials broadcast. Thus, BAR said, advertisers and stations can get complete reports on competitive activity, stations will have "automatic logging" facilities to meet new FCC requirements and, for first time, advertisers will have independently audited proof-of-performance in markets where 85% of TV money is spent.

Next year BAR expects to present competitive activity report in terms of estimated dollars spent as well as number and length of commercials.

Cost to Vary • Officials said new service's cost to advertisers will vary according to size of their TV investments and number of product categories involved. They estimated average company buying multi-category reports would pay in $3,000 range per category per year. Cost to stations will depend on market size and number of reports bought. In top 25 markets, it was estimated, station ordering 52 reports would pay about $260 apiece; for 12 reports, about $300 apiece. In smaller markets rates will be scaled down.

Stations in New York, Los Angeles, Chicago, Detroit, Philadelphia, Baltimore, Washington, San Francisco, Pittsburgh and Minneapolis are now monitored fulltime. Atlanta, Boston, Cincinnati, Cleveland, Dallas-Ft. Worth and St. Louis are to be added in March.

Market Schedule • Other additions scheduled as follows:
April: Miami, Tampa, Birmingham, Houston, Columbus and Indianapolis.
May: Seattle-Tacoma, San Diego, Sacramento, Fresno, Buffalo and Providence.
June: Milwaukee, Richmond, Memphis, Syracuse, Charlotte and Louisville.
July: Kansas City, New Orleans, Charleston-Huntington, Toledo, Ft. Wayne and Youngstown.
September: Denver, Grand Rapids, Kalamazoo, South Bend-Elkhart, Green Bay, Wichita and Rochester.
November: Nashville, Little Rock, Tulsa, San Antonio, Oklahoma City and Norfolk-Portsmouth.
December: Cedar Rapids-Waterloo, Jackson, Omaha, Amarillo, Lansing-Jackson, and Greenville-Spartanburg-Ashville.
January 1964: Shreveport, Des Moines, Portland (Ore.), Phoenix and Flint-Bay City.

Scott Broadcasting buys WTTM-AM-FM
Sale of WTTM-AM-FM Trenton, N. J., by Peoples Broadcasting Co. to Scott Broadcasting Co. for $375,000 was announced Friday.
Scott Broadcasting, principally owned by Herbert Scott, owns WPAZ Pottstown, Pa., and WJWL Georgetown, Del.
Peoples, subsidiary of Nationwide Insurance Co., said it intends to concentrate its station ownership in larger markets.
Peoples owns WRFD-AM-FM Columbus-Worthington, Ohio; WMMN Fairmont, W. Va.; WJPS-AM-FM Cleveland, Ohio; WNAX Yankton, S. D., and KVTU (TV) Sioux City, Iowa.
WTTM operates on 920 kc with 1 kw fulltime; WTTM-FM, under construction, will operate on 94.5 mc with 20 kw. Broker was Blackburn & Co.

Pulse says it's happy to make FTC changes
The Pulse Inc. issued statement on Friday in connection with Federal Trade Commission consent orders and complaints issue earlier (see page 66).
"Pulse has always made, and will continue to make, a conscientious effort to insure audience data of the highest possible accuracy, and to represent that data for what it is. While we do not necessarily agree that all of the points made by the FTC have essential bearing upon the basic accuracy and utility of our research, we are happy to make the detailed changes requested in the interest of avoiding prolonged and harmful misunderstanding of audience research in general. In fact, we believe we have already made all the changes necessary to comply with the commission's order. Pulse will continue through experimentation and validation to make our technology and our reporting as accurate, and as accurately-represented as it can be."

Pacifica heads, guests subpoenaed by Senate
Senate Internal Security subcommittee had subpoenaed by Friday at least five persons connected with or who had appeared on Pacifica Foundation stations for appearances at executive session in Washington, D. C., on Thursday (Jan. 10).
Pacifica is non-commercial, listener-supported licensee of three fm stations: KPFA (FM) Berkeley, KPFK (FM) Los Angeles, both California, and WBAI (FM) New York. Outlets offer cultural, off-beat programming and have presented communists and other political extremists. Trevor Thomas, Pacifica president, warned that "any legislative pressures to curtail broadcasting content are dangerous and unwarranted."
Subcommittee refused any comment.

Export interviews
U. S. Information Agency Director Edward R. Murrow is seeking to have some televised interviews of top U. S. officials made available to government for overseas use.
According to USIA spokesman, Mr. Murrow has suggested to chief news officers at several departments that such interviews, "having to do with policy of world-wide concern should be made available to USIA for use of its overseas media, regardless of their ability to pay."
Mr. Murrow is said to feel that such interviews as those of Secretary of State Dean Rusk, which appeared on CBS-TV, and President Kennedy, which was shown on all three networks, should be available for government's use overseas.
FCC asks court backing in Orlando ch. 9 grant

FCC this week will ask court of appeals in Washington to approve agency plans to reaffirm 1957 grant of ch. 9 (WLOF-TV) Orlando, Fla., to Mid-Florida Inc. (CLOSED CIRCUIT, Nov. 5, 1962). Case had been remanded to FCC by court, which retained jurisdiction, because of off-record contacts with former Commissioner Richard A. Mack.

By 4-1 vote last Thursday, FCC decided that Mid-Florida principals did not ask attorney William Dial to seek out Mr. Mack and, in fact, did not even know that such contacts had been made. Action reverses earlier initial decision which had recommended disqualification of WLOF-TV (BROADCASTING, Sept. 25, 1961). Chairman Newton N. Minow dissented with Commissioners E. William Henry and T. A. M. Craven not participating.

Druggists get warning on tv commercials

Proprietary Assn., trade group for drug industry, has alerted members about proposed NAB tv ban on use of doctors or dentists in drug or medical commercials. Proposal comes before NAB TV Board at Phoenix, Ariz., Jan. 16 (story page 53). NAB's code now bans white-coat appearances by actors. Doctor-dentist ban was proposed by Tv Code Board last December.

WQXR bows to listeners

Listener response to announced plan to cancel weekly jazz program on WQXR-AM-FM New York and QXR Network conducted by John Wilson, brought reinstatement without missing single show. Announcement of demise of The World of Jazz by WQXR, whose reputation rests on classical music format, came at end of Dec. 26 show, and immediate "unsolicited interest" caused return of 8½-year-old program following week.

Paperwork

Scott Paper and Upjohn Co. will sponsor NBC-TV's White Paper programs "The Death of Stalin" on Jan. 27 and "The Rise of Khrushchev" on Feb. 3. Upjohn has also purchased one-half sponsorship of two more documentaries on Soviet Union—"Who Goes There" on March 1 and "Encyclopedia of Communism" on April 10. Agencies: J. Walter Thompson (Scott), McCann-Marschalk (Upjohn).

WEEK'S HEADLINERS

Frank M. Headley, president and treasurer of H-R Representatives and H-R Television, elected board chairman, chief executive officer and continues as treasurer, in new alignment of titles and executive staff of New York-based station representative firm. Dwight S. Reed and Frank E. Pellegrin, former executive vps and also founding partners with Mr. Headley, promoted, and Edward P. Shurick, former executive vp of Blair-TV and at one time CBS vp, joins H-R Television as vp and senior executive, as part of newly announced expansion (see story, page 34).

Jerome Bess elected executive vp of RKO General Broadcasting, new division of RKO General Inc. (WEEK'S HEADLINERS, Dec. 24, 1962). Mr. Bess joined RKO General in July 1961 as executive assistant to Hathaway Watson, former vp in charge of broadcasting for RKO General and now president of new division. Mr. Bess, in past year, has also served as division director of CKLW-AM-TV Windsor, Ont.-Detroit, Mich. In new capacity, he will be responsible for broadcast operations of division's sta-

James M. LeGate, one-time general manager of WHIO Dayton, and WIOD (now WCKR) Miami, and in recent years promotion manager of Miami (Fla.) News, a James M. Cox newspaper, appointed station director of WCKR-AM-FM Miami, effective Feb. 11. Milton Komito will continue as general manager of WCKR, licensee of which is Miami Valley Broadcasting Corp., headed by James M. Cox. Other Cox Stations are: WHIO-AM-FM-TV Dayton, Ohio; WSOC-AM-FM-TV Charlotte, N. C., and WSB-AM-FM-TV Atlanta, Ga.

George H. Gribbin, president of Young & Rubicam, New York, since 1958, elected board chairman and continues as chief executive officer. Edward L. Bond Jr., executive vp and general manager, elected agency's president. Mr. Gribbin succeeds Sigurd S. Lammon as board chairman; Mr. Lammon having retired on Dec. 31, 1962. Mr. Gribbin joined Y&R in 1935 and rose through creative ranks (copy department). Mr. Bond joined Y&R's contact department in 1946 and was elected vp and contact supervisor in 1953. He was made director of contact department in 1958, senior vp in 1959 and executive vp and general manager in February 1962.

STEINMAN STATION • Clair McCollough, Pres.

Representative: The MEEKER Company, Inc. • New York • Chicago • Los Angeles • San Francisco
For broadcasters and TV producers who require the very finest in tape equipment, the new TR-22 is the answer. Now going into stations and studios throughout the world, this deluxe, precision-built recorder includes many new features that lead to improvement in operating efficiency and picture quality. The compact design and the smartly styled console increase its usefulness, and will enhance the appearance, of any TV tape studio.

All-Transistor Design
The only tubes in the TR-22 are found in the monitor and oscilloscope. It is the only recorder that is totally transistorized in all recording and playback circuits. Among other things, the use of transistors reduces start-up time, requires less space, and increases reliability.

Five-Second Starting
Although the conservative specifications call for a warm-up period of five minutes, it has been repeatedly demonstrated that the TR-22 will playback an excellent picture in less than 5 seconds after it is turned on—from a cold start! This is especially important when a client suddenly appears.

Air-Bearing Headwheel
This is an exclusive RCA advantage which is standard equipment on the TR-22. Since the recording and playback heads ride on a cushion of air, there is an absolute minimum of jitter, improved SN ratio, and excellent frequency response. It all adds up to a better picture.

Built-In Pixlock
Also standard equipment on the TR-22, the Pixlock system provides for switching between tapes and other sources without roll-over, and enables you to create special effects. Other electronic editing aids include a tone oscillator for marking a cue channel. Result: A more professional production.

Finest Pictures
RCA transistor design, together with air-bearing headwheel, assures trouble-free recording and top quality reproduction of tapes. Self-adjusting circuits hold the high quality picture over long periods of time—without an operator constantly adjusting controls. This kind of performance can be duplicated day after day, enabling you to produce the finest of tapes.

Simplified Operation
Recording controls and playback controls are built on separate panels—one at either end of the tape deck—to reduce possibility of accidental erasings, etc. Signal lights tell the operator when to start, warn him when any trouble develops, and indicate the "mode" of operation. Eye-level monitors give visual checks on performance during recording and playback.

Designed for Color
There is room in the console for adding both Automatic Timing Correction and Color. These are plug-in, transistorized modules that simply slide into position. No external equipments are required.

Self-Contained Console
All the electronics, operating equipment, and accessories are neatly packaged in a single console. There are no external racks of equipment. The TR-22 can be easily set up in one spot requiring only 10 sq. ft. of space, and is also ideal for use in a mobile unit.

YOUR BEST SELLING TOOL

Because the TR-22 is so striking in appearance and is designed to set the highest standards of excellence in TV Tape Recording, you will find it attracts attention wherever it is in operation. Your studio can benefit from this symbol of the finest in TV Tape. It's a selling tool that radiates prestige. Your salesmen and customers will be convinced that you can produce top-quality tape productions when they see the TR-22 in your studio.

See your RCA representative or write: RCA Broadcast and Television Equipment, Bldg. 15-5, Camden 2, N.J.
The bleat of a lamb may soften the heart of man, but the bleat of a broadcaster carries no farther than his signal, for the stations that beseech, do not necessarily reach people. The success of television and radio stations lies in proportion, not distortion. People watch. People listen. People know.

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

JANUARY

Jan. 7-8—NAB-FCC joint conference on am growth problems. Conference is open to all interested parties.

Jan. 8—Philadelphia Club of Advertising Women dinner. Poor Richard Club. Mark Evans, vp and director of public affairs for Metromedia Inc, will be key speaker at the dinner affair highlighting "The Radio Broadcasting Industry in the Delaware Valley."

Jan. 8—Reply comments due at FCC on proposed allocation of frequencies for space communications.

Jan. 10—Luncheon meeting of Advertising Research Discussion Group, New York chapter, American Marketing Assn., Brass Rail, Park Ave. and 40th St., 12:15 p.m., Dr. Thomas E. Coffin, research director, NBC, will deliver a talk entitled "Beyond Audience: The Measurement of Advertising Effectiveness."

Jan. 12—Deadline for 1962 entries for George Foster Peabody Radio and Television Awards. Entries should be sent to Dean John E. Drewry, Henry W. Grady School of Journalism, U. of Georgia, Athens.

Jan. 10-19—International Television Festival of Monte Carlo, Monaco.

Jan. 12—Florida Assn. of Broadcasters board of directors meeting, Cherry-Plaza, Orlando, Fla. Orlando broadcasters will host a "hospitality hour" at 6 p.m. Board meets at dinner, 7 p.m. FAB members are invited to send President Joe Field or Executive Sec. Ken Small suggestions for items to go on agenda.

Jan. 14—Academy of Television Arts & Sciences, Hollywood, 8 p.m., place to be announced; BBC documentary film, "Television and the World," Collier Young, co-ordinator.

Jan. 15—Deadline for foreign entries for third International Broadcasting Awards competition of Hollywood Ad Club. Entries should be sent to IBA, P.O. Box 38900, Hollywood 38, Calif.

Jan. 17-19—Sixteenth annual winter convention of South Carolina Broadcasters Assn., Wade Hampton Hotel, Columbia. S. C. H. Moody McElveen Jr., vp and general manager of WNOX-AM-FM-TV Columbia, is general chairman. Among the key speakers are: Edmund C. Bunker, president-elect, RAB; Julian Goodman, vice president for news and public affairs, NBC; and air personality Bud Collyer.

Jan. 18—Comments on FCC proposed rulemaking to require applicants, permittees and licensees to keep file for public inspection of all broadcast applications.

Jan. 18—South Carolina AP Broadcasters Assn., Wade Hampton Hotel, Columbia. In conjunction with the meeting of the South Carolina Broadcasters Assn., panels will discuss how to make full use of the AP news report—and how to make that report better by sharing in news gathering. Lamar Caldwell, WBSC Hartsville, will discuss the survey made by the Wire Study Committee.

Jan. 18-20—Advertising Assn. of the West

FIRST CHOICE IN A FIRST RATE MARKET

Twice as many listeners as all other Minneapolis-St. Paul stations combined!

Powered by an enormous 68.1% share of audience, WCCO Radio provides a setting of outstanding acceptance for your advertising story. You get sales-sparking coverage of two markets in one: the 5-county Twin Cities metro area plus 119 non-metro counties. Big audiences, top acceptance and great coverage are yours at the lowest cost-per-thousand in the market—less than one-third the average of all other Minneapolis-St. Paul stations.
mid-winter meeting. Mapes Hotel, Reno, Nev.

*Jan. 29—Iowa AP Radio & Television Assn. annual winter workshop meeting in Des Moines. Governor-elect Harold Hughes will address the luncheon session. Awards will be presented to members contributing the most to the Iowa AP report during 1962.

Jan. 21—Deadline for comments to FCC rulemaking proposals to allow (1) joint use of auxiliary tv stations and microwave facilities of closed-circuit etv systems for transmitting on parttime and secondary basis to on-the-air etv stations and station to closed-circuit; and (2) make available 1850-1990 mc band to etv for extended range, closed-circuit purposes.

Jan. 22—Georgia Assn. of Broadcasters. board meeting. U. of Georgia, Athens.

Jan. 22-24 — Eighteenth annual Georgia Radio-TV Institute, co-sponsored by Georgia Assn. of Broadcasters and U. of Georgia. FCC Commissioner E. William Henry, Georgia Governo-elect Carl Sanders; Stephen Labunski, WMCA New York; Maury Webster, CBS Radio Spot Sales; Stephen Fiddleberger, ABC owned radio stations; Edmund C. Bunker, president-elect, RAB; and John Mooney, WKNO Knoxville, are among participants.

Jan. 23—Winter meeting of Colorado Broadcasters Assn., Hilton Hotel, Denver. Meeting includes a cocktail party and dinner for members of the Colorado legislature.

*Jan. 23—Colorado AP Broadcasters Assn., meeting, Hilton Hotel, Denver. AP assistant general manager Lou Kramp will address the session. Members will firm up plans for a news clinic for radio and tv newsmen.

Jan. 25—AWRT Educational Foundation board of trustees meeting, Savoy-Hilton Hotel, New York City.

Jan. 28—FCC hearing on availability of local television programming in Omaha, Neb. Commissioner E. William Henry presiding.

Jan. 29-Mar. 3—Award winning examples of western editorial and advertising art selected by Art Directors Club of Los Angeles in 18th annual competition. on exhibit at Museum of Science & Industry, Exposition Park, Los Angeles.

Strike coverage

EDITOR: I want to compliment you on your excellent roundup of radio and television activities during the newspaper strike in the Dec. 24 issue of BROADCASTING. Of all the articles I have seen on this subject yours was by far the most comprehensive and informative.

There is just one minor point in your story that seems to give, or rather leave, a wrong impression, and that concerns the Journal-American. On page 33 where your writer refers to our efforts on WOR, he says, "Capsule versions of the program are being aired by other stations as well."

To me this sort of implies that all the other stations—and we have been fortunate in securing time segments gratis for 2- or 4-minute vignettes featuring the recorded voices of our top writers on a dozen or more stations through the efforts of the Rose-Martin agency—are being served "used" material.

Nothing could be further from the case. All the other stations are receiving fresh, new material which is sent to them daily and which has not been used by WOR or any other station previously.—Fred N. Lowe, director of promotion, plans and public relations, New York Journal-American.

Heart of America

EDITOR: This is to request permission to reprint the "Topeka" section of your "Heart of America" story [SPECIAL REPORT, Sept. 24, 1962], at the request of WIBW-TV Topeka, one of our stations. Needless to say, BROADCASTING will receive written and visual credit on the reprint.—Erwin Spiegel, sales promotion, Avery-Knodel Inc., New York.

[Permission granted.]

Radio in Canada

EDITOR: Dr. Roslow and The Pulse Inc. are names well known and respected in Canada, and we feel it significant that they should express the belief that the emphasis of future rating reports will be on "persons" rather than "homes" [BROADCASTING—Nov. 26, 1962].

The Radio Sales Bureau is in complete agreement... so much so that we have just published a comprehensive study on the summer activities of individuals by sex and age groups (not including children) as related to their exposure to the radio medium. This includes in-home, out-of-home, in-home-away-from-home (i.e., on vacation) and out-of-home-away-from-home listening by half-hour time segments... In addition... the individual questionnaire logs contain a vast wealth of statistics... —Charles C. Hoffman, president, Radio Sales Bureau, Toronto.

More than meets the ear

EDITOR: Your article, "And now (shh) a word from the sponsor" [GOVERNMENT, Dec. 24], brings to mind a problem I have faced many times as an engineer.

I sincerely agree that it is not a "sim-
YOU MAY NEVER SEE THE BIGGEST ANIMAL*

BUT... WKZO-TV Will Give You Mammoth Coverage in Greater Western Michigan!

Every day, every night, every week—WKZO-TV reaches more homes than any other Michigan station outside Detroit. It’s a whale of a station in a whale of a market!

See for yourself in NCS ’61. WKZO-TV has weekly circulation in 456,320 homes in 30 counties in Western Michigan and Northern Indiana. Prosperous homes, too! SRDS credits the area with retail sales of over two and one-half billion dollars annually.

Let Avery-Knodel give you the full story. And if you want all the rest of outstate Michigan worth having, add WWTV/WWUP-TV, Cadillac-Sault Ste. Marie to your WKZO-TV schedule.

*The Blue Whale reaches a length of 108 feet and a weight of 131 tons.
Last year the MGM 30/62 feature films were acknowledged the finest single offering of post '48 films yet released. Now we're topping those with the 30/63. It's a truly exciting array of entertainment values that will keep audiences and advertisers looking and buying.

Like mother, like daughter—both like the Delta Touch...famed Delta service that is always personal, quick and exceedingly thoughtful...be it Deluxe, Family Plan or Tourist. Next trip fly Delta.

The "Fletcher and Munson" curve is always thought of as Edwin Mullen's concept. But it has been observed that the "average" radio receiver's loudspeaker has its best response in the mid-frequency range, and the average person's hearing is best in this range. Therefore, the net result is what appears to be, in some instances, excessive loudness.

This hearing response of the average person is often referred to as the "Fletcher and Munson" curve, especially by technical people, although this term is used more often in the electrical engineering. This hearing response of the average person is often referred to as the "Fletcher and Munson" curve, especially by technical people, although this term is used more often in the electrical engineering.

Along this same line it might be wise to investigate the possible transmission of programs with equipment equalized to the "Fletcher-Munson" curve. -Ralph T. Winquist, consulting engineer, Bridgeport, Conn.

Separate functions

EDITOR: I'm following your editorials and [am] glad to see you speak out for free broadcasting. While I haven't cared particularly for various statements made by Collins, I believe he has some sympathy with his position on tobacco advertising and I can't quite agree that one should be prevented from speaking out merely because it might hurt revenues and profits...

If we are to maintain a free broadcasting structure, some organization should represent ownership and public service in the same breath; the head of it should be capable of industry self-criticism, and should also be able to sell the FCC on the need to change the FCC. Collins, as head of this association, might well caution the industry on the excesses of advertising, tobacco included. There are too many advertisements in their collective setting policies and practices and entirely too much influence by advertisers and agencies on broadcasting standards. No wonder the FCC moves into the vacuum.

The federation of broadcasting you propose [EDITORIALS, Dec. 10] should not be one of conflicting interests. I'd like to see the editorial function separated completely from the advertising functions...and I'd want the editorial group to be the boss.

-Frank E. Mullen, Mullen-Buckley Corp., Los Angeles.
JUST OFF THE PRESS

1963 BROADCASTING YEARBOOK

50 directories indexing the business world of TV and radio

SIX reference works in ONE

“One-book library of television and radio information”

FACILITIES OF TELEVISION: Station profiles, call letters, channels, allocations, applications pending, CATV, translators; group and newspaper/magazine ownership, station sales.

FACILITIES OF AM/FM RADIO: Station directory includes executive personnel, specialty programs, reps, call letters, frequencies; Canada, Mexico, Caribbean stations.

BROADCAST EQUIPMENT/FCC RULES: Manufacturers & services; new Product Guide; awards & citations; TV network map.

CODES/PROGRAM SERVICES: TV and radio codes; program producers, distributors, production services, news services, talent agents, foreign language and negro programming by stations; broadcast audience data.

REPRESENTATIVES, NETWORKS, TRADE GROUPS including regional reps and networks; attorneys, consultants, engineers, associations; U.S. govt. agencies; news and farm directors.

AGENCIES, ADVERTISERS, BILLINGS: Leading advertisers, agencies and their billings; books and reference works; schools, major trends, events, agency financial profile 1952-61.

Designed for your specialized “must know” references, the 1963 BROADCASTING Yearbook issue is the largest (632 pages) and most complete encyclopedia-type book ever published for the business of radio-TV broadcasting and the associated arts and services.

BROADCASTING, January 7, 1963
Some of the prettiest figures in television turn up in the National Nielsen Ratings. (A recent report was so handsome we had it decorated for the holidays.) Still, as every sponsor knows, one rating doesn’t make a season. The significant point is that one network has consistently attracted the biggest audiences in television—for five straight years in the daytime and for eight straight years at night. This is the CBS Television Network “where (to quote Advertising Age) advertisers have a better than 50% chance to get their commercials into the top-rating shows.” With the odds given at 33% on the second network and 6% on the third, “...there has not been such a wide spread since 1956-57.”
CBS leads the other networks in size of audience seven nights of the week.

CBS has 18 of the top 20 nighttime programs. This is half of our nighttime schedule.

But even the bottom half of our schedule outdraws either of the other two networks.

CBS at night leads the second network by 29% (that is, by 2,389,000 homes).

CBS leads the other networks in size of audience seven nights of the week.

CBS in the daytime, with an average minute-by-minute audience of 3,984,000 homes, leads the third network by 126% (2,274,000 homes).

CBS in the daytime leads the second network by 50% (that is, by 1,321,000 homes).

CBS in the daytime has the highest rated program 72% of the time.

CBS at night has the highest rated program 69% of the time, twice as often as the other two networks combined.

Source: NTI 2nd November report. Nighttime: 6-11 pm, 7 days; daytime, 7 am-6 pm, Monday-Friday, all regular programs.

(The very next—and latest—report was much the same: our lead over the second network was down one percentage point in average audiences at night; up one point in the daytime.)
MONDAY MEMO
from EDWARD CONDON, Bankers Life & Casualty Co., Chicago

A radio campaign that’s still going strong after nine years

Bankers Life & Casualty Co.’s radio advertising is intended primarily to produce sales leads for our insurance agents, just like our advertising in other media.

Radio has done an excellent job for many direct-response advertisers, but usually they find that in a year or less they have worn out their audience and the lead costs climb sharply. This is why we feel Bankers has set a record that’s absolutely unique in the history of response radio advertising.

We are now in our ninth consecutive year as sponsor of news commentator Paul Harvey on the ABC Radio network. No other direct response advertiser, to our knowledge, has ever sponsored a single broadcasting personality on a single radio network as long as nine years as part of an ad program where the effectiveness of the advertising is carefully and accurately measured by the number of quality leads it produces.

Successful Formula • There are a number of reasons why the combination has been successful and results have not fallen off. One is the fact that we continually vary our radio commercials from among the many types of insurance policies which Bankers offers the public.

For example, during one week, Paul Harvey might talk about our hospital-surgical insurance plan for the “senior citizen”—people 65 and over. The following week, our commercials may be devoted to Bankers’ “Major Medical” policy. Next, our advertising might cover Bankers’ unique medical insurance policy that pays money back to the policyholder if he stays well. Succeeding weeks may find us advertising some of our various life insurance policies such as the “Family Plan,” or our “Life Paid-up at 65” policy.

The result is that we are continually talking to different segments of the radio audience. Sooner or later, we offer something that will be of special interest and value to just about any and every person listening in. We also broaden the interest and appeal of our radio commercials even further by altering the basic “proposition.” For example, one commercial may offer a free booklet on health insurance. Another may ask the listener to write for a quotation on how much a certain insurance policy would cost.

Radio’s Unique Quality • This is the beauty of radio advertising. No other medium offers us the same degree of flexibility in making low-cost rapid and continual changes. We can and often do change our approach virtually overnight if our day-by-day studies of the leads we receive show that a particular commercial is not bringing in a sufficient volume of postcards and letters. Thanks to radio’s flexibility and the cooperation between our lead tabulation department and our advertising agency, Phillips & Cherbo, we can bolster any lead shortages almost before they start.

Another reason for our long association with ABC and Paul Harvey is Paul Harvey himself. He is a truly great radio salesman. Unlike many newscasters, he delivers his own commercials and injects into them an enthusiasm that’s genuine. His delivery of every commercial is exciting and so smoothly integrated into the rest of the broadcast that the listener just doesn’t think to “tune him out” when the commercial comes on.

We try to take advantage of this by giving him commercials that fit into his editorial style. His unique style prompted us, in 1954, to select him to deliver our commercials over WLS, the Chicago outlet for ABC. We felt there was a logical association between Paul Harvey the newscaster and Bankers Life & Casualty Co., the newsmaker in the insurance field. He did so well that we soon decided to sponsor him on the full ABC network. Our new contract calls for as much time as we’ve used in any of the last five years.

Track Record • While we naturally want to develop a good volume of leads with our radio advertising, the quality of these leads is also important to Bankers. So, we carefully “follow” each sales lead we send out to our agents in the field. We determine how many leads are actually turned into sales. We find out how much each sale amounts to in terms of monthly or annual premiums. But we don’t stop there. Sales from leads are “tracked” to find out their “persistence” —how long the insurance policies continue to be renewed by customers.

The net result is that we know to the penny how many dollars are brought in by the radio advertising dollars we invest and we know it for each individual advertising effort we make. This system has worked well for us. Right now, we’re one of the largest companies in the insurance field. In the past five years, for example, Bankers’ sales volume has increased an average of 20% each year. And certainly, radio and Paul Harvey have played an important role in this growth.

Because Paul Harvey has become so well identified as the radio spokesman for Bankers, we try to weave him into our total advertising and marketing programs in various ways. We often use his name and pictures in our print advertising and merchandising tie-ins. He frequently will be the feature speaker at our sales and agent meetings.

Radio Keystone • Our radio advertising program complements the rest of our advertising program. For many years, Bankers has been one of the largest users of direct mail in the world. We will often use radio to back up a mailing by having Paul Harvey tell listeners in a certain area to watch for our letters. We also have a heavy schedule of national magazine advertising and have been among the top three or four largest users of transit advertising. We use television, newspaper and theatre advertising tactically too.

Radio not only strengthens our total advertising “mix,” but it’s “live” quality also helps add warmth and feeling to an intangible product. Radio should continue to be one of the keystones of our advertising program.

Edward Condon is advertising director of Bankers Life & Casualty Co., Chicago, and has long been active in response advertising. He joined Bankers in 1956. Before that he was direct mail advertising manager of Esquire Inc., New York, where he also worked on Coronet, Coronet Films, Apparel Arts Magazine and Esquire Credit Club. Before that he was with Encylopedia Britannica Inc. as assistant advertising and sales promotion manager. He speaks frequently before advertising clubs.

The Mayor and the city's business leaders know and understand the needs of the people of Pittsburgh. When they learned that pledges to the United Fund were still short of its goal, they acted swiftly by participating in KQV Radio's "Million Dollar Wednesday." For the third year the station offered its facilities to the United Fund. Throughout the day, these civic leaders sat behind KQV microphones, introducing music, reporting the time the weather and, most important, urging the people of Pittsburgh to support the United Fund. The participation of Pittsburgh's top leadership in KQV's "Million Dollar Wednesday" was, in the words of Campaign Chairman Philip A. Fieger, "but one example of the genuine interest, the concern, the imagination, and the work which the station invested in the 1962 United Fund Campaign." KQV's "outstanding cooperation" demonstrated the kind of "superior public service" ABC Owned Radio Stations perform to generate true community action.

SPECIALISTS SELL MOST PROGRAMS

They placed nearly three-fourths of season's network shows
Independents find competition tough and growing tougher
Talent agencies and movie studio subsidiaries both qualify

The prime-time network television programs, which are now beginning to be fitted into the schedules that will begin next fall, more and more are being funneled to the networks through a relatively few, exceptionally well-heeled sales organizations.

The independent producer's chances of selling his product directly to networks or sponsors appear to be growing slimmer, and the trend among networks points toward less, not more, network-initiated production.

The extent to which "sales representatives" control the placement of programs is pointed up by an analysis of the current year's schedule: they were responsible for the sale of approximately 74% of all prime-time programs on the air at the start of the season.

A canvass last week found no reason to expect that the percentage would be materially reduced in 1963.

Time of Decision • The week after New Year's Day traditionally marks the beginning of the selling season for the following fall. Although some programs already are committed for 1963-64, the fate of the large majority of prime-time offerings probably will be decided within the next six weeks.

The sales representatives sell primarily to networks, and often assist the networks in finding advertising sponsors. In some cases they sell directly to advertisers and then help the sponsor seek a network slot, but the usual procedure is vice versa.

These salesmen represent two main categories primarily: (1) the talent agencies that serve as sales agents of tv program producers, and (2) the television subsidiaries of production companies allied with motion picture studios.

Examples of the first grouping are the William Morris Agency, General Artists Corp. and Ashley-Stneier. In the second classification are MCA (aligned with Revue Studios and Universal Pictures), Screen Gems (Columbia Pictures), MGM-TV and Warner Bros. TV.

The rise of these sales representatives to prominence in tv can be attributed largely to two developments: The decision of the networks to produce fewer programs themselves and the apparent inability of most independent producers to fulfill the dual functions of producing and selling. Tied in with the network pattern is the decline of the live dramatic series, which the networks produced themselves or which were negotiated for directly with an outside producer.

Status Today • An independent producer who has sold directly to the networks in the past explained the changed situation of today in these words: "Five or six years ago, there were outfits like Television Programs of America, Ziv Television Programs, Official Films, Pyramid Productions and Bernard Schubert Inc. who could take a show to the networks and make a sale. Those days are gone forever. Even Desilu and Ziv (now United Artists TV) had to go out and get agents—GAC for Desilu, William Morris for UA TV.

"I believe high costs of television are an important consideration. A producer has to have strong financial resources, which means that he can put out a quality show week in, week out. "Tv subsidiaries of motion picture outfits have this financial backing and the strong talent agents have access to money from other sources. Then, too, both have access to the lifeblood of a good show—the talent, whether it's an actor, a writer, a producer or a director. The little guy can't do it, unless he's willing to give away a piece of the show."
15 firms sell most programs to networks

The men who negotiate and sell prime network program packages to the networks include such top executives as (l to r) David A. (Sonny) Werblin, president, MCA TV; John Mitchell, vice president, national sales, Screen Gems; Wally Jordan, head of television for William Morris Agency, New York; Herman Rush, senior vice president for television, General Artists Corp.; Oliver Treyz, vice president and general manager of worldwide television, Warner Bros., and Ted Ashley-Steiner. Collectively, the officials represent handle the bulk of sales made to the networks on prime time programs.

Fifteen sales representatives were active in the selling of package programs for prime time presentations on the networks this season. Their influence can be gauged by this statistic: They made the sales on 74% of prime time slots in 1962-63.

With one exception, Goodson-Todman, these reps act on behalf of the tv subsidiaries of motion picture studios or of various talent agencies. They range from the giants—William Morris, MCA TV and Screen Gems—down to Art Rush and Sam Lutz, who negotiated single sales. (Goodson-Todman handles sales for two live shows, To Tell the Truth and Password.)

For purposes of this study, programs scheduled on network tv in October are included, but cover only those slotted in the Mon.-Sat., 7:30-11 p.m. and Sunday, 6:30-11 p.m. periods in which the networks program their schedules.

Broadcasting learned that of the 70½ hours of prime time available each week on the three networks, sales reps earn a fee, usually 10% of the program cost, on 52 hours. The remaining 18½ hours consist of programs owned wholly or partly by the network and a few which are sold directly without a representative. Sales reps are active on 64 prime time shows; 25 programs are network-controlled or otherwise sold directly.

Fewer on CBS-TV • CBS-TV leads the other two networks in the total number of programs in which a sales rep is not involved. CBS-TV has 15 such shows, totalling 11½ hours per week; NBC-TV has 5 programs for a total of 4 hours per week and ABC-TV, 5 programs for 3 hours weekly.

A similar study of programs made by Broadcasting in 1957, which dealt solely with the role of talent agencies when serving as sales agents, showed that MCA, William Morris, GAC and Ashley-Steiner sold 40% of nighttime network tv programs (Broadcasting, Oct. 21, 1957). A consideration that precludes making a precise comparison today is that MCA no longer functions as a talent agency but does serve as a sales rep for programs produced by Revue and other producers. The four organizations named sold virtually the same amount of program time in

purposes of simplification Broadcasting is using the term sales representative to include both classifications).

The concentration of sales strength in talent companies and motion picture tv subsidiaries has developed over the past several years. But the pattern was accentuated by these moves in 1962:

- Desilu Productions, which previously had served as its own network sales representative, engaged GAC as its sales agent.
- United Artists Television, which formerly operated as Ziv-United Artists and earlier as Ziv Television Programs, named William Morris as its sales agent, though for many years it had negotiated its own network deals.
- The signing of such name personalities as Danny Kaye, Judy Garland and Phil Silvers, all on CBS-TV, and Bill Dana on NBC-TV to regular series for 1963-64 emphasizes the still growing role of the talent agent, who handles sales for these projects.

Interviews by Broadcasting with executives at networks, talent agencies, production companies and advertising agencies brought forth these reasons for a stronger reliance on sales representatives:

- The high costs of television production and selling require a well-financed organization. The motion picture subsidiaries have a high degree of financial stability. Strong talent agents, by representing a group of producers, can keep overhead costs down and arrange for financing, though they do not invest in programs themselves.
- Both groupings have acquired over the years a reputation for delivering a satisfactory, if not always successful, program series on schedule, week in, week out. The networks, in essence, can depend on them.
- Both motion picture tv subsidiaries and talent agencies have access to performers, independent producers, writers and directors of all classifications. Through these contacts they are able to make this talent available. They learn of new ideas and often can propose the formats of series.
- Through long and intimate association with the networks, they are more apt to discern a network's needs; they are more likely to come up with the right show at a particular time to "plug a hole" or add balance to a schedule than an independent producer with a less successful record.
- They have the resources—financial and creative—to bolster a sagging series by hiring new writers, directors or performers, or to bring in a replacement series if necessary.
- They can maintain a high-caliber, well-paid sales staff because they are usually selling a group of shows. A producer with a single entry may find the sales costs too high.

32 (LEAD STORY)

Broadcasting, January 7, 1963
1962—27 1/4 hours per week—against 28 1/2 hours this year.

MCA Leads • MCA was the leader in program time sold in 1957 with 13 1/4 hours and is number one again this year with 11 1/2 hours. William Morris was second in 1957 with 8 1/4 hours and is in the same ranking this year with 9 1/2 hours. General Artists was third five years ago with 3 1/2 hours of sold programs, as against 5 hours this year, while Ashley-Steiner was fourth with two hours, as against 3 hours in 1962.

The organization that has made the most headway since 1957 is Screen Gems which sold four half-hour programs for two hours of time in that year. In 1962 SG sold nine hours for a total of six hours of prime time.

A Listing • The following listing of shows and their sales “reps” was compiled from network, talent agency, advertising agency and production company sources:

William Morris Agency: The Real McCoys, Danny Thomas Show, GE True Theatre, Andy Griffith Show, New Loretta Young Show, Lloyd Bridges Show, Dick Van Dyke Show on CBS-TV; McKeever and the Colonel, Saints and Sinners, Dick Powell Show, Sing Along With Mitch, Don’t Call Me Charlie and Joey Bishop Show on NBC-TV; The Rifleman, Stoney Burke, on ABC-TV.

MCA TV: It’s A Man’s World, Laramie, The Virginian, Wide Country, Andy Williams Show, on NBC-TV; Jack Benny Show and Mr. Ed on CBS-TV; Wagon Train, Going My Way, Leave it to Beaver, My Three Sons, McHales Navy, Alcoa Premiere and Ozzie & Harriet on ABC-TV.

Screen Gems: The jetsons and The Flintstones, Donna Reed Show, Naked City, and Our Man Higgins on ABC-TV; Dennis the Menace and Route 66 on CBS-TV; Empire and Hazel on NBC-TV.

General Artists Corp.: Lucille Ball Show, Dobie Gillis, Fair Exchange, Jackie Gleason Show, American Scene Magazine on CBS-TV; Perry Como Show on NBC-TV; Mr. Smith Goes to Washington and Father Knows Best on ABC-TV.

Ashley-Steiner: The Nurses, The Defenders and Candid Camera on CBS-TV.

Warner Bros: Gallant Men, Sunset Strip, Hawaiian Eye, and The Cheyenne Show on ABC-TV.

Goodson-Todman: To Tell the Truth and Password on CBS-TV.

MGTV: Dr. Kildare, The Eleventh Hour and Sam Benedict on NBC-TV.

Frank Cooper Assoc.: Tm Dickens, He’s Feaster on ABC-TV.

Creative Management Inc.: Jack Paar Show on NBC-TV.

United Artists Assoc.: Sunday Night Movie (United Artists feature films) on ABC-TV.

20th Century Fox TV: Saturday Night at the Movies (Fox feature films) on NBC-TV.

Art Rush: Roy Rogers Show on ABC-TV.

Sam Lutz: Lawrence Welk Show on ABC-TV.

Rosenberg-Coryell (now Artists Agency Corp.): Ben Casey on ABC.

“...The producer who doesn’t have a sales agent is going to ask pretty much the same figure as a producer who has one. True, he has a little more leverage and he can come down in price if he sees he isn’t getting anywhere by insisting on a higher price. But my feeling is that if an agent does add to a price, it is only a slight increase. And the agent often brings other values to a show.”

Sales representatives invariably are reticent to discuss the roles they portray in the creation and sale of a television program package. They point out that some of their functions are implemented “behind-the-scenes,” such as bringing independent producers together with writers, or performers or sponsors with a producer or a writer.

Values Cited • Two talent agency executives who were willing to discuss the values they believe an agent can provide in the creation and sale of TV program series were Hermann Rush, senior vice president for television at GAC, and Wally Jordan, head of the television division of William Morris, New York.

Mr. Rush asserted that “sales is only one function of a creative agency,” and added: “On occasions we have created the basic concept of a series. On others we have added one element or several elements of a package, such as a writer or a writer and director. We are in close touch with the creative areas of television—directors, writers, performers—and the business areas including the advertising agencies, the sponsors and the networks—and have acquired the ‘know-how’ to come up with the proper series at a given time. After a show is on, we service it, booking talent and taking care of sundry problems that crop up.”

Mr. Jordan voiced the belief that the reliance on talent agents by producers has developed because it costs “a lot of money” to develop and maintain an efficient sales force, and an agency has the facilities (performers, writers, and directors) required to construct a “saleable” property.

An innovation that William Morris considers significant is a two-week conference the agency holds in Beverly Hills after Labor Day each year, Mr. Jordan reported. Top executives from New York and Beverly Hills confer with writers, editors, directors, and executives of production companies to stimulate them toward creating series prior to meetings with networks, sponsors and agencies.

Name Values • Mr. Jordan believes talent agencies have made valuable contributions to the development of tv. He pointed out that William Morris
played a significant role in bringing such individuals as Danny Thomas, Sheldon Leonard, Dick Van Dyke, Robert Taylor and Loretta Young into the medium.

Programs sold by a representative are generally network owned, wholly or in part, and in a few instances were sold directly by a producer.

The general belief among talent companies, producers and advertising agencies is that the trend toward the use of a sales representative—either a talent agency or a motion picture company tv subsidiary—will grow. The rationale is that independent producers with a salable property will join forces with a tv subsidiary or a producer handled by a sales agent in order to obtain financial and sales strength.

The other alternative is an increase in production by the networks. There is no indication that this will happen—and the trend seems to be against it.

H-R REP FIRMS EXPAND

Realignment calls for new positions for owners and elevation of several major executives

H-R Representatives Inc. and H-R Television Inc., radio and tv station representation firms respectively, last week announced a new expansion move.

As part of the realignment, which involves new titles for its principals as well as major executives, Edward P. Shurick, former executive vice president of Blair-Tv, has joined H-R Television as a vice president in a senior executive capacity.

In addition to other duties, Mr. Shurick will head a new creative department of station relations and forward planning to provide "deeper and more extensive consultation services to stations."

Frank M. Headley, president and treasurer of the company, moves up to board chairman, chief executive officer and retains his treasurer post for both firms. Dwight S. Reed, executive vice president for both firms, was elected president of H-R Representatives and executive vice president of H-R Television. Frank E. Pellegrin, executive vice president and secretary of both companies, was elected president of H-R Television, executive vice president of H-R Representatives, and remains secretary (also see Week's Headliners, page 10).

Messrs. Headley, Reed and Pellegrin are founding partners. Mr. Reed has his headquarters in Chicago, and the other two are in New York.

Promotions: Several executives were affected in the promotions announced last week. James M. Alspaugh was elevated from vice president to executive vice president of H-R Representatives.

Adding the title of vice president at H-R Television: Grant Smith, midwestern sales manager; at H-R Representatives: Max M. Friedman, eastern sales manager, and Bill McRae, midwestern sales manager.

William MacCrystall, who is sales manager of the Los Angeles office for the rep firms, and Joseph M. Friedman, sales manager at San Francisco, were elected vice presidents.

John (Jack) White was elected vice president and national sales manager of H-R Television on Dec. 15.

Branch offices now total 12 with the Dec. 1 opening of the Boston office. Avery Gibson continues as vice president of sales development, in charge of research and sales promotion, and Max Everett moves into a newly created post of vice president and director of creative sales.

Mr. Headley noted that the sales and service staffs were being enlarged and executives realigned "in depth" so as to prepare to offer additional services while competing on "new levels demanded by this vastly expanded and highly volatile business."

Among these demands, Mr. Headley listed greater competition among independent reps as well as new competition from group reps. He also mentioned pay tv, community antenna tv, global tv, possibility of tv drop-ins through FCC engineering standards relaxation, further development of uhf and a continued resurgence of radio, as areas which could open new horizons for the broadcast business.

Mr. Headley indicated the H-R companies' expansion came after a six-months study of competitive factors.

Tobacco cancer charges called "unscientific"

The Tobacco Industry Research Committee, New York, last week answered "repetitive" charges that cigarette smoking is responsible for the reported increase in lung cancer incidence. The situation calls for "facts, not emotions," Timothy V. Hartnett, committee chairman, said in a year-end statement.

Though the statement did not identify the sources of criticism, they presumably included the controversial position taken by NAB President Leroy Collins, who condemned cigarette advertising based on its appeal to the young (Broadcasting, Nov. 26, 1962).

Citing the many cancer research projects underway throughout the world, Mr. Hartnett said it would be "unscientific, to say the least," for any one of the agents and factors under study "to be accused arbitrarily of being the causative factor in lung cancer or some other ailment."

He noted that the TIRC exists to support the search for factual knowledge about smoking and human health. He pointed out appropriations of $800-000 in 1962, bringing to $6.25 million the total amount given.
The fact that some 30% of the housewives here in Ohio's Third Market double as wage earners helps to swell discretionary income to a healthy 27% above the national mean.

As for this market, no medium—but none—covers it as thoroughly as WHIO-TV, AM, FM. Ask George P. Hollingbery.

Additional morsel for thought:

Dayton has been Ohio's fastest growing major metropolitan area during the past 20 years. Source: U.S. Census of Population 1960.
WHAT TV DOES FOR NEW PRODUCTS

Katz Agency shows use of spot as launching pad

The Katz Agency's major presentation to advertisers and agencies this year is intended to demonstrate the effectiveness of national spot television in new product introductions. Called "Launching Your New Product," the slide-and-brochure presentation will get national circulation among marketing executives beginning this week.

Noting that the growth of many companies depends on new product introductions, the rep firm quotes figures from McGraw-Hill and Booz, Allen & Hamilton studies to show that only one out of 40 new products succeeds. And even when the product has gone all the way through research, development, testing and introduction to the consumer, the chances of acceptance are 50-50.

The rep firm's presentation is an attempt not only to improve the odds for success but to relate how spot TV may protect investments at the critical test-marketing and commercialization stages.

In Part One of the analysis, on retail distribution machinery, the Katz Agency describes the efforts of retailers to increase profits through faster merchandising turnover. Cited as an example is a report entitled "The Eagle Study," prepared by Super Market Merchandising Magazine. A 38-unit midwest regional chain, Eagle Food Centers, which was the subject of a 39-week study in 1960, uses an IBM installation to check and assess the flow of merchandise on a continuing basis. According to Katz, store executives say they cannot avoid being partial to the heavily advertised products.

Market Disparities - Emphasis in Part Two of the presentation is on market-to-market changes, and on the meaningful speed, size and diversity of those changes. Katz notes that "nationally, our similarities dominate, but we assert many differences in the market place."

Part Three, "Motivating Through Advertising," tells how spot TV allows an advertiser to control the balance between reach and frequency which will yield the advertising weight necessary to any given market situation, and permits the varying of weight from market to market. Spot TV success stories are reviewed in this section.

They are Busch Bavarian Beer, Alberto-Culver, Chock Full O' Nuts coffee, Nu Soft fabric softener, Maypo cereal, Texize household cleaner, Allerset, Climaleine, Matey bubble bath, Contac, Procter & Gamble, and Sega liquid weight-control preparation.

Hand-in-Hand With TV - The Busch Bavarian story notes that after using spot TV the company reshaped its distribution machinery to coincide with TV station coverage areas. Spot TV became its primary medium. Anheuser-Busch subsequently adopted a similar distribution policy for its other products. Other companies followed suit (General Foods, Schaefer beer, Robert Hall, Bardahl, Maypo, Maryland Club coffee and Purina). Katz calls this development in distribution "the beginning of a major marketing innovation."

The presentation concludes with an appraisal of P & G's spot TV strategy. The country's biggest advertiser, which allocates more money for spot TV than any other medium, spends 70% of its household volume on new products. In sum, Katz reports, P & G's choice of spot TV is not based on big budgets, but because the medium matches its basic advertising yardstick - cost per sale.

"Launching Your New Product" was written by Joseph Kenas under the direction of Halsey V. Barrett, director of spot TV sales development at the Katz Agency, New York.

K&E to move West Coast office to San Francisco

Kenyon & Eckhardt Inc. will move its West Coast headquarters from Los Angeles to San Francisco, effective April 1.

K & E will transfer key personnel interested in such a move from Los Angeles to San Francisco or one of the agency's other offices. K & E has resigned the accounts which have been handled exclusively in Los Angeles, effective March 31.

Colgate products introduced via tv get big sales

A leading tv advertiser, Colgate-Palmolive, New York, received almost 25% of its total sales in 1962 from products that didn’t exist in the previous year, according to Robert W. Young Jr., vice president and general manager of the household products division.

The products, introduced on spot and network tv, include Action, a dry bleach; Baggies, plastic bags for sandwiches; Dynamo, liquid detergent; Ajax liquid cleaner, and Soaky, children’s bath soap.

Television gross billings during the first nine months of 1962 were reported for the products as follows: Soaky $1,509,386; Ajax $2,461,743; Dynamo $2,489,600; Baggies $516,330, and Action $70,930.

Potts-Woodbury merges with Joseph Callo Inc.

Potts-Woodbury Advertising Agency, Kansas City, and Joseph F. Callo Inc., New York, were merged Jan. 1, retaining the Potts-Woodbury name. The Kansas City agency, which has regional offices in New York and Denver, added over $1 million in billing. Already Kansas City’s largest agency, Potts-Woodbury ranks 103rd among all U. S. agencies.

The Potts-Woodbury New York operation in Rockefeller Center, 1270 Avenue of the Americas, will provide the present departmentalized services of the Kansas City staff for Callo clients, according to Charles E. Jones, president of the Kansas City firm. Joseph F. Callo Sr., board chairman, and Joseph F. Callo Jr., president, joined Potts-Woodbury as senior vice presidents. Other Callo account executives moving to Potts-Woodbury include Louis F. Tufarolo and Henry F. Fontana Jr. Mr. Jones said the merger is the first step in a long-range expansion program in New York.

H&C moves • Honig-Cooper & Harrington on March 1 will move its Los Angeles office to 3600 Wilshire Blvd.

Ready to sell • Peters, Griffin, Woodward Inc.’s “Radio Colonels” began 1963 with a special three-day meeting, Jan. 2-4, in New York. The spot radio division salesmen in attendance were from Chicago, Dallas, Atlanta, Los Angeles, San Francisco and New York. In preparation for the new year, they reviewed PGW’s methods and practices for spot radio sales.

Bureau moves • Bureau of Facts & Figures, New York marketing, research and media plans firm, is moving to Yorktown Heights, N. Y., according to T. Norman Tveeter, managing director. New mailing address is P. O. Box 475, Yorktown Heights, Phone number is Yorktown Heights 2-4003.

Name change • The R. G. Lund Co., Portland, Ore., marketing and sales consultant firm, has changed its name to Lund, McCutcheon, McBride Inc. Address remains unchanged: 306 Terminal Sales Bldg., 1220 S.W. Morrison St., zone 5. Phone: Capitol 6-7379.

Exhibit deadline • Entries for the sixth annual Exhibition of Southwestern Advertising, Art, will be accepted until Feb. 20. Sponsored by the Dallas-Fort Worth Art Directors Club, the exhibit includes a television category. Awards will be presented April 13 at dinner in the Sheraton-Dallas Hotel, Dallas. Entry forms are available from Wyatt Whaley, Jaggers-Chiles-Stovall, 522 Browder St., Dallas.

Burnett sees decline in criticism of ads

Even though there will continue to be critics of advertising inside and outside of government as there have been for the last 50 years, Leo Burnett, board chairman of Leo Burnett Co., Chicago, and chairman of the Advertising Council, said last week that he believes the situation will improve.

“I optimistically detect,” Mr. Burnett said, “that there is a growing respect for the function of advertising as an indispensable part of our economic system.”

He also saw “a growing trend among advertising practitioners toward higher standards of good taste and a sharper sense of the fitness of things.”

Mr. Burnett also observed that “we are emerging from an era of smart-aleck advertising. I see signs of a healthful return to what you might call ‘plain vanilla’ in which the product itself and its benefits take the center of the stage and the inherent drama of the product is projected with . . . greater believability.”

The advertising veteran took note too of the cost-profit squeeze which continues to be the “greatest dilemma” of American business. Mr. Burnett said he believes that more and more manufacturers “are realistically, if reluctantly in some areas, coming around to the point of view that advertising skillfully used is one of the best ways out of this dilemma and the best way to reduce overall marketing costs.”

Mr. Burnett paid tribute to the Advertising Council as the “largest communications force for good works in America.” The council received $225 million worth of free time and space in 1962, he said.

Catholic Apostolate to examine ad ethics

The ethical responsibility of the American advertising industry will be examined at the first conference of the Catholic Apostolate of Radio, Tv and Advertising in New York Jan. 12.

Theme of the conference, at the Hotel Commodore, is “Can Advertising Permit Regulation to Replace Rights, Reason and Responsibility?” Sen. Eugene J. McCarthy (D-Minn.) is key-

Frank Blair, NBC newsman, will be moderator of both morning and afternoon sessions.

GMB forms division for agricultural ads

Geyer, Morey, Ballard Inc. announced today (Jan. 7) the formation of a special division to handle advertising and marketing services for the agency's clients in the agricultural field.

The new unit, which will have its headquarters in the agency's Chicago office and will function in association with all of the agency's offices, will be under the direction of two agency vice presidents. They are Paul W. Limerick, director, and Lloyd E. Ver Steegh, manager.

The agricultural division, which was patterned after the agency's new food and grocery division, offers the client both the exclusive attention of his account group and the services of a division specializing in the client's markets. GMB clients in this field are Allied Mills, American Zine Institute, Badger

Lloyd E. Ver Steegh (l), will be manager and Paul W. Limerick will be overall director of Geyer, Morey, Ballard's new agricultural division.

Nielsen homes data revised

New figures on total radio homes in two U. S. counties were reported by the A. C. Nielsen Co. last week in an updating of its county-by-county report on radio and tv ownership (Broadcasting, Dec. 17, 1962).

Randall County, Tex., should be shown with 10,570 radio homes out of 10,800 total homes, and Herkimer County, N. Y., with 20,000 radio homes out of 20,600 total homes. In Nielsen's earlier report, compiled as of September 1962, both Randall [Open Mike, Dec. 31, 1962] and Herkimer were given lower figures on radio ownership.

Agency appointments...

• Mead Johnson & Co., Evansville, Ind., has appointed Sudler & Hennessey, New York, for its infant formula products.
• Central Airlines, Fort Worth-based carrier serving six-state area in Southwest, names D'Arcy Adv., St. Louis, as agency effective Jan. 1. Central is tv-radio advertiser.
• Argus Inc., Chicago, names Edward H. Weiss & Co., that city, for its Argus photo equipment line and Schram Adv., Chicago, for its Mansfield Holiday division, both effective immediately. Accounts switch from John W. Shaw Adv.
• Pepsi Cola Bottling Co. of Puerto Rico Inc., San Juan, has appointed Lennen & Newell Inc., that city, as its advertising agency. Other recent appointments for L&N's San Juan office include Corn Products Co., McCormick & Co., & Coover Americana Latina Inc., and Chevy Chase Foods.

Roman-Levinstein agency

George Roman, president of Roman Adv. Agency Inc., and Morton Levinstein, partner in A.W.L. Adv. Agency Inc. for the past 15 years, have joined to form a new company—R. & L. Advertising Agency Inc.

The new agency is taking over and enlarging the quarters of the Roman firm at 810 N. Calvert St., Baltimore, and plans to service accounts in local, regional and national markets.

The Media

Most favor NAB's conference series

SURVEY FINDS 88% OF RESPONDENTS WANT TO KEEP FALL MEETINGS

The general pattern of NAB's annual series of fall conferences is favored by a substantial majority of the membership, according to a station poll conducted by the association.

William Carlisle, NAB station services president, who conducted the survey, said 788 (87.9%) of 908 responding stations favored continuation of the eight-meeting series and 31 (3.5%) suggested they be discontinued; 77 (8.6%) did not answer the question.

The poll showed that 325 (81.5%) consider the conferences "average" or "good," 42 (10.5%) "superior" and 32 (8%) "poor." Barely half—455 (80.8%) of respondents—favor the 1½-day program used in 1962, whereas 239 (26.7%) liked one-day meetings, 122 (13.6%) two-day agendas and 8 (0.9%) longer than two days.

General approval—697 (77.8%)—was given the scheduling of eight separate meetings, conducted as regional gatherings for NAB members; 28 (3.1%) considered eight meetings too few and 50 (5.6%) too many; 121 (13.5%) didn't answer this question.

A preference for fall conferences in large, easily accessible cities with major airline schedules was shown by the poll, 689 (76.9%) preferring this formula; 85 (9.5%) preferred smaller resort hotels and 48 (5.4%) motels outside downtown areas of major accessible cities.

Allocation of subjects on a share-time basis at the meetings indicated these membership preferences: staff reports on Washington activities, 19.6%; broadcaster panels on business problems, 29.3%; management problem discussions by staff members, 25.5%; direct reports by out-of-town broadcasters, 23%; others 2.6%.

Mr. Carlisle said all member comments have been sent to the board along with survey results. The board will decide on the schedule of 1963 conferences at its Jan. 14-18 meeting in Phoenix, Ariz.

NAB institute to hear Ruder

William Ruder, president of Ruder & Finn, a public relations firm in New York, will be a featured speaker at NAB's first Public Service Institute, to be held Feb. 7-8 in Washington (Broadcasting, Dec. 31). He is a former assistant secretary of commerce. His firm is described as the largest in the public relations field. NAB President LeRoy Collins will address the Feb. 8 luncheon. Mr. Ruder will speak at the Feb. 7 banquet.
Why WRGB bought Seven Arts' "Films of the 50's" Volumes 1, 3, 4 and 5

Says Merl L. Galusha:

"We call our late evening weekend movie, "The Critic's Choice". This title implies THE BEST IN MOVIES

We know that with the acquisition of Seven Arts' "Films of the Fifties" WRGB will be presenting the very best to the viewers of the Albany-Schenectady-Troy markets. As the nation's pioneer TV station and the number one station in its market, WRGB must constantly SEARCH FOR PROGRAMMING MATERIAL THAT WILL MAINTAIN ITS DOMINANT POSITION. The Seven Arts' "Films of the Fifties", we are confident, represents the top flight entertainment that will keep us in first place".

MUSICAL CHAIRS WITH AFFILIATES

Radio networks during 1962 add 76 outlets; ABC, Mutual gain about 9% while CBS, NBC have fewer affiliate changes

Network radio affiliations moved forward in 1962, with the number of network outlets increasing by 76, or 6.2%.

ABC Radio and Mutual contributed most to—and were chief beneficiaries of—the missionary work. ABC extended the length of its lineup by 9% through a net gain of 35 stations, while Mutual added 9.3% with a net increase of 40 stations.

CBS Radio had a net gain of one affiliate and NBC Radio broke even. The numerical contrast between their additions and those of ABC and Mutual reflects contrasting philosophies toward lineup size: CBS and NBC take a more conservative approach while their rivals prefer to lattice the country through far more outlets.

Thus Mutual increased its lineup from 431 stations to 471 and ABC boosted its total from 393 to 428, while CBS went from 206 to 207 and NBC stood pat at 190. The four-network total: 1,296 now as against 1,220 a year ago.

In gaining 76 the networks signed 178 affiliates and gave up—voluntarily or otherwise—102. ABC added 71 and gave up 36; CBS 16 and 15; Mutual 86 and 46, and NBC five and five.

ABC’s additions included four full-time 50-kw stations—WWVA Wheeling, W. Va.; WKHK Shreveport, La.; WHAM Rochester, N. Y., and KRAK Sacramento, Calif.—and one daytime 50-kw operation, KCTA Corpus Christi.

Another ABC affiliate, KWJJ Portland, Ore., got an increase to 50 kw power (from 10 kw).

CBS Radio’s prize addition was the return of 50-kw WJR Detroit, which left a few years ago in disagreement with the network’s then-new Program Consolidation Plan but signed a new contract during the latter part of 1962, effective the first of this year. Another major CBS addition was WCPQ Cincinnati, after the network and WKRC Cincinnati split up over WKRC’s refusal to clear certain CBS Radio programming.

Mutual’s highlights included the signing of 50-kw WHN New York in place of 50-kw WINS New York; the addition of 50-kw WINQ Tampa and fulltime operations in WBOS Brookline-Boston and in WMNI Columbus, Ohio; signing of WBCR Birmingham, Ala., WNOH Raleigh, N. C., and KUCV Fort Worth, Tex.

NBC’s additions included 50-kw WAGA Cleveland, plus WOKE Charleston, S. C., among others.

By network, the affiliation additions and terminations were as follows:

N.Y. NEWSPAPER STORY

Interim Columbia U. report lists effects of the strike

An interim report on the effects of the nearly four-week-old New York City newspaper strike has been completed by 80 reporters at the Graduate School of Journalism, Columbia U., New York.

Among the findings, based on the first 12 days of the newspaper blackout:

- Magazines offering news summaries and those with tv and radio listings showed the greatest increase in sales volume.
- One of the first activities hit by the strike was the legitimate theatre, which followed a publicity pattern set up during the 19-day newspaper strike in 1958.
- Concert managers, movie producers and art theatres increased their advertising in other media.

The reporters found that *Tv Guide*, a weekly magazine with tv listings, was probably the largest single magazine beneficiary of the strike. The publication planned for a temporary circulation rise of about 250,000. Beginning with the Dec. 15 issue, a magazine spokesman said 1,750,000 copies were printed instead of the usual 1.5 million.

The League of New York Theatres, an association of Broadway producers bought spot advertising time on all major radio stations to publicize the theatre. A total of 183 spot ads were broadcast each of the first two weeks of the strike.

Several concert managers planned to meet the strike by increasing their advertising in other media. Ann O'Donnell, of Columbita Artists Management, said her bureau planned more radio announcements, and bus advertising.

**Nothing Freudian** = Universal Pictures’ “Freud,” publicized via an all-out campaign on radio and tv, used 35 mobile units dispatched throughout the city bearing posters for the movie, heavy publicity placed in suburban newspapers and a direct-mail campaign.

A spokesman for Rugoff & Becker, operator of 10 “art” theatres in New York, said the strike was almost certain to affect attendance adversely, though more radio-tv spots are planned.

The report included a statement by Michael J. Donovan, a vice president of BBDO, who said advertising for “clothing, banks, utilities and food products has been hard hit for outlets.” He said radio and tv didn’t replace newspapers for many kinds of advertisements. “We cannot arbitrarily switch from print to another media.” He added that it takes time to produce a tv com-

ABC TV

American Broadcasting-Paramount Theatres executives will join the board of governors of the ABC-TV Affiliates Assn. at a series of meetings in Puerto Rico this week. Sessions will be held at the Caribe Hilton Hotel, San Juan.

The board of governors will meet separately today and Tuesday (Jan. 7-8) and with the ABC and AB-P heads on Jan. 9-10.

Among the top network and parent-company executives slated to attend are Leonard H. Goldenson, president, AB-PT; Simon B. Siegel, executive vice president, AB-PT; Everett H. Erlick, vice president and general counsel of AB-PT and its ABC division; Thomas W. Moore, vice president in charge of ABC-TV, and Julius Barnathan, vice president and general manager of ABC-TV.

Officers and members of the board of governors expected to attend: chairman John F. Dille Jr., WSJV-TV South Bend-Elkhart, Ind.; vice chairman Thomas P. Chisman, WVEC-TV Norfolk, secretary W. B. WUEST, WQ-MC TV Seattle; treasurer Martin Umansky, KAKE-TV Wichita, Kan.; Norman Louvau, KCPX-TV Salt Lake City; Howard W. Mascheiner, WNHC-TV New Haven-Hartford, Conn.; D. A. Noel, WHBQ-TV Memphis; Lawrence Rogers II, WKRC-TV Cincinnati; and Mike Shapiro, WFAA-TV Dallas.

WTEV starts Jan. 1 despite severe storm

WTEV (TV) New Bedford, Mass.-Providence, R. I. took the air at 1 a.m. Jan. 1 despite a severe storm that handicapped technicians. The new ch. 6 outlet in the Greater Providence area stayed on the air all night and at 1 p.m. joined ABC-TV to carry the Orange Bowl football game. The station is a basic ABC-TV affiliate.

The inaugural program included Charles L. Lewin, president-treasurer of WTEV; Gov. John A. Volpe, of Massachusetts and Gov. John A. Notte Jr., of Rhode Island; Edward F. Harrington, mayor of New Bedford; Walter H. Reynolds, mayor of Providence, and religious spokesmen.

WTEV's management team includes Vale L. J. Eckerley, formerly of WDAU-TV Scranton, W. Pa., general manager; Maurice P. Wynne, formerly of WWL-TV New Orleans and other stations, chief engineer; Francis H. Conway, formerly of WDAU-TV Scranton, general sales manager; Mann Reed, formerly KBTY (TV) Denver, operations manager.

The 35-50 GE transmitter emits 79.5 kW effective radiated visual power. At present the staff is scattered around several offices in New Bedford but within a month the new WTEV office-studio building is to be ready. WTEV also will have offices in the Sheraton-Biltmore Hotel, Providence. The station is licensed to WTEV Television Inc., owned 55% by E. Anthony & Sons, which also owns the New Bedford Standard Times. New England Television Inc. owns the other 45% (15% of this firm is owned by Eastern States Television Inc.).
U.S. CENSORSHIP OVERSEAS?

NBC newsman Anderton charges State Dept. attacked his character, managed news involving military

The Kennedy administration, which disenchanted many newsmen last fall when the Pentagon's top information officer admitted "managing" news during the Cuban crisis, was criticized by a network foreign correspondent last week for the State Department's handling of news in Germany.

Piers Anderton, NBC News correspondent in Germany, charged Wednesday (Jan. 3) that U. S. officials in West Germany and West Berlin are managing and censoring news and intimidating reporters.

One of nine NBC correspondents reporting at a National Press Club luncheon in Washington, Mr. Anderton said news policies exercised by State Department and military officials prevent Americans at home from being as well informed as they should be about developments in Germany.

Amplifying his luncheon statements in an interview later, Mr. Anderton also complained:

- He has been operating in a "McCarthy-like" atmosphere for more than a year in Germany.
- A State Department cable describing him as "pro-communist" has been circulated through official U. S. channels. Such false accusations are dangerous, he said, because they could jeopardize both his job and his reputation.
- An attempt had been made to "get my job" by the planting of a false story in a U. S. show business newspaper which indicated the correspondent was about to be fired.

Denial of State Department spokesmen in Washington said no such cable as Mr. Anderton described exists. Robert J. Manning, assistant secretary of state for public affairs (who was seated next to Mr. Anderton during the luncheon), said he was aware certain problems exist in Germany, especially in the handling of military news because it must be cleared by three Allied governments.

What's more, Mr. Manning said, he personally visited Germany in September to look into news problems and spoke for almost two hours with a group of correspondents in Berlin, including the NBC reporter. Mr. Anderton did not comment or ask a question, the State Department news chief said. "Why didn't he speak up then?" he asked.

Top NBC New York executives who were in Washington for the luncheon and a reception Wednesday night expressed surprise at Mr. Anderton's statements.

Julian Goodman, news vice president, said he regretted Mr. Anderton's statement, saying he was being "emotional." Asked whether the incident would affect Mr. Anderton's assignment, Mr. Goodman said he hopes the publicity won't prevent NBC News from making any changes it previously may have had under consideration.

In fact, Mr. Goodman said, the Berlin NBC correspondent asked for a new post a year ago, but his request is still under consideration.

When Mr. Anderton was asked if he had sought a new assignment, he said he had not. The NBC correspondent also denied making such a request a year ago. He said he expected to return to Germany when the NBC correspondents completed their two-week speaking tour in the U. S. and to continue as the network's man in Germany for about another year.

"I want to fight this thing through," he said. "To move now would be to give up."

No Changes • William R. McAndrew, NBC executive vice president in charge of news, said Thursday no changes are contemplated in Berlin assignments in the "foreseeable future."

Mr. Anderton, a former associate producer of NBC's Chet Huntley Reporting and one-time reporter on Collier's magazine and the San Francisco Chronicle, told newsmen West Germany's government-supported economy is not so vibrant as U. S. officials would make it seem.

For two years U. S. military vehicles traveling the autobahn between West Germany and West Berlin have been fired upon, he said and when he returned to Berlin after reporting this to U. S. audiences a year ago, an American official "raised hell with me and asked why I had reported it." He said the official admitted the report was correct, but said that dissemination was contrary to U. S. policy.

In Germany, neither the U. S. ambassador in Bonn nor top U. S. military chiefs hold news conferences, and much information comes from planted leaks—sometimes through German government sources, the NBC newsman said.

He first became aware of a "McCarthy-like" atmosphere when an American correspondent jokingly told him at an airport news conference that he'd heard the broadcast newsman was supposedly "pro-communist." Later, he said, two persons he knows in Berlin told him they had seen a State Department cable describing him as "pro-communist."

Describes Cable • Mr. Manning said an official cable on Mr. Anderton was dispatched from Germany after the correspondent addressed a convention of the America Women's Club of Germany in Garmisch and criticized U. S. policies on Germany. But he said the cable carried no such description as Mr. Anderton claimed.

Mr. Manning and Mr. Anderton conferred at the State Department after the luncheon and Mr. Manning said he promised to show the newsman the cable in question.

The questionable newspaper article about him used his Garmisch talk as a peg, Mr. Anderton said. It was filed with a Bonn dateline and appeared in Variety in April, he said, and it reported that he had said NBC was censoring its correspondents and that he was about to be fired.

After hearing Mr. Anderton's explanation about the Variety story, Mr. McAndrew backed him up completely last year, the correspondent said. The NBC News head was very understanding, he added.

Variety printed a point-by-point retraction in September, said the correspondent, but only after his own lawyer had threatened a libel suit.

Mr. Anderton has been a reporter and newsmen since 1939, with time off for service as a Navy officer during World War II and for a Nieman fellowship at Harvard U. in 1954.

Too Tempting • Upset with the treatment he thought he had been getting from U. S. officials in Germany, Mr. Anderton was "set off," he said, when he learned as he was leaving Germany for the U. S., last month that an Associated Press reporter in Berlin about whose stories the State Department complained to his AP superiors, was transferred to Bonn. That made him

Rise in library use said due partly to tv

LIBRARY GROUP'S REPORT NOTES EFFECTS OF MASS MEDIA

The impact of the mass communication media, especially television, is one factor frequently mentioned by librarians to account for the rising public use of libraries and improved literary tastes, in the U.S., the American Library Assn. said last week. The group's report on its annual study of the nation's library habits also found that news reports of domestic and foreign affairs have influenced reading for the better.

The report noted a shift away from westerns and light romances towards arts, travel, health, education and national-international affairs. The report is based on a survey of librarians and indicated the decline of popularity of the western and romance books might be because the need for this material is being supplied by tv. Tv, however, is credited with helping to stimulate the increasing adult use of libraries and to raise interest in better books.

"The responsiveness of Americans to the news and to public affairs reporting and their strong desire to be well informed should be encouraging to communications executives concerned with expanding and improving the coverage of events around the world," David H. Clift, executive director, said last week.

Even interest in avocations such as skin diving and karate was attributed to the influence of television, according to some of the comments which librarians volunteered in their questionnaires, the library group said. The report also found increasing use of non-book materials at libraries too, including phonograph records for foreign language study, film strips, movies and tape recordings.

Bishop Sheen to address mass-media breakfast

Most Rev. Fulton J. Sheen will be the principal speaker at the Mass Media Communion Breakfast to be held Feb. 10 in Washington. FCC Commissioner Robert E. Lee is president of the media group with Joseph Baudino, Westinghouse Broadcasting Co., vice president; Gertrude Broderick, U. S. Health-Education-Welfare Dept., secretary, and Tom Wall, Dow, Lohnes & Albertson, treasurer. FCC Chairman Newton N. Minow will introduce Bishop Sheen.

About 1,000 media representatives are expected to attend, Commissioner Lee said. The cost is $4.25. Ceremonies will open with a 9 a.m. mass at St. Patrick's Church followed by a 10 a.m. breakfast at the Willard Hotel. President John F. Kennedy and Attorney General Robert F. Kennedy are among prominent Washington figures who have been invited to attend.

The 1962 breakfast held by the Washington media group was addressed by Sen. John O. Pastore (D-R.I.).

Changing hands...

ANNOUNCED - The following sale of station interests was reported last week subject to FCC approval:

- WREC-AM-TV Memphis, Tenn.: Sold by Hoyt B. Wooten to Cowles Magazines & Broadcasting Inc. for $8 million cash (CLOSED CIRCUIT, Dec. 31, 1962). Cowles Magazines & Broadcasting, under Gardner Cowles, owns KRNT-AM-TV Des Moines, Des Moines Register and Tribune and Look Magazine. John Cowles, a brother of Gardner Cowles, heads properties which include 80% of KTVH-TV Hutchinson-Wichita, Kan., and 47% of WCCO-AM-TV Minneapolis, Minn., and publishes Minneapolis Star and Tribune. Mr. Wooten will continue on board of licensee WREC Broadcasting Service Inc. Charles Brakeltest, present commercial manager, will become vice president-general manager, and Jack

Michael, present program director and promotion manager, will become vice president and program director. WREC, founded in 1922, operates on 600 kc with 5 kw, WREC-TV, founded in 1956, is on ch. 3. Both are affiliated with CBS.

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 80).

- KLYD-AM-TV Bakersfield, Calif.: 58.82% interest sold by Edward E. Urner, Bryan J. Coleman and Maurice St. Clair to Lincoln Dellar and wife for $177,640. Mr. Dellar has interests in KROY Sacramento and KACY Port Hueneme, both in California.

Councilman arrested in WSUN-AM-TV case

A city councilman of St. Petersburg, Fla., has been arrested on a charge of bribery involving the possible sale of WSUN-AM-TV St. Petersburg (ch. 38), a city-owned station, it was reported last week.

The councilman, Jack E. Burklew, claims he was approached last fall by an unnamed local attorney, representing an out-of-town client, who asked that Mr. Burklew propose the sale of WSUN-AM-TV to the city council through his real estate brokerage office. Mr. Burklew said he then asked Vice Mayor El Jenkins, a fellow city councilman who was also representing Mr. Burklew as a lawyer at that time (but not since last week), to advise him on the legality of acting as broker in the proceeding. At that point the stories diverge.

Mr. Jenkins claims that he was offered $17,500 in an attempt to influence his vote in the possible sale, although no money changed hands, and this is the information that led the state attorney to issue the warrant for Mr. Burklew's arrest.

Mr. Burklew, however, said that he asked for legal advice only and that his action was vindicated by the city council last November. The charge, he said, was pressed only when Mr. Jenkins filed a written report which eventually led the state attorney to take action. Mr. Jenkins several times offered to drop charges, Mr. Burklew said, if he would resign as a city official. Mr. Burklew refused.

Mr. Burklew, who is free on $3,000 bond, declined to reveal the name of the alleged bidder for WSUN-AM-TV or the terms of the offer. The station, also an applicant for ch. 10 in St. Petersburg (see Broadcasting, Dec. 24), has repeatedly been termed "not for sale" by the city, most recently on Nov. 27.

Triangle and Penn State renew television pact

An agreement between Triangle Publications Inc. and Penn State U., first formulated in 1957, has been renewed for another five years. The first agreement provided that Triangle's WFBS-TV Altoona, Pa., would establish a microwave link between University Park and Altoona and provide a kinescope recorder and broadcasting time over the ch. 10 station. The university agreed to provide a minimum of three hours per week of tv programming. Triangle also gave the university $10,000 a year for the five years to support broadcast activities on the campus.

In the renewal agreement, Triangle agrees to continue the $10,000 per year grant, to provide a second microwave link between the Altoona campus of the university and the ch. 10 transmitter and for the university to continue to provide the three-hour-per-week programming minimum.

KXOL-FM signs on

Fort Worth's first family, Mayor John Justin and his wife, Jane, officially put KXOL-FM in that city on the air Dec. 15. A multiplex stereo station on 99.5 mc with 20 kw, KXOL-FM and its sister am operation, KXOL, are licensed to KXOL Inc. Mayor Justin threw the switch at the inaugural and Mrs. Justin selected the initial programming as KXOL-FM Manager Jerry Hahn (r) looked on.

ATTRACTION STATION BUYS!

CALIFORNIA—Well equipped fulltime radio station with good power. Land and building included in sale. Grossed $90,000.00 in 1962 and returned good profit. Priced at $175,000.00 with $52,000.00 down. Another H&L Exclusive!

MIDWEST —Daytime only radio station with population of 250,000 within half millivolt contour. Very well equipped. Grossed $85,000.00 in 1962. Total price of $150,000.00 with 29% down and terms to be negotiated. Another H&L Exclusive!
The company publishes these New Jersey weekly newspapers: Recorder, covering Metuchen and Edison; Spokesmen, covering South River and southern Middlesex County; and Sentinel, covering Milltown, East Brunswick and North Brunswick. Sentinel also publishes the Town Crier magazine.

Engineers strike at WNEW New York

A strike by broadcast engineers at WNEW New York last week continued as of Jan. 3 with no agreement in sight despite meetings before the New York State Mediation Board.

The strike started the evening of Dec. 29 after the International Brotherhood of Electrical Workers and WNEW failed to reach agreement on a new contract for the engineers. The old contract expired Sept. 30 but discussions on new terms had continued.

WNEW continued on the air with supervisors replacing the engineers. WNEW-TV is not involved in the strike.

WNEW offered the union a five-year contract during which term the engineers could not be laid off. A salary of $213.20 for 37-1/2-hour week and a pension plan costing WNEW $17.70 a week per man were also offered by the station, according to WNEW officials.

The union is asking for $220 a week immediately and $25 a week more beginning in 1965, in addition to the company's proposed pension plan. The union also is demanding a 13-week paid vacation after 20 years' employment and every fifth year thereafter.

Although the station remained on the air, it cancelled its scheduled broadcast of the New York Giants-Green Bay Packers championship football game from New York's Yankee Stadium on Dec. 30.

The IBEW had threatened to picket the stadium and thus prevent the NBC and NBC-TV pickup of the game if WNEW had covered the event.

John Van Buren Sullivan, vice president and general manager of WNEW, went on the air on the day of the game, announcing that the station would not broadcast it. The announcement was repeated several times until game time, pointing out that listeners could hear the broadcast on NBC.

14 etv stations using airborne unit tapes

The airborne television unit based at Purdue U. and transmitting educational programs down to several hundred thousand students in 15 metropolitan areas in 11 states has become one of the largest distributors of video-taped instructional materials in the country.

A total of 15 groups are participating in the new school year and are taking the material for rebroadcast over 14 etv broadcast stations and one closed circuit system. All are outside the 200-mile radius covered by the flying classroom.

Renting only complete courses, the organization charges from $480 for 16

WLOS-TV employe turns shoplifter for a day

What began as a story on a teenage shoplifting bid turned into a major report on WLOS-TV Asheville, N. C., as it investigated an area holiday shoplifting loss of nearly $1 million, a statistic far beyond the confines of a fad.

Sponsored by the Asheville Merchants Assn., the report featured interviews with detectives, private investigators and businessmen. Luciendia Pace, WLOS-TV's news assignment editor, turned in a special performance as she demonstrated shoplifting methods (see cut).

The program, which some local merchants required their sales clerks to watch, was reportedly well received, although five threatening phone calls were made to the station by persons presumed to be irate shoplifters.

Broadcasters buy N.J. papers

Joe Rosenmiller and Peter Bordes, owners of WCTC-AM-FM New Brunswick, N.J., and of WESO Southbridge, Mass., have purchased 80% interest in the Sentinel Publishing Co. of New Jersey. The price was not announced.

December 7, 1962

Dear Peter,

I was distressed to read of the forced demise, for economic reasons, of the NAB. You performed a very valuable service and one that will be missed.

I am sure I speak for most of us at CBS when I say I most sincerely hope this first failure will not deter you from continuing your efforts in behalf of broadcasting.

With warm personal regards and the best of luck in whatever you now turn to.

Sincerely,

Kidd

Mr. Peter Goelet

December 20, 1962

Mr. Peter Goetz, President
National Audience Board, Inc.
152 East End Avenue
New York 28, New York

Dear Mr. Goetz:

A number of times during the past several weeks I have been on the point of writing you a "fan" letter about the work of the National Audience Board as reflected in THE VIEWER but I never seem to have gotten around to putting my thoughts on paper. Today I am writing for quite a different reason. This is a letter of sincere regret over my failure to receive copies of THE VIEWER since the October issue. Can it be that I have been delinquent in paying for a subscription? If so, that will be easy to rectify if someone will send me a bill. However, should it be that you are no longer publishing THE VIEWER, this would indeed be most regrettable. I have found it to be a veritable gold mine of information, presented in attractive form with easy-to-read type and paper. Whatever the reason for the current lapse, I hope it is only a temporary one.

Wishing you the Compliments of the Season, I am,

sincerely yours,

Orry G. Broderick
Educational Media Specialist

Secretary-Treasurer: Mr. Peter Goetz, President

THE VIEWER: A Bimonthly Publication of the National Academy of Television Arts and Sciences

Mr. Peter Goetz
152 East End Avenue
New York 28, New York

Dear Peter:

It was with considerable distress that I learned of your decision to discontinue the monthly publication of THE VIEWER. It has been an honor and a privilege to work with you and to know that your outstanding contributions to the art and craft of broadcasting will continue to be recognized and appreciated by the industry.

The VIEWER has been an important publication in the field of television, and it is a loss to the industry that it will no longer be available. However, I am confident that the contributions of the National Academy of Television Arts and Sciences will continue to be recognized and valued.

I look forward to working with you in the future and wish you continued success in your endeavors.

Sincerely,

[Signature]

The man to whom these letters are addressed has bought this space out of pride in his organization and the system under which it operated.
Student-operated WDCR seeks new image

WDCR Hanover, N. H., is making a concentrated effort to change its "college station" image. Licensed to Dartmouth College by the FCC, the station is manned by a staff of 100 unpaid student volunteers.

In the 1961-62 academic year, WDCR, which operates on 1340 kc with 1 kw day and 250 w night, received about $16,000 in commercial revenue ($13,000 local, $3,000 national spot). So far in the current academic year, the station has booked over $20,000 from local advertisers.

Though WDCR is student run, its programs are designed to attract the general public as well as the academic community. The daytime schedule generally follows the music-news format with what Sturges Dorrance, general manager and Class of '63, describes as "bouncy wake-up music" beginning at 6 a.m.; light classical from 9 a.m.; Broadway show music at 11 a.m. From 12:15 p.m. "we step up the tempo continuously" until 3 p.m., according to Mr. Dorrance, then WDCR goes "top-40" until 5 p.m., when the mood "relaxes" with progressive jazz, standard instrumentals and vocals.

At 6 p.m., WDCR presents a daily 60-minute Six O'Clock Report, including national, local, sports, business and weather news. WDCR has its own weather man—a student who wants to be a meteorologist.

From 7-9:30 p.m., the WDCR Concert Hall holds the spotlight. After 9:30 p.m., the schedule varies with local productions including the Inter-Fraternity Quiz, original dramatic programs and the syndicated series The Shadow.

Progress Evident • That WDCR is making progress in its campaign to drop the label of "college station" is indicated by the recent addition of a dairy and a supermarket to its roster of advertisers.

Sales promotion pieces for the station emphasize the 59,000 estimated people in WDCR's coverage area with radio (and their estimated annual retail purchases of $106 million) compared to Dartmouth's 3,000 students (and the $1.6 million the students spend annually).

WDCR's production and promotion departments publish a weekly "Listening Log" which is circulated free to listeners who request it.

The station, which has been on the air since 1958, operates nine months a year, for a 19-hour day, with silent periods during Christmas and summer vacations. With a new summer session being added at Dartmouth this year, WDCR hopes to begin year-round operations. The Ivy Network, New Haven, Conn., is WDCR's national representative.

Communications experts needed, says Huntington

Colleges and universities must broaden their curricula to include the science of mass communication according to George Huntington, executive vice president of Television Bureau of Advertising.

Speaking before business administration and economics students at Franklin & Marshall College, Lancaster, Pa., Mr. Huntington said the nation needs "communications scientists" who can determine why some words, pictures and sounds are more effective than others. This, he continued, is necessary to

RKO division to meet

The first meeting of managers of the 12 RKO General Broadcasting stations since the formation of the new RKO General Inc. division starts today (Jan. 7) in New York and continues to Jan. 16. Hathaway Watson, president of the new division, will preside at the sessions, which will deal with business and policy matters.

Broadcasting, January 7, 1963
BOARD SURE TO DISCUSS COLLINS
NAB president's future may be determined at Phoenix meeting

A long list of routine matters faces the NAB board when it convenes next week (Jan. 14-18) at the Camelback Inn in Phoenix, Ariz., but one item of paramount interest isn't on the formal agenda—what about Gov. LeRoy Collins' contract renewal?

Gov. Collins entered the third and final year of his contract last week as the center of an industry controversy that started last Nov. 19 at the final NAB Fall Conference in Portland, Ore. (Broadcasting, Nov. 26, 1962). At that time Gov. Collins spoke harshly of cigarette commercials directed at school-age children and demanded that the industry do something about it.

The cigarette comment drew criticism from station, network and advertising-agency sources as well as praise from some civic groups and broadcasters who agreed with the NAB president.

Following the agitation, a special NAB committee set up to review the Collins three-year contract failed to take any action or to hold a planned meeting. The contract calls for a $75,000 annual salary, about $15,000 for living expenses and an expense account.

It is reviewable at the end of two years (Jan. 1, 1963).

Although the unofficial agenda for the board's Arizona meeting doesn't indicate how the Collins contract will be handled, it's known members of the board, including Clair R. McCollough, Steinman Stations, joint radio-tv board chairman, have discussed the subject in letters and phone calls. Mr. McCollough is chairman of the special contract review committee.

Report to Board = At NAB headquarters it was indicated the subject is certain to come up at the meeting, with a possibility the committee will meet formally and file a report with the board.

As the board meeting approaches, association membership is at an all-time high (Broadcasting, Dec. 31, 1962).

Budget matters will occupy much of the time of board committees and the board itself. Including all activities, the budget now runs around $1.7 million and there's a good chance some of the research and other projects could run up the figure to a record total.

NAB's convention committee will report on plans for the March 31-April 3 industry meeting at the Conrad Hilton Hotel, Chicago. The general format of the convention has been planned. Many details remain to be worked out, including the actual equipment exposition.

Contracts for equipment exhibits have been signed but there still is uncertainty about the status of film exhibitors, who are planning special displays in the Congress Hotel a few doors from the Conrad Hilton.

The board's schedule at Phoenix follows:

Jan. 14—Tv finance committee 9 a.m.; radio finance committee 11 a.m.; general fund finance committee 2 p.m.; membership committee 4 p.m.

Jan. 15—Distinguished service award subcommittee 9 a.m.; convention committee 11 a.m.; joint boards of directors 2 p.m.

Jan. 16—Tv board 9:30 a.m.

Jan. 17—Radio board 9:30 a.m.; reception for retiring board members 6 p.m.

Jan. 18—Joint boards 9:30 a.m.

The directors will receive recommendations from the NAB Tv Code Review Board calling for amendments covering editorializing and stricter standards for over-the-counter products involving health considerations. A report on the cigarette advertising problem raised by Gov. Collins will be submitted.

Among topics on the agenda are NAB's role in the overpopulation of radio, to be reviewed today (Jan. 7) at a joint NAB-FCC shirtsleeve session (story page 68). Also to be considered will be the FCC's hearing into the programming of television stations in Omaha, Neb. Right of access to news sources, legislative prospects and other regulatory problems will be considered.

All but one of the 42 board members will be present at Phoenix. Julian Haas, KAGH Crossett, Ark., will be unable to attend because of illness. There is one board vacancy due to the resignation of Joseph H. Shoecraft, Los Angeles, who signed when he became president of Crowell-Collier Broadcasting Co. The vacancy probably will be filled at the annual tv board elections during the Chicago convention.

Media reports...

BCH adds rep firm = Pearson National Representatives Inc., New York, has subscribed to the automated centralized billing services of Broadcast Clearing House, New York. The agreement covers Pearson-represented radio stations, its New York office and five branch offices.

NBC Radio adds affiliate = KINO Winslow, Ariz., joined NBC Radio's affiliate list on Jan. 1. Owned by Willard Shoecraft, it operates full time with 250 w on 1230 kc; Eric Manola is station manager.
JUDY GARLAND TO CBS-TV SERIES

Contract for 32-show package involves $6.5 million

CBS-TV has added Judy Garland to a lengthening list of star performers. She will appear in a new series on the TV network next season. A contract signing with Miss Garland and reportedly involving some $6.5 million in a series of 32 one-hour show packages, was announced last week.

The new contract with Miss Garland was said also to contain options for renewal over a four-year period.

Miss Garland's shows, which have been on CBS-TV, have been infrequent over the years and mainly confined to specials. She currently is working in a special being prepared for March 19 telecast (8:30-9:30 p.m.) on CBS-TV which will co-star Phil Silvers and Robert Goulet. Her most recent performance on the network and her first in six years was in February 1962.

In the fall of 1963, CBS-TV said, Miss Garland will star in a weekly, one-hour musical variety series. The day and time have not yet been announced.

Creative Management Assoc., Ltd., of which David Begelman and Freddie Fields are the principals, represented Miss Garland in the negotiations which led to her signing with CBS.

NET announces plans for new programming

National Educational Television's 1963 programming will expand in four categories, John F. White, president, National Educational TV & Radio Center, announced last week.

He described the expansion plans as (1) programs for children that make learning fun, such as What's New?, a daily half-hour series for children from seven to 12; (2) public affairs programs, exemplified by Great Decisions—1963, a series of eight one-hour reports; (3) the arts, with special concentration on fresh and experimental programming (dramas from foreign TV production centers and programs by individual artists), and (4) the sciences, with particular emphasis on keeping people abreast of technological advances, for example, Dave Garroway's 11-program series Exploring the Universe.

NET's network affiliates grew from 58 to 70 in number during 1962, according to a roundup of last year's developments and activities.

'Peter Pan' scheduled for fourth TV showing

"Peter Pan," one of the largest audience-drawing entertainment shows ever telecast by a single network, is scheduled for a fourth viewing on Feb. 9 at 7-9 p.m. on NBC-TV.

Live performances of the James M. Barrie classic shown by the network on March 7, 1955, and Jan. 9, 1956, had total viewing audiences estimated by NBC at 67.5 million and 57.5 million respectively.

The taped color version, featuring Mary Martin, to be shown Feb. 9, was originally viewed Dec. 8, 1960, by an audience of approximately 65 million, according to the network. The show is a Richard Halliday-Edwin Lester production.

Bob Rowell, of F., C. & B., joins the Tricorn Club

Our club hat is crowning some of the smartest market-media brains in the land. It makes no difference whether they're adorned with crew-cuts, flat-tops, ivy-league-trims, Jackie K. bouffants—or just a flesh-tone expanse. Bob made the club's exclusive ranks by winning this required quiz: 1. What is the Tricorn Market? 2. What is North Carolina's No. 1 metropolitan market in population, households and retail sales? Answer to both: the 3-city “tricorn” of Winston-Salem, Greensboro, High Point. He then scored a triple parlay by knowing what state ranks 12th in population. (Sure you knew it's North Carolina?) But the real money winner is the marketing team that knows WSJS Television is the No. 1 sales producer in the No. 1 market in the No. 12 state.

Burrud sees tv viewers returning with colored glasses

The emergence of color television into the mass media class will be a boon to the producers of travel-adventure films, according to Bill Burrud, a pioneer in that type of tv programming. It will be, that is, if they have had Mr. Burrud's fore-sight of making true-life documentaries in color. He now has some 2,000 half-hour films which, having been successfully exposed to viewers who saw them in black-and-white, are now ready for a new career in color.

"Even if he has seen the film before in monochrome, the color-set owner is going to enjoy watching it over again," Mr. Burrud said last week. "There's no doubt that color adds to the enjoyment of watching a fictional drama or a musical show on tv and the value added by color is even greater for our type of show. Colorful native costumes, colorful foreign backgrounds give added reality and added impact to our kind of programs, which depict events that are called colorful even when they are merely described in words."

And color will add to the profit of the producer of travel-adventure films as well as pleasure to their viewers, Mr. Burrud firmly believes. Not that they aren't profitable already. After 11 years in the field, Bill Burrud Productions now earns about $1 million a year. A large part of these earnings are plowed back into new products, the company owns all its own negatives out-right and in more than a dozen years has always managed to handle its own financing without bank loans.

Growing Up • Such business acumen, rare in any instance, is remarkable when displayed by one who is primarily an actor. Bill Burrud made his stage debut at the tender age of 9 and went on to become a child movie star. But late in 1948 he was no longer a child nor a star, just an out-of-work actor. The Los Angeles Times was getting its tv station (KTTV) ready for a Jan. 1, 1949, start of program service and Bill felt it was a chance to get into television. He'd been turned down for a staff job at the station so he tried an oblique approach, through the newspaper's outdoor editor, an old acquaintance.

"Let's get together and make a program to tell people what they can see in Southern California on a weekend trip," Bill proposed. The editor called the publisher, who liked the idea and called the station manager, and Open Road was added to KTTV's schedule as a weekly half-hour which tied in with a Sunday newspaper column. Bill rushed to a camera store, plunked down practically his last dollar for a secondhand movie camera and said to the amazed salesman: "Show me how to operate this thing. I've got a tv show starting in five weeks."

The what-to-see-near-at-hand program gradually expanded its scope as its embryo producers discovered that other people, some of them even professionals from the motion picture field, were making travel films that could be obtained for use on television. "We also found that people were interested in the out-of-doors, in nature, in true life adventure. But they needed a dramatic frame. Even here, the play's the thing. Nature in the raw can be pointless as well as wild. Before long we began to follow the pattern of the picture magazines like Life and Look and to select and edit our pictures to tell stories about people, places and things."

Spreading Out • The program developed to the point where other Los Angeles tv stations got interested in it and Bill Burrud moved his base of operations from KTTV to the highest bidder, KCOP, which was building a travel-adventure format. Today, he has four programs a week on KCOP: Holiday at 7-7:30 p.m. Monday; Wanderlust at 7:30-8 p.m. Tuesday; True Adventure at 7:30-8 p.m. Thursday and Vagabond, his original series, which has just returned for a new showing at 8:30-9 p.m. Tuesday. KCOP still his home station, pays Mr. Burrud better than $250,000 a year for his program services.

Until 1956, when Vagabond went into syndication through Official Films, he did the narration live for his local Los Angeles broadcasts on KCOP and he still follows that practice for Wanderlust and Holiday. "I'm still an actor at heart," he says, "and I like to make personal appearances when I can."

Today his True Adventure films are in 49 U. S. markets, plus West Germany, Australia and French Film sales...

MCA files for overdue fees

MCA Inc. announced last week it has filed with the American Federation of Musicians in New York several arbitration complaints against former clients in the band and orchestra field. MCA claimed they failed to pay commissions for services rendered prior to the company's discontinuance of its talent agency business last July. The names of the former clients were not revealed. Several weeks ago, MCA filed a similar action against Dick Chamberlain, star of the Dr. Kildare series on NBC-TV.

Ford fund etv grants:

$16.3 million in 1962

Ford Foundation grants to educational television totaled $16,394,000 in 1962, according to the foundation's annual report for the period from Oct. 1, 1961 to Sept. 30, 1962.

The largest etv grant, $8.7 million, was to the Midwest Program on Airborne Television Instruction, which completed its first full year of operation in June 1962. Its total support from the foundation has reached $14.7 million.

Community etv grants totaled $7.
Canada: Treasure "It's all about lost and buried treasures, but I've yet to find one myself") and the veteran Vagabond are currently in six markets apiece. Wilton Corp., a subsidiary of Bill Burrud Productions, handles the sales of True Adventure in the 11 western states and all sales of Treasure and Vagabond. The syndication of True Adventure outside the West, in the rest of the U. S. and abroad, is handled by Teledynamics Inc., New York organization which deals exclusively in color programs.

**Built-in Viewers** - Scheduled largely in the early evenings, all-family viewing time, the travel-adventure films do well in ratings. Mr. Burrud reports, particularly with adult viewers. "When there's a kid show against us, we'll tie it; when there isn't, we're generally tops." One thing he can't explain is that audience composition studies show the majority (60%) of his viewers to be women.

From its small beginning, Bill Burrud Productions has grown to an organization with 23 fulltime employees and 53 stringers around the world. The home staff includes nine editors, four supervisor-producers, a production coordinator, three salesmen and the management and office help. Gene McCabe, vice president and business manager, handles most of the day-to-day business matters, leaving Bill free for his creative work, such as writing the talks he gives to amplify and explain the pictures. "Things have changed since 1953-54 when we started making Vagabond," he commented. "Then those half-hour films cost about $5,000 apiece to produce. Today, a True Adventure will run anywhere from $13,500 to $17,000. Fortunately, quality has gone up along with costs. We wouldn't accept today what we were happy to get seven or eight years ago."

Looking to the future, Mr. Burrud feels it is quite possible that his company might be merged with a large firm. "I wouldn't object if my people can go along as a unit. I'd like to make a capital gains deal on all the negatives we own: earnings of $1 million a year sounds like a lot, but there's not much left after taxes."

694,000. National Educational Tv & Radio Center's share was $4.7 million and WNDT (TV) New York was granted $2,994,000. WNDT also received $225,000 grant for programs exchanged with WGBH-TV Boston.

**5% increase for directors**

More than 700 members of the Directors Guild of America, including directors, assistant directors, associate directors and stage managers, got raises of 5% on Jan. 1 under contracts negotiated by DGA in 1960.

A freelance director of a tv network program (except dramatic, sports or "high budget" programs) get $66 for a weekly show of five minutes or less under the new scale, up to $855 for seven hour-long programs a week. The new scale for dramatic shows ranges from $80 for a five-minute, once-a-week show to $1,033 for seven hour-long programs.

**Does the blacklist still exist in radio-tv?**

**AMERICAN JEWISH CONGRESS PANELISTS CITE TROUBLES**

The broadcasting industry still maintains a blacklist which bars certain entertainers from appearing on radio and television, it was asserted in a general panel discussion by performers and lawyers in New York, Dec. 30.

The discussion, called "The Thunder of Reaction," was presented by the American Jewish Congress. The panel included John Henry Faulk, a former radio commentator, who recently won a libel suit against Aware Inc. for linking him falsely with pro-communist causes.

Other panel members were Oscar Brand, ballad singer and tv entertainer; Theodore Bikel, actor and folksinger and head of the arts chapter of the congress; and Howard Squadron, lawyer and co-chairman of the congress’s commission of law and social action.

It was the consensus of the panel that a performer cannot be expected to be silent on controversial political issues and confined only to his immediate world of entertainment.

Mr. Brand contended that an entertainer may be prevented from performing on radio or television by one post card from a listener disputing his appearance on a program.

The networks and agencies, he emphasized, "feel guilty" about the existence of the blacklist but are afraid "to get into a sphere where they will be considered troublemakers."

He suggested that social organizations like the congress appeal to the
heads of networks and advertising agencies to make a public stand against the list.

Mr. Brand's comments made up the few radio-tv specifics in what was a general discussion of today's status of blacklisting.

Program notes...

Intertel production • Tahiti-Pacific Cocktail, ninth in a series of International Television Federation (Intertel) documentaries, is being produced by the Australian Broadcasting Commission in partnership with broadcasters in Canada, Great Britain and the U.S. The program, scheduled for viewing in January in more than 20 countries, will be syndicated in the U.S. by Westinghouse Broadcasting Co. WBC and the National Educational Television & Radio Center are the U.S. members of Intertel.

'Girl Talk' plans • ABC Films Inc., New York, announces an additional 13 weeks of production on Girl Talk, a half-hour, five-day-a-week series. Started Dec. 3, 1961, in five markets, the program stars Virginia Graham and guests. Now in 16 markets, the series has been ordered for sponsorship by several advertisers in additional markets, predicated upon the program's purchase by stations.

New TAC show • Television Affiliates Corp., New York, has added The Land of the Distelfink produced by WFIL-TV Philadelphia, to its library.

Wolper to expand activities • Wolper Productions, Hollywood, has announced its activities to TV documentaries, plans to enlarge operations to include dramatic TV filmed programs.

GOVERNMENT

$9 million kiss between RCA and Philco

SETTLED; PATENT DISPUTE AND CH. 3 PHILADELPHIA HASSLE

A legal obstacle to the proposed exchange of NBC's Philadelphia stations for RKO General's Boston stations was removed last week with announcement that Philco Broadcasting Co. and its parent Ford Motor Co., have reached an agreement with RCA-NBC resolving long-standing litigation.

NBC and RKO General have pending at the FCC a plan to swap WRCV-AM-TV Philadelphia and WNAC-AM-TV and WRKO (FM) Boston.

A two-part accord was reached Jan. 3 between RCA and Philco. First they settled a long-standing dispute in the patent license field, with RCA agreeing to pay Philco a flat $9 million for Philco patent rights. Second, NBC and Philco announced they were filing with the FCC a joint request for withdrawal of Philco's application to operate a ch. 3 tv station in Philadelphia.

The ch. 3 action has stood in the way of the RKO General-NBC exchange of Boston and Philadelphia facilities. If the FCC approves the Philco withdrawal request, NBC will pay Philco "for the expenses it has reasonably incurred in furthering its application." The amount had not been determined last week. Philco filed a protest to NBC's Philadelphia ch. 3 renewal application in 1957 and filed an application for the facility in 1960.

The joint RCA-NBC and Ford-Philco damage suit settlement does not involve payment of any consideration "for Philco's agreement to seek withdrawal of its application for the Philadelphia station license. Both the license agreement and the agreement to settle the damage claims between the parties already are in force, and neither is contingent upon FCC approval of the request to withdraw the Philco application for ch 3 in Philadelphia."

Hearing Resumes • When FCC Chief Hearing Examiner James D. Cunningham resumes hearings today (Jan. 7) in the Philco application for ch. 3 in Philadelphia, Irving Segal, counsel for NBC, will propose that the record in the case be closed now that Philco has agreed to withdraw its application. NBC Board Chairman Robert Sarnoff had been scheduled to testify at the hearings which were originally scheduled to resume Jan. 2. The FCC Broadcast Bureau, a party to the case, will appear.

The RCA-Philco patent agreement specifies that RCA will get non-exclusive licenses under all present Philco and Ford United States patents for radio apparatus including color tv, transistors and data processing equipment, all being for the full lives of the patents.

RCA will be free for the next five years to use any domestic color tv patent issuing to Philco on an application filed after the date of the agreement.

Non-Exclusive Licenses • Ford and Philco receive non-exclusive licenses from RCA under all present domestic patents and patent applications relating to radio-purpose apparatus (other than color tv), transistors and data processing equipment, running for the full lives of the patents.

In addition Ford and Philco are granted rights under RCA color tv patents that were issued before Oct. 28, 1958 as well as on applications filed prior to that date. These cover inventions needed to comply with the FCC standards for color tv. Later color tv patent rights will be available to Ford and Philco at the prevailing rate for such licenses.

An important phase of the agreement is the settlement, without payment of damages by either company, of the litigation between them that has been pending since 1957 in the U.S. District Court, Philadelphia. Philco is withdrawing its claim for $50 million damages against RCA and RCA is withdrawing its claim for $174 million damages against Philco.

Chief Examiner Cunningham is presiding at hearings in progress since last October on the proposed Philadelphia-Boston trade, an NBC renewal applica-

BROADCASTING, January 7, 1963
tion for WRCV-TV and Philco's ch. 3 application. NBC had been ordered to dispose of its Philadelphia properties by last Dec. 31 under a 1959 consent decree with the Dept. of Justice but this deadline had been extended 18 months (Broadcasting, Dec. 24, 1962). Testimony at the hearings has included charges that Westinghouse had been pressured by NBC into swapping its Philadelphia stations for NBC's Cleveland properties.

FTC issues 248 co-op complaints

Emphasizing that it was not attacking co-op advertising, the Federal Trade Commission last week mailed 248 identical complaints and proposed consent orders to cease and desist from the payment of discriminatory advertising allowances to leading apparel manufacturers.

The action was the result of a one-day conference at the FTC last October when spokesmen for apparel makers urged a blanket approach to get unfair practices in co-op advertising, but urged that the principle of co-op advertising be permitted to stand (Broadcasting, Oct, 22, 1962).

In the complaints sent out by the FTC last week, the commission said that investigation indicates that the manufacturers had violated Sec. 2(d) of the Clayton Act by paying certain customers advertising allowances which were not made available on proportionally equal terms to all other competing customers.

The manufacturers were given until Feb. 15 to utilize the consent order procedure. Otherwise, it was indicated, the FTC would have to bring individual complaints which would be litigated under the usual FTC rules.

Dissenting to last week’s action were Commissioners Philip Elman and A. Leon Higginbotham Jr.

FCC moves to revoke North Carolina am

The FCC instituted license-revocation proceedings last week against a station that a commission staff investigation indicates has been operated “without a license or other valid authorization for more than two years.”

The station, WBMT Black Mountain, N. C., was ordered to show cause why its license shouldn’t be revoked.

The commission files list Eugene and David P. Slatkin, doing business as Mountain View Broadcasting, as the licensees.

But, the commission said in its showcause order, the Slatkin brothers dissolved their partnership more than two months before a cp was granted on May 4, 1960, without amending their application.

The commission also said the station’s finances and business operations have been controlled by a corporation in which Mr. and Mrs. Eugene Slatkin shared ownership with Mr. and Mrs. John Greenwood, of Black Mountain.

According to the commission, Mr. Greenwood, publisher of a weekly newspaper, supplied more than half the funds used in building the station.

In all, the commission alleges five violations of the broadcast rules which, it said, raises questions as to whether the station was built and operated without a license, in violation of the Communications Act, and whether Eugene Slatkin has the character qualifications to be a licensee.

In addition to listing charges arising out of the WBMT operation, the showcause order alleges Eugene Slatkin made false statements to the commission in applications for construction permits for am stations in Shelby and Hendersonville, N. C., as well as in an affidavit filed in connection with his role in preparing an application for a construction permit at Asheville, N. C.

WHHM permitted to stop for 90 days

WHHM Memphis reached the point where it was “unable to meet the payroll” and received FCC permission to go off the air from Dec. 27, 1962, until today (Monday). Last week the station asked for and received authority to remain silent an additional 90 days.

William Grumbles and his sister, Marie Copp, WHHM owners of record, have asked the FCC to approve the sale of the station to its former owner, Thomas W. Shipp. The transfer is necessary to salvage the station from a precarious financial position, licensee Mercury Broadcasting Inc. told the FCC in answer to a protest against the sale (Broadcasting, Nov. 26). Mr. Shipp would cancel $160,000 in debts against WHHM in payment for the station. Mr. Grumbles is president of WYNS-TV Syracuse, N. Y., as well as president of WHHM.

Several other stations received FCC permission to remain silent for various periods up to three months to start the new year. Like WHHM, most were having financial troubles, a commission spokesman said. Among those now dark: WTSV-FM Claremont, N. H.; WTHR Panama City Beach, Fla.; KRPM (FM) San Jose, Calif.; WETT Ocean City, Md.; WRRB Tarpon Springs, Fla.; WSFR Sanford, Fla.; KENE Toppenish, Wash.; KNEL Brady, Tex.; KCAL-FM Redlands, Calif.; and KMOD-FM Midland, Tex.
Scientific research grants are made each year by the Cereal Institute for experimental and library research. Findings from this research are made available through published reports, leaflets, and in educational messages.

During 1962, Cereal Institute grants are supporting research at the following universities:

- Department of Internal Medicine, College of Medicine, State University of Iowa
- Department of Physical Education, State University of Iowa
- Literature Research, State University of Iowa
- Departments of Physical Education, University of California
- School of Medicine, Marquette University
Kerr's death leaves chairmanships vacant

The death of U. S. Sen. Robert S. Kerr (D-Okla.) in Washington last week (see page 76) left the chairmanships of two standing committees vacant as the 88th Congress prepared to convene this Wednesday (Jan. 9).

Meanwhile, Oklahoma Gov. J. Howard Edmondson, the man who is empowered to name a successor to the senate seat formerly occupied by the multi-millionaire oilman and broadcaster, was in a position to place himself in that chair—with the help of Lt. Gov. George Nigh, a fellow Democrat. No announcement was expected until after Sen. Kerr's burial, scheduled last Friday (Jan. 4).

Sen. Kerr was chairman of the Aeronautical and Space Committee and was in line to succeed the late Sen. Dennis Chavez (D-N. M.) as chairman of the Public Works Committee.

Symington Likely * Sen. Stuart Symington (D-Mo.), former secretary of the Air Force under President Harry S. Truman, seemed a likely successor as space committee chairman should the post be waived by three senior Democrats, all of whom now head important standing committees.

Sen. Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee, which is parent of the Communications Subcommittee, indicated last week he intends to stay there. He waived the Space Committee chairmanship two years ago when Sen. Kerr succeeded then-Sen. Lyndon Johnson of Texas. The space post was passed up then, too, by Sen. Richard B. Russell (D-Ga.), chairman of the Armed Services Committee, and Sen. Clinton P. Anderson (D-N. M.), chairman of the Interior and Insular Affairs Committee. Both senators are in line for the job now, but neither indicated interest in giving up the committees with which they have long been identified.

Sen. Pat McNamara (D-Mich.), senior Democrat on the Public Works Committee, was in line to assume that chairmanship.

The late Sen. Kerr was also ranking Democrat on the Finance Committee, of which Sen. Harry F. Byrd (D-Va.) is chairman. Sen. Russell B. Long (D-La.) now is ranking Democrat.

CBS appeals decision on compensation plan

Charging that the FCC is not authorized to regulate business arrangements between a network and its affiliates, CBS last week asked a federal court to overrule the FCC's finding that its new compensation plan to tv station affiliates violates commission rules.

In an appeal filed with the U. S. Court of Appeals for the Second Circuit in New York, the network claimed (1) that the FCC is not authorized to regulate rates of compensation paid by networks to affiliates; (2) that Sec. 3.658 (a) of the commission's rules was never intended to give the FCC power to invalidate a compensation agreement between a network and an affiliate; (3) that the commission erred and abused its discretion in concluding that the regulation, even if applicable, had been violated; and (4) that in the guise of interpreting an existing rule, the FCC in substance promulgated a new rule without going through required rule-making procedures.

At issue is the CBS compensation plan which provided a sliding scale of payments running from 10% of the station network rate up to a certain number of hours, and 60% of this rate for each hour over the cutoff level.

The FCC last spring, in a 6-1 vote, found that this plan violated that regulation which forbids a station from accepting a network agreement that would preclude the station from accepting the programs of another network. The CBS plan, the FCC majority said, clearly hindered affiliate acceptance of programs from other networks (Broadcasting, June 4, 1962). Commissioner Frederick W. Ford dissented.

The network adopted the new compensation plan after the FCC revised the option time rules to permit no more than 2½ hours of each segment of the broadcasting day to be optioned to the network.

Kaiser gets cp for Detroit uhf

The plans of Kaiser Industries to operate seven television stations, the maximum allowed under FCC rules, came closer to realization last week when the commission granted Kaiser a construction permit for a new 225 kw uhf station on ch. 50 in Detroit.

Last week's action was the third granted out of five applications Kaiser has filed for uhf tv stations (Broadcasting, Sept. 10, 1962). The other grants were for new stations on ch. 44 in

Is the FCC a pawn in local political battles?

The FCC is becoming a tactical weapon in editorial battles between broadcasters and interests involved in local controversal public issues.

The latest occurrence took place just before and over the Christmas holidays. The scene was Corpus Christi, Tex., and before the battle was over the commission had become involved to the extent that Corpus Christi Mayor Ben F. McDonald actually was in telephonic communication with Edward J. Brown, chief of the FCC's renewal branch, on Dec. 24 (a government holiday in Washington).

It all started on Dec. 22 when T. Frank Smith, president and general manager of KRIS-TV Corpus Christi, editorialized against the alleged haste with which the city council was planning to acquire a gas distribution firm and to hold an election to authorize a 27-year franchise to a second gas distribution company. One of Mr. Smith's purposes, he maintains, was to redress the imbalance in the city's news media on the subject. Neither of the local newspapers nor the other broadcast stations had presented the other side of the proposed actions, Mr. Smith contends, and his feeling was that the proposals were being rushed through without enough consideration by local citizens.

The day after the initial 9½ minute editorial, Mr. Smith was confronted with a demand by the mayor and spokesmen for the two gas firms for "equal time" under the FCC's fairness doctrine. That same day Mr. Smith received a telegram from the FCC reciting the complaint and asking for his side of the issue.

This sequence continued for the whole week.

Mr. Smith's first response to the demand for equal time was a flat no, on the ground he had not taken sides in the controversy. On the second go-round, he offered the three other parties participation in a 30-minute panel show to discuss the issues. This was refused. As he found himself at the receiving end of a one-two punch (demands for equal time plus telegrams from the FCC), Mr. Smith liberalized his offers: a fifteen-minute program to be shared by the three objectors, and when that was refused, 15 minutes each to the three principals. This was accepted.

The 45 minutes rebuttal time almost equaled by then the time used by Mr. Smith in editorializing on the gas issue. By this time he had added three 10-minute statements to his original 9½-minute editorial.

On Dec. 29, the city council approved its proposal to acquire the gas distribution company (cost, $4.6 million), and in the election the citizenry voted to approve the 27-year franchise.

The only comfort Mr. Smith now draws from his campaign is that almost three times the number of voters participated in the election than normally would have turned out.

He expressed one other thought after his experience: "A few years ago this sort of battle would have been fought out between the station and its opponents in the local arena. Today, everyone goes immediately to the FCC."

San Francisco and ch. 52 in Corona, both California. Still pending before the commission are applications for new stations on ch. 38 in Chicago and ch. 41 in Burlington, N. J.

In making the grant the commission said it did so "without prejudice to such further action as the commission may deem appropriate as a result of the pending criminal anti-trust suit of U.S. vs. Kaiser Aluminum & Chemical Sales Inc." Kaiser Industries is a substantial principal of the aluminum and chemical company. This same decision also applies to the San Francisco and Corona grants.

In addition to its three uhf construction permits Kaiser owns KHVH-AM-TV Honolulu and KHJ(TV) Hilo, both Hawaii. Both of the Hawaiian tv stations are vhf.

FCC extends deadline for daytime comment

The FCC last week extended the deadline for comments in its proposed daytimer rulemaking from Jan. 28 to March 15. The new date for reply comments is April 1.

The commission acted at the request of the Assn. of Broadcasting Standards. The association is a new group of full-time regional and Class II stations, organized, among other reasons, to present the commission with comments and engineering data on the operation of standard stations with daytime facilities before sunrise.

The initial directors are E. K. Hartenbower, KCMO Kansas City, Mo.; George Conner, WTMJ Milwaukee; A. Louis Read, WDSU New Orleans; W. B. Quarton, WMT Cedar Rapids, Iowa; Allan M. Woodall, WDAK Columbus, Ga.; Harold Krelstein, WMPS Memphis; Herbert E. Evans, WRFD Columbus, Ohio; Richard M. Fairbanks, WIBC Indianapolis.

The proposed rulemaking would permit daytime-only stations to go on the air at 6 a.m. or sunrise, whichever is earlier, in areas without an unlimited time station. In broadcasting pre-sunrise, however, daytimers would be limited to 500 w in power and the use of a non-directional antenna. Broadcasting, Dec. 3, 1962).

In requesting extension of the deadline, ABS said the proposal is of great significance to the broadcast industry, and that additional time is needed to prepare engineering studies on it.
Sometimes a danger is hard to recognize even though a warning lamp is lighted. The loss of freedom is one such danger. And the steady growth of government-in-business is one such danger signal.

In the last 30 years the federal government has come to own many thousands of businesses, from cement mixing plants to ice cream factories. In the field of electricity alone it now has an investment of 5½ billion dollars in power plants and lines. And the advocates of government-in-business press constantly for more.

When government owns business it has in its hands both political and economic powers—the means of controlling goods and jobs. In such a state it can become difficult indeed for individuals to keep their basic freedoms.

Is this a risk you want to take?
Three of broadcasting’s top rating services—The Pulse Inc., A. C. Nielsen Co., and American Research Bureau—agreed last week to stop claiming that their findings are 100% accurate.

The agreements are contained in consent orders accepted by the Federal Trade Commission. They followed six months of negotiations between the government agency and each of the three survey firms (At Deadline, Nov. 5; Closed Circuits, Oct. 8, July 30).

Observers don’t feel there’ll be much change in rating reports; the principal result, they think, will be additional and more comprehensive explanatory notes in each of the rating reports issued by the services.

The conclusion of the FTC investigation does not mean, however, that the rating services are free and clear. On Capitol Hill, the House Commerce Committee’s regulatory agencies subcommittee is still undecided about what to do with its 14-month investigation of the radio-television rating industry.

Reports have filtered through from time to time that House investigators have uncovered instances of hanky-panky in broadcast research, although it has been stressed that they involve local research firms, none of the majors.

The subcommittee is the successor to the Legislative Oversight unit which exposed payola and quiz show rigging. The subcommittee is understood to be still considering hearings in the 88th Congress. A decision on whether to go ahead with a formal congressional inquiry will undoubtedly be one of the items before the committee after Congress opens Jan. 9 (Wednesday).

Not Admissions * In announcing the agreements last Thursday, the FTC noted they are for settlement purposes only and do not constitute admissions by the respondents that they have violated the law.

Reactions from two of the three rating services, Nielsen and ARB were immediate.

Nielsen—

“The Nielsen portion of an intensive investigative of what we understand included the entire ratings industry ended quietly today when A. C. Nielsen Co. consented to a Federal Trade Commission order relating to its broadcast research services. We understand that FTC complaints were also directed or will be directed to other radio and television research firms.

“The terms of the agreement affect the explanatory notes in Nielsen television and radio reports. The commission felt that a more complete disclosure of research details would insure against the possibility of misinterpretation on the part of people using Nielsen Reports. The agreement states that Nielsen’s consent does not constitute an admission of wrongdoing on its part.

“By way of illustration: Additions to Nielsen Report language will give added emphasis to the fact that the information provided constitutes estimates by Nielsen based on Nielsen sampling and methods; that reporting in terms of precise mathematical terms is subject to sampling and non-sampling error qualifications; that National Nielsen’s Ratings exclude samplings of the Mountain Time Zone.

“We believe that the added detail and fuller explanation will aid in the interpretation and proper use of our reports.”

ARB—

“... In ARB’s opinion, although some parts of the order appear unnecessarily strict in their requirement for minute detail, the general sense and purpose are completely in line with ARB’s own feeling on the subject, namely, that the most complete disclosure possible should be made to users of audience research as to the actual techniques and procedures employed in conducting the surveys and the accuracy thereof.

“No changes in ARB’s sampling procedures, field work or report processing are contemplated as a result of the order. Required modifications in the cover text of the reports and other explanatory material will be effected as soon as possible.

“It has always been ARB’s policy to welcome sound contributions resulting from responsible investigations of the methodology employed by the industry in producing television audience measurements, whether they be from clients, industry groups or governmental authorities.”

Latest Moves * The FTC orders last week are the latest indication of government interest over the past five years in survey firms dealing with radio and tv program ratings. Involved have been the Senate Commerce Committee and its chairman, Sen. Warren G. Magnuson (D-Wash.), and Sen. A. S. Mike Monroney (D-Okla.); on the House side, the House Commerce Committee and Rep. Oren Harris (D-Ark.), its chairman.

The Senate committee held a one-day hearing on the rating services several years ago, and the testimony and other data were turned over to the FTC.

From time to time Sen. Magnuson has urged FTC action, most recently when Paul Rand Dixon, FTC chairman appeared before the committee on his nomination to the FTC. Sen. Magnuson again urged action and Mr. Dixon promised to look into the subject.

Three years ago the House Commerce Committee became interested in the subject and at the instigation of Chairman Harris asked the American Statistical Assn. to undertake an impartial study. This resulted in the Madow Report, submitted to the committee early in 1961 and named after the chairman of the ASA’s special technical committee on broadcast ratings, Dr. William G. Madow of Stanford Research Institute (Broadcasting, March 27, 1961).

The principal recommendation of the Madow Report was that the television industry establish an Office of Research Methods and an independent sampling services.

As to complaints that the procedures of the rating services are suspect, the ASA committee determined that “although there are important sources of error in the methods used by each rating service, the services seem to be estimating the ratings fairly well on the average.” The committee warned, however, that the sheer number of rating estimates each service would lead to a number of errors.

The committee also said that on balance the seven rating firms studied were doing a reasonably good technical piece of work for the purposes to be served.

Errors in national sampling, the group said, tend to cancel each other out. The committee warned that the sampling techniques used by some of the services could cause significant errors in local ratings.

Misleading Claims * All three rating services are charged in the FTC complaints with claiming that station and program ratings, and share-of-audience figures are accurate measurements resulting from error-free techniques. The FCC holds this is not so; that they are in fact only estimates.

All three rating services are charged with representing that their measurements are based on probability samples. This is incorrect, the FTC said.

The agency declared that Pulse and Nielsen represent, directly or by implication, that their program ratings are accurate to 1/10 of 1%, and ARB, to 1%. The FTC also said that Pulse claims its share of audience figures are

BROADCASTING, January 7, 1963
accurate to 1%; Nielsen and ARB, to the "mathematical exactness of 100 homes."

Specifically, the trade agency also lists the following individual complaints:

- Pulse—
  - Includes all "not at homes" in its sample base.
  - Adjusts "sets in use" figures upward by 20% for morning programs and 40% for afternoon and evening programs without research to justify such adjustments.
  - Uses data from reports containing interviewees' general preference as opposed to what they actually listened to or viewed during the period covered by the survey.
  - Uses data obtained by interviewers over whom Pulse does not have sufficient supervision and control to assure the accuracy or reliability of such data.
  - In some reports Pulse has combined the ratings and audience shares of two or more stations into a single rating and share, while other stations, not serving the entire area served by the combined stations are listed with their individual ratings and audience shares as though they were competing with such combination of stations for the audiences in the entire area covered by said reports.
  - Sample size for each Pulse survey is smaller than the number of quarter hour reports upon which each such survey is purportedly based.
  - Some of the measurement data contained in Pulse reports are based on general listening or viewing preferences as opposed to actual listening or viewing as of a specific time.
  - Pulse rosters are not always employed in obtaining measurement data.
  - Pulse interviewers in conducting interviews sometimes deviate from the pre-assigned plan and conduct interviews elsewhere.
  - Pulse's sampling method is not completely accurate either statistically or otherwise.

Nielsen—
- Bases station total audience partly upon measurement and partly upon projection based on obsolescent surveys.
- Combines data secured at different times into consolidated rating and audience size values as though all of such data had been derived during the time period embraced by a given report when some of the data were derived during a different time period.
- Publishes what purports to be complete radio audience data although Nielsen does not measure portable and transistor radio listening or tuning.
- Does not disclose the number or percentage of samples where there is a refusal or failure to respond or cooperate, and otherwise does not account for the statistical effect of non-response.

There may be two ways of listening—Howell

The FCC was advised last week to refrain from rulemaking in a proposed study of loud commercials. Such rulemaking, the commission was told, could violate the Communications Act's prohibition of censorship.

Rex G. Howell, a broadcaster with 37 years experience, said the FCC should concentrate on whether present ways of measuring sound levels are enough to assure compliance with existing commission rules.

Mr. Howell owns KREX-AM-FM-TV Grand Junction, KREY-TV Montrose, and 50% of KGIL Greenwood Springs, all in Colorado. His comments followed his letter to FCC Chairman Newton N. Minow in which he said FCC rules already limit the volume of commercials to that of adjacent programs (Broadcasting, Dec. 24).

Mr. Howell agreed with the commission's notice of inquiry that the psychological quality of sound as experienced by the listener is subjective. "We believe further study will reveal that there is no uniformity of psychological reaction to these sounds and that which may prove irritating to some is not necessarily irritating to others."

He also said it's well known that response to both intensity and frequency is not always linear to a person's ears. Some people believe a bass sound is louder because their hearing response is greater to low-register tones.

"To attempt to legislate against the whims or physiological limitations of complainants," he added, "would be totally fruitless at best, and an intrusion into a proscribed area [censorship] at most. Every complaining witness would have to undergo a hearing test."

Mr. Howell said the problem—"if indeed it merits being called one"—requires only that the commission supply broadcasters with any technical data revealed by the inquiry that would aid them in complying with commission rules "with the best equipment possible."

The deadline for comments is Jan. 28,
AM OVERPOPULATION TALKS START

NAB's Collins opens testimony on radio problems

NAB President LeRoy Collins will be the starting witness today (Monday) when the long-awaited industry-FCC “shirtsleeves working conference” on the troubles of radio gets under way.

The two-day conference will be held before the full FCC. Other NAB witnesses are scheduled today, and six other “interested parties” are scheduled to present their views tomorrow. The conference grew out of public statements nine months ago at the NAB convention by Gov. Collins and FCC Chairman Newton N. Minow (BROADCASTING, April 9, 1962).

The central theme of the conference is whether there are too many AM stations operating in the U.S. Pending an overall study of AM broadcasting and its covering rules, the FCC has instituted a freeze on applications for new radio stations and for major engineering changes in existing stations. Several court appeals against this action have been filed by prospective applicants for new stations.

Other NAB witnesses will include George Hatch, president of KALL Salt Lake City and chairman of the NAB Radio Development Committee formed to plan the association’s participation in the conference; Carl E. Lee, executive vice president-general manager of WKZO Kalamazoo, Mich., and chairman of the NAB engineering subcommittee; George C. Davis, Washington consulting engineer; George W. Bartlett, NAB manager of engineering, and Merrill Lindsay, WSOY Decatur, Ill., vice president and chairman of the NAB’s special non-engineering subcommittee.

Two members of the NAB’s engineering subcommittee—William S. Duttera, NBC, and Jules Cohen, Washington consulting engineer, also will testify but not as official NAB participants.

NEW TRY FOR CH. 10

Beachview asks FCC to look again at grant to WAVY-TV

Beachview Broadcasting Corp. renewed its 10-year fight before the FCC last week against the present licensee of WAVY-TV (ch. 10) Norfolk-Portsmouth, Va. Beachview, which lost a 1957 grant for ch. 10 to Tidewater Teleradio Inc. on a 3-2 vote, asked the FCC for “reconsideration, rescission, renewal, reinstatement, comparative consideration and other or further relief.”

A month ago, the FCC questioned the promise vs. performance of WAVY-TV in ordering a hearing on the application then pending for approval of the sale of the station to Gannett Inc. for $4.5 million (BROADCASTING, Dec. 3). That sale application has since been dismissed (BROADCASTING, Dec. 24).

In ordering the hearing, the FCC dismissed Beachview protests against the planned transfer but scheduled a public airing of many of the charges made by Beachview. The commission also refused to approve an agreement whereby WAVY-TV would reimburse Beachview $98,750 for expenses incurred by the latter in prosecuting its long fight for ch. 10. (Beachview, in turn, had agreed not to appeal to the courts if the transfer received approval but did not withdraw its charges against the past operations of WAVY-TV.)

Beachview said last week that the fundamental issue is “whether a licensee charged with deception, willful misrepresentation, sham gamesmanship to secure a competitive tactical advantage and deliberate concealment of material facts . . . shall be permitted to retain the fruits of its alleged willful misconduct by receiving a grace period of 10 months to upgrade its performance for renewal purposes.” WAVY-TV’s existing license expires next Oct. 1 and, if it is granted, the FCC’s reasons for ordering the transfer hearing will have been “effectively washed out,” Beachview declared.

The petition last week asked the FCC to (a) rescind, revoke and set aside the WAVY-TV license and reinstate for hearing the Beachview application with that of Tidewater, or, (b) in the alternative order Tidewater to file a renewal application, permit Beachview to file a competing application and designate both for comparative hearing.

Several affidavits of former WAVY-TV employees were submitted by Beachview which, the protestant said, raise questions whether Tidewater representations during the earlier comparative hearing were made in good faith “or were instead calculated to deceive.”

Beachview said that its agreement with Tidewater for reimbursement of expenses, denied by the FCC, was instituted by Gannett Inc. Three “responsible and experienced members of the commission’s bar” participated in formulation of the agreement and “Beachview expressly declared that it was not withdrawing the charges. Beachview gives every assurance to the commission of its good motives, purposes, intentions and good faith in entering into the agreement and urges that the execution of the agreement—now frozen—must not be construed to give rise to any adverse reflections” against Beachview.

FCC drops label proposal

The FCC last week decided to drop the rulemaking proposal it had designed to standardize wording, appearance and location of manufacturers’ seals on receivers in the 30-890 mc range. The seals note compliance with radiation limitation requirements.

At the same time, however, the commission once again warned purchasers against buying fm and tv sets which lack the certificates.

68 (GOVERNMENT) BROADCASTING, January 7, 1963
WGMA, bureau swap charges in hearing

The arguments for and against the renewal of the license of WGMA Hollywood, Fla., were continued last week when the FCC's Broadcast Bureau and Melody Music Inc., the station's licensee, filed reply comments to each other's proposed findings in the case (Broadcasting, Dec. 17, 1962).

The Broadcast Bureau told the commission that WGMA's "programming submission is hinging on minimizing and excusing the prior misconduct and character derelictions of its principals."

The owners of WGMA, Jack Barry and Daniel Enright, were the owners of the rigid and now defunct TV quiz shows Twenty-One and Tic Tac Dough, and questions as to their character qualifications were raised when the WGMA renewal proceedings began well over a year ago (Broadcasting, Nov. 20, 1961).

WGMA said that the Broadcast Bureau's approach to the station's arguments for license renewal on the grounds that it did a fine job of community programming and judging the communities' needs were "erroneous and unfair." WGMA argued that the programming of the station outweighed the conduct of Messrs. Barry and Enright during the TV quiz scandal and their role in the production of Twenty-One and Tic Tac Dough.

The Broadcast Bureau said that WGMA ignored the fact that the programming "is only relevant as a mitigating factor" and that it is the duty of any licensee to program in the public interest. The bureau also charged that the "bulk of WGMA's improvement in its programming service occurred after the commission's letter of inquiry into the conduct of Enright was written on Nov. 27, 1959," at which time it could be anticipated a renewal application would be designated for hearing, the bureau concluded.

WGMA further concluded that if Messrs. Barry and Enright were not aware that "rigging" of the quiz shows was improper, as WGMA argued, in view of the practice throughout the industry, they are then "unaware...of moral values." "It takes no highly refined sense of moral values to recognize and appreciate that 'cheating' in whatever form, is improper," the bureau added.

The bureau said that anyone who "callously and systematically" deceived viewers week after week "is not fit to be trusted with a broadcast license."

FCC changes rules on filing procedures

The FCC last week instituted five procedural changes in its filing rules, three of which increase and two of which diminish the commission's supply of red tape by several inches. A rundown of FCC procedural amendments:

- The number of copies of interlocutory pleadings before the Review Board, Chief Hearing Examiner or Presiding Officer has been increased from 10 to 15, and in all other matters except rule-making 20 copies instead of the present 15 must be filed.

- Rulemaking proceedings still require only 15 copies, although two additional copies for each docket must be submitted when identical documents are filed in two or more related rulemaking proceedings which have not been consolidated.

- Requests for action by more than one of the FCC's arms of authority may not be combined in a single pleading, and combined requests may be returned.

- Responses to oppositions must be filed only by the petitioner; a single document must reply to all oppositions; replies must be confined only to the substance of the opposition; and such replies must be filed within five days after the deadline for oppositions has expired.

- Ex parte rulings may be made on motions for extension of time without waiting for the filing of oppositions and replies.

Congressional activities in radio-tv

These are the major legislative items of interest to broadcasters which the 88th Congress, convening Wednesday, Jan. 9, can be expected to consider:

- Amendment or suspension of Sec. 315, that part of the Communications Act which requires radio and television stations to provide equal time to political candidates.

- Probes of broadcast measurement firms by the house, possibly the senate, too (see page 66). .

- Community antenna television regulation.

- Concentration of ownership in newspapers and broadcast properties owned or controlled by newspapers.

- Amendments to communications satellite legislation passed last year and confirmation of Communication Satellite Corp. incorporators.

- House review of administration news policies with an eye on easing access to news and eliminating censorship.

- Provision of money to follow last year's authorization of $32 million toward construction of cctv stations.

LEE STRIKES BACK AT VHF CLAIMS

AMST's figures on uhf-vhf merits are faulty, commissioner says

The debate over what the FCC's uhf test in New York actually proved went another round last week, FCC Commissioner Robert E. Lee rejecting the Assn. of Maximum Service Telecasters' conclusion that the test showed vhf's superiority.

Commissioner Lee also dismissed some of the AMST's criticisms of procedures used in the year-long test.

The commissioner, who is the FCC's staunchest supporter of uhf, was in charge of the New York project. He expressed his views in a letter to AMST's executive director, Lester Lindow, who had commented on the uhf report in a newsletter to association members in November (BROADCASTING, Nov. 26).

Mr. Lindow had written that, within 25 miles of the Empire State Building, uhf reception was rated from 10% to 50%. The 10% figure was based on evaluation of technicians, the 50% figure on householders' reactions.

But, Mr. Lee said, nothing in the report provides a basis for the conclusion that the technicians rated uhf as substantially better. "When our data shows a 10% inferiority in uhf for grade 3 or better pictures with indoor antennas, little or no difference with outdoor antennas and a 5% superiority for uhf on grade 2 or better pictures using outdoor antennas, your claim that uhf is substantially superior falls far short of being substantiated," Commissioner Lee said.

Householders' Reactions • The commissioner said the 50% figure was based on the finding that 21 householders rated channel 2 pictures as grade 4 or poorer and that 22 gave the same score to channel 7 pictures, but that 40 gave that rating to the uhf test channel, 31.

Commissioner Lee said the FCC attached little significance to the householders' reports "vis-a-vis those of the trained technicians" because "it was found very difficult to educate the family circle as to the purpose of the test, to properly operate the receiver, to adjust indoor antennas and to understand the difference between program quality and picture quality."

Even ignoring this consideration, Commissioner Lee said, the report doesn't bear out the conclusion that householders considered vhf superior. He said that 428 householders rated channels 2 and 7 to be grade 3 or better and that 406 gave the same rating to channel 31.

"If this supports your contention that householders rate that 50% superior to uhf," Commissioner Lee added, "I should have failed sixth grade arithmetic."

The commissioner also took aim at Mr. Lindow's criticism of the selection of locations for receivers used in the test—78% were within 10 miles of the transmitters, more than 90% within 15 miles. The outside limit was 25 miles.

Limits of Clutter • Commissioner Lee said the purpose of the test was to "ascertain the transmission problems in heavily built-up areas. Anyone with an intimate knowledge of New York City will recognize that man-made clutter associated with the metropolitan area" doesn't exist to any appreciable extent beyond 25 miles.

AMST is currently conducting its own uhf study in New York placing sets in homes 25 to 65 miles from transmitter. Commenting on early findings of the test, Commissioner Lee said he doesn't doubt that uhf is markedly inferior to vhf beyond 25 miles.

He said the FCC test showed the same thing, and that the commission not only expected this but designed its antenna "to concentrate its energy to nearby areas at the expense of outlying areas."

Commissioner Lee, who has advocated moving all television to the uhf band, refused to concede Mr. Lindow's statement that uhf is not a substitute for vhf and that the FCC test showed the need for both vhf and uhf.

"I fail to perceive the manner in which our data would infer any such conclusion," Commissioner Lee said. "Our tests were designed to obtain information and little else."

He said the commission didn't intend its test to compare uhf with vhf.

Commissioner Lee expressed some irritation at the AMST criticism of the test in view of the association's participation, in an advisory capacity, in the project. He said that there may have been some disagreements as to procedures to be followed but that he wasn't aware of "any basic differences of opinion."

"I am greatly surprised," he added, "that you now raise substantial questions as to the procedures used and of the analysis of results."

WIBW-TV denied leave to assist translator

A community-owned translator station on ch. 3 (K03BR) in Clyde, Kan., will have to get along without financial support from WIBW-TV (ch. 13) Topeka, Kan., the FCC decreed last week.

The commission refused to waive its rule which prohibits vhf stations from extending their normal Grade B contour by owning or contributing to the support of vhf translator stations: WIBW-TV was denied permission to donate $500 to the translator station.

"Experience has indicated that if there is a need in a locality for translator tv service, the citizens will join together to satisfy that need," the commission said.

To permit vhf stations to extend their coverage area via vhf translators "would result in extension of service at relatively little cost with no responsibility for meeting the needs of the new community for local programming," the FCC said. Also, the agency maintained, such a practice could result in delaying the development of a local station and the expansion of existing stations through authorized facilities.

Chairman Newton N. Minow and Commissioner Rosel H. Hyde dissented.

When is an operator a "chief engineer"?

Radio and television station "engineers" will have to be able to document their right to that title if they want to be addressed as such by FCC field personnel.

FCC Chief Engineer E. W. Allen, in response to a complaint from the National Society of Professional Engineers, said the commission would be willing to cooperate by "instructing its field staff to avoid the term 'engineer' when dealing with persons not known to be registered engineers."

The NSPE contacted the commission after hearing complaints from South Carolina that holders of first class radio telephone operators licenses were calling themselves "chief engineers," in violation of that state's registration law.

In his letter to NSPE, Mr. Allen said "the title of the license issued by the FCC is an operator's license and in no way confers upon the holder of this license the right, from any FCC action, to use the term 'chief engineer.'"

He added that FCC field personnel who ask for "the chief engineer" when contacting broadcasting stations were "merely acceding to (established) custom" and were not implying commission recognition of the personnel "as professional engineers."

70 (GOVERNMENT) BROADCASTING, January 7, 1963
SATELLITES OFF, ON AGAIN

Scientists get Telstar, Relay functioning anew after failures from malfunctions, other damages

America's two communications satellites, Telstar and Relay, came to life last week and scientists were hoping the sparks may brighten.

Telstar, silent since Nov. 23, began operating properly on Jan. 3 after Bell Telephone engineers succeeded in getting its transmitter and receiver to operate on command from the ground. Plans were underway to attempt a live television exchange with England and France Friday (Jan. 4).

Telstar operated perfectly for four months before radiation damage to two transistors in the command circuit caused it to go silent. Bell Engineers reproduced the difficulty in the laboratory and based on what was learned in this way were able to get the command circuit to respond.

Earlier in the week, AT&T announced it will launch the second Telstar in the spring of this year. Telstar II will be launched for AT&T by the National Aeronautics & Space Administration, the telephone company paying all launching costs as it did for Telstar I. The cost was reported to be $2.7 million.

Bell scientists hope to incorporate shielding for the command circuits to overcome the radiation damage suffered by Telstar I. A higher orbit for Telstar II is also expected to aid in overcoming radiation damage; this will be possible through the use of a Thor Delta rocket. At a higher altitude, Telstar II would be exposed to less of the high energy levels of the inner Van Allen Belt. Telstar I's orbit was 600 to 3,500 miles.

Around noon on Thursday NASA scientists found Relay's circuits working normally, and at 4 p.m. on that day on a second test Relay again worked perfectly, sending successfully a tv test pattern from the Bell station at Andover, Me., to the NASA facility at Nutley, N. J. NASA plans to continue testing for the next few days until it can be determined that the radio relay satellite actually is operative.

Relay, manufactured for NASA by RCA, was sent into orbit Dec. 17 but was found to be suffering from power supply anemia on its first test (Broadcasting, Dec. 17). A second test discovered no change in the trouble. Relay, in a 800-4,500-miles high orbit, has been successfully transmitting telemetry, however.

California's No. 1 industry

Electronics has become the number one manufacturing industry of California, according to data compiled by the Western Electronic Manufacturers Assn. As of Dec. 1, 1962, WEMA reports, electronic employment in the state was estimated at 210,000, substantially ahead of the 175,000 employed in food and food processing and the 195,000 workers in the aircraft and parts industry. Since 1957, 100,000 new jobs have been created by California's electronic activities.

During 1962, California also became the top state in the country in terms of electronic employment, well ahead of New York's estimated 185,000. Factory sales of electronics equipment in California totaled approximately $2.78 billion, WEMA reports, with a gross of more than $3.1 billion predicted for 1963.
ITAL GETS CENSORING POWER

Bill implementing White Paper gives Authority more control on program material, commercials

The U.K. government's new television bill, which gives effect to its recent White Paper proposals [BROADCASTING, Dec. 24] to increase Independent Television Authority control over the commercial network, extends ITA's life 12 years from 1964 and ITA will have to initiate program standards on violence, especially for times when young people might be viewing. All program schedules must be approved by ITA before transmission and ITA will have the power to cancel, cut or change material which violates its code of conduct.

A new definition of ITA's duty to viewers has been made. Currently it is required to "entertain, instruct and inform" but in the new bill the terms used are "information, education and entertainment." This brings ITA into line with the BBC charter which has the same order of priorities.

New power will be given to ITA to regulate natural breaks and decide where they may occur in the program. An advertising code will be formulated and the postmaster-general will have a final say in any dispute. The code will prescribe products and methods which are prohibited in commercials. It will be kept under review by a strengthened advisory committee which will include representatives of the public.

A medical advisory panel will also be appointed and will advise ITA on commercials for medicines, medical and surgical treatments and appliances, toilet products which include claims as to the therapeutic or prophylactic effect of the product, and veterinary medicines and treatments. Successive commercials must be recognizably separate; commercials must not be presented so that they appear to be part of a continuous feature; audio must not be "excessively noisy or strident."

The commercial network will have the same leeway as BBC in presenting controversial subjects. Instead of having to balance conflicting views within one program, as at present, it will be possible for balance to be worked out over a series.

A curb will be placed on big quiz prizes. ITA will have the duty of approving the amount of prize money in any show.

As promised in the White Paper, payment by the tv companies to ITA is on two levels. One will be to cover ITA expenses and the other will be a levy on each company's profit before taxes.

Power will be granted, when the bill becomes law, to direct ITA on the collection of information about company profits. The bill provides a maximum $280 fine and three months imprisonment for refusing to give information.

One clause of the bill bans subliminal advertising, which is defined as any technical device, which by using images of a very brief duration or by any other means could influence an unsuspecting audience.

'Broadway Goes Latin' sold in 19 countries

Broadway Goes Latin, syndicated music-variety series offered for foreign distribution last month, has been sold in 19 countries.

Overseas markets purchasing the Independent Television Corp. series include Canada, Japan, Australia, United Kingdom, Argentina, Uruguay, Rhodesia, Costa Rica, Honduras, Hong Kong, and others. Contract negotiations are reportedly nearing completion in other foreign countries.

Canadian-made sets show sales increase

Canadian-made radio and television receiver sales were up in the first ten months of 1962 as compared to the same period in 1961, according to the Dominion Bureau of Statistics, Ottawa.

Canadian-made radio receiver sales totaled 507,915 in the January-October 1962 period, as against 464,570 the previous year, while television receiver sales amounted to 340,801 units as compared with 284,992 units the previous year. There was an increase in all categories of Canadian-made radio receivers except portables.

The imports in the first six months of this year are reported at 294,322 transistor-type radio sets, 92,881 other radio receivers and 8,943 television receivers.

Well over half the Canadian-made radio receivers, 316,227 units, were sold in the province of Ontario in the January-October period. Ontario residents bought just over a third, 119,539 receivers, of the total Canadian-made television receivers sold in the first ten months.

Abroad in brief...

Marital advice abroad • Marriage, Before and After, a radio series of 260 one-minute segments on marital and pre-marital problems, has been sold by Alan Sands Productions, New York, to EMI Ltd. for distribution in Australia and New Zealand and to outlets in Trinidad. The series has been aired weekly on ABC Radio since 1961.
FATES & FORTUNES

BROADCAST ADVERTISING

Werner Michel, who resigned in December 1961 as vp in charge of radio-TV at Reach, McClintock & Co., New York, has been retained by N. W. Ayer & Son, Philadelphia, as tv programming and commercial production consultant. Before joining former agency in 1957, Mr. Michel was under contract to Benton & Bowles and Procter & Gamble as producer of Edge of Night series. He was executive producer at DuMont tv network from 1952-56, and earlier had been associate tv director-producer at Kenyon & Eckhardt, where he created and produced Ford's 50th anniversary show; producer-director at CBS, and with Voice of America as director.

Alvin Eicoff, executive vp and media director of Mohr & Eicoff Inc., New York, has withdrawn as officer from agency in order to form Gottschalk & Eicoff, Chicago advertising agency. Two agencies reportedly will provide reciprocal services for each other's clients in Chicago and New York, and other joint ventures between Mel Mohr, president of Mohr & Eicoff, and Mr. Eicoff will be continued.

Robert S. Marker, senior vp in charge of creative services for MacManus, John & Adams, Bloomfield Hills, Mich., joins Leo Burnett Co., Chicago, as vp and creative director, heading up new creative section to be organized in Burnett's creative services division. Prior to his 8-year service with MacManus organization, Mr. Marker was copy group head at Maxon Inc., Detroit; account executive and copywriter at Griswold-Eshleman agency in Cleveland, and advertising manager of B. F. Goodrich Co.

Jules H. Beskin, John A. Groen and Vincent B. Neill, art directors with Foote, Cone & Belding, Chicago, elected vps.

Harold Gold, pr director of Communications Industries Corp., joins Jay Victor & Assoc., Newark, N. J., advertising agency, as vp in charge of pr. Mr. Gold joined CIC last March after serving six years as pr director of MBS.

Ray Howard, marketing research manager of Container Corp. of America, named director of marketing for Post-Keyes-Gardner, Chicago-based advertising agency which was formed recently from merger of Post, Morr & Gardner and Keyes, Madden & Jones. Before joining Container Corp. in 1956 as research analyst, Mr. Howard was with Kimberly-Clark's cellucotton division.

Michael Gradle, former vp and western manager of Needham, Louis & Brorby and for past 18 months advertising and promotion manager of KCNB (TV) Los Angeles, resigns to form his own advertising agency in San Fernando Valley.

David W. Stotter, vp in charge of marketing for Drewry's Limited U.S.A. Inc., South Bend, Ind., brewery, elected president, filling post left vacant by death of Rudy A. Moritz last Nov. 18. Mr. Stotter, who served from 1950 to 1962 as chief of agency contact and account management for Drewry's account at MacFarland, Aveyard & Co., Chicago, joined Drewry's last Nov. 12 as marketing vp. When he left Chicago advertising agency, he was senior vp and member of executive and marketing committees.

Richard L. Chalmers, former general manager of WNHJ-AM-FM New Haven, Conn., named regional director in Radio Advertising Bureau's member development department.

Cecil E. Bundren, former merchandising supervisor for general merchandise division of BBDO, joins Ketchum, MacLeod & Grove, Pittsburgh, as director of marketing.

Carroll R. Layman, advertising tv consultant who for many years was vp and western manager of Harrington, Righter & Parsons, New York-based station rep firm, joins George Ray Hudson Adv. Co., Chicago, as vp, new business manager and radio-TV director. Prior to joining HR&P, Mr. Layman was associated with T. R. Bauerle Adv. Agency and Grant Adv. in account executive capacities.

John S. Connolly Jr. and Oliver L. S. Joy, both former assistant advertising managers of Miles Products Div. of Miles Laboratories Inc., Elkhart Ind., promoted to division's administrator for new product marketing and product director, respectively.

THE MEDIA

Timothy F. Moore elected vp and member of board of directors of Star Broadcasting Inc., owners and operators of KISN Vancouver, Wash.-Portland, Ore. Mr. Moore has served as general manager of station for past 18 months and will continue to function in that capacity. Star Broadcasting is wholly owned subsidiary of Star Stations Inc., owners and operators of KISN and KOIL-AM-FM Omaha, Neb.

Claude Sullivan, former executive vp of Bluegrass Broadcasting Co. (WVWL Lexington and WCMJ-AM-FM Ashland, both Kentucky, and WHOO-AM-FM Orlando, Fla.), joins Kentucky Central Broadcasting Co. (WJNN Louisville) as vp and general manager. Mr. Sullivan had served in various capacities at WVWL for past 11 years.

Guy B. Farnsworth, sales manager of WUSJ Lockport, N.Y., joins broadcast division of Triangle Publications Inc., effective today (Jan. 7), as assistant general manager in charge of sales for KFRE Fresno, Calif. Mr. Farnsworth is former general manager of WOKW Brockton, Mass. Robert E. Klose, program director of Triangle's WFLP Philadelphia, appointed KFRE program manager.

Don Shepherd, promotion director of WLST-TV Asheville, N. C., joins KFRE-AM-TV and KRFM (FM) Fresno, effective Jan. 14, in similar capacity.

Sol Radoff, executive vp and station manager, elected to board of directors of Cream City Broadcasting Co., licensee of WMIL-AM-FM Milwaukee. Mr. Radoff joined WMIL as account executive in 1956.

Arthur L. Martin, vp in charge of sales and promotion for WMRN-AM-FM Marion, Ohio, assumes added duties of station manager. Mr. Martin joined station as commercial manager in 1953. Sheldon Dods, WMRN sales representative, elected assistant vp for sales and promotion.

Walter H. Simon, assistant manager and news director of KGMI (FM) Seattle, promoted to station manager.

Ronald Todd, with KGMI's sales and promotion department for past four

BROADCASTING, January 7, 1963
Actor-producer Dick Powell, succumbs to cancer

Richard Ewing Powell, 58, board chairman of Four Star Television, Hollywood, died of cancer Jan. 2 at his apartment in Beverly Hills, Calif. Mr. Powell, a Hollywood celebrity for more than 30 years, had been a singer, actor, producer and director in motion pictures before founding Four Star in 1952 with Charles Boyer and David Niven to produce filmed programs for television.

He soon took over active management of Four Star, guiding its development into one of the top TV production companies. Last fall, after being stricken with cancer, he turned management duties over to Tom McDermott, who three years earlier had left Benton & Bowles where he had directed agency's broadcast activities, to join Four Star as executive vp. Mr. McDermott became president of Four Star, succeeding Mr. Powell, who moved up to board chairmanship. Since then Mr. Powell had concentrated more on his duties as producer, host and frequent star of The Dick Powell Show, hour-long anthology series on NBC-TV.

Mr. Powell's death will not alter Four Star operations. Mr. McDermott, in a statement expressing "a tremendous sense of personal loss," said that when Mr. Powell "retired as president of Four Star last October, he arranged his affairs so that the corporation he founded could continue to grow and prosper without his services—but we shall miss him."

Born in Mountain View, Ark., Dick Powell was a singer and musician as a boy, had his own band before he was out of high school and began his professional career as singer and banjo player with a traveling orchestra. After being taken to Hollywood in 1932 by Warner Bros. from the Stanley Theatre in Pittsburgh, he was starred in more than 40 musical movies made at that studio before breaking into dramatic roles as a tough private eye in "Murder, My Sweet." Along with his movie work, Mr. Powell also starred in such radio series as Richard Rogue and Richard Diamond, Private Detective.

Mr. Powell added directing to his other activities with "Split Second," an RKO picture released in 1952, the year Four Star was founded. He directed a number of motion pictures after that but soon the new tv production firm began to monopolize his time. The first Four Star series, Four Star Playhouse, ran four years on CBS-TV with Singer Sewing Machine Co. as sponsor, and before that run had ended, the company had secured the tv rights to the works of Zane Grey, which went on tv as Dick Powell's Zane Grey Theater, with Mr. Powell as host and sometimes star. Outdoing Four Star Playhouse, this series enjoyed a run of five years on CBS-TV.

This season, Four Star has had six programs on the tv networks and has put some of its former network series into syndication through its own distribution subsidiary. The firm has also entered the recording field and is about to produce its first theatrical motion picture.

Mr. Powell is survived by his wife, June Allyson, their adopted daughter, Pamela, 16, and son, Richard, 12; as well as daughter, Ellen, 23, and son, Norman, 25, by his former wife, Joan Blondell.

promoted to assistant program manager and production supervisor, respectively.

Ralph Story, conductor of Story-Line program on KNX-AM-FM Los Angeles, has taken eight-month leave of absence for around-the-world trip.

Bob Ferris, host of KNX's Kaleidoscope program, will replace Mr. Story for duration of his absence.

Bram Emous, former vp of Flower Bulbs Inc., joins BTA Div. of Blair Television, New York, in sales service staff.

Charles R. Sanders, manager of WSPA-AM-FM Spartanburg, S. C., appointed assistant general manager of Spartan Radiocasting Co., owners and operators of WSPA-AM-FM TV. Mr. Sanders became associated with WSPA in early 1961 when he was named assistant to president. He was appointed manager in October of that year. Previously, Mr. Sanders was with Sears, Roebuck & Co. for 15 years.

Joe Mansfield, veteran producer-director formerly with Warner Bros. Pictures, Bruce Chapman Co. and NBC, joins WALE Fall River, Mass., as director of The Sounding Board, public opinion, commentary, interview program starting today (Jan. 7).

Allen Grey, program personality with WCBS-AM-FM New York, resigns to become food broker in Minneapolis-St. Paul area.

David Bringham appointed news director of KOOL-AM-FM Phoenix, Ariz.

Ray Dantzler and Richard A. Hardy join news and sports staff respectively of WTVT (TV) Tampa-St. Petersburg.

Murry Salberg, former director of advertising and sales promotion for WABC-TV New York, joins WNEW-TV, that city's director of advertising and promotion. Mr. Salberg has also served as radio-tv consultant with Marshall & Coch, and manager of program promotion department of CBS Radio network.

Richard Bate, former CBS News reporter, joins ABC News' Washington bureau as staff correspondent covering Pentagon. Before joining CBS News, Mr. Bate was Cape Canaveral correspondent for Time Inc.

Ross Miller appointed assistant program manager of WTIC-AM-FM Hartford, Conn.

months and former broadcast operations manager of Market-Casters Inc. (KMCS [FM] Seattle), appointed sales manager.

Tom Feldman and Eugene C. Keenan Jr. named national sales manager and promotion-merchandising manager, respectively, of WEBB Baltimore, Md.

William J. Lemanski, account executive with WBBM-AM-FM Chicago, joins national sales division of RKO General, New York, as radio sales executive in Chicago office.

Elmer D. Krammer and Hal Siegel join WRGP-TV Chattanooga, Tenn., as account executives.

Mark Evans, vp in charge of public affairs for Metromedia Inc., named general vice chairman for 1963 Cherry Blossom Festival in Washington, D. C.

Eugene W. Whitaker, assistant director of engineering for KSL-AM-FM-TV Salt Lake City, joins King Broadcasting Co. (KING-AM-FM-TV Seattle, KGW-AM-FM Portland, Ore., and KREM-AM-FM-TV Spokane) as assistant to vp in charge of engineering.

James Davis and Monroe Brinson, members of program and production staffs of WBT-AM-FM Charlotte, N. C.,

BROADCASTING, January 7, 1963
GOVERNMENT

William D. Moyers, 28-year-old Texan who formerly worked in continuity department of KTBC-AM-FM-TV Austin as chief traffic director and later assistant tv news editor, has been chosen by President Kennedy to be deputy director of Peace Corps. President said last week he would nominate Mr. Moyers for the $20,000-a-year post when 88th Congress opens Jan. 9. Mr. Moyers, former reporter for Marshall (Tex.) News-Messenger, is U. of Texas journalism graduate who served as executive assistant to Lyndon B. Johnson during 1960 Kennedy-Johnson campaign.

PROGRAMMING

Ralph M. Allgood, former manager of WAPX Montgomery, Ala., joins Associated Press in Washington, D. C., as regional membership executive responsible for all broadcast membership activity in Maryland, Virginia, West Virginia and District of Columbia. Mr. Allgood replaces Frank Stearns, regional membership executive in Washington for past 19 years, who moves to Los Angeles to assume similar responsibilities there.

Aubrey Austin, president of Bank of Santa Monica, Calif., and LeRoy Lattin, president of Universal Products and former board chairman of General Telephone Corp., elected to board of directors of Home Entertainment Co. of Los Angeles at special meeting Jan. 2. Home Entertainment is planning to provide pay-tv service for Santa Monica, with homes connected to central studios through facilities supplied by General Telephone (Broadcasting, Dec. 10, 1962). Other HEC board members are: Wendell Corey, president; Oliver A. Unger, board chairman; H. W. Sarbent Jr., vp, technical operations; Leon Caplan, general counsel; Jerry Gabriel, vp, operations; Henry Rogers, president of Rogers & Cowan, pr firm; and Maurice Hibbert, attorney.

Leonard A. Johnson elected to newly created corporate office of assistant treasurer of Four Star Television, Hollywood. Mr. Johnson joined production company last September following his resignation as president of Sterling Electric Motors Inc., Los Angeles manufacturer of variable speed drives, gearmotors and ac motors.

A. J. (Andy) Schrade, vp in charge of west coast operations of Columbia Records, retires after 47 years with company. Mr. Schrade joined Columbia Graphophone Co. in New York in 1915. William J. Leo, manager of credit section, finance staff, and assistant treasurer of CBS, joins Columbia Records as credit and collections director.

Stan Major, former program director and air personality with WJJD-AM-FM Chicago, has formed Stan Major Enterprises, radio-tv program service organization, in Los Angeles. New firm is supplying airchecks of West Coast radio stations and plans to extend service to nationwide proportions. Stan Major Enterprises is located at 1122 S. Cardinal Ave., Los Angeles 25. Telephone: Creditch 6-8376.

Robert M. Fresco, writer-producer at Wolper Productions, Hollywood, assumes added duties of associate producer of The Story of . . . series. Mr. Fresco will also assist series producer Mel Stuart in development of new subjects for documentary series.

Philip S. Goodman, tv writer-director and motion picture producer, appointed creative director of Fred Niles Communication Center, New York.

ALLIED FIELDS

Paul L. Wimmer and Bernard R. Segal, consulting engineers with Washington, D. C., firm of Jules Cohen, become partners of firm which is now known as Jules Cohen & Assoc. Mr. Wimmer has been with Jules Cohen for past 10 years; Mr. Segal, formerly with FCC's Broadcast Bureau, joined Cohen in 1959. New firm, currently located at Albee Bldg., 1426 G St., N.W., will relocate to Securities Bldg., 729 15th St., N.W., effective Jan. 14. Telephone remains 393-4616.

Sen. Robert S. Kerr, 66, dies of heart attack

Sen. Robert S. Kerr (D-Okla.), a powerful force in the Senate and a holder of broadcast interests, died of a heart attack Tuesday (Jan. 1) in Doctor's Hospital, Washington, D. C., where he had been convalescing from an earlier attack Dec. 18. (Broadcasting, Dec. 31.)

Death of the 66-year-old lawmaker caused considerable speculation in the capital as to Mr. Kerr's successor as Oklahoma senator and on the three committees where he served with great influence and power (see story page 62).

Sen. Kerr was chairman of the Aeronautical & Space Committee, and helped lead the fight for the administration's space communications satellite legislation. He was ranking Democratic member on both the Finance and Public Works Committees.

A wealthy oilman, the senator was a principal owner and chairman of the board of Kerr-McGee Oil Industries Inc. of Oklahoma City and owned 50.6% of WEEK-TV Peoria and WEEQ-TV LaSalle, both Illinois, and 13.1% of KVVO-TV Tulsa, Okla. His widow, Mrs. Grayce B. Kerr, owns 14.8% of KVVO-TV and 10% of KOCO-TV Enid, Okla., of which Kerr-McGee is also 20% owner.

Sen. Kerr was born in a log cabin at Ada (then Indian territory), Okla. Sept. 13, 1884. A former Army officer and later a drilling contractor, he was a practicing lawyer and was state commander of the American Legion in 1925. As a politician, he was his state's Democratic national committeeman from 1940-48, governor of Oklahoma from 1943-47, elected U. S. senator Nov. 2, 1948, and was re-elected in 1954 and 1960, serving continuously until his death last week.

President Kennedy, congressional and business leaders from around the country attended Sen. Kerr's funeral held last Friday (Jan. 4) in Oklahoma City.

Sen. Kerr is survived by his widow, a daughter, Kay Clark, and three sons, Robert Jr., Breene and William, all of Oklahoma City.

DEATHS

J. Howard Dellinger, 76, widely known government expert on radio telecommunications research, died Dec. 27 in Suburban Hospital, Bethesda, Md., following heart attack. Mr. Dellinger had 40 years service with Department of Commerce and National Bureau of Standards and for three months in 1928 was chief engineer of Federal Radio Commission. At time of his retirement in 1948 he was chief of central radio propagation laboratory of Bureau of Standards. In 1922, Mr. Dellinger was instrumental in forming Interdepartmental Radio Advisory Committee which assigns radio frequencies among government agencies and served several terms as its chairman. He attended numerous international telecommunications conferences as U. S. representative. Among Mr. Dellinger's many honors was the International Radio Engineer's Pioneer Award.

Jack Carson, 52, comedian who was noted chiefly for his roles in such theatrical movies as "The Male Animal" and "A Star is Born," died of cancer Jan. 2 at his home in Encino, Calif. Mr. Carson had worked in radio network shows for Seattles, Campbell Soups and General Foods. In 1950-51, he was in All-Star Review on NBC-TV, alternating as host with Ed Wynn, Danny Thomas and Jimmy Durante, and in 1954-55 had his own program, The Jack Carson Show, on that network. Mr. Carson had recently completed pilot for new tv series, The Kentucky Kid, on which NBC-TV had an option.

Mrs. A. J. Fletcher, 77, wife of A. J. Fletcher, owner of WRAL-AM-FM-TV Raleigh, N. C., died Jan. 2 in Raleigh after long illness. Mrs. Fletcher was mother of Floyd, co-general manager of WTVD-TV (Durham, N. C.); Frank, Washington communications attorney; Fred, vice and general manager of WRAL, and Mrs. Ray Goodmon, Raleigh, N. C.

Hearing cases

INITIAL DECISIONS

- Hearing Examiner H. Gifford Irion issued initial decision looking toward granting application of New Mexico Best, Inc., for new tv station to operate on ch. 2 in Santa Fe, N. Mex. Applicant proposes to operate Santa Fe station as satellite of its station KGGM-TV (ch. 15) Albuquerque. Action Dec. 28.

- Hearing Examiner Millard F. French issued initial decision looking toward granting applications for new daytime stations on 1520 kHz, 550 w, in Kenton, Ohio, and 1490 kHz, 550 w, in Youngstown, Ohio, both conditioned that pre-sunrise operation with daytime FAC is to be extended and final decision in Dec. 14,1419, Action Dec. 27.

- Hearing Examiner Eugene L. Hoig and Charles F. Naumowicz, Jr., issued supplemental initial decision looking toward (11) denying application to new station to operate on 1530 kHz, 5 kW, D, in Orlando, Fla., and (12) granting denial for default application of Western Best, Co., for new station to operate on 1500 kHz, 50 kW, D, in Oxnard, Action Dec. 27.

OTHER ACTIONS

- Commission gives notice that Oct. 26 initial decision which looked toward denying application to change operation of station KDKY Tyler, Tex., for new day operation to unit time, with 900 w-N, DA-N, continued daytime operation with 1 kw, became effective Dec. 17, 1963, with no exceptions. Action Dec. 27.

- Commission gives notice that Nov. 8 initial decision which looked toward granting application of General Communications Inc. to increase daytime power of KKXW Lafayette, La., on 1520 kHz from 500 w to 10 kw, with 400 w-DA-N, and from 1500 kHz from 2000 w to 5 kw, and change from DA-1 to DA-2 but with daytime DA during critical hours only, conditions and pending final decision in Dec. 14,1419, hearing operation with daytime facilities precluded, became effective Dec. 25 pursuant to Sec. 1,133 of rules. Action Jan. 2.

- By order, commission granted petition of W. D. Fink, trk as Jefferson Radio Co., and extended time to Dec. 31 to respond to motions of Southern Bests, Inc. to strike Jefferson’s response pleading in Greensboro, N. C., tv ch. 8 proceeding. Action Dec. 31.

- Commission gives notice that Sept. 27 initial decision which looked toward granting application of WHYK Inc. for new tv station to operate in Stephens County, Ga., was reaffirmed in hearing with applications of Smackover Radio Inc. for new w and Magnolia Best, Co. to increase power of station WYDA Magnolia, both Arkansas, in Dec. 14,1413-4. Action Dec. 27.

- By memorandum opinion & order in proceeding on applications of Blount Best, Inc. and WAKS Inc. for increase in daytime power of stations VVDA Vidor, Tex., and KAYS Hays, respectively, both Kansas, denied KAYS petition for deletion or mod. of. operation. Action Dec. 16.

- By memorandum opinion & order in consolidated proceeding on an applications of William S. Cook, Colorado Springs, Denver Area Bests. (KDBA), Arkansas, both Colorado, and Charles W. Stone (KCCHY), Cheyenne, Wyo., in Dec. 14,1418 (1) denied indefinitely filed in Dec. 14,1418 (2) KB for

OUR RESPECTS to Peter Storer

Unique challenge: to create and build a new business

In typical Storer tradition, Peter Storer, president of Storer Television Sales Inc., New York, within the last two years has demonstrated a talent for management that places him in the forefront of the second generation of broadcasting industry executives.

His executive wings have passed the hardest test—the successful launching of a new business enterprise. Understandably, he considers the growth record of STS his proudest accomplishment. "The opportunity to develop, create and build an organization like this," he noted in a recent interview, "was a unique challenge."

Peter, the third son of George B. Storer, founder and chairman of Storer Broadcasting, was doing more than just upholding family standards when he was elected to start a new business.

Well trained in management matters, he was ready to apply both sales experience and an intimate knowledge of station operations. The sales arm opened July 1, 1961, as a smoothly functioning firm that could compare favorably with established representatives.

Breaks In At Stations • A 1951 graduate of the U. of Miami, with a degree in business administration, Peter had served in various capacities at five Storer stations and also worked for CBS Radio Spot Sales before assuming the helm of STS.

Peter was born in Toledo, Ohio, on Aug. 12, 1928, which was just a few months after his father had acquired WTAL, that city, and changed the call letters to WSPD. The first in the string of Storer stations, WSPD is still part of the group as WSPD-AM-FM-TV. The family moved to Michigan in 1931, and Peter spent his childhood and teen years in Bloomfield Hills.

Following four years at the U. of Miami, Peter returned to Michigan to become promotion manager of WJBK-TV Detroit. Accompanying him was his wife, the former Virginia Parker, of Miami, whom he had married there on Oct. 19, 1951.

In 1952 Peter stepped into his first sales position, becoming a local salesman for the Storer-owned WJBK-TV. He left in October 1954 to join CBS Radio Spot Sales, his only position away from Storer companies and one which provided "invaluable experience" as well as contacts that have continued through the years.

Back To Toledo • He rejoined the Storer group in June 1955 when he was named national sales manager for WAGA-TV Atlanta and WBRC-TV Birmingham. In August 1957 he was transferred to WJW-TV Cleveland, as general sales manager, and two years later he moved back to his birthplace; this time as managing director of WSPD-TV. He stayed there until December 1960, when he was elected to his present position and was sent to New York to reorganize the former national sales office of Storer stations into a house representation firm for five outlets (WSPD-TV, WJBK-TV, WJW-TV, WAGA-TV, and WITI-TV Milwaukee).

His first order of business in New York was to attract "high-powered" men to help put STS on a solid foundation. To secure a staff of 19, including a general manager and office managers, he conducted more than 300 interviews. He believes those persons selected rank among the best in the business. For proof, he can point to their sales success in the past year. With obvious pride, he noted that 1962 was "very satisfactory" and that October and November "were the two biggest months in the history of the tv stations."

Reflecting on the firm's first full year of operation, Peter is convinced that some industry assumptions that led to the establishment of STS turned out as expected. Among the basic industry trends that were underway as far back as 1955, he said, were the increase in the number of stations and in spot tv billings. "To grow with the industry we felt we had to adopt the most specialized selling technique possible and we realized it was best done with a strong, compact organization."

STS was set up as a completely independent subsidiary of Storer Broadcasting. It has its own board of directors and functions just as any other rep would in representing its stations. Working out of an office at 500 Park Ave., Peter makes frequent trips to the company's regional offices in Chicago, Detroit, Los Angeles, San Francisco, and Atlanta as well as to the Storer stations. He travels between 250,000-400,000 miles a year.

Little Time Off • Peter's traveling also includes occasional long week-end visits to his parents' winter home in Miami Beach and summer home, a ranch, in Wyoming. When time does permit he enjoys playing golf, hunting and fishing.

Like the Storer business operations, the Storer family, through widely separated, maintains a close-knit relationship. But rarely do all four sons and their families manage a complete family reunion. Brother George B. Storer Jr., president of both Storer Broadcasting and Storer Programs Inc., lives in Miami. Brothers Bob and Jim are with the Storer stations in Los Angeles and Cleveland, respectively.

Peter's own family of four children (Peter Jr., 9; Leslie, 7, Elizabeth, 5, and Linda, 1) makes their home in Greenwich, Conn.

Though active in community affairs while living in Toledo, Peter's long hours the past two years have limited his outside activities in New York and Connecticut. He is a member of New York's International Radio & Television Society.

Meanwhile, Peter and staff are busy in the primary task of selling. To do it well, he believes it is also a rep's function to advise stations on such matters as rate cards, program availabilities and types of programs for national sales and national sales promotions. He is in command of a complete service that includes in-depth research, sales promotion, national client relations, traffic service and sales service.

The success of STS is an accomplished fact. Modestly, Peter is reluctant to take all the credit he well deserves; he prefers to pass compliments on to his staff. A man who has lived with broadcasting all his life, Peter says: "The representative field has confirmed my feeling that it is one of the most vigorous and exciting in the broadcasting business."

Peter Storer
Primary job is sales

BROADCASTING, January 7, 1963
Money talks—and doubletalks

Radio's 1961 financial record, which was released by the FCC only a few weeks ago, is being used as an argument for federal restraint of radio competition. The fact that nearly 40% of all radio stations lost money in 1961 is being quoted by those who want the government to apply birth control and possibly euthanasia to the station population.

The fact of radio's losses does not, however, give a clear judgment of radio's health. It is a superficial fact. Without a deeper look into the flow of income and expense within those stations that show net losses, it is impossible to appraise the viability of the radio system.

A good question that is raised by the report of radio losses is: Why, if all these stations are losing money, do they stay in business? The answer must be that a good many of them stay in business because their owners are making money even if the stations are not. This assumption cannot be verified by the information that is now available: the reports that stations now file with the FCC give no indication of how much salary or how many perquisites may be flowing to the proprietors and officers of stations that show a corporate or company loss.

As reported in this publication Dec. 24, the FCC has decided to begin requiring stations to provide information that will give a clearer indication of profitability. Although a fundamental question still may be raised as to the propriety and perhaps legality of the commission's exacting information of that kind, there is a need for better information if any information is to be gathered at all.

The danger in the collection of any information about radio economics is that it will lead to the government's assumption of a big brother attitude. Whether 40% of all stations are losing money, or 10% or 100%, it would be fatal to broadcasting if the government introduced a policy of economic protectionism. The minute an FCC began granting or withholding licenses on the probability of economic success it would also be forced to impose limits on the profits of those it allowed to survive.

This week the FCC and the NAB will begin conferences on radio "overpopulation," a word that suggests both parties have already concluded there are now more stations than the economy can support. As long as these conferences are restricted to the repair of engineering standards, which have been allowed to degenerate, they will be performing a useful service.

If the conferences start to talk about limiting stations on economic grounds, the way will be opened for utility regulations.

Flyspeaking

Regular users of Nielsen, ARB and Pulse audience measurements have long been aware of the imperfections that the Federal Trade Commission described last week. Nobody who knows anything about the various ratings services, least of all the ratings services themselves, claims that their measurements approach the accuracy of, say, a United States Census.

Yet the FTC announcement last week implies the discovery of wrongdoing. In the FTC's words, the consent orders signed by Nielsen, ARB and Pulse have the effect of "halting the . . . three concerns from misrepresenting the accuracy of their radio and television audience measurements and from using survey techniques which cause bias or error in their rating reports." We have no doubt the FTC announcement will be used by those who personally dislike popular television and radio programming and who therefore wish to discredit the methods by which popularity is measured.

Exempt to provide a small packet of ammunition to those critics, however, the FTC orders will have little practical effect. The three services will have to be more explicit in describing their methods and the probability of errors, but the basic nature of their functions will be unchanged. The case falls somewhat short of the earth-shaking category. Some days a government agency can't make a headline no matter how it tries.

The great decibel mystery

We suppose the FCC just naturally assumed that questions involving loudness could not be answered without hearing. Otherwise there is no tolerable explanation for its decision, just before the recent holidays, to investigate its suspicion—and a handful of lay complaints—that commercials sometimes sound too loud.

What the commission would like to prove is that stations play commercials louder than programs. But it confessed it had not been able to pin the rap on anybody, even after years of investigation. One FCC survey of 816 stations turned up exactly one culprit. Unless the commission plans to stay now from technical regulation, it will be investigating a problem which, by its own evidence, does not exist.

One of the best-publicized outcries against loudness preceding the FCC action was a news release issued by H. H. Scott Inc., a hi-fi manufacturer. The release grabbed big headlines with its report on a so-called survey showing that most TV commercials are louder than dramatic programs. Yet when NBC's Ernest Lee Jahmcke wrote for a copy of the survey, Scott confessed the problem is far from simple, has nothing to do with stepped-up volume and is probably "social" and "philosophic" rather than "technical."

If the FCC intends to get into the social and philosophic areas of advertising, its action changes from the merely ridiculous to the downright dangerous. Would it forbid the use of strident voices except in programs? Would hard-sell commercials be outlawed? As Rex Howell of KREX-AM-TV Grand Junction, Colo., wrote to the commission: "What you are really saying is you don't like commercials delivered in a certain manner of speech."

We think Mr. Howell was right when he told the FCC that "I'm sure you will agree that this is outside the commission's jurisdiction. . . ."

Phoenix prelude

On eve of NAB's winter board meeting in Phoenix which begins today (Jan. 14) word was leaked that NAB President LeRoy Collins is among those under consideration for chairmanship of new Space Communications Corp. Timing apparently was key since just three weeks earlier authoritative sources said Mr. Collins definitely had not been proposed. Since NAB board will consider Gov. Collins' future this week—after two years of brinkmanship—space appointment possibility is calculated to become factor in negotiations for extension or severance of his contract.

Supporters of Gov. Collins are expected to argue that he should be given extension of his $75,000-plus contract perhaps for three years. If space job is offered (and Gov. Collins says he is unaware of it) he then could make decision. Space chairman's duties include arranging participation by governments in space program; testifying before Congress, and handling public relations. President would be executive in business or banking with emphasis on administration rather than politics. Chairman of incorporators of space corporation is Philip L. Graham, president and chief executive officer of Washington Post Company, close friend of Gov. Collins and prime mover in latter's NAB appointment.

Vhf drop-ins

Staff-level premise at FCC seems to be that all-channel vhf-uhf receiver is only one element in push to get uhv established. Other actions talked: deintermix top 75 markets by making them all uhv, covering 90% of all tv viewers. This can be done, some say, by drop-ins even though some may involve short-separation.

FCC won full congressional assent to all-channel set legislation by promising not to carry out proposals to deintermix eight cities, but this involved replacing sole existing "v" channel with uhf. Reverse strategy—to make these and other cities all uhv—is considered by staff lawyers as not breaking faith with Congress.

Letter speere curbs

FCC, disturbed by procedural delays as well as censorship implications of letters written by staff to stations seeking license renewals, is considering procedure to limit staff's authority. Proposal would let staff lawyers write initial prototype letter seeking information under redefined instructions. But commission itself would have to okay follow-up letters. Commission hopes proposed procedure, which Broadcast Bureau has been instructed to put in draft form, would clarify situation.

Sales good despite strike

Newspapers can expect no solace from study currently in works at TVB and due for wide distribution shortly. It reportedly has found that despite strike which has shut down all major New York newspapers since early December, leading many advertisers to experiment with, or expand in, tv and radio, retail sales have been affected insignificantly, if at all.

Overpopulation aftermath

Here's curbstone opinion on what FCC will do on radio station overpopulation issue in wake of last week's proceedings (story page 29): Tighten up engineering standards where needed; closer scrutiny of financial responsibility of applicants, particularly in areas now having service; less stringent financial requirements in "white" areas where no present service exists; closer scrutiny of compliance with engineering standards, particularly where directional antennas are authorized.

Goelet revival?

Revival of National Audience Board, which suspended operations last fall for economic reasons, is being considered by its president and founder, Peter Goelet of New York. Mr. Goelet last week confirmed report that considerable support has generated from public, broadcast-network and government sources and that he has under consideration reorganization that would permit him to resume its service in programming field, possibly with outside funds. Decision may be made within next month.

Not ready for action

While NAB's directors discuss future of Gov. LeRoy Collins at Phoenix, it's unlikely they will act on basic problems of cigarette commercials and tv, which drew nationwide publicity after Collins' denunciation last November. Special three-man tv code subcommittee expected to report it doesn't feel qualified to study scientific and moral aspects of problem and isn't sure NAB itself is competent.

Basic element of cigarette problem, subcommittee feels, is fact that advertising is not directed at pre-teenage group and that impact is purely indirect. Unusual aspect of subcommittee report is that it will be made directly to tv board and not to subdivide four code board. Chairman is William B. Pabst, KTVU (TV) Oakland, Calif., also chairman of tv code board, who will be at Phoenix meeting.

TIO's future

Not on agenda, but expected to arise at NAB winter board meeting in Phoenix this week, is future of Television Information Office which derives its support from tv station and network members but functions in conjunction with NAB. Move has been revived for absorption of TIO functions within NAB public relations activities, but reportedly is opposed by number of tv board members, including Joint Board Chairman Clair R. McCollough. TIO's income is understood to be in excess of $500,000 while NAB annual return is about $1.7 million.

CBS News move

CBS has exercised option for purchase of Army Times' building in downtown Washington for its news operations and hopes to occupy structure, after remodeling, during first half of 1964. CBS News now occupies space in Broadcast House, where Washington Post—Newseum stations (WTOP-AM-FM-TV) are housed. Army Times' building, two-story structure plus parking area at 2020 M Street, N.W., will be designed to accommodate CBS News' long-term needs. ABC last month moved its Washington news operations from Evening Star-WMAL studios at upper Connecticut Avenue to its own building opposite Mayflower Hotel.

Collins there first

While NAB President LeRoy Collins will not appear at FCC hearing in Omaha on local tv programming (see page 72), he plans to beat FCC to Nebraska by five days with attack on agency's citywide programming investigations. Gov. Collins will speak to Nebraska Broadcasters Assn., in Lincoln Jan. 23 and is expected to expand on his position that such hearings are unfair to stations involved.

Cold cash cold

Insiders in financial-brokerage field report insurance companies and banks have gone "cold" on newspaper financing and ascribe it to crippling strikes in New York and Cleveland, along with track record of past few years.
Weekly, 88 "In Depth News reports" scoop the TV sky in Cleveland. Adair's City Camera, Walter Cronkite, Doney's Features, Armstrong's International Reports, plus CBS-TV’s comprehensive coverage are more reasons why WJW-TV—Cleveland delivers up to twice the spot audience on a CPMH basis, compared to the nation's top 15 markets. Want to know the facts? Call your Storer Television Salesman — WJW-TV CBS® in Cleveland.

KTTV to Metromedia for $10 million-plus

Negotiations for sale of KTTV (TV) by Los Angeles Times and Mirror to Metromedia was on verge of consummation Friday and announcement of transaction was planned today.

Price for ch. 11 independent was believed to be in over-$10-million area.

Upon FCC approval Los Angeles outlet will give Metromedia its seventh station—five vhf's and two uhf's—plus as well as four am and four fm outlets.

News of purchase negotiations came same week FCC cleared John W. Kluge, chairman and Metromedia president, of charge of participating in off-record activities in 1957 hearing for ch. 9 in Orlando, Fla. (see page 6). Mr. Kluge was principal stockholder of group which received Orlando grant, now WLOF-TV. He does not now, however, hold any interest in Florida station.

Metromedia owns Foster & Kleiser, outdoor advertising. It sold commercial international shortwave station WRUL, with transmitter at Seicatea, Mass., to Mormon Church last month for over $1.7 million.

LeSueur to Voice as Swing replacement

Larry LeSueur, CBS news correspondent, New York, takes year's leave and joins U. S. Information Agency in Washington Tuesday (Jan. 15) as senior political analyst and commentator on Voice of America. Newsman with network since 1939, Mr. LeSueur fills post partially vacated in March 1962 when Raymond Gram Swing, 75, longtime commentator with networks and more recently in top VOA commentary role, reduced his schedule at Voice to concentrate on book of memoirs he is compiling.

Mr. LeSueur will be paid $17,400 and will work under Alexander Kleeforth, VOA program director.

Ribicoff for radio-tv

Connecticut's new Democratic senator, former H.E.W. Secretary Abe Ribicoff, intends to become one of the most prolific users of broadcast media in maintaining contact with constituents.

Questions propounded by folks back home will, whenever feasible, be answered by tape recordings for radio use. Senator has tape recorder at his elbow: was schooled in techniques by his close friend, Rudy Frank, vice president of WELI New Haven and state fish and game commissioner.

Sen. Ribicoff attributes his election in large measure to judicious use of broadcast media during his vigorous campaign last fall. "They were major factors in reaching the electorate quickly and effectively," Sen. Ribicoff said, "and were singularly important because I could not launch my campaign until the eleventh hour due to my duties as a cabinet member in Washington."

NAB joint board opens sessions in Phoenix

NAB joint board opens week of committee and board sessions today (Jan. 14) at Camelback Inn, Phoenix, Ariz. After series of committee meetings, joint board convenes tomorrow afternoon followed by tv board Wednesday, radio Thursday and final joint session Friday.

Range of subjects from cigarette advertising problem and President LeRoy Collins' contract renewal to legislative, regulatory and budget problems will be considered during week (Broadcasting, Jan. 7).

Two members of 43-man board will be unable to attend meeting because of illness, NAB headquarters said. They are Julian Haas, KAGH Crossett, Ark., and Harold Essex, WSIS-AM-TV Winston-Salem, N. C.

BBDO plans comments on FTC ratings order

BBDO, New York, in anticipation of client puzzlement over initial newspaper accounts of consent decree signed by ratings services with Federal Trade Commission (Broadcasting, Jan. 7), reportedly has prepared commentary on ratings in hope of putting issue in perspective.

Commentary, of media policy nature, notes BBDO, has never overemphasized ratings and that agency uses them for trends information. Agency says, moreover, it has always questioned adequacy of sample among all ratings services and has been pushing for enlargement of sample. Implication is that individual ratings themselves cannot be end-all to media problems.

BBDO's comment is expected to be circulated this week to all of its clients.

Authorities checking shortwave's programs

Authorities are investigating operation of international shortwave station, transmitting with 50 kw power from Red Lion, Pa., in both English and Russian, and espousing extreme right-wing philosophies in tempo with John Birch Society.

Station, transmitting since November, has reported its shortwave broadcasts are being used domestically by upward of 300 broadcast stations.

According to FCC, international shortwave station, WINB, was granted in May 1960 to Rev. John M. Norris, to operate with 50 kw power, assigned to various frequencies in the international band (6.25 mc) depending on seasons. FCC public files on station were stripped, presumably because of investigation. Rev. Norris is also licensee of WGCB-AM-FM Red Lion.

FCC holds up renewals for Pacifica outlets

Pacifica Foundation licenses for FM stations in California and New York are being held up by FCC because of complaints about programming. FCC staff said Friday (Jan. 11).

Senate Internal Security Subcommittee concluded two days of secret hearings on Pacifica stations Friday in which it followed up "information indicating that there may have been communist efforts to infiltrate a radio chain" (see page 72).

Sen. Thomas J. Dodd (D-Conn.), vice chairman, conducted probe, which he said was held in executive session "to protect innocent persons from unfavorable publicity," had not gone into program content.

When investigation would continue Sen. Dodd could not say, but he revealed other persons have been subpoenaed.

more AT DEADLINE page 10
WEEK’S HEADLINERS

Mr. O'Brien

Mr. Johnson

Robert H. O'Brien, executive vp and treasurer of Metro-Goldwyn-Mayer, New York, elected president and chief executive officer as succeeding Joseph R. Vogel. Mr. Vogel was elected chairman succeeding Joseph R. Vogel. Mr. Vogel was elected chairman succeeding.

George K. Killion. Mr. O'Brien joined MGM in August 1957 as vp and treasurer. He was elected executive vp in December 1961. Prior to joining MGM, Mr. O'Brien served as executive vp and member of board and executive committee of American Broadcasting-Paramount Theatres and executive vp of ABC. Mr. Vogel was president of Loew's Theatres prior to his election as MGM president in 1956. Mr. Killion, who was elected to MGM executive committee replacing Mr. Vogel, served as chairman since February 1958. He is president of American President Lines and member of board of Space Satellite Corp. Changes in administration were expected as result of MGM's earnings decline in fiscal '62.

Gordon H. Johnson, senior vp and member of executive committee of Dance-Fitzgerald - Sample, New York, elected executive vp. Mr. Johnson joined D-F-S in 1944 as account supervisor. He was elected vp in 1947 and senior vp in 1959. Mr. Johnson is filling post left vacant since October 1961 when Chester T. Birch became agency's president and Clifford L. Fitzgerald, chairman.

Alabamans unmollified by NBC-TV's apology

Rep. Roberts said reply from Tom S. Gallery, NBC director of sports, is unsatisfactory. He wants names of persons involved, despite NBC's apology, letters of explanation and expression of regret.

NBC said refusal to let Mr. Wallace make tv appearance "apparently arose because of a misunderstanding on the part of NBC's production personnel at the game." Who invited Mr. Wallace was unclear Friday.

Rep. Roberts also was irked because on same day of Blue-Gray game, California Gov. Pat Brown appeared on East-West game telecast.

FCC refuses to protect catv from interference

Catv systems may not claim protection from interference by translator stations, commission ruled last week in granting four applications for translator facilities.

Commission granted applications of Claremont Tv Inc. for new uhf translator stations on chs. 2, 6, 10 and 12 in Claremont, N. H., to translate programs of WENH-TV Durham, WMUR-TV Manchester, both New Hampshire, WRLP (TV) Greenfield, Mass., and WCAX-TV Burlington, Vt. In making grant agency dismissed petition by Bellows Falls Cable Corp., area catv system which claimed that grant of translators in area would cause interference.

Commission ruled that catv operators are not viewers, and are entitled to interference protection given viewers, because they receive tv signals for purpose of redistributing them for fee, as opposed to free service provided by translators. Catv can alleviate interference, commission said, by changing antenna site or use of microwave relay. Commission warned, however, that it will not condone deliberate attempts by translators to create interference to catv.

3,298 uhf stations possible, study finds

Present 1,500 uhf assignments can be more than doubled, to 3,298, according to report expected this week.

Prepared by National Assn. of Educational Broadcasters, report is based on computer study done with aid from Jansky and Bailey, Washington, D. C., consulting engineers, and FCC.

Project was financed with $55,258 grant from Dept. of Health, Education and Welfare under statute providing funds for development of new educational media. NAEB officials, however, say possible assignments uncovered by study would be available for commercial as well as educational television.

NAEB will present report to U. S. Office of Education and FCC with recommendation that study be basis for new uhf allocation table. Present assignments wouldn't be disturbed under proposal.

FCC staff is doing similar study without computer assistance; it is expected to be completed next month. It reportedly will roughly parallel conclusions in NAEB report.

Senators get copies of delinquency report

Senate Juvenile Delinquency Subcommittee report on television is now in "final form" and was circulated to subcommittee members Friday (Jan. 11), said Sen. Thomas J. Dodd (D-Conn.), chairman.

Senator would not reveal whether report, awaited since hearings concluded last spring (Broadcasting, May 21, 1962), includes proposals for legislation, nor would he say whether he has law-making ideas of his own on subject. But Sen. Dodd made it clear he is not closing door on possibility legislation could come from hearings.

Report draft was reviewed by chairman late last year and sent back for revision, mainly to add "recently uncovered evidence" of effects sex and violence on tv have on children (Closed Circuit, Dec. 24, 1962).

Kemper defends stand in ABC breach suit

ABC's $452,000 breach of contract suit against Kemper insurance companies was challenged Friday (Jan. 11) and network was charged by defendant with failure to provide sponsor protection.

James S. Kemper, board chairman, said his company was within its rights when it canceled out of ABC Evening Report after furor aroused by Nationwide Insurance's Howard K. Smith News and Comment show about Richard M. Nixon on which Alger Hiss appeared.

Public confused show as Kemper's because announcement at end of Evening Report plugged Mr. Smith's program, Mr. Kemper argued. Therefore ABC violated sponsor protection clause of contract by putting announcement inside Kemper news program, he said.

Jack Beall Jr., 64 dies

Jack Beall Jr., 64, retired ABC correspondent, died in Washington hospital Friday (Jan. 11) of respiratory failure before surgery. Mr. Beall was born Dec. 6, 1898 in Waxahachie, Tex. He also had served at WLW Cincinnati, NBC in New York and on newspapers.

*Indicates first or revised listing

**DATEBOOK**

**JANUARY**

Jan. 14—Deadline for filing of responses to FCC political rulemaking proposal. Addresses should be sent to IBA, P.O. Box 38908, Hollywood 28, Calif.

Jan. 15—Deadline for foreign entries for third International Broadcasting Awards competition of Hollywood Ad Club. Entries should be sent to IBA, P.O. Box 38908, Hollywood 28, Calif.

Jan. 15—Deadline for applications in the Better Television Markets, Inc. advertisement contest by Broadcasters Assn. of Los Angeles, dinner meeting at Encore Restaurant, Robert Sutton, vice president and general manager, KNX Los Angeles, will speak on "Broadcast Editorials."

Jan. 17—Sixteenth annual winter convention of South Carolina Broadcasters Assn., at the Executive Hotel, Columbia, S. C. The general manager of WNOK-AM-FM-TV Columbus, is general chairman. Among the key speakers are: Edmund C. Bunker, president-elect, RAB; Julian Goodman, vice president, for news and public affairs, NBC, and air personality Bud Collyer.

Jan. 18—Broadcasters Assn. annual meeting, at the Savoy-Hilton Hotel, New York City.

Jan. 18—Wisconsin Broadcasters Assn. annual meeting, at the Pfister Hotel, Milwaukee.

Jan. 21—Deadline for nominations to Radio Hall of Fame by those in broadcasting as well as public. Address: American College of Radio Executives, Safety Command, 425 N. Michigan Ave., Chicago 11, on official entry blanks available from same address.

**FEBRUARY**

Jan. 21—Deadline for comments to FCC rulemaking proposals to allow (1) joint use of auxiliary tv stations and microwave facilities of closed-circuit tv systems for transmission of selected and secondary basis to on-the-air tv stations and station to closed-circuit; and (2) make available 1850-1990 me band to tv for extended range, closed-circuit purposes.

Jan. 22—Georgia Assn. of Broadcasters, board meeting, U. of Georgia, Athens.

Jan. 22-24—Eighteenth annual Georgia Radio-Television Directors Assoc. meeting, at the Cornhusker Hotel, Lincoln, Neb. NAB President LeRoy Collins will be principal speaker.

Jan. 23—Winter meeting of Colorado Broadcasters Assn., Hilton Hotel, Denver. Meeting will be co-sponsored by NAB and Coca-Cola. President for members of the Colorado legislature.

Jan. 23—Colorado AP Broadcasters Assn., meeting, Hilton Hotel, Denver. AP assistant city editor and manager Lou Kramp will address the session.

Jan. 23—Deadline for comments to FCC proposals of Jan. 21 (above).

Jan. 31—Deadline for entry blanks available from same address.
Your product stands trial tonight—on the TV screens of America.

Will it be represented by topflight counsel?

Your case rests upon the commercial. In one minute it must present the evidence imaginatively, persuasively, believably. Only then can you expect the public to buy your product.

Our product is ideas, seasoned with experience. This combination has helped us win many a verdict for our clients—expressed in gratifying sales and profits.

N. W. AYER & SON, INC. The commercial is the payoff
Intriguing! "The Key"... A suspenseful, war-time romance starring two of the most exciting screen personalities of our day—Academy Award-winners William Holden and Sophia Loren! The director: Carol Reed. The writer and producer: Carl Foreman. It's another of the 73 great box-office hits, newly released for television, that have been added to the roster of the COLUMBIA POST-48's.

The COLUMBIA POST-48's are distributed exclusively by

SCREEN GEMS, INC.
Largest audience of affluent adults

Among Southern California radio stations, KPOL delivers the biggest audience of affluent adults at the lowest cost—47¢ per thousand. The size of the KPOL audience always ranks near the top among all radio stations in the area...and is by far the largest compared to the four Los Angeles good music stations. Pulse data shows KPOL’s audience 80% bigger than the second good music station... larger than the second and third stations combined...and seven times larger than the fourth station. This big audience is affluent, with family income substantially higher than the Los Angeles county average. Advertising addressed to this high concentration of responsive prospects produces outstanding results. For details call Fred Custer at WES-2345.

The 1963 Yearbook

EDITOR: . . . BROADCASTING YEARBOOK is, as usual, a superb job and absolutely invaluable as a source of all information. . . . —Bernard L. Yudain, Time Inc., Washington.

EDITOR: . . . I have grown used to having this for daily use . . . so much so that it would be very difficult to get along without it.—Thomas C. McCray, vice president & general manager, KNBC-TV Los Angeles.

(The 1963 BROADCASTING Yearbook issue, the one-book library of television and radio information, is now being distributed. Copies of this 622-page reference work are available at $8 each.)

Toys on tv

EDITOR: Has BROADCASTING published anything in the past few years regarding the advertising of toys on television?

Anything of a general nature would be helpful, but I'm particularly interested in getting some idea of the frequency that a specific toy is exposed in a market during the pre-Christmas season.—Keith Olson, Colle & McVoy Advertising Agency Inc., Minneapolis.

(Copies of pertinent articles have been forwarded to Mr. Olson.)

Radio help to retailers

EDITOR: . . . Your article on the New York strike hardship hurting radio [AT DEADLINE, Dec. 31, 1962] reports that "major radio stations appear to be turning a pretty profit . . . Yet they feel that they're apt to make enemies, because if strike drags on into January they'll have to start dumping strike accounts to make way for returning national business. They're concerned, too, lest new-to-radio retailers get poor results because they don't know how to use radio and hence become permanently—and needlessly—soured on radio medium."

Although too many of America's radio stations are in the hands of inexperienced, immature managements, I hope that the majority of New York's radio men are professionals who will grasp the newspapers' unfortunate dilemma as an opportunity to be of service to every commercial prospect . . .

Despite the fact that national business might impart more prestige and provide heftier profits, I urge that no local sponsor be kicked around for the big boys with fancier (though often sporadic) budgets. In the successful years that I managed radio stations, I never regarded a local merchant's dollar as being any less valuable than a national advertiser's . . .

It is a radio station's job to insist that retailers use its facilities properly and with sufficient planning and exposure to insure success. Otherwise . . . radio does a disservice to its clients and the industry. Like any advertising medium, radio deserves only the status it earns for itself.—Howard Stanley, Cavalier Advertising Agency, Norfolk, Va.

Elephant size

EDITOR: KUJ received a call from a Walla Walla Valley grower that he had a head of cauliflower weighing over 20 pounds and measuring 14 inches in diameter. He also said he bought the fertilizer, Elephant Brand, from one

Challenge to Americans' ad

EDITOR: Three cheers for you! We are, of course, delighted that you ran the "Challenge to Americans" ad, and everybody is most grateful to you.—Theodore S. Repplier, president, The Advertising Council, Washington.

FTC & ratings

EDITOR: IS THERE ANY CHANCE OF GETTING A DOZEN COPIES OF THE JAN. 7 ISSUE OF BROADCASTING? PARTICULARLY INTERESTED IN THE ARTICLE ON FTC AND RATINGS.—Grace McElveen, Promotion Director, WAFT-TV Baton Rouge, LA.

On stereo monitoring

EDITOR: In your article, "EIA group to monitor stereo fm stations" [EQUIPMENT & ENGINEERING, Dec. 3], it is stated that EIA is forming a nation-

STORER BROADCASTING COMPANY

BROADCASTING, January 14, 1963
would monitoring group to check the transmissions of all fm stations broadcasting in stereo. . . .

It would seem to me that the proper thing [for EIA] to do would be to report any deviations from the standards to the stations. The technical parameters such as separation, frequency response and signal-to-noise, cannot be measured during program periods in any case. It would take a qualified engineer with the proper instruments and with the cooperation of the station in transmitting the necessary tone signals to determine whether technical standards of . . . the FCC's rules were being violated.

About all that could result from a listener report would be . . . correspondence . . . which would prove nothing. I would suggest that the gentlemen of the EIA report anything they think is irregular to the stations, since they are the only ones in a position to check with any degree of accuracy to see if deviations are occurring.

. . . The policing functions of the FCC should be left to its trained engineers rather than to a manufacturer's group such as EIA, whose qualifications to do this are doubtful at best.—Parker H. Vincent, chief engineer, WMTR-FM-TV Poland Spring, Me.

Look ma, no cigarette!

EDITOR: NAB President Collins . . . has commented that we . . . should abolish tobacco advertising because cigarette smoking "provides a serious hazard to health of our teen-agers."

In good conscience we must agree. However, should we not go a step further and abolish all automobile advertising, since more teen-agers are killed by automobiles than by smoking? And, since California Welfare Department statistics show that more teen-age unwed mothers conceive in automobiles at drive-in movies than anywhere else, perhaps we should eliminate movie advertising.

Or perhaps we can only accept automobile advertising for sports cars in which it would be impossible to become pregnant—especially when smoking a cigarette.

Then, again, sports cars might increase the teen-age death rate. Obviously, we have a problem.—Joe Klaas, KYA San Francisco.

Showsheet correction

EDITOR: Your quarterly network showsheet (TV Network Showsheets, Jan. 7), lists Wild Kingdom (Sun. 3:30 p.m., NBC-TV) as having participating sponsorship. The show is sponsored in full by Mutual of Omaha health insurance. It is produced by Don Meier Productions Inc., Chicago.—Pat Collins, Don Meier Productions, Chicago.
The following series of pictures present a dramatic story of the “Precision Planned” installation of a 16 Bay TV Antenna being mounted on a rugged ROHN 485' DD-H Broadcast Tower. Careful planning, engineering and years of experience of the ROHN manufacturing and installation teams are yours whenever you call ROHN for your requirements.

BOOK NOTES

Mr. Morgan is a commentator on the ABC Radio network and this book, to be on sale next Monday, is a selec- tion of his "essays" carried on that network since he joined ABC from CBS in 1955.

The ABC commentator, it has been said, enjoys the right to broadcast what he pleases on his program with- out interference, and the essays in fact attest to Mr. Morgan's subjective treatment of his material and illuminate the undeniable success he has had with this form of presentation. They also make it immediately evident that he has had little hesitation in advocating the unpopular view in his zeal to get at what he considers to be injustice, falsity or a point that others have minimized or overlooked.

Mr. Morgan's scripts are well-written, considering that he prepared them under a newsmen's deadline pressure. They are made more adaptable for book form by added title headings and by footnotes where the author feels further explanations are needed in the light of later developments.

Taken together, the broadcast essays show a man who feels almost compelled to expose fakery, inhumanity, foolishness and error, who can become emotional about people and things and successfully convey his feelings to listeners; who once stood up under the strain of covering a disaster (the sinking of the Andrea Doria in 1956) in which his own teen-age daughter was believed lost but was found later to have been saved by a seeming miracle.

Mr. Morgan's essays range over the "American scene," the Eisenhower and Kennedy administrations in Washing- ton, people in and out of the news, labor and management relations, censorship, civil rights, overseas happenings and his personal experiences. They make a convincing case for non-interference in "personal" broadcast jour- nalism.

This is the 1963 edition of the combined diary-directory Peter Glenn has published for the past five years. More than 100 pages are devoted to helpful directories covering talent agencies, advertising agencies, producers and the like. The directory, this year in hard cover with plastic binding and tabbed indexed pages separating sections, is written for people who are involved in TV commercials or advertisements.

THEY GAVE THE MESSAGE:

Dr. Albert E. Burke

"...a mind like a barracuda!" (News- week)

"One of TV's most provocative half hours." (Los Angeles Times)

"A keen mind, a pencil and the most an- noying public-affairs program in TV to- day." (Look Magazine)

"...provocative, sensible and challeng- ing...made video's usual run of com- mentary seem like a bedtime story." (New York Times)

THEY HAD A MESSAGE:

Dr. Albert E. Burke

"Signing a blank check for Al Burke's unblank mind is the best investment we have ever made." (Hartford National Bank)

"It is conversant, as illustrated by the fact that this is currently one of the most talked about shows on local TV." (Glen- dale Federal Savings)

THEY GOT THE MESSAGE:

21
THE CLEAR DOPE

Here is the clear dope about a good broadcasting operation.

Although most guys and gals our age who are in the advertising business know almost everything about us, we are often reminded that time flies and each day new people are joining the ranks of agencies of the country. Some of them sit in judgment on us, and so they need to know all about us.

Well—We operate KRNT Radio, KRNT Television, and KRNT Theater out here in Des Moines, Iowa. All under the same roof. All run by the same people. Many of the personnel are up to their necks in all three all the time.

Our radio station has led in service and adult audience most of its 27 years. The television station reflects credit on its parent and generally leads in ratings, and in every one of its seven years, it has done around 80% of the local business! Both stations are affiliated with CBS. The CBS know-how together with the KRNT “know-how and go-now” keeps us out in front. The theater is the largest legitimate theater in the U.S.A. Everything from the Grand Opera to the Grand Ole Opry is shown in it. It truly is the “Show Place for All Iowa.”

So what happens? Well, the stations promote the theater and the theater promotes the stations, and we learn show business from running all three. We learn about people, too. Nothing will straighten out a person’s thinking about what appeals to people as well as the box office. ’Tis the till that tells the tale. People either put their money where their mouth is at the box office or they don’t—they kid you not.

Out of this baptism of fire comes some pretty hep people in programming and promotion and market knowledge.

Few organizations, if any, know this market as well as the KRNT organizations knows it.

Few organizations know more about program appeals—

Few organizations know more about promotion and publicity—

Few organizations are held in as high esteem by its public.

Few organizations of our kind in the U.S.A. have the track record that KRNT Radio and KRNT Television post year after year.

The KRNT name means leadership and has for a long time.

What about right now, today?

Well, take KRNT-TV:
The hot CBS-TV schedule is hotter here.

The hot Steve Allen Show is hotter here.

The hottest movie package is here.

The hottest news outfit is here. In fact, one of the top daily nighttime news programs in a multiple station market in America is here on KRNT-TV.

The hottest sports programs are here. The football coaches of the three largest universities in Iowa are seen exclusively in this market on KRNT-TV.

The most and the best and the best-known local personalities are on this station.

Civic, cultural and religious groups know from long experience that they can count on our eager cooperation and support. They know we do operate in the public interest, convenience, and necessity.

And—this is the station, in this three-station market, that carries around 30% of the local television advertising and has since the station’s inception. Yes—where the cash register has to ring today to make today’s profits, this is the station the local merchants depend on for sales—some of them selling products your agency represents.

Then about radio:

Every Des Moines survey a fellow can find shows KRNT Radio leading in total audience, total adults . . . leading in believability, too. KRNT “Total Radio” has the solid sound of success you like. You’re proud to be associated with it. It, too, is a great news station, a great sports station, and it has the most and best known local personalities. It, too, is an outstanding public service station.

Our KRNT Radio personalities appear regularly on KRNT Television. This is a big advantage. Radio listeners know what KRNT personalities look like. Likewise, television viewers are constantly reminded of their local KRNT-TV favorites because of their frequent exposure on KRNT Radio. One medium helps the other in our operation. And personalities are pictured in heavy newspaper promotion, too. Our personalities are “old friends” to Central Iowa people—an important plus in their merchandising and sales effectiveness.

These stations of ours provide the proper climate for responsible advertisers—a climate of leadership, believability and responsibility. It is said that Lord Chesterfield once invited his young friend thusly: “Come walk down the street with me. It will make your fortune!”

We invite responsible advertisers to come walk down the street with us. It will go a long way toward making your fortune.

KRNT RADIO—KRNT TELEVISION
An Operation of Cowles Magazines and Broadcasting, Inc.
Represented by the Katz Agency, Inc.
MONDAY MEMO from ALVIN ZAKIN, partner, The Zakin Co., New York

Find how you’re different, then tell it—in a different way

Broadcast media today are in the clutches of that old devil, conformity, in advertising their wares.

Most stations hold rigidly to a few hackneyed formula claims, and no one seems willing to be the first to break away. I’m thinking of such well-worn slogans as “First in the market,” “Delivers bigger audiences”—or that patetic plea, “You need both to cover the Skinny Gulp Market.” No matter how differently they’re expressed, they’re still the same time-eroded ideas.

It seems ironical that so much station advertising is still creatively dull and unconvincing. The irony, of course, is that stations are in the business of advertising. More than anyone else (except perhaps the agencies) they should sell on a highly inventive level. The fact that they don’t, as a rule, is the old story of the shoemaker’s child going barefoot. Most stations have neglected to keep up with the changing trends in all advertising.

A lot of station advertising, I fear, is simply handed over to the local ad agency that buys the most time on the station. This arrangement doesn’t always lead to the best creative work. Good advertising is more apt to evolve (1) when there is the stimulation of an active client-agency relationship and (2) when campaigns are questioned and weighed critically.

Now, since I seem to know so many answers, what do I recommend to make the break with tradition? I’m certainly not suggesting some of the bizarre advertising attempts I’ve seen lately, chestnuts appearing to have no relevance to the subject. Naked ladies, for instance, are enticing—but not as a means of unveiling rating figures. I also have a hunch that the double-entendre in ads (especially when it snickers) has to be very, very clever to be good.

Straight And Clean • So let’s play it straight and clean and direct—the way really good advertising is anyway.

What I am suggesting is a fresh look at station advertising and a disregard for all the things that have been done. I would like for some station manager to be the Mr. Volkswagen of media advertising; to be realistic enough to recognize that what he really has to sell is a product—his; enough to admit there are no sacred cows; that his problem is simply to find the single, selling point he has in his favor.

And this, as he might suspect, is the hardest part of the job. It takes blood, sweat and fears-overcome to hang his image on one basic point. But when he’s found it, tested it, pot-shotted at it, and it still comes up shining, his battle will be half won.

I say half because now that the point of difference is established, it must be presented differently. Here is where I hope our friend, the station manager, would start to discard any dusty cliches which may be still around. To be on the safe side, he’d throw out every old rating chart, every picture of a pretty girl, every picture of the local mountain with its tv tower, every picture of Main Street, every picture of dear and faithful media buyers, and especially every picture of himself (which takes iron self-discipline).

Now, with the decks cleared, I would like the station manager and his agency to sit down and think up 10 fresh new ways to present this point of difference. This is an even harder job, and just as critical as the soul-searching which went before. Out of the first 10 ideas, if he gets one good ad he will be lucky. But this is the beginning of his campaign, and (I hope) the beginning of the kind of advertising that makes a product or a service famous.

If this station manager and his agency are typical of the kind of people who make great selling ads, it will be a long process. And dozens of embryo campaigns will never see the light of day as the final one is put into action.

A Station’s Story • Now if all this sounds like a nice theory—but just a nice theory—I’d like to tell you a story about a station that had the courage to assert its individuality. And because my agency is part of the story, I know how it all happened.

About three years ago, an independent television station in a large metropolitan market found it had grown up into a thriving, respected medium. But it lacked an identification—a theme—one basic point of difference.

This metropolitan independent and the agency’s creative staff took a long, hard look at the station’s assets. These boiled down to six or seven points, all of which were unusual for an independ ent in a metropolitan market. Each point contributed to an overall picture of quality and prestige that could not be matched by any other independent. Thus, a theme was developed, stressing the prestige of this non-network outlet.

A comprehensive campaign followed (after many were created and discarded for various reasons), calculated to alert the industry to the very real advantages of the station and to back the “prestige” claim with solid points.

The campaign utilized dramatic photographs of objects, which, when seen in association with the headlines, dramatized the six selling points in unusual and arresting ways. And always, the emphasis in the look and tone of the individual ads was on prestige.

The effect was memorable. There is evidence that this campaign has done an enormous service for the station.

Now it stands to reason that no media buyer can memorize 500 tv station call letters. The competition for the buyer’s recognition is enormous. The call letters remembered outside the immediate market must be impressed and impressed hard—and the job must be done by advertising.

Large metropolitan markets, of course, present special problems for advertising. But in every smaller city, the same principles govern. Ended is the era in which a tv station could cry vaguely “first” or “me too” and get away with it. Today, if the tv station is to be the identification maker for a product, it must show first that it knows how to create a strong identification of its own.

Al Zakin is a partner in The Zakin Co., an advertising agency in New York with broadcast industry clients on its account roster. Mr. Zakin is a native New Yorker and a graduate of Syracuse U. YOU CAN'T COVER
INDIANAPOLIS FROM

*The Indianapolis market, we mean!

This provocative headline is more than a facetious approach to a marketing problem. If you presently have distribution in and are exerting advertising pressure on the Indianapolis market, then consideration of the Terre Haute market is of vital importance to your sales success.

HERE'S WHY:

1. Terre Haute is closely linked to Indianapolis for its distribution.
2. Two of the Leading Supermarket Chains in the Terre Haute-Indianapolis coverage area credit the WTHI-TV area with more than one fourth of their total area sales.
3. Indianapolis Television, even when extensively used, misses 80% of the Terre Haute metro area.
4. Combining WTHI-TV with any Indianapolis television develops sizeable, additional penetration without additional cost.
5. The combination of WTHI-TV with an Indianapolis effort reduces excessive duplication, substituting new potential customers.
6. The Terre Haute-Indianapolis media approach does not reduce the level of impact in metro Indianapolis.

These facts were revealed through a series of special studies conducted by ARB. These are presented in detail and are available through your Edward Petry Man.

BROADCASTING, January 14, 1963
Focal Point is a year-long project that attempts to harness the power of broadcasting to the forces at work on community and statewide issues and problems. The function of Focal Point is to overcome citizen apathy and to encourage action.

Focal Point in Baltimore
In Baltimore, on WJZ-TV, Focal Point is tackling the varied and complex problems of metropolitan expansion as they apply to education, transportation, urban renewal, police administration, roads and highways, and other areas. The project was started with a leadership conference, which included among its participants Senator Harrison A. Williams, Jr., Federal Housing Administrator, Dr. Robert Weaver, FCC Commissioner, Frederick W. Ford and former Mayor J. Harold Grady of Baltimore.

Focal Point in Boston
Most recently, in Boston, Focal Point is taking a penetrating look at the state, its government and its problems. The project began with three 90-minute forums given prime time on three successive week nights over WBZ-TV and Radio. Participants included Attorney General Robert Kennedy, Governor LeRoy Collins, Archibald MacLeish, Moderator Erwin D. Canham and Paul C. Reardon, Associate Justice Supreme Judicial Court.

Discussion areas—as related to government—were “Morality” (can it be legislated?), “Modernization” (can statutory and constitutional law be changed to keep pace with the
times?), and “Manpower” (how can political parties be revitalized?).

Two audiences were involved: those present in New England Life Hall, where the programs took place; listeners and viewers at home (estimated at 500,000), including members of audience action groups.

“New and Better Directions”

These programs represent the kick-off to a year-long project, but already their effect is being felt. Focal Point has fired the imaginations of critics, columnists, and viewers. “The phrase ‘focal point’ is likely to be one that Massachusetts citizens will remember for a long while...it may mark the turning of a corner that leads to new and better directions,” said the Pilot, official organ of the Archdiocese of Boston. The Boston Herald called it “...the most interesting, but more important, informative, program of a local nature...this season.”

Its success ultimately will be measured by the public’s involvement. In Baltimore and Boston, additional programs on specific issues of state and local significance are being contemplated. Other WBC stations are already applying the Focal Point concept in their particular areas.

The Power of Broadcasting

The Westinghouse Broadcasting Company has long believed that the power of broadcasting can successfully be brought to bear in the practical area of community improvement as a constructive force in the solution of social and political problems.

ENGINEERED BIRTHS FOR RADIO

- NAB says technical standards can control station growth
- It rejects economic protection though profits shrink
- It and other witnesses urge FCC to lift radio freeze

The adoption of a government policy of economic protection for radio stations was headed off last week.

The NAB went on record in opposition to government regulation of radio competition, except by the application of engineering standards. The association's strong stand against economic regulation, taken during a two-day FCC Washington hearing on radio station population control, put an end to speculation that it would join with some FCC officials in a plan to create limited monopolies in radio.

"I want to make it clear," said the NAB's chief spokesman at the hearing, "that NAB is opposed to and cannot subscribe to any proposal which would arbitrarily place a limitation on the number of radio stations in a given market." The spokesman, George Hatch, president of KALL Salt Lake City and chairman of the NAB's Radio Development Committee, added: "Stated in reverse, given an application for a facility which meets all proposed sound engineering standards, the commission should grant a license for that facility."

The NAB said, however, that the FCC ought to quit granting stations indiscriminately. It advanced three recommendations to keep the station population from outgrowing the capacity of the radio spectrum and to discourage inadequately financed applicants from entering radio:

- A general overhaul of engineering standards including the elimination of the 10% rule (whereby an application can be granted if no more than 10% of his normally protected contour will receive objectionable interference), a more precise definition of a "first service," the use of intermediate powers for the improvement of existing services to serve urban areas rather than granting of new stations and a review of directional antenna standards and methods of calculating skywave interference.

- A re-examination of FCC policies on the authentication of financial responsibility to construct and operate a

The NAB talks (above) and the FCC listens (below) in last week's conference on the problems of am radio broadcasting. Association representatives at the "head table" are (l to r) consulting engineer George C. Davis; Carl Lee, executive vice president of the Fetzar stations and chairman of the special NAB radio engineering subcommittee; George Hatch, president of KALL Salt Lake City and chairman of the NAB Radio Development Committee; NAB President LeRoy Collins; Doug Anello, NAB general counsel, and George Bartlett, NAB manager of engineering. An interested audience (below) includes all seven FCC commissioners (l to r) Frederick W. Ford, Robert E. Lee, Rosel H. Hyde, Chairman Newton N. Minow, Robert T. Bartley, T. A. M. Craven and E. William Henry.
**How the birth control talk started**

A RADIO STATION POPULATION EXPLOSION TROUBLES NAB AND FCC

The postwar surge of new radio station grants, stalled now by the current FCC-imposed freeze, finds broadcasters and government alike faced by a dilemma—how to meet the demands of would-be station operators without crucial damage to the present radio structure or the public interest.

Some of the problems of station population growth were brought into the open last week as the FCC and the NAB held a two-day hearing (see story beginning on page 29).

This conference came after a series of developments that started at the end of World War II when there were roughly 900 radio stations on the air. After the FCC came out from under the impact of wartime equipment shortages and a freeze on new grants, it began playing midwife to new facilities—am radio, fm radio and tv—at an unprecedented rate.

**Cops Tough to Get**

Before the war the process of wringing a construction permit from the commission had been long and expensive, often involving unrecorded political nuances, as the existing station operators utilized numerous ways of contesting applications that might cut a station's service area, cause interference or limit its economic potential.

After World War II the FCC began satisfying demands for expansion that had been pent up during the war years. Longtime operators whose stations had served areas many miles from their transmitters now were worried because their distant signals were being drowned out by new stations in outlying communities. These population figures on authorized stations at five-year intervals (as compiled by the Broadcasting Yearbook) trace the explosion:

As of Nov. 30, 1962, there were 3,924 authorized am stations plus applications for another 499, according to the latest FCC compilation. Broadcasting's weekly compilation showed 3,803 am stations on the air on Jan. 2, 1963.

By 1960, with some 3,500 stations on the air, total radio revenues of $600 million were being split so fine that about one-third of all stations reported losses. This financial record had just been compiled before LeRoy Collins took office as NAB president in January 1961.

Collins on Overpopulation

Gov. Collins took notice of the radio situation in his first address to an NAB convention (Broadcasting, May 15, 1961).

"Where do we go from here in radio?" Gov. Collins asked. "Perhaps we should start by seeking to develop some plan for effective birth control in this business."

The next October October Commissioner Frederick W. Ford raised the sticky question of regulating station population according to economic criteria. In a speech to the Kentucky Broadcasters Assn., Mr. Ford recalled that during the 1930's the FCC had taken into account the nature and extent of economic injury when it considered new grants (Broadcasting, Oct. 23, 1961).

Then the commission's perspective had been influenced—to a limited extent, at least—by a U. S. Supreme Court decision in 1940. This had held that radio stations are distinguished from common carriers by the element of unrestrained free enterprise and that free competition should determine which station stands or falls. Commissioner Ford told the Kentucky group that it was time the FCC re-

radio station. It was suggested that an applicant be required to be prepared to operate for one year without revenue instead of the present three months.

- Encouragement by the commission of mergers of existing stations, particularly where substandard engineering facilities are involved. This, the NAB said, would permit a substandard facility abandoned by merger to be withdrawn from its original location and possibly reassigned to an area that needed it.

**Economics, Programs Passed**

Singularly lacking from most of the testimony during the two days of hearing were statements on finances and programming. Both were mentioned at times, but neither was given the weight that some had expected—particularly the subject of economics.

Mr. Hatch said that "all of us are aware of the declining average revenue per radio station." He said the subject is worthy of most serious study even if there appeared no available and acceptable solution to the problems that might be uncovered.

The NAB witnesses testified last Monday (Jan. 7) with 10 "public witnesses" appearing Tuesday. NAB President LeRoy Collins was present for the association testimony but did not participate except to introduce NAB witnesses.

"There have been so many funeral dirges sounded and written," Gov. Collins said, "that it is good to know that at last we have an opportunity to come here to praise radio broadcasting and not to bury it."

In an opening statement, FCC Chairman Newton N. Minow pointed out that radio today bears little resemblance to the same medium immediately after World War II. He said that the number of stations has increased from 955 to nearly 4,000 and that revenues per station have decreased from $238,000 in 1945 to $145,000 in 1961. Average profits per station went down over the same period from $72,000 to $8,900, he said.

Among other points made at the hearing:

- All witnesses agreed that the am freeze should be lifted immediately. The NAB did not specifically mention the freeze in its prepared statements but in answer to a question, Mr. Hatch said the association's recommendations could be carried out without a freeze and that it should be lifted.

- Rate cutting and double billing are the true evils of broadcasting and the FCC should do something about both.

- The reason so many stations do not show a corporate profit is because owners pay themselves large salaries. This is perfectly legitimate, the witnesses felt, and the practice will show up in future financial statements filed with the FCC which will require a listing of total salaries paid executives, owners and their families.

**No Transfusion Wanted**

In a concluding statement, Mr. Hatch said that "radio does not need any transfusion, nor is it as sick as some would have us believe. It is our belief that with greater reliance placed in am allocations upon sound engineering practice and adequate financial qualifications, the radio industry will reach new heights in prosperity and will continue to provide
examine its thinking on the question because bad programming might drive out good since it costs less to produce. He showed how revenues of individual stations had been dropping.

As a counter to Mr. Ford's remarks FCC Commissioner Rosel H. Hyde warned that utility-type regulation was being considered. He suggested, in an obscure reference to broadcasters who were talking about seeking economic protection: "This may be another instance where preoccupation with matters of immediate concern may obscure interest in basic principles." He said that radio could not attain stature by leaning on government protection.

But some influential NAB members were beginning to side with Mr. Ford's views. The 1961 Salt Lake City SAB fall conference, in the homeland of George Hatch, operator of KALL Salt Lake City and NAB radio board chairman, was attended by representatives of new radio stations and the impact of FCC policies on stations.

Gov. Collins, reviewing a conference he had held at the commission, sent a memo to the radio board on the subject. When the board met Jan. 31, 1962, it looked over a staff study and directed Gov. Collins to name a special study committee.

A number of informal conversations were held by NAB and FCC spokesmen during the spring of 1962 in an effort to see each other's views.

**Action Begins** • All the talk and research were transcribed into action at the April 1962 NAB convention when Gov. Collins said "there is no more important work before us" than to find remedies for radio's overpopulation. FCC Chairman Newton M. Minow came back a day later with the suggestion that the industry and commission meet in an informal, face-to-face shirtsleeves working conference to discuss the state of radio, adding that the search for answers was overdue.

That did it. Gov. Collins set up a nine-man committee headed by Mr. Hatch and the FCC declared an emergency conference on radio, a first step toward re-examine the rules governing a radio stations. It termed the freeze "a partial halt to accepting new applications."

NAB's committee and its subcommittee met several times and conferred with commissioners and staff.

Frequent alarm was expressed in the industry lest the NAB get involved in utility-type discussions that could threaten free broadcasting. NAB pointed out it was emphasizing engineering aspects in its studies preparatory to the Jan. 7-8 conference.

Now the conference is over. NAB has stated its case in depth. It's up to the FCC.

**Outstanding** • Broadcasting service." Without these tighter standards, Mr. Hatch said that he would not feel so optimistic about the future of radio.

NAB conducted extensive engineering studies of radio coverage and interference in the southeastern U.S. and asked the commission to continue the study to include coverage of all the country. The association also presented studies of nationwide situation report on the use of two specific frequencies, 600 and 1300 kc.

Serious Concern • In his opening remarks, Mr. Hatch said that radio has reached the point where interference is of "serious concern." He cited the "Topsy-like" growth that has seen the number of radio stations increase from 765 in 1940 to 3,451 by 1960.

"This explosion in the number of stations is the result of the understandable desire of the commission to provide as many local services as could be fitted into a limited spectrum," he continued. "However, as the nation has reached a saturation point in the number of radio stations, there have been increasing complaints from the public."

The special NAB committee concluded that the necessary climate for a sound and orderly development of radio can be provided without making any basic changes in the competitive, fee enterprise system, Mr. Hatch said. The association's study indicated that the objective of the FCC in providing service "has been achieved to a remarkable extent," he said. "From here on, it would appear that the objectives of the commission and of the radio industry over the next two decades should be the improvement of existing facilities and the extension of interference-free service."

Open Minds • The NAB approached its engineering study with "open minds, without preconceived ideas... letting the facts fall where they may and speak for themselves." Carl E. Lee, executive vice president of the Fetzer Broadcasting Co. and chairman of the engineering subcommittee, told the FCC.

He said the study was made from the following standpoint: (1) During the past 20 years, how has engineering (or the lack of it) contributed to the interference or degradation to the radio service the public receives? (2) How has engineering contributed to the over-all development of a nationwide radio system as well as meeting the commission objectives for radio during the past two decades?

The NAB engineering studies, Mr. Lee said, show that the FCC "with all its trials and tribulations should be highly complimented" in the administration of its standards to secure a nationwide radio system. Application of the engineering standards over the last 20 years has proceeded in many cases the FCC's overall objectives, he said. Sometime between 1950 and the present, Mr. Lee said, the overall objectives for radio were reached and the new stations granted since then simply added to the multitude of signals already covering a given area.

NAB Orders Study • The NAB sponsored an extensive engineering study of daytime radio coverage and interference in the southeastern U.S. and of nation-wide usage of 600 and 1300 kc by George C. Davis Consulting Engineers. Results of the study were given to the FCC in a narrative, chart and slide presentation. George W. Bartlett, NAB manager of engineering, presented a separate study made to determine how well the following goals have been met by the FCC:

1. Provision for some service to all or as much of the nation as possible;
2. Provide each community with at least one radio service;
3. A choice of at least two radio services wherever possible;
4. To encourage local coverage stations for as many communities as possible; and
5. Multiple program choices to as many listeners as possible.

Both studies on daytime radio coverage in 1940, 1950 and 1960 included all of South Carolina and Georgia and parts of Tennessee, North Carolina, Alabama and Florida (north of Jacksonville). This area was selected as typical of the U.S. In 1940, according to Mr. Bartlett, 60.9% of the area received at least one primary daytime service; 96.7% in 1950 and 99.4% in 1960; the NAB study showed. For cities over 2,500 population, 38.1% had at least one daytime service in 1940; 84.7% in 1950 and for 1960 the figure was 97.3%.

Population-wise, 33.9% received at least two interference free daytime services in 1949; 86.1% in 1950 and 96.7% received two or more stations in 1960. Within the area studied, in 1940 there were 61 cities with 5-10,000 population and none had more than one radio station; by 1950 there were 110 cities in this population category and four had two or more stations and in 1960 the
Three maps tell the story of radio's growth in the southeastern U. S. as, in 1940, there was no interference free daytime signal for 39.1% of the area.

By 1950, most areas had a choice of two or more daytime stations and only 3.3% of the land area was without an interference free signal.

Ten years later, in 1960, the coverage looked like this. At least four stations were available during the day to 87.1% of the area.

119 cities with less than 10,000 population, 10 had two or more stations.

**Constant Gain** - In the 10-50,000 population grouping for 1940, there were 53 such cities and only two had more than one station. In 1950, there were 66 cities in this category with 30 having two or more stations and in 1960 the figures were 96 cities with 49 having multiple daytime services.

Only one daytime service was provided to 70.2% of the people within the six states in 1940; 33.9% had at least two services; 11.3% had a choice of three or more stations and only 3.7% could receive four or more stations. By 1950, 97.8% of the population had one service and 57.7% had a choice of four or more. In 1960, all but .03% received one primary daytime service and 81.6% had a choice of four or more stations.

Cities with a population between 5-10,000 in 1960 without a single am station totaled 22 and 9 cities with over 10,000 were without a local am station.

There were 80 am stations providing service in the southeastern states surveyed in 1940; 328 stations in 1950, and 526 by 1960.

Mr. Bartlett's study did not consider interference while Mr. Davis's study was based primarily on that factor (see charts at left). Mr. Davis presented an 88-page document consisting primarily of charts and graphs covering radio development in the six states and the use of 600 and 1300 kcs across the nation. Both frequencies picked are regional channels, one in the high band, one low band, and were selected because they were considered "typical" (see page 34 for broadcast use of the two frequencies since 1940).

The Davis study shows the degradation of signals of existing stations caused by the granting of new stations as well as white areas in the southeastern states.

**Further Use** - There are 48 possibilities for new stations (daytime) assigned to the southeastern states in areas where the largest town has less than 3,000 population, Mr. Davis said. These are frequencies which are available and for which no applications are pending. In areas containing towns from 3-10,000 population, there are 45 possible new stations and there are 21 possibilities in communities with over 10,000 population, according to Mr. Davis's findings.

A preliminary study of Class 1-B channels in the six states indicates that 75 daytime stations of 5 kw or less could be granted, he said.

Mr. Davis's maps showed wide areas without primary daytime in 1940, much less in 1950 and practically none in 1960 (see at left). The remaining white areas are on the Atlantic Coast.
Automotive sales in WHO Radio's NCS '61 area are $581,827,000 PER YEAR!

You don't think of the sound, conservative Iowa citizen as being particularly car-happy — and he isn't. Yet people in this great station's NCS '61 area actually make over a HALF-BILLION dollars of automotive purchases annually (Sales Management, June 10, 1962).

WHO Radio's 117 counties (NCS '61) are a golden lode for manufacturers of automobiles, tires, lubricants, fuels, batteries — and every other product that prosperous people want, and that money can buy.

How else can you cover such a market, with one medium, at truly moderate cost?

Some of America's most successful advertisers use WHO Radio as one of their "first ten" — fifteen — twenty-five market stations. Ask PGW for the facts.
20 years of growth

Serving as typical of radio's fantastic growth in the past 20 years are these two charts made by George C. Davis Consulting Engineers for the NAB. Results were given at the NAB-FCC conference last week by Mr. Davis. These charts show the number of stations, population and square miles of area covered by stations on a frequency of 600 kilocycles (I) and 1300 kilocycles (r). In 1940 there were five 600 kc daytime radio stations serving 6,529,440 people in an area covering 103,030 square miles. By 1960 there were 22,600 kc stations covering 19,570,773 people in an area of 389,729 square miles. The growth for stations on 1300 kc was similar. The two frequencies were selected as typical of the entire radio pattern.

in South Carolina and in northern Flori-
da.
In 1940, 29.8% of the people (3.3 million) in the area under survey were without an interference free daytime service, while only 3.7% of the population had a choice of four or more interference free stations, Mr. Davis said. By 1950, only 2.2% of the population was without daytime service and 57.7% had four or more stations. The population without at least one interference free service in daytime had dropped to 0.3% in 1960 and 81.6% (11.4 million people) could tune in four or more stations.

Qualifications. Mergers. • NAB recommendations for a closer scrutiny of financial qualifications and the encouragement of mergers were given by Merrill Lindsay, vice president of WSOY Decatur, Ill., and chairman of the NAB's special non-engineering subcommittee.

Mr. Lindsay said the subcommittee made a number of studies pertaining to various economic facets of radio. "While several of these investigations developed results of interest to members of the committee, it was our ultimate conclusion that none of the studies warranted conclusions upon which to pass recommendations for the purposes of this conference," he said.

It was "expressly gratifying to find unanimity of opinion" that no limit should be placed on the number of am broadcast stations, Mr. Lindsay said. He used slides to portray the population growth of the U. S., along with the increase in stations and total radio advertising revenues. He said that if radio grants continue at the past rate there will be 5,000 am stations by 1970, continuing the disproportionate growth of radio to the total U. S. population. During the last 20 years, the population has increased 38% and the number of radio stations 500%, he pointed out.

Pointing out that cities and their metropolitan areas are getting ever larger, Mr. Lindsay said the NAB hoped the FCC will bear in mind all "of this shifting in the American scene in planning for the future." Commission rules should be flexible enough to permit stations to improve their facilities to follow the shifts in population around urban areas, he said.

Financial Responsibility. • In tightening financial qualifications, the NAB suggested that the FCC require the bases of an applicant's expected revenues and examine whether it is being "stringent enough" in requiring that capital be on hand for only three months operations.

To achieve greater stability, NAB asked the commission to encourage station mergers, particularly where one of the stations would vacate an assignment which does not meet existing engineering standards. "Such an action would not only remove a facility, but could well make possible the assignment of the frequency to another community in need of additional or improved service," Mr. Lindsay pointed out.

If the FCC reacts favorably to these recommendations, "the future of radio takes on a much brighter aspect," the NAB spokesman said. "With the anticipated growth in such factors as national population, gross national product, individual incomes, spendable in-

BROADCASTING, January 14, 1963

34 (LEAD STORY)
"WSOC-TV program support helps build record response of 150 donors for Charlotte Eye Bank"—H. C. Cranford

"What impresses me most is WSOC-TV's strong promotion support. For example, when we ran our show on a corneal transplant operation, they alerted the Charlotte Eye Bank, went all out with them to publicize the program. Result: within 24 hours after the show, more than 150 viewers had willed their eyes to the Eye Bank."

H. C. CRANFORD, JR.
Public Relations Director
Hospital Care Association
Durham, N. C.

When your schedule is on Charlotte's WSOC-TV you are backed by much more than this station's program strength. You get a brand of staff support that contributes measurably to the success of your own efforts in the Carolinas. That is another reason why you get more for your advertising investment when it is with Charlotte's WSOC-TV. One of the great area stations of the nation.

WSOC and WSOC-TV are associated with WSB and WSB-TV, Atlanta, WHIO and WHIO-TV, Dayton

BROADCASTING, January 14, 1963
Shreveport merger would solve overpopulation

The FCC has been asked to do something concrete about overpopulation of radio stations in Shreveport, La.

Filed last week was a request asking commission approval of a merger between two daytimers in Shreveport. To be merged are KREB (980 kc with 5 kw) and KCJl (1050 kc with 250 w). The resulting station would operate on 980 kc. Surrendered to the FCC would be 1050 kc, with the hope that it would never be used in Shreveport again.

One reason the principals of the two stations feel 1050 kc won't be used in Shreveport is that a new applicant for that frequency would find it almost impossible to satisfy engineering standards. It seems that since KCJl began operating on 1050 kc other grants on that frequency and co-channels have pretty well "boxed in" the wavelength for Shreveport. Both KREB and KCJl were not doing too well, the application says, particularly in the light of competition with seven other Shreveport am stations (not to mention four fms and three tvs). The lion's share of business has been going to two or three stations, the application recites, "and the others are carrying on a dogfight for the scraps."

KREB is 50% owned by Lawrence Brandon and 50% by Upstate Small Business Investment Co. They bought the station in 1961 with an investment of $180,000. Last year, because of losses, they switched from 1550 kc fulltime to its present 980 kc daytime only, in an exchange of licenses with KOKA also of Shreveport.

KCJl is owned by Marvin Burton, who bought the facility last Novem

ber for assumption of obligations totalling $71,589.

Because both stations have been owned less than three years, a waiver of the three-year rule has been requested.

The transaction proposed will result in the ownership of the new KCJl by both the Brandon-Upstate SBIC group and Mr. Burton. The present KREB owners will suffer a net book loss of $65,250, the application says.

ENGINEERED BIRTHS FOR RADIO continued

said the NAB plea for tighter engineering standards reminds him of an explanation of the Daughters of the American Revolution: The Daughters had their revolution and now they do not want anybody else to have one.

"The NAB is for free enterprise for those that have enterprises," he said. The NAB statement that it was against any limitation on the number of stations is inconsistent with its engineering proposal for abolition of the 10% rule, he declared. The NAB, Mr. Colby charged, advocated a "double standard" for broadcasting in the association's request that existing stations in suburban areas be given better facilities rather than the granting of new stations. He said the NAB approach is an "insult to human intelligence."

NAB Executive Vice President Vincent Wasilewski and other association witnesses replied in kind. "I hope you understand your policy better than you understand us," Mr. Wasilewski told Mr. Colby, Commissioner Ford said that he interpreted the NAB's position as just opposite to the characterization given by Mr. Colby.

Urges Two-Station Rule • Mr. Colby made a plea for FCC encouragement of specialized programming and a new rule which would permit one licensee to own two am stations in the same city if the second outlet programmed to minority tastes. He said "blanket restrictions" should not be placed on the granting of new stations. Such blanket restrictions are "inherently undemocratic because they deprive newcomers to the broadcasting field the opportunity to compete on equal terms with established interests," he said.

In using "blanket restrictions," Mr. Colby said he was referring to "rule changes and other devices which seek to limit the number of radio stations by imposing difficult or impossible conditions... without regard to individual conditions in individual markets." The commission, he stressed, should not tamper with engineering standards for the purpose of relieving economic distress in certain markets.

Current engineering standards are "unusually stringent," the attorney said. They prohibit a grant that is not 90% efficient in terms of population served and interference received while such efficiency is not attainable in other fields of engineering. "Engineering standards should have an engineering purpose and should not be ginnedicked to accomplish some other, unrelated objective," he said.

In any case, the FCC freeze should be lifted, Mr. Colby said.

Rash of Fines • Rogan Jones, president of two am and seven fm stations on the West Coast and manufacturer of automation equipment, told the FCC that a "rash of fines... will end the supply of foolish investors and could put from 20-40% of all stations out of business." In a one-page statement labeled "very refreshing" by Chairman Minow, Mr. Jones said proper enforcement of two FCC "rules" will reduce the number of stations "quickly."

"Enforce the rule against double billing and at least one station in Bellingham [Washington] will go out of business, probably three. This probably is true everywhere," he said.

"Enforce the rules about logging and many stations will go out of business. They won't be able to afford either enough people or the machines to do the proper work."

Mr. Jones' companies, International Good Music Inc. and Wescost Broadcast Co., own KPG Wenatchee, Wash.; KGM1-AM-TV Bellingham; KGMJ (FM) Seattle; KGMG (FM) Portland, Ore.; KBA-FM San Francisco; KFMU (FM) San Bernardino, Calif.; KFMU (FM) Los Angeles and KTSU (FM) San Diego. He said "we stopped" double billing when the FCC issued its policy statement against the practice a year ago but "competitors did not."

"Rule enforcement will mean better broadcasting," Mr. Jones told the FCC. "It will do away with poorly managed and under-financed stations. Time will do the rest. Lay it on (the violators), that's all I ask."

Stop Rate Cutting • Rate cutting and poor salesmen are the main problems of am radio, according to Washington attorney Harry J. Daly. He said stations selling below their rates constitute a "specific evil" worse than double billing and that it should be stopped by the FCC. Mr. Daly agreed he did not have a "double standard" but to do in this area legally but thought that a strong policy statement against the practice might help rectify matters.

"To those in the industry who cry most, I might say... it is not less radio stations that we need but better salesmen and better managers," Mr. Daly said. "Radio, a great medium, doesn't sell itself well. Not to its advertisers, its listeners or even the FCC."

He urged the commission not to "build an economic shelter for radio and tv stations. This... inevitably brings on us the idea of more double billing, and so we bury the free enterprise of the radio industry." He pointed out that the NAB's presentation well represented the "haves" but argued that it will be a disservice to the public and the industry if the FCC "reserves the time and the space" to increase the facilities of those stations already on the air while at the same time refusing to accept applications for new stations.

"The problem is not the restriction of new stations, but rather in bad markets with poor management," he said. "Let the limited amount of money disburse to the station whose poor selection of market or personnel have made it a marginal operation."

At one point, Mr. Daly said that he is against the FCC's promise vs. performance comparisons. When Commissioner Ford asked what that had to do with the purpose of the hearing. Mr. Daly said: "I have just withdrawn that statement."

Novel Suggestion • The best way to "attack" the problems of radio is for competing am stations in the same market to "unequally limit facilities" so as to reduce operating and overhead costs. This is the view expressed to the FCC last week by E. M. Johnson, president of WCAW Charleston, W. Va.

Citing combined printing plants of competing newspapers, Mr. Johnson said the FCC should "undertake promptly to foster and approve" similar cooperative arrangements among am stations. Much of this could be done, he said, without rules changes. However, Mr. Johnson said, he would be reluctant to approach a competitor with a
In the fabulous Texas Panhandle . . .

3 great stations sell 750,000 prosperous Texans

Amarillo and Lubbock enjoy the highest per capita income in Texas. Amarillo is #1 and Lubbock is #2 among Texas metro areas. It comes from oil, gas, chemicals, rich agricultural yields and diversified industry.

KGNC-TV AMARILLO

Channel 4, 100,000 watts, NBC—Amarillo’s pioneer Television Station. Solid #1 throughout the day (Nielsen, ARB), providing the Panhandle with outstanding local programming and NBC.

KGNC-TV, for example, has the only registered TV meterologist, fully equipped with his own long-range radar weather gear . . . sweeping a 250-mile area from Amarillo through Texas and into Oklahoma, Kansas, Colorado and New Mexico.

KGNC-TV has 9 out of the top 10 daytime shows and 16 out of the top 20 nighttime programs (total homes, NSI).

KGNC-AM, FM

10,000 watts, 710 kc, NBC—established 40 years.

Blanketing the “Fabulous Golden Spread,” KGNC Radio is #1 by a large margin in 17 out of 18 hours—6:00 AM-12 Midnight (Pulse 37-county Amarillo Report, March 1962), serving 97,000 regular listening families (NCS ’61).

KGNC-AM is heard regularly by more families than all other Amarillo stations combined!

KFYO LUBBOCK

5000 watts Day, 1000 watts Night, 790 kc CBS—established 35 years. With 5000 watts at 790, KFYO is powered and programmed for the most complete radio service in Lubbock.

CBS news and features, outstanding local news coverage, good music format, complete sports dominance, complete farm and special services—Programming leadership for the rich Lubbock area.

ENGINEERED BIRTHS FOR RADIO continued

suggestion for cooperative arrangements without the specific blessing of the FCC.

His plan, Mr. Johnson added, would preserve the benefits of competition and at the same time help stations to compete more effectively in the public interest. Stations might use the same chief engineer, a single accounting department, joint production and promotion and a joint sales department "which might very well, in addition to cutting costs, increase radio sales to would-be purchasers," he said. The stations might even be sold in combination, he suggested. He agreed there would be an inherent antitrust problem.

Like other witnesses, Mr. Johnson told the FCC it should not place a limit on the number of stations which would be authorized any given area.

Urban Expansion • Rapid growth of metropolitan areas, encompassing individual communities which need and are entitled to local service makes it unrealistic to rely on power increases by existing stations to provide such service, Joseph Kessler, a Washington attorney, told the commission at the Washington hearing.

Mr. Kessler, also a prospective applicant for a new am in Springfield, Va. (Washington metropolitan area), maintained that central city stations cannot provide a program service which will meet the needs of audiences in both the city and the suburban area. And, he said, "there is no convincing evidence to indicate that economic, rather than purely engineering considerations," should be considered by the commission in making future grants.

Mr. Kessler urged the commission to lift the am freeze to the extent of allowing applications for cities of over 10,000 population which do not have an existing am or fm station or daily newspaper and which would not cause interference to existing stations. He has appealed to the court the FCC's refusal to accept the Springfield application for a station.

No Guarantee • Thomas C. Fleet, prospective applicant for a new am station in Greenville, S. C., maintained that the marked increase in the number of stations has been a "healthy trend." He urged the FCC to thaw its freeze on new am applications.

"We and other prospective applicants do not seek a guarantee of profit or a guarantee of success—only an opportunity to compete for these things..." he said. "This opportunity is no more than the opportunity which has already been afforded to existing stations throughout the country."

Specialization in major markets and local radio stations in smaller towns are two trends the FCC should encourage, Mr. Fleet said. Fleet Enterprises Inc. has appealed the FCC's am freeze to the court and at one point asked for a court order stopping last week's conference (BROADCASTING, Dec. 10, 1962).

Engineers Speak • The Assn. of Federal Communications Consulting Engineers, through President David L. Steel Sr., urged the FCC to terminate the am freeze "at once." Engineering and efficient frequency allocation is and will continue to be much more of an art than a science, he said.

The U.S. today has the finest and most efficient broadcasting system anywhere in the world, Mr. Steel said. "We would like to see radio continue to grow under a free democratic system as the need and desire of the public and the economy continues to grow and not be frozen by indecision or unnecessary federal rules and regulations," he said.

AFCE asked the FCC to terminate the clear channel rulemaking and to give no further consideration to powers above 50 kw for commercial am stations. Also, the association asked the commission to open all clear channels for further development of new stations in underserved areas and for the improvement of existing stations where a need is shown due to population growth or competitive inequality.

Special consideration should be given to permitting daytime-only stations to operate fulltime whenever possible, Mr. Steel said. The 10% rule is "inadequate and inappropriate" for determining what constitutes an efficient use of a frequency, he said.

Through Mr. Steel, the association offered several recommendations to the FCC designed to (1) expedite processing of applications and (2) help existing stations.

Russell Eagan, attorney for the Clear Channel Broadcasting Service, replied to Mr. Steel's recommendations on the clear channels. Mr. Eagan said CCBS plans to file a petition with the FCC for rulemaking to permit powers in excess of 50 kw. The FCC has relied for over 20 years on a Senate resolution limiting powers to 50 kw in refusing to authorize powers above 50 kw. Also outstanding is a House resolution of last summer urging the FCC to approve powers above 50 kw.

Several clear channel stations sought to apply for 750 kw last fall but the FCC refused to accept the applications (BROADCASTING, Dec. 3, 1962). Two of the stations have appealed the FCC's refusal to the courts.

BROADCAST ADVERTISING

4A OFFERS 'PRE-EMPTION' FORMULA

Committee plan suggested to cut down on spots paperwork

An effort is being made by the broadcast committee of the American Assn. of Advertising Agencies to reduce paperwork caused by insufficient notice of pre-emptible-spot schedule changes.

The term pre-emptible spot is used in this context: a spot purchased by an advertiser at a package or other lower rate but subject contractually to "pre-emption" by another advertiser who might place an order for the spot at the higher, regular rate.

Suggestions for a uniform practice to hold down unnecessary paperwork and possible conflicts involving the agency, its client and the station are being released today (Jan. 14) by the AAAA's committee on broadcast media.

The committee proposes:

"(1) No pre-emption during the initial two weeks of the schedule, and (2) at least seven days notice of pre-emption at any time during the schedule (unless specifically waived by agency at time of purchase)."

The committee said the purposes of the recommendations are to "avoid waste to advertisers, representatives and stations in making preparations for schedules which may be pre-empted after only a few spots have been run—or none at all," and to "give agencies and advertisers time to compensate for the loss of the pre-empted spots."

It was noted by broadcast sources that the recommendations may also be aimed at some station misuse of the pre-emptible spot which has contributed to the paper load.

Station representatives said the suggestion called for nothing that is not already general practice. Some suggested, however, that the AAAA group "should get backing by urging clients to give at least the same consideration to stations when the advertisers want to cancel campaigns."

They noted that the AAAA standard contract calls for the client to give 14 days' notice of cancellation of spot announcements and 28 days' notice for cancellation of programs. Despite these provisions, they said, agencies often call representatives to report that the client wants to cancel a campaign on shorter notice—and they are allowed to do so by the stations.

Radio to benefit from ‘Media-Mix’?

SIMULMATICS SAYS SYSTEM WILL PINPOINT MEDIA EFFECTIVENESS

The Simulmatics Corp.’s Media-Mix system for pre-testing advertising campaigns by simulation in computers will be offered shortly as a means of pinpointing radio’s effectiveness.

This use is a component of the system’s functions in evaluating actual and proposed advertising campaigns (Broadcasting, May 28, 1962). For these broader uses Simulmatics officials say they already have signed Benton & Bowles and the Du Pont Co., plus two major agencies and a major magazine whose identities cannot yet be revealed.

The possibilities of Media-Mix in helping radio to sell itself were described last week by Dr. Ithiel de Sola Pool, director of the international communications program of the Massachusetts Institute of Technology, who developed the Media-Mix system and is research board chairman of Simulmatics, and Edward L. Greenfield, opinion researcher, research consultant and Simulmatics’ president.

“One of radio’s problems,” Dr. Pool said in an interview, is its inability to show exactly how much it contributes to an advertising campaign. The same

is true of all media, of course, but the other media, especially television, usually start out being considered essential. They are not required to prove their point as much as radio is called upon to do.

“The most that conventional media research can do in this respect is to determine the extent to which exposure obtained by one medium overlaps the exposure obtained in others. It does not show how much a given campaign will provide the frequency which is desired.

“Media-Mix can do that because it provides a picture of the repeated stream of exposures that radio—or any other medium—can give. For radio it can show what an advertiser will get by adding a radio schedule to his present campaign, or what he’s getting from an existing campaign. If the campaign isn’t delivering as many exposures as he needs, radio may provide repeat exposures at low cost.”

Banks of Data • As explained by Dr. Pool and Mr. Greenfield, Media-Mix stores two banks of data in the computer. One is a simulation of the

U.S. population. The other assigns to this “population” media habits which are typical of the media habits of the actual population.

When details of an advertising campaign are fed into the computer, the simulated population responds in keeping with the assigned media habits (half-hour by half-hour in the case of radio listening). The computer thus tallies the number of people—by age, occupation, education and other socioeconomic characteristics if desired—who have been “exposed” to each medium and to two or more of the media during any given period from a day to a year.

Exposures made outside the home, including listening in automobiles and at work in the case of radio, are tallied with those achieved within the home.

The “people” in Media-Mix total 2,944 and “reside” in 98 actual counties. These counties contain about 300 radio stations, or seven per county.

Ratings Base • Each “person” in the model is assigned preferences covering four stations—a first choice and second, third and fourth choices. This assign-

Is the mass audience a thing of the past?

The diversification of interests among the public is having a more drastic effect on mass media than most people realize.

The article, prepared by Lawrence C. Murdoch Jr. and others in the bank’s research department, says that many publishers and broadcasters look upon the public as a sort of Gulliver, “a naive, unimaginative giant, a single entity with one set of tastes, interests and desires.” The truth is that the public more and more has come to resemble the Lilliputians—a host of individuals and each one different—on whose island Gulliver found himself a captive, the article says.

The article notes that magazine and newspaper circulation since 1956 have not increased as fast as household and that A.C. Nielsen figures show radio and TV listening and viewing are down; that newspaper and magazine ad lineage is declining; that magazines and newspapers are fewer in number; that there are widespread losses among magazines and radio broadcasters; and that radio and TV have had trouble with government regulation. The culprit? The “numbers game,” says the article. A splintering of public tastes that had been fairly homogenous left mass media with the problem of audiences and circulation that were expensive and difficult to maintain, let alone increase.

The article then turned to the individual media.

Although lineage in mass magazines dropped 8% in 1961, special interest magazines are running counter to this trend and more than two dozen of these were started in 1961, publications where an advertiser can find a special type of reader for his message.

The move to the suburbs has hurt city newspapers, though specialized newspapers are thriving, it’s noted. Radio all but died in the early 1950s with the advent of television competition and amid the growing disenchantment with the lack of variety in network radio programming. But radio eventually realized it couldn’t compete with television and radio started to specialize in the various types of music, and with community news and editorials.

Advertising has followed this local emphasis and local radio advertising has increased almost 200% since 1946 while national advertising has declined slightly, the article concluded. Although the profits and audience figures may not be optimistic, there’s reason to believe they might be worse without the changes in radio. The decline in radio listening may have resulted from the rush to radio of new advertisers with loudmouthed claims that alienated radio audiences, it’s concluded.

Although TV has had the most success in the numbers game, the 1962 decline in viewing hours may be the

42 (Broadcasting Advertising)
Hancock and Norwalk gasolines switch to radio

Switching its advertising emphasis from outdoor to radio, Signal Oil & Gas Co., Los Angeles, is starting a saturation campaign of humorous one-minute spots on some 60 stations in California, Nevada and Texas, for Hancock and Norwalk gasolines. Honig-Cooper & Harrington, Los Angeles, is the agency.

Spotmakers and Mel Blanc Assoc. created the spots, all based on the theme of seven gasolines at seven prices, giving each car the exact kind of gas its engine requires and allowing the motorist to buy the right kind without paying a premium for something he doesn't need or want.

An example is "Tailors," produced by Mel Blanc Assoc., with Mel Blanc and Herschel Nernardi voicing a script by Dick Clorfene.

Media-Mix will depend on the amount of special material and computer running time involved in each case. The current rate card calls for a maximum of $7,000 for estimation of the reach and frequency of one schedule for one year, with provision for second and third schedules to be evaluated at the same time for an additional $1,000 each.

President Greenfield said, however, that this rate card is currently being scaled down to reflect operating economies introduced in the last few months and that the new schedule will bring the service within reach of middle-sized and even smaller agencies.

COMPUTERS' FUTURE

BBDO executive says they allow more time to think

The electronic computers being used more and more by advertising agencies to shortcut detail drudgery and to give executives more time for decision-making will ultimately lead to the buying of broadcast media based on a cost for a delivered audience.

That is one of several specific developments foreseen by John M. Tyson, Jr., vice president, BBDO, Chicago, as agencies and advertisers live and learn with their new machines.

He told Chicago's Broadcast Advertising Club last week that "we always have played a game of Russian roulette in trying to outguess each other as to what ultimate audiences and, consequently, ultimate efficiencies will be. There is no room for this kind of gambling with the kind of money that is being committed to advertising today."

Mr. Tyson's other predictions:
- The machine is going to force more uniform data from media. Radio and television both must provide consistent and accurate data to satisfy the operating needs of computers (BBDO's machines use "linear" programming).
- The mathematics and mechanics of linear programming of computers will force us to seek the relative values of different units in broadcasting.
- "It is amazing how little is known by anyone as to the relative values of different commercial lengths, daytime versus nighttime, spot television versus program, etc.," Mr. Tyson said. "You can find almost anyone with strong opinions in this area, but you find nobody who knows."
- Linear programming will force us to learn to express the relative values of print versus television.
- More care will be taken in the design of broadcasting properties to meet specific audience requirements. "Network people, show people, tv stations will find that the XYZ Corp. wants to reach certain prospects so they will design programs to reach them," Mr. Tyson explained.
- Linear programming will greatly reduce the purchase of run-of-station spots by many advertisers. He said this will occur because they will have no knowledge of who these spots are reaching.
- Agency use of computers "will cut into long-term commitments in shows as management sees what they may lose by forcing all brands into one vehicle."
- It will increase the use of scatter-minute buys so that brands can buy precisely at the time they need advertising and can design the audience profile they want by combining different shows.

Mr. Tyson said the computer's big contribution to advertising is that "it forces us to think." He said the elec-
tronic machine demands facts instead of opinions and hence encourages a new discipline in the way of doing things. "It forces us to organize," he said, and "it encourages us to do research if we do not know the answers."

Pointing out that one of the biggest expenses in running many businesses today is the money that is spent on marketing "and particularly on advertising," Mr. Tyson said top management is paying more and more attention to the advertising function. The result is a growing demand for a more efficient and higher professional approach to every facet of the advertising and marketing processes.

Will the computer throw media people out of work? "There isn't much chance that this will ever happen," Mr. Tyson said, "but if it ever does I am sure that it is far enough away that none of us have to worry about it."

The computer, Mr. Tyson said, "is merely a very efficient, fast working assistant which takes much of the detail and tiresome work away from business programs and allows people time to think and plan."

**NEEWSPAPERS STILL OUT**

More advertisers turn to radio-tv for promotions

The Motion Picture Assn. of America, New York, began a radio spot campaign last Wednesday (Jan. 9) to inform listeners of a new central telephone number for motion picture information during the New York newspaper shutdown, which is continuing into its sixth week with prospects of no immediate settlement.

The campaign, in its first week ran 50 spots on WNBC; 30 on WABC; 24 on WQXR and 25 on WCBS. The promotion is in addition to special campaigns by individual movie companies during the strike. Advertising agencies represented are Monroe Greenthal, Donahue & Coe, Lennen & Newell and Charles Schleifer.

A presentation by the Television Bureau of Advertising before the National Retail Merchants Assn. on Jan. 10 pointed to the strikes in New York and Cleveland as illustrating the importance of planning retail store promotions far in advance.

A "first aid kit" for retailers, designed to help stores use tv in emergency situations such as the current strikes (AT DEADLINE, Dec. 24, 1962) was described by Howard P. Abrahams, vp in charge of retail sales, and Louis Sirota, retail sales director. While the idea for the kit, designed to help retailers keep their costs down, originated during the strikes, TVB expects it will have general use as well.

**Tourism Benefits** - Radio and tv is also gaining increased advertising benefits from tourism.

The Florida Development Commission has diverted its newspaper advertising in New York City because of the strike, to radio and tv. Its schedule includes 40 20-second spots on two radio stations and 48 20-second spots on a third outlet from Jan. 7 through Feb. 1. On tv, the commission purchased an extensive one-minute spot campaign on NBC-TV's Today show from Jan. 7 through Feb. 27. Advertising agency: Louis Benito, Tampa, Fla.

WQXR introduced a half-hour weekly program featuring reviews of recent record releases by newspaper critics.

The program, called The Weekly Record Review of the Air will be broadcast Sundays from 12:30-1 p.m. and is being presented as a public service by RCA Victor, which will not have any commercials in the time period.

At WCBS-TV, Bill Leonard was named executive producer of the station's expanded news coverage. Mr. Leonard, who is also executive producer of the CBS News Election Unit, will be assisted by the unit's producer, William Eames, and production manager, Alvin Thaler.

WHLI Hempstead, N. Y., announced that McCreory's department stores are posting "WHLI News Headlines" in their street-level windows and distributing it at their cafeterias at lunch time.

Meanwhile, the strike itself has been taken to court by thirteen idle pressmen who charge in an antitrust suit that the Publishers Assn. of New York and the nine daily newspapers now closed, entered into a conspiracy in restraint of trade. The suit for $6,675,000, claims the publishers agreed that a strike of one union against any newspaper would be treated as a strike against all nine newspapers. The printers struck only four of the nine, but the other five closed their New York City operations.

The suit was filed Thursday (Jan. 10)

---

**Broadway show producer undaunted by strike**

When the New York newspapers begin publishing again they "definitely" won't get as much advertising from Broadway theatre producer David Merrick.

Mr. Merrick told Sam A. Donaldson of WTOP-TV Washington in an interview for that station's Newsnight that the strike "hasn't hurt me at all."

He credited radio and television advertising, purchased since the strike began, for the major part of the $1 million advance sale for his new musical "Oliver." Mr. Merrick, who has waged a battle with the city's seven newspaper critics for several years, said radio-tv reviews of Broadway shows "seem more effective than the other kind."

Mr. Merrick said his other shows — "Tchin Tchin" and "Stop the World I Want to Get Off" — are "both selling out" despite the strike.

---

**PGW 'colonels': Jones in radio, Collins in tv**

Peters, Griffin, Woodward, which annually bestows the "Colonel of the Year" awards on the PGW radio and television salesmen who have shown the most growth in their positions during the year, has honored William O. Jones, Atlanta manager for radio, and Rollin P. Collins, a Chicago tv account executive, for their contributions in 1962. Presentation of scrolls and checks were made in New York (picture at left) to Mr. Jones (r) by R. Preston Peters, PGW president, and in Chicago (picture at right) to Mr. Collins (c) by PGW Midwest sales manager W. Donald Roberts (l) and vice president, William Tynan (r).
COMMANDER BOLT

Through the remote reaches of space, the manned spaceship Prober 10 hurtles along on strange, fascinating journeys. Commander Bolt is in charge each weekday at 5:00 PM. Loyal young South Florida televiewers ride with him.
Strange visitors from space dot the show with excitement. Unusual space creature hand puppets, "Hey There You" and "Iggy", are bound to make an appearance. There is a villain too — the evil "Silvan". It's a space age oriented show designed to sell your products with an array of the finest space and science themed cartoons and serials available: "Super Car", "Rocky and his Friend", the Encyclopedia Britannica film library, "The Space Explorers", "The New Adventures of the Space Explorers" and many others. Add to these exciting films a selling personality — Commander Bolt — and you have a combination designed to attract audience and sell products.

Channel 10 is the ABC station from the Palm Beaches to the Florida Keys.

The typographical union filed damage claims against the individual papers totalling $1,409,000 earlier in the week.
A fact-finding board of three jurists has been conducting an inquiry into the strike since Sunday, Jan. 6. It was to issue a report last Friday (Jan. 11).
In Washington, D.C., Rep. Emanuel Celler (D-N.Y.), chairman of the House Antitrust & Monopoly Subcommittee, explained last week that the

**CONFUSION BETWEEN AGENCY, CLIENT**

K&E’s Stewart says it’s caused by duplication of functions

The “most dangerous” problem that faces advertising today is the misunderstanding and confusion about how advertising functions. David C. Stewart, president of Kenyon & Eckhardt, told a meeting of the Adcraft Club of Detroit last Friday (Jan. 11).

He called for a reassessment of the relationship between advertising agencies and their clients, beginning with “tossing into the ashcan the old ‘partnership concept.’” To replace the partnership principle, Mr. Stewart advocated that agency and client establish ground rules, spelling out clearly the obligations and contributions of each party.

Mr. Stewart recommended that the advertiser be held responsible for overall market planning and the setting of marketing objectives, with the agency responsible for setting advertising goals and objectives, as distinct from marketing goals and objectives.

Pointing out there often is duplication of functions by the agency and the client, Mr. Stewart asserted that “we can no longer afford” this situation in view of the rising costs of advertising. He said K & E estimates, using 1956 costs as a base, indicate that major media costs will rise 19% this year and 23% by 1965. Above and beyond these actual costs, Mr. Stewart continued, there has been a steep rise in the cost of advertising effectiveness, the amount of money it takes to register effective sales messages with the public.

K & E believes the answer to this predicament lies in the “more effective mobilization of advertising manpower and particularly in the more exact definition of advertiser and agency relationships and responsibilities in the total advertising program,” Mr. Stewart declared.

**Agency appointments**

- Motorola Automotive Products Inc., Franklin Park, Ill., to Waldie & Briggs Inc., Chicago, for all national advertising directed to the automotive market.
- Blistex Inc., Chicago, maker of Blistex and Blistik cold sore and lip remedies, to Welles-Morgan Inc., Chicago, for all broadcast advertising.
- Royal York Hotel, Toronto, Canada, appoints Kenyon & Eckhardt Ltd., in that city, to handle advertising and promotion. Royal York belongs to Canadian Pacific Railway Co.
- Trans-Lux Television Corp., New York, has appointed Brownstone Assoc., that city, as advertising agency for Trans-Lux and its subsidiary Television Affiliates Corp.
- Seven Arts Assoc. Corp., New York, has appointed Scope Adv. Inc., that city, as its advertising agency.

**Rep appointments**

- KHAT Phoenix: Ewing/Radio, Hollywood, as its national sales representative. Ewing/Radio specializes in country-western music stations, and now represents four stations: KHOW Pomona, KVRE, Santa Rosa, both California; and KTOO Las Vegas, in addition to KHAT.
- WFKY Frankfort and WMST Mount Sterling, both Kentucky; Grant Webb & Co., New York, as national representative.
- WHLL Wheeling, W. Va.: Ohio Stations Representatives Inc. as representative for Ohio.
- WHJIB Greenburg, Pa., WLEC Sandusky, Ohio, and WTAP-TV Parkersburg, W. Va.: Penn State Reps.
- KWWY Everett, Wash.: Grant Webb & Co. as national representative.
- KPAM Portland, Ore., KETO-FM Seattle, Wash.: Broadcast Time Sales, New York, as national representative.
- KRDG-AM-TV Colorado Springs, Colo.: Adam Young Inc., New York, as national representative.

**Business briefly**

Farmers Insurance Group, through Honig-Cooper & Harrington, Los Angeles, has renewed its sponsorship of Hemingway AM West and Sports West with Hank Weaver for another year on ABC Radio West. The Hemingway newscast is broadcast Mon.-Fri. at 7-7:15 p.m.; the sports cast, Mon.-Fri., at 5:45-5:55 p.m., on ABC West’s 116 stations.

Five advertisers have signed to sponsor Sports International with Bud Palmer, 90-minute sports series in color which started on NBC-TV Jan. 12 (3:30-5 p.m. EST). They are Georgia Pacific Corp. through McCann-Erickson; General Mills through Knox Reeves; Bristol-Myers through Doherty, Clifford, Steers & Shenfield; P. Lorillard through Grey Adv., and Colgate-Palmolive through Ted Bates.
BALTIMORE'S WINTER FAVORITES

Baltimoreans enjoy delicious, mouth-watering oysters for which Maryland is world-famous... the Baltimore Clippers, the new ice hockey team, now playing in the huge new $14,000,000.00 Baltimore Civic Center. And, of course, another winter favorite of Baltimoreans—and Marylanders—is viewing WMAR-TV, Channel 2.

WMAR-TV's wide-range programming reaches viewers of all ages. "Dialing for Dollars," (Mon. through Fri. 9:40 A.M.) Baltimore's oldest continuous telephone quiz show, leads all morning audiences... "Woman's Angle" (Mon. through Fri. 1:00 P.M.) is Baltimore's only women's TV service program... "Bozo the Clown" (Mon. through Fri. 5:00 P.M.) the happy live children's program, which has entertained over 16,000 studio guests... movie viewers see the only late movies in Baltimore programmed 6 nights a week (Mon. through Fri. 11:20 P.M., Saturdays 11:00 P.M.)... the "news" is covered thoroughly and completely by WMAR-TV's staff of top newsmen Jack Dawson, Dave Stickle and Don Bruchey... and now "Hennesey" has come aboard as a winter favorite (7:00-7:30 P.M. Saturday).

Wintertime—anytime—there's more to view on Channel 2! There's more audience, too—and more opportunity to sell your product or service to more people on Channel 2... soon to be telecasting from a completely new facility—Television Park, Baltimore.

**ARB testing new tv-print data comparisons**

**MEDIALOG USES SPECIAL DIARY TO CHECK AUDIENCES**

A new technique for comparing audience exposure to television and print media is being field tested by the American Research Bureau in five major markets, ARB announced last week.

Officials said the proposed new service, called MediaLog, uses a specially developed diary to collect data on number of minutes exposed and frequency of exposure for national consumer magazines, metropolitan newspapers and major newspaper supplements, in addition to television.

Different formats are being used in current tests in Baltimore, Boston, Chicago, Miami and Washington in an effort to find the one best approach for further use. In some markets, validity checks are being run concurrently through telephone and personal interviews.

Jack Gross, ARB agency services manager, said the five-city tests would continue for about two months and that results would then be evaluated and presented to interested industry authorities. He said he hoped the new service could be marketed well within the year.

Mr. Gross said MediaLog would provide basic coverage data and basic duplication data for each medium and also provide comparisons within media and across all media.

The comparisons, he said, will all be on the same base—minutes of exposure—so that there will be "a uniform standard of measurement of duplication and accumulation of audiences within and between media."

The information will be compiled according to selected demographic groups which will offer identification of the audiences in more detail than ever available before, ARB asserted.

Mr. Gross expects to describe the MediaLog technique in detail in a speech at the Newspaper Advertising Executives Assn. convention in Chicago Jan. 22. An explanatory brochure is being prepared for general release at the same time.

**Kemper, Texaco buy ‘Clambake’ golf**

Kemper Insurance Group, through Clinton E. Frank, Chicago, and Texaco, through Benton & Bowles, New York, have signed as sponsors of two live telecasts of the National Pro-Amateur Golf Championship, better known as the "Clambake Clambake," from the Pebble Beach Country Club at Monterey, Calif., over a special "Clambake Network" next Saturday and Sunday. As of last Thursday, 93 tv stations across the country, including affiliates of all three tv networks as well as a number of independent stations, had made firm commitments to carry the broadcasts at 12:30-1:30 p.m. Saturday (Jan. 19) and 2-2:30 p.m. Sunday (Jan. 20).

The special network was organized at the instigation of Robert Breckner, president of KTTV (TV) Los Angeles, who suggested it to Larry Crosby of Bing Crosby Enterprises as soon as ABC-TV, which had broadcast the pro-amateur finals in previous years, indicated that it would not do so this year. Working with Dick Bailey’s Sports Network, Mr. Breckner and Mr. Crosby started lining up the stations and they are confident that by the time of the broadcasts more than 100 tv outlets will be connected to the "Clambake Network."

KTTV is sending five mobile tv units to the Monterey Peninsula to pick up the proceedings. Bob Hiestand will direct the telecasts. Bing Crosby, whose Youth Fund is the recipient of all proceeds from the annual pro-amateur tournament, will be the special sports commentator, assisted by Jimmy Demaret, who won the tourney in 1952; Ralph Kiner, former outfielder of the Pittsburgh Pirates and Bill Welsh, director of sports and special events for KTTV.

Kemper and Texaco will each sponsor one-third of the two special broadcasts. It was anticipated that a third sponsor would join them to provide full sponsorship of the 2 1/2 hours of golf as played by the nation’s top professionals and their amateur partners from the upper ranks of the entertainment world.

**GOP names Burnett as advertising agency**

The Republican National Committee announced last week the appointment of Leo Burnett Co., Chicago, to handle GOP advertising for two years, beginning Jan. 1, 1963. This includes the 1964 Republican convention and the presidential campaign. The agreement includes the placement of all advertising, print, radio and television. In addition Burnett Co. research and public relations staffs will be available to the Republican National Committee during the contract period.

In the 1960 presidential campaign, the GOP spent between $2 million and $3 million in advertising, with BBDO handling the account.

The Democratic National Committee has not yet announced the appointment of an agency to handle its advertising for the coming campaign. In the 1960 presidential campaign, the Democrats spent over $2 million in all media for advertising through Guild, Bascom & Bonfigli.

**Equitable Life plans spot radio campaign**

The Equitable Life Assurance Society of the U.S., which last year began testing the use of radio for local support to Equitable agents, will begin a widespread spot radio campaign in early...
An O. Henry "Beginning" — on display during the O. Henry Centennial Observance in Greensboro, North Carolina, early home of the famous American storyteller. Along with other exhibits representing Greensboro in the 1880's, WFMY-TV's "Good Morning Show" host Lee Kinard and his daughter see a replica of the Porter family drug store, where William Sidney Porter worked and found experiences for his later life as O. Henry. Today, Greensboro encourages creative talent and satisfies interest in the arts within an educational and cultural climate provided by five major colleges, two symphony orchestras, an opera association, numerous choral organizations, museums, writers' clubs, community theatres, art galleries, a unique arts program for children, a summer music camp and a "built for tomorrow" auditorium-coliseum. This is part of the Greensboro story of progress and expansion . . . a story that's repeated throughout WFMY-TV's 51-county coverage area. For growing Piedmont North Carolina and Virginia, there's no end to this story.

Represented nationally by Harrington, Righter & Parsons, Inc.
“Public interest” and “private profit” ... two phrases often used, particularly in broadcasting, and sometimes thought to be conflicting and incompatible. Corinthian believes them to be inseparable and completely compatible.

Profit is the mainspring of this country’s economic system, a system we have chosen to best serve most of the needs and wants of the people. It provides our lipsticks and our locomotives, our matchbooks and our magazines, our baby bottles and our broadcasting.

The purpose of the competitive profit system is not to enrich the few, but to responsively serve the many. Those who serve best profit most. This is the incentive which encourages people to build better mouse traps ... to operate more efficiently ... to try to guess what the consumer will want tomorrow and the day after tomorrow.

At the heart of the profit system is a simple idea: most needs are best met by letting the people themselves make their own decisions ... the free choice of those who use and the competitive response of those who produce. The alternative is a master plan developed and directed by government, a solution now being questioned even within the walls of the Kremlin.

Corinthian believes that this competitive profit system, although less than perfect like every human institution, has served us all well. It has provided an unparalleled standard of living and contributed importantly to the maintenance of individual freedom.

In our judgment, “private profit” is clearly in the “public interest.”
February. More than 100 markets will be used, according to Foote, Cone & Belding Inc., New York, Equitable's agency.

FC&B said a key part of the campaign will be the promotional efforts conducted jointly by Equitable's field offices in cooperation with the stations chosen for the spot schedule. Martha Sykes Murray is the agency timebuyer for the campaign.

Butter-Nut coffee makes first tv network buy

Duncan Coffee Co., Houston, Tex., through Tatham-Laird, has signed for the first network television advertising campaign for its Butter-Nut brand with a regional schedule in three ABC-TV evening programs.

The Butter-Nut campaign, which begins this month and continues through September is for ABC-TV's Going My Way, The Sunday Night Movie and Premiere and is set for a regional lineup of more than 65 markets from the Midwest to the West Coast.

AFA-AAW committee to polish adman's image

Formation of a national committee to promote advertising's image and explain its role in a free enterprise system has been announced jointly by the Advertising Assn. of the West and the Advertising Federation of America.

The 20-man group of media, agency and business men, with Peter Folger of J. A. Folger & Co., San Francisco, as national chairman and King Harris of Fletcher Richards, Calkins & Holden as national plans chairman, is preparing materials for all media on the theme, "Advertising is the Voice of Free Choice." Kits containing such material will be sent to 185 advertising clubs and members of the two sponsoring organizations.

All creative work for the campaign is being contributed by committee members and prices for the various media materials will represent only actual cost of the items.

Nebraska plans 6-station educational tv net

$3 MILLION MICROWAVE SYSTEM WOULD LINK STATIONS

A plan to serve over 90% of the population of Nebraska with an educational TV network was revealed last week by the Nebraska State Committee on Educational TV. The plan follows a recent action by the FCC (Broadcasting, Nov. 12, 1962) which reserved six channels in that state for non-commercial educational use.

Proposed stations on the six reserved channels would be linked together with KUON-TV Lincoln by microwave facilities, at a cost of more than $3 million. The etv committee, which was appointed by Gov. Frank Morrison, will request funds to start the network from the state legislature.

The project, which will be carried out in four steps, will (1) move KUON-TV's transmitting facilities to a new 1,000 ft. tower, connect the Lincoln and Omaha studios, and activate ch. 3 Lexington, connecting it with the transmitting facilities of KUON-TV; (2) activate ch. 9 North Platte and link it with Lexington station, and activate ch. 13 Alliance, connecting it with North Platte; (3) activate ch. 25 Albion connecting it with KUON-TV facilities, activate ch. 7 Bassett linked to Albion facility; (4) begin operating stations as a network and add translators where the etv network doesn't reach.

In appraising the cost to Nebraska Dr. John C. Schwarzwalder, chief consultant on the plan, said that about $750,000 "might be received from the federal government" with the state paying the remainder. He also estimated that if the state operates its own microwave facilities the network would cost $255,916 annually to operate.

The etv committee recommended that control of the network be given to a state commission, but that operation be contracted to the U. of Nebraska. The state will pay costs of the actual operation with the university supplying programming.

NAB board members to pick award winner

A recipient of the NAB's Distinguished Service Award for 1963 is expected to be picked this week at the joint meeting of the NAB boards in Phoenix. A special committee named to recommend a winner will report at that time. Last year's winner was Edward R. Murrow, chief of the USIA.

Members of the special committee include James D. Russell, KKTV (TV) Colorado Springs, Colo.; Ben Strouse, WWDC Washington; Willard Schroeder, WOOD-AM-TV Grand Rapids, Mich., Gordon Gray, WKTV (TV) Utica, N. Y., and George T. Frechette, WFHR Wisconsin Rapids, Wis.
ABC-TV affiliates and network meet in San Juan

ABC-TV and American Broadcasting-Paramount Theatres executives met with the board of governors of the ABC-TV Affiliates Assn. at the Caribe Hilton Hotel in San Juan, P. R., Jan. 7-8.

Dille Jr., WSJV-TV South Bend-Elkhart, Ind., chairman; D. A. Noel, WHBQ-TV Memphis; Howard Maschmeier, WNHC-TV New Haven, Conn.; William W. Warren, KOMO-TV Seattle, secretary; Martin Umansky, KAKE-TV Wichita, Kan.; L. T.

Changing hands...

ANNOUNCED - The following sale of station interest was reported last week subject to FCC approval:

- WEET Richmond, Va.: Sold by Burton Levine to J. Olin Tice Jr. for $300,000. Mr. Tice also owns WCAY Cayce, S. C.; WKTC Charlotte, N. C.; WBAZ Kingston, N. Y., and WFTC Knoxville, Tenn. Mr. Levine retains ownership of WROV Roanoke, Va. WEET operates on 1320 kc with 1 kw daytime only. Broker was Blackburn & Co.

WNEW strike settled

A broadcast engineers strike at WNEW New York ended Wednesday (Jan. 9) following 10 days of negotiation between the station and Local 1212 of the International Brotherhood of Electrical Workers.

A wage increase from $213.20 to $225 weekly to come in the last two years of a new five-year contract, during which none of the engineers can be laid off, was included in the settlement terms. The terms also involved a pension plan and increases in paid vacation time based on seniority.

Arundel buys newspaper

NAB kits available for National Radio Month

Radio's mobility and its ability "to serve a nation on the go" will be emphasized during the 1963 observance of National Radio Month next May. The month's events will be based on the theme, "Radio—the Mobile Medium..." Promotional kits for the event are being prepared by John M. Couric, NAB public relations manager. Scott-Textor Productions, New York, has been retained for the second straight year to produce jingles in varying tempos and styles to fit the wide range of American musical tastes.

Kits for radio month will include live spots, program and promotion ideas and suggestions, a speech text, filler facts and other material. Blank proclamations have been prepared. Kits and jingles will be provided free to NAB members.

Empire State Bldg. fire cuts off two stations

Two stations in New York last week temporarily suffered the effects of a series of electrical wiring fires in the Empire State Bldg., where the stations have their transmitters.

WNBC-TV and WNEW-FM were forced off the air for a short time early Jan. 9 when water from fire hoses damaged one station's equipment, and smoke caused a delay in transmission and forced engineers from the other station to leave the building.

WNBC-TV, which normally signs on the air at 5:55 a.m., began its broadcast day a half hour late. Two engineers, on duty in the control room at 4:30 a.m., were forced to vacate the building because of dense smoke.

WNEW-FM, which maintains an automatic, remote control system on the 82nd floor of the Empire State Bldg., went off the air at 6:01 a.m., when water shorted the system. WNEW-FM went back on the air at 9:57 a.m. The station duplicates WNEW-AM's 24-hour operation.

Other New York radio and tv stations which operate from the Empire State Bldg. were not affected by the fire.

Media reports...

Corinthian agency • Van Brunt & Co., Advertising-Marketing Inc., New York, has been named to handle advertising and promotion for Corinthian Broadcasting Corp. Firm's stations include KHOU-TV Houston, KOTV (TV) Tulsa, KXTV (TV) Sacramento, WANE-AM-TV Fort Wayne and WISH-AM-TV Indianapolis.

America's Most Experienced Media Brokers
An fm stereo success story: KPEN (FM)

Two young San Franciscans who have made fm stereo history lay their success to high quality programming and high quality stereo.

The two, both 27 years old, former Stamford U. campus radio operators, are Gary Gielow and James Gabbert, owners of KPEN (FM) in the Bay area (on 101.3 mc with 46 kw). They told their story last week to a luncheon gathering in Washington, sponsored by Electronic Industries Assn., and which included four of the seven FCC commissioners, staffers and newsmen.

Wonder of their story is that they have been making a profit with fm stereo; they claim they account for 55% of the gross revenues of all the fm stations in the San Francisco-Oakland market. Although they declined to indicate their profit, they did say that two months after they inaugurated stereo, in August 1961, the influx of additional advertisers paid for the outlay they incurred for additional equipment.

All this in the light of a 1961 gross of $300,244 and an overall loss of $156,000 by the 10 fm stations in the area, as reported by the FCC.

The young men told how they had scraped together $11,000 to put KPEN on the air in 1957 and how after they began stereocasting the station began appearing in program rating surveys. During some segments of the broadcast day, they said, KPEN is fourth in share of audience, including am listeners. A Sunday morning religious program, the choir of Grace Church on Nob Hill, has been receiving a rating of 8, they excitedly announced.

Symphony Live • Latest venture, and already a cultural and commercial success, began last month when KPEN broadcast live the San Francisco Symphony Orchestra. This was hailed as a major first and a virtuoso high fidelity triumph for fm stereo. The three-hour program was jointly sponsored by Merrill, Lynch, Fennel & Smith and by Safeway Stores. Safeway has agreed to take half sponsorship of the remaining programs in the symphony series.

The next big step, now in the planning stage, is the presentation of live drama in stereo.

The key to their success, both emphasized, is "sparkling fidelity." This is accomplished, they pointed out, by a high standard of technical excellence, including maintenance that refuses to accept less than the best and the upgrading of commercial equipment until today the gear is "almost custombuilt," and program ideas. This has brought them 65 regular advertisers.

Both are energetic and enthusiastic. "Stereo has put radio back into the living room for the first time since television," Mr. Gabbert said.

Back in the 1940s, when FCC Commissioner Robert T. Bartley (c above) was a young executive with the BBC in London, he persuaded that organization to enter fm, then a new and untried method of broadcasting. Over the years fm has had relatively tough sledding. Last week in Washington, and 20 years later, Commissioner Bartley welcomed the growth that has made the Bay area stations a startling success of fm stereo broadcasting. They are Gary Gielow (l) and James Gabbert (r). Their station is KPEN (FM).
The GEMINI process is an exclusive MGM Telestudios development which produces a twin high quality 16mm film simultaneously with the video tape.

Pardon the slogans, but we've been working on this for a long time and we're really excited. At MGM—and only at MGM—the kine finally is dead; not just reworked, disguised, or renamed. It's dead! The tape industry has worn this albatross for too many years. We at MGM Telestudios decided that trying to improve it further was an exercise in futility. So we focused our energies in a completely new direction—and perfected GEMINI.

GEMINI is a direct film process, capable of producing unlimited 16mm GEMPRINTS.*

GEMINI is made as a twin product to MGM Video Tape, shot scene-by-scene, simultaneously.

With the last roadblock removed by MGM Telestudios you can now have the superiority of tape for network and major markets, and supply local markets with superb 16mm GEMPRINTS.

Today, tape, more than ever before, is TV's prime production tool. For more information, call Bob Fierman, Sales Manager, LO 3-1122

*Trademark

This is one of a series of major announcements from MGM Telestudios. Look for Part II of The Anatomy of PRIMACY.
FCC FREEZES HIT EQUIPMENT MAKERS

Hardest hit are those making only broadcast equipment

Production and sale of broadcast equipment has been slowed down by the FCC's am and fm station freeze orders. A checkup of companies engaged exclusively or primarily in broadcast equipment indicates a marked slowdown in business in the last half-year but firms with widely diversified electronic lines are not as seriously affected.

The FCC's partial freeze on new am applications was imposed last May 10. Hopes that it will be lifted this year are hinging on whatever action the commission takes as a result of its two-day hearing last week on am radio overpopulation (story page 29).

The fm freeze is of more recent origin. It was imposed last Dec. 21 but does not affect some of the northern plains and mountain states where there are few fm stations. This freeze was imposed when the commission drew up a proposed fm allocations table similar to the tv table. The FCC's proposed fm allocations table provides about 2,730 fm assignments in the continental U.S., including the present 1,200 stations on their present channels.

Last week Continental Electronics Products Co., a subsidiary of Ling-Temco-Vought, Dallas, reorganized its original Electron Corp. line. Despite the freeze, LTV announced Continental and the top corporation are looking to expanded business. Gifford K. Johnson, president of LTV, said Continental's main sales items are the line of commercial broadcast transmitters formerly produced by Continental Mfg. Co. and purchased by almost 100 radio stations around the world. J. O. Weldon is president of Continental Electronics Products as well as Continental Electronics Mfg. Co. and Continental Electronics Systems.

Thomas B. Moseley, Continental Electronics sales director and vice president-general manager of Continental Electronics Products, said, "We expect this line of transmitters to account for the bulk of our business in 1963 and to enable us to grow rapidly in the years ahead." He predicted 1963 sales will exceed $1 million. The tv line is concentrated on closed-circuit equipment with emphasis on new low-cost cameras. The educational tv field is described as one of the principal markets.

While official comments were not available, it's understood such major electronics corporations as RCA, Collins and General Electric Co. are placing emphasis on some of their nonbroadcast lines because of the freeze and the lack of a new-station market.

On the other hand some firms producing radio and transmitter accessory items have reported fair to good business despite the freeze.

The freeze on new am stations has caused economic injury to the manufacturers of radio equipment, Parker S. Gates, president of Gates Radio Co., told the FCC last week.

In a letter read into the record at the FCC-NAB-industry radio conference last week, Mr. Gates said that "to believe that the problem is caused by overpopulation in am radio stations is, in my mind, very questionable." He said that Gates has had to release many employees since the freeze was imposed and that he was sure the same is true of other manufacturers. The opportunity to enter broadcasting, at a reasonable capital investment, should not be denied where frequencies are available, he said.

"To a growing country, limiting broadcasting is to an extent like limiting the number of telephones," Mr. Gates said. "It is retarding a vital communications medium."

Prices raised 3%-16% on GE tv equipment

General Electric raises the prices of some of its closed circuit and broadcast television cameras, effective today (Jan. 14).

The increases, ranging from 3% to 16%, reflect the rising costs of manufacturing transistorized video equipment, according to H. E. Smith, manager of marketing, technical products operation.

The equipment affected by the increases are GE's TE-14 and 15 closed

ABC buys RCA color tv tape recorders

Frank Marx, president ABC Engineers (I) and Charles H. Collinge, division vice president and general manager for RCA, examine the new RCA TR-22. Purchase of 12 of these colorized tv tape recorders by ABC-TV, for use in Chicago for network feeds, was announced last week.

Reported to be the "first completely transistorized broadcast tv tape machine in the television industry," the new equipment is approximately half the size of conventional recorders and effects a 50% reduction in power needed for operation.

Picture stability of the recorders is said to be plus or minus one tenth of a milliinch of a second. Instrumentation permits servicing from front of the recorder and a signaling system indicates faulty operation during recording or playback and shows where malfunction may have occurred.

EQUIPMENT & ENGINEERING
Little Red Schoolhouse

The little red schoolhouse cliche for Eastern Iowa is as outdated as the concept that Eastern Iowa is exclusively bucolic.

Country boys and girls—1,849 of them—attend this consolidated high school. It’s down the road a piece from Cedar Rapids, towards Iowa City. It’s as modern as most any modern metropolitan area school, perhaps more so. Students come from families whose standard of living surpasses most of nation’s. While Iowa’s 34.8 million acres of tillable soil produce about ten percent of the nation’s food supply, personal income derived from agriculture in Iowa accounts for something like 25% of the total; income derived from manufacturing, trades, and services accounts for the rest.

Iowans are neither exclusively farmers nor exclusively manufacturers. They are exclusively people—as aware of new products and new ideas as the most sophisticated cosmopolite.

WMT-TV covers over half of the tv families in Iowa, and dominates three of Iowa’s six largest cities.

WMT-TV • CBS Television for Eastern Iowa • Cedar Rapids—Waterloo

BROADCASTING, January 14, 1963
Kinescope eliminated in tape-to-film move

A new tape-film system, eliminating the need for a kinescope for filmed prints of taped commercials and programs, was revealed by MGM Telestudios at a news conference last Wednesday (Jan. 9). The kinescope is a "hot print" off the camera tube.

The system, dubbed "Gemini," consists of a RCA TK-60 television camera which shares its lens with a 16-mm motion picture camera mounted beside it. A device (beamsplitter) lodged behind the lens, splits the light before it enters the camera, thus allowing simultaneous operation on video-tape and 16mm film.

Production of a kinescope required that the image pass through two cameras, creating a distortion of the original picture.

"Elimination of the kinescope removes what agency people consider the last remaining obstacle to commercial production by tape," George K. Gould, president and general manager of MGM Telestudios, said.

Mr. Gould explained that film prints of tape commercials are used by advertisers in markets not equipped with tape recorders. He pointed out that advertisers and their agencies, while satisfied with tape for major markets, have been unhappy about using kinescope in no-tape markets.

Mr. Gould said MGM Telestudios has acquired exclusive rights to "Gemini" for the three years from Warren R. Smith Inc., Pittsburgh, a motion picture laboratory, which holds the patent on the system. Warren R. Smith, president of the firm, has joined MGM Telestudios as director of technical development.

BACK IN BUSINESS
Relay, Telstar transmitting television programs to Europe

America's two communications satellites Relay and Telstar, have proved they are alive and perking by transmitting tv programs from the United States to Europe.

Last Wednesday Relay was used to transmit portions of the NBC Today show to Europe, showing ceremonies the previous night at the National Gallery of Art in Washington when President Kennedy opened the display of France's Mona Lisa.

The program was beamed to Relay from the AT&T ground station at Andover, Maine. Relay sent it on to Goonhilly Downs in England and Pleumeur-Bodou, France, where it was distributed to tv stations in those countries. Reception was termed "excellent" in France and there was "nothing wrong" in England. The transmission also was monitored by the Italian ground station at Fucino.

Also for the first time as a live U.S. program, the ceremonies were shown behind the Iron Curtain to home viewers in Czechoslovakia and Hungary via Intervision, the East bloc's tv interconnection system.

Later in the morning another first was established when scenes of New York firemen fighting the blaze in the Empire State Building were seen in England and France, also via Relay.

The first successful trans-Atlantic test for Relay, placed in orbit in mid-December but silent since then because of power drain, took place Jan. 4 when a tv test pattern was transmitted from Andover and received in France. During the afternoon pass, the ground station of the National Aeronautics & Space Administration at Nutley, N.J., transmitted and received a second tv test pattern.

Transistor Faulty = The power drain which Relay began experiencing immediately after its Dec. 13 launch was traced to a transistor in the No. 1 transponder. The faulty transponder was isolated, thus eliminating the power drain, and after a period during which the batteries built up a charge, the satellite was put into service by using the No. 2 transponder. All the circuits in Relay, built for NASA by RCA, are duplicated.

Telstar, silent for the last six weeks, was restored to life Jan. 4, also, when a live tv exchange took place between Andover and England and France.

In overcoming Telstar's troubles, Bell Lab engineers duplicated the faulty command circuit, pinpointed the malfunction at one of the transistors in the satellite's command decoders, and diagnosed its malady as excessive radiation. The engineers devised special command signals and voltage-removal treatment to restore normal command functions. The success of the trick command pulse, it was pointed out, may also have been due to the fact that Telstar had risen in orbit to weaker areas of the Van Allen Belt. The Van Allen Belt is a girdle of high density radiation surrounding the earth.
Carlton Fredericks sells the savor and nourishment and that's what sells the bread. Ask Levy Bread and 800 other advertisers who have sold through CARLTON FREDERICKS' syndicated “LIVING SHOULD BE FUN” for over 22 years on hundreds of satisfied stations.

Now, Carlton Fredericks has far greater audiences than ever in his public-serving career. In addition to his syndicated broadcasts, carried on many of America's leading radio stations, he has a thrice-weekly feature on American Broadcasting Company's “Flair,” heard on some 290 outlets. Fredericks also has a syndicated newspaper column, carried in the New York Mirror, among others, and is currently cutting a unique LP album for Epic Records on nutrition, to be released in the near future.

"LIVING SHOULD BE FUN" is now available in most markets, on an exclusive basis to qualified stations. Formats range from 45 minutes (as on WOR New York) to 25-minute, 15-minute and 5-minute programs, to 90-second spots, similar to the “Flair” ABC network segment. (Now also available is a new series of programs for FM stations, in format designed for the medium's special audience.)

Build responsive audiences with responsible programming. Write, wire or call Carlton Fredericks Productions, Suite 12G, 211 East 53rd Street, New York 22, N. Y., PL 3-4241 for your audition tape today!

Facts and figures on television reruns

Second runs are by far the most important of all reruns of tv programs, according to Chester L. Migden, assistant executive secretary of the Screen Actors Guild. Reporting to the SAG membership, Mr. Migden said that during last year approximately half of all rerun payments came from second runs. Over a six-year span, he said, actors have collected $12.8 million from second runs to $7.3 million from third runs of programs.

"Of course, second runs pay a higher percentage under the contract than subsequent runs," he said, "but this is not the sole reason for their big dollar lead over other runs. The prime reason is that there are more second runs than any other run. In 1961, for example, there were 2,600 episodes which had second runs, while third run episodes numbered 1,875. We find that in any year second runs pile up a substantial lead," he added.

Pointing to a consistent downward trend as the runs increase, Mr. Migden cited 1961 as typical: "Second runs produced $2,319,000; third runs produced $1,036,000; fourth runs produced $653,000; fifth runs produced $498,000; sixth runs produced $271,000; and in episodes, second run, 2,600; third run, 1,875; fourth run, 1,525; fifth run, 1,125; sixth run, 675."

"Each year examined produced similar results. The case for early runs is even more convincing when we consider that $20.5 million have been collected for second and third runs out of a total of $27 million for all reruns since 1956."

Mr. Migden contrasted the success of the SAG "early pay theory," as opposed to that of "extended or stretched payment over innumerable runs," such as the Writers Guild, who spread their 140% rerun payments over 15 runs. "What happened was that they found themselves deprived of payments as runs stopped short of the 13th run and they found vastly increased collection and policing problems. They found bankrupt and near-bankrupt producers they would have collected from years before had they stayed with six runs. After this experience, they reverted to payment for the first six runs."

"Many of us used to take for granted that most shows played through and beyond the sixth run," Mr. Migden stated. "The facts just do not support it. There have been only 36 series out of some 600 made that went through six runs."

---

TV MISINTERPRETED?
Writer says critics of tv seek alternative in etv

Critics of television have misinterpreted the nature of television as an "economic institution" and as a medium of information and entertainment. So says Richard Schickel, writing in the December 1962 issue of Commentary, published by the American Jewish Committee. Mr. Schickel notes that most critics of television have not "fallen silent, apparently awed by the failure of their mass attacks."

Mr. Schickel thinks the critics are concentrating on propaganda for educational television, "hoping to make it a true alternative to the commercial variety, as fm broadcasting has become for a minority of serious radio listeners."

Educational broadcasters, he adds, have difficulty finding money sources for programming competitively and have done little to demonstrate that they can use "good facilities effectively."

Mr. Schickel said he conducted his own survey in New York on the news, documentary, and public affairs programming of the three network outlets (WABC-TV, WCBS-TV and WNBC-TV) one week last fall. He notes that between 6-11 p.m., Sunday-Saturday, the stations had 105 hours of time available.

In his survey, Mr. Schickel found the stations devoted 19% of hours to programs similar to those on the educational channel, and he commented, "most of them were better shows." (Entertainment programs, such as The Defenders, which may have had information of educational value, were not counted as educational-type programs.)

Thus, he said, commercial channels devoted nearly 20% of their prime time to educational tv, "which seems a reasonable proportion to spend on uplift and information." His conclusion is that "educational television mainly duplicates a service already being performed without noticeably improving the quality of that service."

Mr. Schickel recommends that criticism of commercial tv be "alive to the possibilities of the medium in its own right" instead of using critical "standards borrowed from other media."

He also suggests that (1) educational stations ought to spend less time discussing other arts and more in experimenting with the television medium, and (2) commercial tv ought to invest some of its time and money in new experimentation.

Second 'Briefing' scheduled

"State Department Briefing: Disarmament," a program featuring three U.S. officials directly concerned with disarmament, will be telecast later this month and in February on the National Educational Television network (NET) and on Time-Life stations.

The video taped program features statements by the experts and a question-and-answer period. John Steele, chief of the Time-Life Washington bureau, is moderator.

The program will be shown in three stages: the first group of stations will broadcast it Jan. 14, the second on Jan. 28 and the third on Feb. 11.

The briefing is the second in a State Department series entitled State Department Briefings. The first broadcast was shown in September and October.

Intermountain Network has five news bureaus

Intermountain Network Inc., serving 65 radio stations in eight mountain states, announced last week it had completed formation of full-time news bureaus in five of them.

Intermountain News Director Bruce Miller of Salt Lake City will supervise the bureaus in Colorado, Idaho, Montana, New Mexico and Wyoming. The network provides three closed circuit broadcasts from the state bureaus each day for use in locally originated member-station newscasts and a mid-day regional wrap up for all members featuring reports from each of the state bureaus.

The bureaus: Denver, Colo.: KBTR news director Hal Starr; Boise, Idaho: KGEM news director Wendell Weaver; Helena, Mont.: KBLL newsman Terry Bass; Albuquerque, N. Mex.: KDEF newsmen Vern Rogers and Bill Sexton; Casper, Wyo.: KVOC news director Jack Fairweather.
What color tape playback system takes up only 5 1/4" of rack space?

Ampex Colortec color adapter eliminates a complete extra rack of electronics; it fits into a 5 1/4" panel on your Videotape recorder. It gives you color. Bright, beautiful color—with full bandwidth luminance and chrominance signals. Sharp black and white, too. And it's accurate to 3 parts per billion. The luminance and chroma are never separated but are processed together so that the picture is synchronous to 3.58 mc subcarrier to within ± 3 nanoseconds. Furthermore, it's the only color recovery system that meets N.T.S.C. standards.

Operation? Extremely simple with only two principal controls. What do these facts indicate? Simply this: even if you aren't contemplating color transmission yet, Colortec color tape playback system should figure in long-range plans. For details write the only company providing recorders and tape for every application: Ampex Corporation, 934 Charter St., Redwood City, Calif. Sales, service engineers throughout the world.

A tearful parting

It was an emotional scene as James C. Petrillo ended a 40-minute recitation Tuesday of the highlights of his 40-year iron-man rule of Chicago Local 10 of the American Federation of Musicians. His unexpected appearance and spontaneous talk at the installation of new Local 10 officers brought members to their feet in tribute and stirred frequent interruptions of applause.

Mr. Petrillo and nearly all of the Local 10 incumbent officers were voted out in a surprise election upset Dec. 4 by a rebel group headed by society bandleader Barney Richards (Broadcasting, Dec. 10, 1962). Chicago Local 10 boasts 11,000 members and a $5 million treasury. Mr. Petrillo, now 71, retired as president of the national AFM in 1958 but since his Local 10 defeat he has been hired by the AFM as a consultant and will be paid an annual salary of $10,000, a pension of the same amount, and $3,000 expense account plus limousine and chauffeur.

James C. Petrillo

Pay-tv proviso sought by SAG

The membership of the Screen Actors Guild has approved a collective bargaining contract negotiating policy for theatrical films which does not seek wage increases or changes in working conditions. But the policy will insist on the right to re-open a “new contract when direct production for pay television becomes imminent.”

Present SAG contracts provide that pay-tv is “merely an extension of the theatrical boxoffice,” according to a SAG statement.

Guild members approved the new policy in a mail referendum by a 5,279 to 188 vote. Present SAG contracts with motion picture producers expire Jan. 31. The Guild’s tv film contract runs until June 1964.

Columbia U. student fm syndicates programs

WKCR (FM) New York is the student voice of Columbia U. in that city and has built a high level audience through quality programs originated by the station staff. Reaction to its programs have been so good, the station has reported, that it has decided to offer seven of its weekly series to educational and commercial radio stations throughout the country.

Tapes, sold at cost, have already gone to WHK Cleveland, KGMS Sacramento, KCVN-FM Stockton and KULA Honolulu. Prices are $2.95 for half-hour programs; $6.75 for hour-long programs.

The series currently being syndicated:

- United Nations Review, Our Civil Liberties, Ayn Rand Speaks, World of Science, World Art, all 30 minutes, and Blueprint for Disarmament and Music Through the Ages, both one hour.
- Information can be obtained from: Director of Syndication, WKCR (FM), Columbia U., New York 27, N. Y.

Country Music Assn.

Country Music Assn. to meet Jan. 24-25

Officials and board directors of the Country Music Assn. will convene in New York, Jan. 24-25 for their first quarterly meeting of 1963 with their newly elected president, Gene Autry, presiding.

On the meeting’s agenda are tactics for “crashing” Madison Avenue and plans for a combination building and “Country & Western” museum. Also to be discussed is a second station survey on country music programming.

A 1961 survey of U. S. and Canadian am stations conducted by Country Music Assn. showed 84 outlets with a full time country and western format.

CBS announces data for news fellowships

The opening of the seventh annual competition for eight CBS Foundation news fellowships for the academic year 1963-64 was announced last week by the foundation president, Ralph F. Colin.

Applications, which may be submitted until March 1, will be accepted from news and public affairs staff employees of CBS News, CBS-owned radio and television stations, CBS radio and television affiliates, non-commercial educational stations and from teachers of college courses in news and public affairs techniques.

A program of lectures is offered as well as a year of study at Columbia U. The grants average $8,000 to cover university costs and living expenses. Information is available at CBS Foundation Inc., 485 Madison Ave., New York.

Film sales...

Program notes...

NBC-TV signs Mary Martin • Mary Martin has been signed to a contract to appear in a number of special NBC-TV programs, Robert K. Kitner, NBC president, announced last Thursday (Jan. 10). The number of shows was not disclosed. NBC-TV will present Miss Martin in “Peter Pan” in a two-hour color program on Feb. 7 (7-9 p.m.).

New MGM pilot • MGM-TV is scheduled to start filming today (Jan. 14) The Lieutenant, a new hour-long dramatic series, at Camp Pendleton, Calif. Buzz Kulik is directing the pilot, written by Gene Roddenberry, who will also produce the peace-time Marine Corps series for Arena Productions. Norman Felton, executive producer of MGM-TV’s Dr. Kildare and The Eleventh Hour, will serve in that capacity for

Hope to get IRTS award...

Bob Hope was named today (Jan. 14) to receive the International Radio & Television Society’s 1963 Gold Medal. In announcing the selection by the IRTS board of governors, William K. McDaniel, president, said that the decision was based on the performer’s contributions to broadcasting and international good will.

Mr. Hope’s radio career began on NBC Radio in 1938 and his television work, in 1950 on NBC-TV. Presentation of the award will be made at the 23rd anniversary banquet of the IRTS, March 6 in New York.
the new series, the fourth put into production at MGM-Tv for 1963-64. Others are: The Travels of Jannie Mac Pheeters, The Human Comedy and Mr. Novak.

Extras, producers may arbitrate spat

A dispute by Screen Extras Guild with the producers of films for television over the proper pay for stand-ins who work on more than one episode of a series in single days seems headed for arbitration after principals failed to reach a settlement in negotiations.

The union is standing firm on a provision of the SEG contract prohibiting extras from working in multiple pictures for the same day's pay. The producers say the ruling was not intended to apply to stand-ins working on series for which two or more episodes may be filmed together, noting that the stand-in is not on camera and does not appear in the program, so he is not wearing out his welcome with tv audiences through over-exposure.

Instructed by the SEG board to "take any and all steps necessary to resist these unwarranted interpretations of our contract," the guild's executive secretary, H. O'Neil Shanks, and Robert W. Gilbert, legal counsel, are preparing to take the issue to arbitration barring an immediate settlement with the producers, which is considered unlikely.

Mel Blanc comedy records

A long-playing record of short comedy bits for radio stations will soon be released by Mel Blanc Assoc., Hollywood. It will be the first of a series of such records which will be leased on a year's basis, with stations guaranteed exclusivity within a 100 mile radius. An introductory disc has just been finished.

Billed as "The Comedy Ad-Lib Library," the package will include drop-in lines, time signals, station breaks, running gags, lead-ins to commercials and weather, one-minute vignettes and vocal sound effects. New supplementary material will be sent to each station every 45 days.

Will House put an end to Rayburn ban?

SPEAKER MCCORMACK REPORTED READY TO HEAR RADIO-TV ACCESS CASE

The long shadow of the "Rayburn Rule," still cast over the proceedings and committee hearings of the House even though the late Speaker Sam Rayburn has been dead more than a year, could be lifted if the House adopts any of several bills introduced last week.

Two Michigan representatives, George Meader, Republican, Martha W. Griffiths, Democrat, each introduced two access bills when Congress convened Wednesday. Both are seeking access to House proceedings for microphones and cameras, but they approach the subject from different positions.

Rep. Meader would authorize committees to permit coverage of public hearings.

Rep. Griffiths thinks broadcast newsmen and photo journalists should have the right to cover public hearings and suggests floor proceedings might be reported on a pool basis.

A group of broadcast newsmen was trying last week to arrange a date with Rep. John W. McCormack (D-Mass.), the present speaker, to explain how electronic and photographic equipment can be used without demeaning the dignity of the House. Speaker McCormack was pictured before Congress convened as "open minded" about access and "glad to discuss it" (CLOSED CIRCUIT, Dec. 31).

Refuses Change - Last year Speaker McCormack went along with Speaker Rayburn's historic interpretation, first articulated by the Texan in 1952 and repeated in 1955. The Massachusetts lawmaker said last year, "The chair intends to follow those opinions [as formulated by Speaker Rayburn] until such times as the House, by its own action in amending the rules, provides for a different method of proceeding" (BROADCASTING, Jan. 22, 1962).

Under the Republican-controlled Congress in 1953-54 Speaker Joseph W. Martin (R-Mass.) allowed broadcasters to cover public hearings of House committees.

The Senate authorizes its committees to permit access to broadcast and photographic media.

Radio and television newsmen may cover House business without their broadcast equipment and must rely on impromptu corridor news conferences for photographic or tape coverage.

Rep. Meader, who for several years has offered bills to change the House rules and provide broadcast access, last week introduced two proposals to amend Rule XI of the House—one a permanent (H Res 53) and the other a temporary or experimental change (H Res 54).

Rep. Meader's last proposal to authorize a permanent rule change was killed in the Congress by an 8-6 vote of the House Rules Committee under Chairman Howard W. Smith (D-Va.) (BROADCASTING, Feb. 27, 1961). It was understood then that a vote in favor of such equipment which would be located in a "portion of the gallery of the House of Representatives as may be necessary."

Objections by House members to live coverage of floor proceedings usually centers on aversion of some to the public seeing them or their colleagues engaged in such "undignified" activities as reading newspapers or magazines or dozing, as some have been seen to do from time to time. A "reputable" representative, it is thought, would use discretion and avoid showing such scenes.

Robert Fleming, outgoing president of the Radio & Television Correspondents Assn., has said Speaker McCormack has expressed interest in hearing broadcasters' arguments for access. Capitol Hill correspondents familiar with congressional thinking on the access problem and who are personally acquainted with congressmen, hope they (the newsmen) would be able to show the speaker that broadcast coverage has "grown up" since Sam Rayburn first banned broadcasters more than a decade ago.

Magnuson wants Cox to stay for full term

Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, said last week he'd like to see his political protege, Broadcast Bureau Chief Kenneth A. Cox, nominated by the President and certified by the Senate for both the unexpired term to be vacated by T. A. M. Craven and the succeeding seven-year term.

So far the President has indicated only that he intends to nominate Mr. Cox for the five-month period left in the term of Commissioner Craven, who reaches the mandatory retirement age of 70 on Jan. 31.

Sen. Magnuson said Thursday he hopes the nomination of Mr. Cox will be "sent up like Minow's." FCC Chairman Newton N. Minow was approved by the Senate in March 1961 for both a four-month period remaining from an expired interim appointment held by a predecessor and a nomination by President Kennedy to a regular term. Mr. Minow replaced Eisenhower appointee Charles H. King.

An administration spokesman said last month that Mr. Cox was scheduled for a full seven-year term.

BROADCASTING, January 14, 1963
Why do they put periscopes on submarines?

The only logical way you can see where you’re going is to look ahead. This wisdom is just as profound for people in the business of broadcast advertising as for skippers of submarines.

Radio and television are entering 1963 after tracking a turbulent course through 1962. What’s ahead in 1963? Where will broadcasting run into heavy weather; where will the sailing be smooth?

Will radio and television, in 1963, increase their share of the advertising dollar? What changes are in store in audience patterns and ways of evaluating them, in marketing techniques, in radio and television facilities? How do the experts in broadcast advertising look at the new year; what do they say and why do they say it?

Answering these questions calls for either the gift of prophecy—or the gift of interpretive analysis based upon solid knowledge. In short, it calls for perspective.

And that is exactly what a special issue of Broadcasting Magazine, scheduled for publication next February 18, will be called . . . “Perspective ’63.” Its many pages of special reports will add up to a chartered course for the year ahead.

Among all publications, only Broadcasting is equipped by skills, by staff and by the experience of years of growing up with radio and television to attempt so comprehensive an analysis. Each of the special Perspective issues that Broadcasting has published in past years has become a standard source work for the important decision-makers in broadcast advertising. Perspective ’63, like its predecessors, will be kept, studied and re-read for months after its issue date.

Within the framework of such a basic working tool for advertising men, your message takes on special value. Through Broadcasting—in any issue—you command a guaranteed circulation of over 27,000. But in Perspective ’63, your advertisement will command extra pass-along and re-readership that will make this the best buy of your year.

If you haven’t reserved space yet in Perspective ’63, we suggest you up-periscope and sound your klaxon. It will be heard (on your behalf) in all the most important and profitable places.

Deadline for advertising: Final deadline February 9.

Rates: No inflation here. For so much more, the cost is the same as any of Broadcasting’s 51 other issues of the year.

Reservations: No time like now. Wire or phone us collect to make sure you’ll be represented the way you want, with good position.

**FCC CLEARs MID-FLOrDA**

Tells court Orlando grant should be reconsidered but that licensee is innocent of any wrongdoing

Mid-Florida Television Corp. appeared assured last week that the FCC will reaffirm its grant of ch. 9 (WLOF-TV) in Orlando.

The commission, in a report to the U.S. Circuit Court of Appeals in Washington, D.C., said the grant, made in 1957, should be reconsidered in view of the off-the-record efforts to influence the vote of former Commissioner Richard A. Mack.

But the commission concluded its review of the case by clearing Mid-Florida principals of any taint of wrongdoing (At Deadline, Jan. 7). The vote was 4-1, with Chairman Newton N. Minow dissenting in part and commissioners T.A.M. Craven and E. William Henry not participating.

The commission's report was requested by the appeals court after it was remanded there by the Supreme Court in 1958. The case was in the courts when the Old House Legislative Oversight Subcommittee disclosed the off-the-record contacts.

The commission, in its report, agreed with the finding of Hearing Examiner James D. Cunningham that William Dial, a former Mid-Florida attorney, had twice attempted illegally to influence Mr. Mack. But it disagreed with Mr. Cunningham's conclusion that Mid-Florida knew of these contacts and approved of them.

**Sworn Statements** - The commission cited the sworn denials on the part of both Mr. Dial and Mid-Florida principals that he had ever told them of his contacts with Mr. Mack. The report also cited the lack of affirmative evidence rebutting those sworn statements.

The commission, however, said Mr. Mack should have disqualified himself from participating in the case. Since he didn't, the commission added, the case should be "reconsidered on its merits." The commission said the consideration will be on the basis of the existing record.

Mid-Florida is owned by Joseph L. Brechner, 38%; Vasil Polyzios, 14.76%; Harris H. Thomson, 10%, and others. Messrs. Brechner, Polyzios and Thomson own 100% of WLOF.

In his dissent, Chairman Minow agreed that a new decision should be issued. But he said the record raises questions about the qualifications of both Mid-Florida and its competitor for the license, WORZ Inc. He said the court should authorize the commission "to decide—after a new oral argument—whether to grant one of the existing applications or to reopen the record for new applications."

The chairman, in substance, agreed with the hearing examiner's finding that Mid-Florida's principals knew of and ratified Mr. Dial's improper approaches.

"The record does not justify the majority's reversal of this finding," he said.

His reference to WORZ apparently dealt with charges, made during the 1957 hearing, of misrepresentations on the part of that company's principals.

**Mid-Florida Not To Blame** - In asserting that Mid-Florida was not to blame for Mr. Dial's illegal contacts with the former commissioner, the commission majority said the record shows that "Mid-Florida was unaware of Dial's discussions . . . with Mack until their occurrence was revealed" by the congressional investigation.

"Thus, it is concluded," the report

---

**Magnuson could take over space committee, probably won’t**

A possibility existed last week that Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, might give it up for the chairmanship of the Aeronautical & Space Committee vacated by the death of the late Sen. Robert S. Kerr (D-Okla.) (Broadcasting, Jan. 7).

Despite his statement that he was considering the idea, however, Sen. Magnuson seemed more likely to stay where he is and permit Sen. Clinton B. Anderson (D-N.M.), next ranking Democrat on the space unit, to take the post.

This maneuver would allow Washington’s junior senator, Henry M. Jackson, to move into Sen. Anderson's post as chairman of the Interior & Insular Affairs Committee, a seat traditionally held by westerners.

The resulting chairmanship lineup then would give the State of Washington control of two committees.

Such would not be the case if Sen. Magnuson exercised his prerogative and took the space post. If he did so, Sen. Jackson would remain ranking Democrat on the interior committee, but control of the commerce Committee probably would go to Sen. John O. Pastore (D-R.I.), presently chairman of the Communications Subcommittee.

Meanwhile, Sen. Anderson, whose home state counts government as its major industry (an estimated $1 billion in military and space projects and other government work), was said by his aides to be actively considering the space chairmanship and probably would take it if it were available. The New Mexico senator attained a long-sought goal when he succeeded last year in obtaining passage of bills which authorize about $210 million in water projects for his state. Keenly interested in the development of nuclear energy for space propulsion (New Mexico is the number one domestic source of uranium ore), Sen. Anderson was the key man in getting President Kennedy to visit Los Alamos in a widely-publicized, cross-country inspection of U.S. military and research centers last month.

To get the space post, however, Sen. Anderson waits on the pleasure of Sens. Magnuson and Richard B. Russell (D-Ga.), chairman of the Armed Services Committee, who ranks ahead of Sen. Anderson on the space committee. There was no expression from the southerner that he is interested in the space post.

Why Sen. Magnuson's announced interest? Some who know the senator thought last week he was "frying a few fish"—holding out for something else—but what that might be wasn’t being discussed.
ARB® Special Tabulations from available television audience data . . .

... create invaluable opportunities for research tailored to your precise needs. Thousands of viewer records offer practically unlimited possibilities for cross-tabulations of data. Cumulative studies, audience flow analyses, commercial preferences and many other audience estimates give you new and important information for television audience evaluation.

Standardized procedures make Special Tabulations quick and inexpensive. And because of the vast amount of data on hand — in diaries, punched cards and computer tapes — capable ARB researchers can go right to work immediately, with no new survey costs involved for clients. When you need research of a specialized nature, call ARB. There will more than likely be an economical Special Tabulation to give the answer.

ARB Special Tabulations Fact Sheets provide important details of extra measures of audience available to clients. If you haven't already received your ARB Special Tabulations Fact File, notify your ARB representative today.
That certain smile didn’t come from White House officials

Tv may be limited to pool coverage of future White House-sponsored events because a White House official didn’t like the NBC coverage of the Mona Lisa ceremonies of the National Art Gallery in Washington last Tuesday.

The White House official is Andrew T. Hatcher, associate news secretary to President Kennedy. He objected to a portion of the narration by Martin Agronsky, NBC Washington commentator.

In his on-minute, voice-over-film, Mr. Agronsky referred to the ceremonies as being “considerably marred by a complete failure of the loudspeaker system. Elevators failed too. Although artistically and diplomatically the event was a triumph, mechanically it was an incredible fiasco. All could look but none could hear, . . .”

Published reports labeled the event a debacle, and one of the worst social flaschos of the Kennedy administration.

Mr. Hatcher’s umbrage was particularly acute because the tv program was transmitted to Europe via “Relay” on Wednesday morning. He chided Mr. Agronsky for mentioning the difficulties, said part of the problem was caused by tv camera lights, and remarked that from now on, as far as he is concerned, tv coverage of White House events would be by pool only.

When Mr. Agronsky demurred that his narration was objective, Mr. Hatcher responded that maybe he was too objective.

Mr. Hatcher explained the next day that his call to Mr. Agronsky was a personal one and not an official White House complaint. He said he was particularly miffed at the mention of the embarrassments at the ceremonies because he had taken care of a last-minute request from NBC for an extra camera position. He repeated his feeling that from now on White House functions should be pooled for tv.

An NBC News spokesman in Washington explained that the first instructions were that each network would be permitted only one camera position. Early Tuesday afternoon, when NBC learned one of the newshy services had three positions, the network complained to the White House. When the White House approved a second position for NBC late in the afternoon, a camera crew was pulled off another story and rushed over to the gallery.

said, “that Mid-Florida did not secure, aid confirm, ratify or have knowledge of Dial’s conversations with Mack, and that nothing revealed . . . can be held to detract from Mid-Florida’s qualifications as a licensee.”

The commission said that although Mr. Mack should have disqualified himself, there is no way of determining whether his vote was actually influenced by the off-the-record contacts. But, the report added, “we deem it proper to resolve any residual doubts” in favor of WORZ and conclude that Mr. Mack’s failure to disqualify himself requires that the 1957 decision be reconsidered.

The commission emphasized its satisfaction with the character qualifications of Mid-Florida by turning down that company’s request for a hearing to receive evidence on the reliability and integrity of Mid-Florida’s principals. The commission said it has, in effect, already accepted Mid-Florida’s position “insofar as the reliability and integrity of its principals are involved.”

Microwave may lose license

An FCC hearing examiner last week advocated denying a license renewal to a point-to-point microwave station, KAQ71 in Turkey Ridge, S. D., citing commission rules which require that microwave stations devote at least 50% of their service time to the public.

Examiner Asher H. Ende’s initial decision held that KAQ71, owned by Allen C. Harmes, confined its service solely to Palace Transvideo Co., a catv system serving Mitchell, S. D. Since Mr. Harmes also owns Palace, Examiner Ende found that there was “no basis for affording the applicant a continued opportunity to hold itself out as a communications common carrier.”

Communications Act report for FCBA

The report of the special Federal Communications Bar Assn. committee proposing basic changes in substantive provisions of the Communications Act of 1934 will be presented to the membership of the association at its annual meeting Friday, Jan. 25, at the Willard Hotel, Washington.

The presentation will be made by Leonard H. Marks, committee chairman. Included will be summaries of the monographs prepared by subcommittees headed by W. Theodore Pearson, dealing with Sec. 326, the anticensorship provision; by Philip G. Loucks, relating to Sec. 315, the political section; by Reed Rollo, concerning Title II, the common carrier provisions, and by Mr. Marks and J. Roger Wol- lenberg, on revision of the structure and functions of the FCC.

In its notice to the membership, FCBA President Harold E. Mott underscored the importance of the presentation “which may well have far-reaching effects.”

Mr. Marks pointed out that in the opinion of the committee reforms are “long overdue.” He added: “It is hoped that the recommendations of this committee will result in fundamental changes in the structure of the commission and the Communications Act, which has not been changed materially in 28 years in spite of the phenomenal growth of the telecommunications industry.”

The luncheon and business meeting, at which new officers will be elected, will be followed by the association’s annual banquet, which will be held at the Sheraton-Park Hotel in Washington. The Gene Krupa Jazz Quartet and song stylist Hildegarde will be the featured entertainment. Tickets are $13.50 per person and may be reserved through Charles J. McKerns, 600 Munsey Bldg., Washington 4, D. C.
When reliability really counts—as it does in broadcasting—be sure with tubes custom-designed and tested for the job.

Sylvania engineers traveled the country—met with engineers and maintenance groups in broadcasting, public service radio, industry, the airlines—listened to their problems and studied them. From this came GB Gold Brand, a superior line of new and upgraded tubes, each tailor-made to a specific job. A given tube may have, for example, low noise, exceptional stability or vibration resistance. Or a critical parameter may be as much as three times the usual value. In each case, performance and reliability have been verified by actual user experience as well as laboratory testing.

Electronic Tubes Division, Sylvania Electric Products Inc., 1100 Main St., Buffalo 9, N. Y.
NBC-PHILCO TAKE BREATHER

FCC examiner recedes hearing until Feb. 11 to decide if Philco can withdraw from case

The many-sided hearing involving the NBC-Philco fight over Philadelphia’s ch. 3 and the network’s proposal to exchange its Philadelphia properties for RKO-General stations in Boston was moved to an FCC back burner last week until Feb. 11.

Chief FCC Hearing Examiner James D. Cunningham on Monday continued the hearing to that date to give the FCC time to act on the joint request of NBC and Philco Broadcasting Co., that the latter’s application for a new station on ch. 3 be withdrawn (BROADCASTING, Jan. 7).

The Review Board, which could have handled the case first, sent it directly to the commission instead.

In their petition, the two parties said NBC has agreed to pay Philco an amount “not in excess of $550,000” as recompense for its legal, engineering and other expenses incurred in prosecuting its ch. 3 application.

An itemized accounting by Philco Broadcasting President Joseph H. Gillies, also filed with the commission, puts the total at $523,396.13. Both sides agree, however, to abide by any reduction resulting from FCC disapproval of any costs.

The largest amount, according to the report, was $352,429, charged to the Washington law firm of Weaver & Glassie. Other major items were $82,099, to W. I. Breathard Jr., Philadelphia, consultant on television matters; $23,738, to Jules Cohen, Washington, D.C. consulting engineer; and $10,600, to Philip Deichert, Philadelphia attorney.

NBC Board Chairman Robert Sarnoff had been scheduled to testify Monday, when the hearing was to have turned to the comparative issues involved in the applications by NBC for renewal of its WRCV-TV license and by Philco for a new station on ch. 3.

Report on Agreements • But in view of the series of agreements already reached between RCA-NBC and Philco and its parent Ford Motor Co., the hearing was devoted mainly to a report by NBC attorney Irving Segal on those accords. In addition to the petition to withdraw Philco’s application, the agreements provide an end to longstanding patent-right litigation, with RCA agreeing to pay Philco $9 million for patent rights owned by the latter.

Mr. Segal stressed that the patent-rights settlement is completely independent of the agreement to withdraw Philco’s ch. 3 application.

Ernest Nash, attorney for the Broadcast Bureau, which is also a party to the proceeding, suggested the recess to give the commission an opportunity to act on the withdrawal request.

In the petition for withdrawal, NBC said approval by the FCC would speed a decision on the network’s application for a renewal of WRCV-TV and, thereby, allow it to move faster in meeting its obligation, under a Justice Dept. consent decree, to dispose of its Philadelphia properties.

Philco said its withdrawal would enable its executives to devote more time to the job of “re-establishing Philco Corp. as a major competitive force.” The company also noted that in view of the 18-month extension given NBC last month to dispose of its Philadelphia stations (BROADCASTING, Dec. 24), there is no danger of the city being deprived of ch. 3 television service.

Issues Remain • NBC is seeking renewal of its WRCV-TV license as a first step in its proposed swap of WRCV-AM-TV for RKO-General’s WNAC-AM-TV and WRKO (FM). If the commission approves the Philco withdrawal, however, it will still have to decide whether NBC is entitled to a renewal. Philco, in prosecuting its application for ch. 3, charged the network with antitrust activities in allegedly pressuring Westinghouse Broadcasting Co. into exchanging its Philadelphia properties for NBC stations in Cleveland. In addition, some public witnesses may be called by the Broadcast Bureau.

According to papers filed with the commission, the first contact in the negotiations leading to the agreements was made last fall, in a telephone call from Robert L. Werner, executive vice president and general attorney for RCA, to Wright Tisdale, vice president and general counsel for Ford.

The document said that, in discussing the ch. 3 case, Mr. Tisdale reported Philco’s willingness to dispose of the matter by buying WRCV-TV. Mr. Werner reportedly rejected this proposal and countered with the offer to reimburse Philco for its expenses if it withdrew its application.

Philco and RCA were also said to have attempted to negotiate their differences in January 1957, after Philco instituted its patent-rights damage suit against RCA. But these talks, which also involved the protest Philco filed to NBC’s ch. 3 renewal application in 1957, proved fruitless.

‘Charlie Walker case’ to be appealed

FCC REAFFIRMS DECISION DENYING WDKD RENEWAL

The question of whether the FCC was correct in denying a license renewal in “the Charlie Walker case” is headed for a court determination.

The commission, in an order issued last week, reaffirmed its decision to deny the license renewal of WDKD Kingstree, S. C. But the station says it will appeal the order to the U. S. Circuit Court of Appeals in Washington.

The commission had denied the renewal application of E. G. Robinson Jr. on the grounds that former WDKD air personality Charlie Walker had broadcast material that was coarse, vulgar and suggestive, and that Mr. Robinson had lied to the commission in denying he was aware of the content of the Walker programs (BROADCASTING, July 30, 1962).

In its order last week the commission rejected WDKD’s argument that only the federal courts, acting under the obscenity statute, have jurisdiction in cases involving charges of the type leveled at the Walker broadcasts.

The commission also denied WDKD’s contentions that it had erred in concluding that Mr. Robinson had made misrepresentations and that the commission should have given Mr. Robinson prior warning before moving to strip him of his license. In saying that only the federal courts have jurisdiction in such matters, the commission said, the station is arguing that “a licensee may devote a very substantial percentage of its broadcast time—perhaps over 75%—to coarse, vulgar, suggestive programming.”

And, if such programming were not found obscene within the meaning of the federal statute, the commission added, the FCC would have to find such programming to be in the public interest and renew the station’s license. But, it added, “nothing in the legislative history of the [Communications] Act or pertinent court decisions would indicate such a narrow compass for the public interest standard.”

Regarding Mr. Robinson’s alleged lack of candor, the commission said “the record conclusively indicates Robinson’s disposition not to deal with the commission in the forthright manner expected of licensees and supports a finding of misrepresentation.”

The commission authorized Mr. Robinson to operate the station until Feb. 8 to wind up his affairs. But an appeal would have an effect of staying the order until the court acts.

The commission vote was 6-0, with Commissioner E. William Henry not participating.
TV viewers see it on a tube—where today’s best-selling pictures come from Scotch® BRAND Video Tape

On a movie screen your commercial may rate Oscars; but on the family tv it can lay there like cold popcorn. Trouble is, home audiences don’t view it theatre-style. It reaches them (if at all) on a tv tube. And the optical-electronic translation loses sharpness, presence, tone scale gradations, and picture size.

On the other hand: put your commercial on “Scotch” BRAND Video Tape, view it on a tv monitor, and see what the customer sees—an original, crystal-clear picture with the authentic “it’s happening now” look of tape. No second-hand images, no translation, no picture cropping. Video tape is completely compatible with your target: America’s tv set in the living room.

Proof of the picture’s in the viewing! Take one of your filmed commercials to a tv station or tape production house and view it on a monitor, side-by-side with a video tape. You’ll see at once why today’s best-selling pictures come from “Scotch” Video Tape.

Other advantages with “Scotch” Video Tape: push-button speed in creating unlimited special effects, immediate playback, and no processing wait for either black-and-white or color. For a free brochure “Techniques of Editing Video Tape”, write 3M Magnetic Products Division, Dept. MBX-13, St. Paul 19, Minn.
Are Reds infiltrating Pacifica stations?  
SECURITY GROUP HAS CLOSED HEARINGS TO FIND OUT

The Senate Internal Security Subcommittee began closed-door hearings last week on the Pacifica Foundation, operator of three listener-supported radio stations—and promptly set off one of the first rows of the new Congress.

Sen. Thomas J. Dodd (D-Conn.), acting chairman, said the subcommittee was looking into reports that Communists were attempting to infiltrate the chain, composed of KPFA (FM) Berkeley, KPFK (FM) Los Angeles, both California, and WBAI (FM) New York.

The senator, in a statement read to the witnesses in executive session and later given to reporters, said Communists control over the mass media "would present the gravest threat to our national security."

He said Congress might be justified in finding that anyone who is a member of a so-called subversive organization be identified as such if he appears as a commentator on radio or television. He said a similar identification might be required of anyone writing a by-line article.

Engle Asks Explanation  
Ordinarily, the Internal Security Subcommittee maintains a complete silence on matters pertaining to executive sessions. Sen. Dodd's statement came in a reply to a demand from Sen. Claire Engle (D-Calif.) that the subcommittee explain its investigation of Pacifica.

The American Civil Liberties Union, the American Jewish Congress and the Socialist Party assailed the hearing in separate statements, calling it an invasion of constitutional rights and an attempt to determine what the public shall see and hear on television and radio.

The AJC, in addition, urged FCC Chairman Newton N. Minow to appear as a voluntary witness and protest the hearing.

Complaints were voiced also by two Republican members of the subcommittee, Sens. Kenneth Keating, of New York, and Roman L. Hruska, of Nebraska. They said they had not been briefed about the hearing and that the inquiry shouldn't have begun before all members knew what was involved.

Seven witnesses were subpoenaed to testify at the hearings, which began Thursday. They included: Trevor Thomas, president of Pacifica; Peter H. Odegard, former president of Reed College in Oregon and now professor of political science at the U. of California; and Harry Plotkin, Washington, D. C., counsel for the foundation.

The other witnesses were Dorothy Healey, who identified herself as "chief spokesman" of the Communist Party of Southern California and who has broadcast bi-monthly over KPFK (FM); Jerome Shore, executive vice president of Pacifica; Joseph Binns, station manager of WBAI; and Pauline Schindler, a retired school teacher who formerly taught in Los Angeles County and El Centro, Calif.

From Left to Right  
The Pacifica stations, according to Mr. Odegard, devote about 70% of their programming to music, the theatre, literature and the arts. Foundation officials say that the three stations also provide forums for speakers representing a wide range of political beliefs that their associations are always reported.

Dr. Odegard, in a statement to the subcommittee, said the foundation "believes that the American people are entitled to have access to the full spectrum of ideas from right to left that compete for attention in the vast arena of government and politics."

Mr. Thomas was questioned for 2 1/2 hours. He told reporters later that the subcommittee asked him about the origins of Pacifica and about many commentators who had appeared on Pacifica stations over the years.

Mr. Thomas said he answered all questions, but that some of the commentators in whom the subcommittee was interested appeared on the stations before he became associated with the foundation two years ago and were unknown to him.

Mrs. Healey, who said she refused to answer all questions put to her by the subcommittee, said the only one she was asked that dealt with Pacifica was whether she was "a well-known" radio commentator having a program on KPFK. Mrs. Healey also told reporters she has appeared on many television and radio stations in the Los Angeles area.

The witnesses generally had no criticism of their treatment by the subcommittee. The subcommittee's manner was "civilized," said Mrs. Healey. "The inquiry is what is barbaric."

Held to local issues, Collins won't testify

NAB President LeRoy Collins will not be among the 150 expected witnesses Jan. 28 when the FCC opens its inquiry into local tv programming offered by the three stations in Omaha.

Col. Collins, of the FCC Friday (Jan. 11) he will not testify because the agency has limited his remarks to issues that "are obviously local in nature." NAB had sought to intervene as a party, a request the commission denied in limiting the association's appearance to testimony on the issues involved in the hearing (Broadcasting, Dec. 24, 1962).

"My position on hearings of this type is well known," Gov. Collins told the FCC. "I reiterate my contention that they are not well advised; that they do not serve a useful purpose; that they do more injury than good, and that they should be discontinued." He said NAB will file a statement within 30 days after the hearing closes "detailing its opposition to such proceedings."

Under the FCC's ruling limiting the NAB to testimony on the issues, the NAB president said he was left with no choice "but to decline the opportunity to make a formal appearance."

He expressed confidence that the FCC will determine that the three Omaha stations—KMTV (TV), KETV (TV), and WOW-TV—"not only have discharged their obligations under the law, but have gone far beyond this in serving the best interests of their community."

Moss plans probe on government secrecy

Preparations were underway in the House last week for new, far-reaching investigations of secrecy in government agencies and a review of the Kennedy Administration's news policies.

The Special Subcommittee on Government Information, headed by Rep. John E. Moss (D-Calif.), would, if reconstituted by its parent committee:

- Form panels of media representa-
The most advanced achievement in recorder engineering to date, the superb new remote-controlled professional Sterecorder 777 series features the exclusive and patented Sony Electro Bi-Lateral 2 & 4 track playback Head, a revolutionary innovation that permits the playback of 2 track and 4 track stereophonic or monophonic tape without track width compromise—through the same head!

Included in an array of outstanding features are individual erase/record/playback heads, professional 3” VU meters, automatic shut-off, automatic tape lifters, an all-solenoid, feather-touch operated mechanism, electrical speed change, monitoring of either source or tape, sound on sound facilities, and an all-transistorized military plug-in type circuitry for simple maintenance. The three motors consist of one hysteresis synchronous drive motor and two hi-torque spooling motors.

Unquestionably the finest professional value on the market today, the 777 is available in two models, the S-2 (records 2 track stereo) and the S-4 (records 4 track stereo). Both models can reproduce 2 and 4 track tapes.* And, the Sterecorder 777 models will integrate into any existing component system. $595 complete with portable case and remote control unit.

*Through the exclusive Sony Electro Bi-Lateral 2 and 4 track playback head.

Sony has also developed a complete portable all-transistorized 20 watt speaker/amplifier combination, featuring separate volume, treble and bass controls, mounted in a carrying case that matches the Sterecorder 777. $175 each.

Also available is the MX-777, a six channel all-transistorized stereo/monophonic mixer that contains six matching transformers for balanced microphone inputs and recorder outputs, individual level controls and channel selector switches, Cannon XL type receptacles, a switch to permit bridging of center stage solo mike. $175 complete with matching carrying case.

The first/complete/portable/all-transistorized/high fidelity/professional recording & playback system: $1120 complete. Sold only at Superscope franchised dealers. The better stores everywhere.

For additional literature and name of nearest franchised dealer write Superscope, Inc., Dept. 3, Sun Valley, California.
tives to examine stand-by plans drafted by the administration for use in national emergencies and limited crises (such as the Cuban flare-up last fall).

- Continue its follow-up program on complaints submitted to the subcommittee by newsmen, congressmen and other citizens.

Rep. Moss, who has headed the information watchdog unit since it was chartered by Government Operations Committee Chairman William L. Dawson (D-Ill.) in 1955, characterized future congressional work on information as of "major significance," and said he thought control which the government might seek to impose on communications media at time of crises were "critically important."

While confident that responsible persons in news media don't want to broadcast harmful information, Rep. Moss said he thought these newsmen want to know what's expected of them and what plans are being considered.

Their views on those plans should be heard, he added. Broadcast media are especially sensitive to such emergency information plans because of the immediacy with which they can relay news.

"News Managing" - The California congressman has made it clear he is not allowing his close relationship to the administration (he is deputy House whip) stand in the way of subcommittee efforts to investigate "news management" admitted by the Pentagon's news chief at the end of the Cuban crisis. The subcommittee changed some of its tactics when the Kennedy people moved into control of government agencies two years ago, Rep. Moss explained, but this served to increase the unit's ability to make progress. With the Kennedy administration, the subcommittee staff has been able to get the attention of top-level agency officials, he said.

City of Oakland Park opposes WIXX license

The City of Oakland Park, Fla., told the commission last week that it should not license WIXX, that city, because the station is reneging on its originally proposed programming and that the application should be designated for rehearing.

The City Council, acting for Oakland Park, said that WIXX announced that it will present an all-Negro format, rather than the format of good music, news and community service as proposed in its original application for 1520 kc. Oakland Park told the commission that WIXX could not provide first service to it through an all-Negro format since there are no Negroes residing in the community.

The commission was told that the application for WIXX represented an effort to serve nearby Fort Lauderdale and that if the station is licensed, Oakland Park will be deprived of its preferred position under commission rules that the WIXX frequency, which is allocated to Oakland Park, program first to the community in which it is licensed.

Because WIXX would not serve the public interest by being licensed, its application should be set for rehearing and Oakland Park supports any other applications for the frequency, the city statement said.

WIXX is owned by Albert S. Tedesco and operates on 1520 kc with a power of 1 kw daytime.

Prettyman calls for permanent conference

The establishment of a permanent Administrative Conference of the United States has been recommended to President Kennedy by E. Barrett Prettyman, retired District of Columbia circuit judge and chairman of the existing conference.

In a Dec. 17 letter to the President, released Jan. 6, Judge Prettyman, for himself and members of the conference, suggested that an Administrative Conference be organized to provide "means by which agencies in the federal government may cooperatively, continuously and critically examine their administrated processes and related organizational problems."

The proposed conference would be composed of a council and an assembly, with a paid chairman appointed by the President and confirmed by the Senate for a five-year period. Its salary should be equivalent to that provided an undersecretary of cabinet rank.

Aside from the technical problems of administrative procedure the conference should also provide an "authoritative, impartial" means for securing public answers to "difficult ethical problems that sometimes arise in administrative proceedings." This would be done through a committee of five, elected by the Assembly.

Also recommended was the continuance of the present conference until Dec. 31, 1964, or until Congress passes legislation establishing a permanent body.

The conference was appointed by President Kennedy by executive order in April 1961. Among its activities were two recommendations to the FCC involving broadcast applications.

In a recommendation on mutually exclusive broadcast applications the conference suggested that the FCC provide a system of qualitative priorities under which some applicants would be automatically preferred over others.

It also recommended that the FCC discontinue formal hearings where no questions of substantial material fact are involved; increase the power of hearing examiners, and "fuller" publicize the criteria employed in judging station program proposals.

FCC takes advice of Booz, Allen & Hamilton

REVAMPS ENGINEERING & MONITORING BUREAU

The organization survey of the FCC made by Booz, Allen & Hamilton, for the Bureau of the Budget, has resulted in a new functional division set-up of the commission's Field Engineering & Monitoring Bureau it was announced last week.

Under the new organization the field office is simplified from four divisions to three, and has been given a new name—Field Offices Division. The old subdivisions of Field Operating, Engineering, Monitoring, and Inspection are to be streamlined into Field Offices, Monitoring Systems and Engineering & Facilities, effective March 1. These offices will continue under the head of an office of the chief of the bureau, the commission said.

The Field Engineering & Monitoring Bureau, according to the commission, is responsible for all field engineering activities relating to broadcast stations, including station inspection, surveys, monitoring, direction finding, and signal measurement and investigations, as well as suppression of interference, the inspection of devices possessing electromagnetic radiation characteristics and related investigations.

Divide by Three - Like the parent office, each of the three sub-offices are again divided by three. Field Offices will be made up of the branches of Operator & Examination, Inspection & Measurement, and Investigation & Certification. The Monitoring System Division comprises Operations, Methods & Review: Contracts, and Liaison. The Engineering & Facilities Division, will be set up as the offices of Standards & Facilities, Antenna Survey and Equipment Construction & Installation.

The office of the chief includes an associate and assistant bureau chief, as well as an administrative branch responsible for planning, coordinating and managing the bureau personnel. The bureau also includes a legal advisor for the operations and functions of that office.
32 value analyzed benefits give G-E Image Orthicons 3 to 5 times longer life, highest sensitivity, and unsurpassed performance in your cameras

G.E.'s family of "station designed" Image Orthicons cover the complete spectrum of commercial and educational television. Individual types incorporate certain value analyzed benefits which optimize performance for any given program requirement, whether specialized or broad. These benefits can extend life to as long as 8000 hours...provide signal-to-noise ratios up to 50:1...and allow high resolution pickup at 1 ft.-c for black and white, or 40 ft.-c for color.

A Distortion-free optical quality glass is used in all G-E Image Orthicon faceplates • Fibre-optics faceplates prevent picture distortion

B Photocathodes—Spectral response close to that of the human eye permits portrayal of scenes in nearly their true tonal graduation • Individual processing for each tube guarantees uniformity of characteristics and maximum sensitivity

C Semiconductor (MgO) thin-film target gives high sensitivity with only 1 ft.-c for black-and-white pickup...only 40 ft.-c needed for color • 0.000002" thick, MgO target gives: greater resolution • extremely long life • no stickiness • improved depth of focus • no target raster burns—GL 8092—GL 7629

D Glass target only 0.0001" thick prevents loss of resolution due to lateral charge leakage • Specially selected optical quality glass is free of imperfections—GL 5820A—GL 7293—GL 8093

E Electroplated target mesh, with 560,000 openings per square inch, improves picture detail, prevents moire and mesh-pattern effects without defocusing

F 750-line field mesh screen—makes the scanning beam approach the target perpendicularly over the entire area • improves corner resolution • diminishes white-edge effect • Shading and dynamic match for color pickup are excellent • Set-up time is reduced

G As an added precaution against moisture contamination, dry inert gas is blown through the envelope prior to exhausting and sealing • Longest tube life is assured

H To prevent contamination from dirt, dust or moisture: All personnel wear lint-free clothing • operators wear nylon gloves or finger guards • assembly rooms are pressurized, the air super-cleaned, and humidity controlled

I Precision manufacture, plus accurate spacing and alignment of all components, assures uniform signal gain in the multiplier section • Dynode material and design, plus a 0.0012" aperture, allow sharper target focus • No compromise between sharpest focus and dynode blemishes appearing in background • Less set-up time required

J Performance testing—Every tube tested prior to release to customer • Tests are made in G.E. and other-make cameras to guarantee highest picture quality and complete operational flexibility

For your free facts folder, containing data and application notes on G-E Image Orthicons, write to General Electric Co., Room 1783A, Owensboro, Kentucky, or call your nearest G-E Industrial Tube Distributor, today!

Progress Is Our Most Important Product

GENERAL ELECTRIC

BROADCASTING, January 14, 1963
The FCC's mailbag was filled as never before with complaints about broadcasting during the fiscal year that ended June 30, 1962, and the commission disciplined stations to an unprecedented degree.

So says the commission's 25th annual report to Congress. The 163-page document, released Sunday (Jan. 13), covers all phases of the commission's activities.

The report said it received "over 12,000" letters of complaint, "a substantial increase over the previous year." About 35% were said to be about programming, "the largest single category being objections to specific programs on the basis of excessive crime and violence."

Substantial numbers of complaints were received also about station commercial practices (including overcommercialization), loud commercials, false and misleading advertising, and the advertising of liquor, tobacco "and other controversial products."

Political Broadcasts • There was also a noticeable rise in the number of complaints about political broadcasting under the commission's 1949 "fairness doctrine," as well as about the equal-time rights of political candidates under Sec. 315 of the Communications Act.

The commission reported that during the five months from January to June, 1962, it received 418 complaints about the broadcast treatment of controversial issues. In all of 1961, the total number of such complaints was 409.

Sec. 315 was the basis of 113 requests and complaints to the commission since January 1962. In 1961, the commission handled 45 equal-time matters.

In two cases the commission noted it upheld broadcasters' right to deal with controversial issues, provided they give "reasonable opportunity for opposing viewpoints." The two programs were "The Battle of Newburgh," which appeared on NBC-TV, and "Biography of a Bookie Joint," shown on CBS-TV.

FCC Gets Tough • As Chairman Newton N. Minow noted in his own year-end report (Broadcasting, Dec. 31, 1962), the year brought increased FCC effort to "obtain greater licensee compliance with requirements of statutes, rules and regulations by invoking its authority to impose sanctions."

Here is a breakdown on the disciplinary actions taken: broadcast licenses revoked or denied renewal, six; stations in revocation or renewal proceedings, 29; stations given fines, 19; stations given short-term renewals, 24.

"For the first time, the commission noted, programming was the major consideration in two of the license-renewal denials"—KRLA Pasadena, Calif., and WDKD Kingstree, S. C. KRLA has taken a court appeal, and WDKD is expected to do the same (see story, page 70).

The other stations in trouble were charged with a variety of offenses, including conduct of contests, unauthorized transfer of control, misrepresentation, falsification of logs, technical violations, character qualifications, hidden ownership, and double billing.

Several Firsts • The year also saw other firsts. The first pay tv test was begun, on June 29, on WHCT (TV) Hartford. And the number of commercial fm stations rose above 1,000 for the first time—the total number of fm stations rose to 1,400.

The Field Engineering and Monitoring Service accelerated its program to eliminate interference, handling more than 33,000 interference cases. The report said 2,366 am station inspections were made during the year, some of the findings resulting in disciplinary action for technical violations. This program is to be expanded to include fm and tv stations.

In terms of statistics, the FCC counted 15,610 broadcast authorizations outstanding during the year, and the receipt of more than 740,000 applications of all kinds. The FCC's 17 hearing examiners issued 1,006 orders, conducted hearing conferences in 165 proceedings, held formal hearings in 152, closed records in 136 cases and issued 136 initial decisions. The chief hearing examiner issued 448 orders in adjudicatory proceedings.

In the employe awards program, 64 employees won a total of $11,475 in recognition of superior job performance. Payments totaling $295 were made for 16 employe suggestions to improve work procedures, and 11 letters of appreciation were issued for other employe suggestions.

Space Communications • The commission saw 1962 as particularly notable for the development of space communications. It said greater strides were made in this field last year than ever before. "And in this march of progress, the United States took the lead." the commission said.

The report said the use of satellite relay was proved practicable by U.S. research, and it credited the commission with a "significant role" in formulating the position to be taken by the U.S. at an international conference this year to consider space frequency allocations.

But "the most dramatic achievement in recent years" in telecommunications, the commission said, was Telstar. The satellite designed and built by AT&T scored a series of successes in pioneering intercontinental transmission of live telecasts, as well as telephone telegraph and data.

Length-of-service emblems were presented to 171 commission employees, and six of the seven commissioners had federal service ranging from 21 to 38 years. The newest commissioner is E. William Henry, who took office Oct. 2, succeeding John S. Cross.

FCC changes transmitter rule

Radio station operators after Jan. 21 no longer need apply for a modification of their construction permits in order to replace transmitters, as long as the new transmitter is type-accepted and meets the commission's power requirements, the FCC announced last week.

Under the new rules, transmitter substitution doesn't need FCC authoriza-
FCC warns licensees about obscene material

All licensees must take care that "obscene or profane" language is not used in broadcasts, the FCC warned last week in commenting that the commission's attention has been called recently "to several instances" of objectionable language used in telephone interviews.

The use of delayed tape may not be preventive enough, the commission said, and noted an incident when an employee charged with monitoring the tape had his attention diverted and objectionable material passed through. In such cases licensees have now installed devices by which the announcer can also stop the playback of improper remarks.

The commission warned that extreme care must be taken against broadcast of improper remarks, not only to protect the public but "to preserve the licensee's reputation for responsibility." That the federal laws provide that persons broadcasting obscene, indecent or profane language may be fined or imprisoned or both, was noted by the FCC.

tion, although the commission must be notified of the change. The FCC warned, however, that substitution of composite transmitters will still require formal applications with the commission.

EARFUL FOR FTC

EIA tries to define hi-fi, but members' views vary

An attempt to define the term "high fidelity" has been made—and the result may be like the replies of the three blind men attempting to describe an elephant.

One description of high fidelity was submitted to the Federal Trade Commission last week. This was by a special committee of the Electronic Industries Assn. Referring only to "factory-assembled, packaged phonograph systems," the EIA committee recommended that these minimum capabilities be required:

- The amplifier should have a music output rating of 5 w minimum, and not more than 5% distortion.
- The overall phonograph system should have a minimum acoustical (or sound pressure level) output of 77 db at 100 cps, 80 db at 1,000 cps, and 74 db at 8,000 cps.

The recommendation included also a test procedure for determining overall phonograph acoustical measurements.

Otherwise, EIA told the government agency, there is a wide divergence of views disclosed by a survey of the industry. Many manufacturers, EIA told the FCC's Bureau of Industry Guidance in a report submitted Jan. 9, opposed the proposed minimum standard. Many agreed with one company's position that high fidelity should be defined as "the art of making music alive and natural to the human ear."

1,000 Questionnaires • The report contains excerpts of comments from 60 manufacturers. The EIA committee sent out 1,000 questionnaires in its attempt to gather a consensus of what high fidelity means: 154 responded.

The EIA document emphasized that the industry association has no engineering standards for high fidelity equipment and no program for testing or certifying equipment. It stated also that EIA has not adopted any industry practice, either commercial or technical, as to minimum requirements for high fidelity sound equipment. Therefore, it noted, the information submitted is offered only as a factual summary of the views of members of the industry. "We make no recommendations based on this information," the committee added.

EIA indicated it had invited the Institute of High Fidelity Manufacturers to cooperate in the study but had received no response. It urged the FTC to solicit views from these makers of high fidelity components.

The EIA study was started last year after a request for such information was made by the FTC. The FTC move came after complaints were received from the public.

Members of the EIA committee were Morris Sobin, Olympic, EIA Consumer Products Division chairman; Armin E. Allen, Philco, EIA Phonograph Section chairman; Orphic R. Bridges, Arvin Industries; Malcolm S. Low, KLH Research & Development, and James A. Stark, GE.

The study was carried out by L. M. Sandwick, staff director, Consumers Products Division.

FTC examiner finds 'Outgrow' ads 'false'

A Federal Trade Commission hearing examiner has recommended that advertising for "Outgro," American Home Products Co.'s preparation for ingrown toenails, must not "false" imply that it is a cure for the pedal problem.

Hearing Examiner Andrew C. Goodhope, in an initial decision announced yesterday, found that tv commercials, newspaper and magazine advertising were false and misleading in claiming that "Outgro" is an effective remedy for ingrown toenails.

WHTN-TV found guilty of unfair practices

The National Labor Relations Board last week ruled that WHTN-TV Huntington, W. Va., was guilty of unfair labor practices in 1961 negotiations with the National Assn. of Broadcast Employees & Technicians, authorized union for the station's employees.

The board found that a Dec. 6, 1961, NABET strike against WHTN-TV was the result of unfair labor practices and that the station interfered with and coerced its employees with respect to union activities. The board also ruled that WHTN-TV did not negotiate in good faith at bargaining sessions leading up to the strike.

Union members offered to return to work Jan. 25, 1962, but were not reinstated until March 5, the board found, in ordering the station to pay 16 striking employees back wages, plus 6% interest, for this period. NABET had won an election in June 1961 for the right to represent the station's employees and WHTN-TV was ordered to bargain collectively with the union when requested to do so.
DISNEY SETS NEW INCOME RECORD

Net profit is up $800,000 over previous year

Walt Disney Productions had a consolidated net profit after taxes of $5,263,491, or $3.14 a share, for its fiscal year ended Sept. 29, 1962, President Roy O. Disney said Wednesday (Jan. 9) in his annual report to stockholders. This compares with a net of $4,465,486, or $2.75 a share, for the previous fiscal year. Gross for the year was $74,059,197, up $3,811,425 from last year and a new high for the organization.

Television income amounted to $5,993,361, an increase of $900,071 from the previous year. A new two-year contract has been signed with NBC-TV for The Wonderful World of Color which is now in its second season. Walt Disney, executive producer, told the stockholders that “on the basis of its reception thus far this season” the series “will have marked success in its second year. Already we have in works or have outlined virtually our entire program for 1963-64 and it will be a truly varied schedule.”

Disney’s Mickey Mouse Club, which was put into syndication last year, is now in some 75 markets and “with the excellent ratings the show has achieved, we expect to increase our market coverage.” the president stated. “Television continues to be very important in promoting and selling our theatrical product in the United States and around the world.”

Collins’ debentures sold

Collins Radio Co. put $12.5 million of 4 3/4% convertible debentures on the stock market last week and within the first day the issue, due in 1983, was oversubscribed and the books closed when the market reached $100. Later in the day the debentures were quoted at 107 bid and 108 asked. The 4 3/4s may be converted into Collins stock at the rate of $27.50 face amount for each common share. Collins closed at 25 1/2 last Thursday on the New York Stock Exchange.

Warner Bros. Pictures to elect five directors

Five directors will be elected to the board of Warner Bros. Pictures Inc. at the annual meeting of stockholders scheduled to be held Feb. 6 in Wilmington, Del.

In a proxy statement sent to stockholders Jan. 3, annual remuneration of principal officers included: Jack L. Warner, president, $159,000; Benjamin Kal- menson, executive vice president, $130,000; William T. Orr, vice president, $159,000. The statement also disclosed that Mr. Kalmenson started a new employment contract with Warner Bros. on Jan. 1. Under the terms of a three-year agreement, Mr. Kalmenson will get $2,500 a week, plus $1,000 a week as advisor while acting as chief assistant to the principal executive officer. He also will receive $650 a week for 10 years as a parttime advisor upon termination of his contract as chief assistant.

Transcontinent pays dividend

A dividend of 12 1/2 cents per common share, payable Feb. 15 to stockholders of record Jan. 31, was declared by the board of Transcontinent Television Corp. last week. In 1962, it was paid out by TTC President David C. Moore, a total of 50 cents per share in dividends was paid out.

TTC owns WGR-AM-FM-TV Buffalo, N. Y.; KFMB-AM-FM-TV San Diego and KERO-TV Bakersfield, both California; WNPE-AM-TV Scranton-Wilkes-Barre, Pa.; WDAF-AM-FM-TV Kansas City, Mo., and WDOK-AM-FM Cleveland, Ohio.

INTERNATIONAL

APRIL START FOR GERMAN TV NETWORK

New uhf operation will have 15 to 20 commercial minutes

Zweites Deutsches Fernsehen, the West German uhf tv network, which will start broadcasting on April 1, this year, will have a total of 15 to 20 minutes of straight commercials daily. The commercials will be grouped in five to seven minute segments and will be separated from the otherwise non-commercial programs. One minute of commercial time on the new network will cost DM 24,000 (about $6,000). This tops the highest cost per minute demanded by any German tv station, up to now. Westdeutscher Rundfunk, Cologne, has a price tag of DM 22,000 ($5,500) on 60-second commercials.

Zweites Deutsches Fernsehen is currently operating at a monthly budget of DM 14,000,000 ($3,500,000). After the start of broadcasting in April ZDF will have additional income from commercial operations.

According to recent reports, ZDF has lined up a large library of documentary programs to meet immediate program demands. However, the network is still in the market for light entertainment. Most of the programs planned are to come from independent German producers. The new network will have a daily news show at 7:30 p.m.

Third Network • Regional broadcasting organizations of Deutsches Fernsehen, national network in West Germany, are preparing for the introduction of additional regional networks with start of operations scheduled in “some months” to “some years” from now. The new service would provide German viewers with a choice between three channels at least during some hours of the day. In the final stage, two of the three channels would be handled by regional broadcasting organizations of Deutsches Fernsehen and one by Zweites Deutsches Fernsehen. Two of the three services will be in uhf and one in vhf. Sueddeutscher Rundfunk (South German Radio) and Suedwestfunk (Southwest Radio) plan to handle their regional third channel programs jointly. According to plans the third channel program will be daily from 7:30 to 9:30 p.m. with 40 minutes of local news. Transmitters, lines and relay links for this service will not be available be-
fore end of 1964, according to current estimates.

Other regional West German broadcasting organizations plan to start their own third channel operations in April 1964. There are plans to pool regional and local programs and exchange them among different stations. Original budget of Suedwestfunk for the third channel operation is only DM 1 million ($250,000) out of a total budget of DM 71.4 million (about $18 million) for the 1963 fiscal year.

McDaniel says Canada needs radio data, too

Canada, like the United States, has a strong need for improved radio audience measurement, William K. McDaniel, executive vice president of NBC Radio, told a meeting of the Radio and Television Executives Club of Canada in Toronto last Monday (Jan. 7).

Mr. McDaniel, who also is president of the International Radio & Television Society, New York, claimed that radio's audience is growing "astronomically" but is virtually "invisible" to researchers. He explained that of the 183 million radio sets in the U.S., approximately three-fourths are self-powered; the audiences of such radios are not being measured satisfactorily, he feels.

Mr. McDaniel said Canada faces the same problem. He adds: "It is clear that more and better research is the answer. It must be soundly conceived. It must be properly executed."

ABC International to rep for two Iranian stations

ABC International Television, subsidiary of AB-PT, was named last week as sales representative for Television of Iran Inc., which operates TVIT (TV) Teheran and TVIA (TV) Abadan. The two outlets serve 100,000 television sets and a market estimated at over a million viewers.

Announcing the agreement, Donald W. Coyle, president of ABC International, said this was the second link in the building of a Middle-Eastern network. ABC International already owns minority interest in and represents Tele Orient Beirut, Lebanon. Association with Television of Iran brings its list of foreign affiliates to 35 stations in 18 countries.

Britain cuts radio-tv tax

Britain's Chancellor of the Exchequer has cut the purchase tax on radio and tv sets to 25% of the wholesale price. The tax had been 45%. The result of this move is a 10% all round reduction in retail prices and prospects for a boost in sales for a currently depressed industry.

American Samoa to get etv system

Plans for a six station vhf educational television system for American Samoa were revealed last week as the tiny U.S. island possession engaged the National Assn. of Educational Broadcasters, Washington, to provide advice for building, staffing and operating the system.

Congress last year granted the Dept. of Interior $1,869,000 for the etv system. An initial three channels are to be operating by February 1964 (Gov- ernment, Aug. 6, 1962).

Smith Electronics Inc., Cleveland, has been designated as design engineer, according to Vernon Bronson, NAEB project director. Dr. William Kessler of U. of Florida is project engineer.

It was determined last year by Sam- man Gov. H. Rex Lee, with the counsel of the NAEB and U.S. electronics executives, that etv, necessary because of an inadequate school system, was feasible as a method of improving the quality of education on the seven islands.

NC&K buys interest in Hamburg agency

Norman, Craig & Kummel, New York, announced today (Jan. 14) a second affiliation overseas.

NC&K said it, along with its London partner, Crane, Norman, Craig & Kummel Ltd., have purchased a major interest in large independent agency Markenwerbung Kg in Hamburg, West Germany.

The London partnership was formed last June when NCKK affiliated with Crane Adv. Ltd.

Norman B. Norman, NC&K's presi dent, said his agency now will have worldwide billings of nearly $75 million. He said NC&K plans to conclude agreements in Italy or France in about six months for similar affiliations.

Abroad in brief...

Rep appointment ● CJLR Quebec City, Que., has appointed Radio & Television Sales Inc., Toronto and Montreal, as exclusive sales representative.

Canadian tv show sold ● Canadian Broadcasting Corp., Toronto, Ont., has sold a second series of 26 one-hour television dramas to Associated-Redif- fusion Ltd., London, England, for $195,000. The dramas were written mostly by Canadian playwrights for the CBC-TV Playdate series. The series will appear in Great Britain on independent tv stations. The sale was made through Global Television Services Ltd., Lon- don.
BROADCAST ADVERTISING

Harry J. Lazarus, vp and member of board of directors of Geyer, Morey, Ballard, Chicago, appointed to new post of administrative vp for western division. In addition to his account responsibilities, Mr. Lazarus will be in charge of financial, personnel and office operation matters. He joined GMB last April from Chicago office of Dancer-Fitzgerald-Sample.

William B. Lowther and John P. Hoag elected vps of Hoag & Provand Inc., Boston advertising agency. Mr. Hoag, director of marketing, joined agency in 1957 as account executive. Mr. Lowther joined H&P in 1959 as account executive.

Paul L. Farber appointed director of advertising for Mogen David Wine Corp., Chicago. Mr. Farber will be responsible for winery's national advertising, merchandising and pr activities, and in his new capacity play prominent role in planning Mogen David's overall marketing strategy. Prior to joining Mogen David in 1962 as assistant advertising manager, Mr. Farber was account executive with Stern, Walters & Simmons, Chicago advertising agency.

Andrew J. Tobin, group supervisor with Harshe-Rotman & Druck, Chicago, elected vp. Mr. Tobin has been with national pr firm since 1954.

Fran Parks, formerly with Kenyon & Eckhardt, Los Angeles, elected vp of KSV&R, public relations-advertising agency, that city.

Walter L. Thompson 3rd and Donald J. Day elected vps of Fuller & Smith & Ross, Pittsburgh. Mr. Thompson is supervisor for transportation and defense advertising of Aluminum Co. of America. Mr. Day is supervisor of Alcoa's building products advertising.

Vincent R. Else, administrative director of Knox Reeves Adv., Minneapolis, elected treasurer. In addition, Mr. Else will coordinate operations of Trans-Communicators Inc., wholly owned subsidiary specializing in pr work.

Edward C. Imbrie and L. Roy Wilson Jr., account executives at Ketchum, MacLeod & Grove, Pittsburgh, appointed account supervisors.

Donald Heath, former vp and account supervisor of Sackel-Jackson Co., Boston, joins Fuller & Smith & Ross, New York, as account executive.

William Condon, account executive with Television Advertising Representatives (TvAR), New York, appointed midwest sales manager, succeeding Lamont L. Thompson, who recently was named sales manager of KPIX (TV) San Francisco. Mr. Condon served as television sales executive with The Katz Agency, New York, for nine years prior to joining TvAR.

Colman H. Kraus, assistant national pr director of Gem International, joins Frank Block Assc., St. Louis agency, as account service executive.

Elmore Nelson, formerly with J. Walter Thompson Co., joins Botstorf, Constantine & Gardner, San Francisco, as media buyer.

John Robinson, former associate radio-tv director at Lambert & Feasley, joins Doyle Dane Bernbach, New York, as assistant director of radio-tv programming. Thomas Shull, former director of programming, Storer Broadcasting, and Edward Van Horn, vp and marketing manager, Smith, Henderson & Berey, named account executives.

Robert M. Glatter, tv commercial producer at Ogilvy, Benson & Mather, New York, joins Carl Algy Inc., advertising agency, that city, as director of broadcast production.

C. Arthur Cochran, former market analyst for Thiokol Chemical Corp., Bristol, Pa., joins Eldridge Inc., Trenton, N. J., advertising agency, as marketing director and account executive.

Joan O'Brien, former executive vp of The Sloan Co., Los Angeles pr firm, joins Barbara West & Assoc., that city, as senior executive in charge of production and planning. The West pr organization is moving to new offices at 6223 Selma Ave., Los Angeles 28.

THE MEDIA

Lawrence P. Fraiberg elected vp and general manager of WTTG (TV) Washington, D. C., succeeding Donn Colee, who resigned, along with his wife, Lee, in order to pursue negotiations for purchase of their own tv station. Mr. Fraiberg comes to his new post from Metro-Broadcast Sales (sales arm of Metropolitan Broadcasting Co., licensee of WTTG) where he was assistant to H. D. (Bud) Neuwirth, vp and managing director. Mr. Fraiberg was general sales manager of KPIX (TV) San Francisco before joining Metro-Broadcast Sales last July.

Marvin Kalb, chief of Moscow bureau of CBS News, appointed to newly created post of diplomatic correspondent at CBS News' Washington bureau. Mr. Kalb, who held Moscow post since 1960, will, in his new capacity, cover diplomatic affairs with emphasis on East-West relations. He will cover major world conferences wherever they may take place. Correspondent Stuart Novins replaces Mr. Kalb in Moscow.

Alan Henry, former general manager of KWK St. Louis, joins Metromedia Inc., New York, as assistant to John W. Kluge, board chairman and president. Before joining KWK two years ago, Mr. Henry was general manager of WCKR-AM-FM Miami Beach, Fla., and vp and general manager of KXEL-AM-FM Waterloo-Cedar Rapids, Iowa. Metromedia owns WNEW-AM-FM-TV New York; WTTG (TV) Washington, D. C.; WHK-AM-FM Cleveland; WIP-AM-FM Philadelphia; WTVH (TV) Peoria and WTV
Harold C. Sundberg, for past three years general manager of WMBD-AM-FM-TV Peoria, Ill., resigns to become general sales manager of WZZM-TV Grand Rapids, Mich. Mr. Sundberg is succeeded by William L. Brown, former assistant manager in charge of WMBD radio and more recently sales manager of WMBD-TV. Mr. Brown joined WMBD in 1957 after being associated with Ralph Jones Adv. Agency and Crosley Broadcasting Co., both of Cincinnati.

John T. Bradley, eastern sales manager of H-R Television, New York, elected vp. Mr. Bradley’s promotion was part of new realignment of executives at H-R Representatives and H-R Television, initially reported last week.

Harry Greenberg elected vp and sales manager of WABAB-AM-FM Babylon, N. Y. Murray C. Evans, WABAB’s vp and general manager, resigns to become sales manager of WGBB Freeport, N. Y. Marvin Seller, WABAB account executive, to merchandising manager.

Ralph J. Robinson, general manager of WSOR Windsor, Conn., and former vp and general manager of WACE Chicopee, Mass., joins transmitter staff of U. S. Information Agency’s Voice of America complex at Greenville, N. C.

Thomas L. Tiernan, account executive with KYW-AM-FM Cleveland since July 1961, promoted to assistant sales manager. Michael Faherty, member of KYW sales staff since January 1962, appointed account executive. Mr. Tiernan is former commercial manager of WKEE-AM-FM Huntington, W. Va.

Frank H. Fraysur, former copywriter for Radio Advertising Bureau and more recently in spot sales department of NBC, joins sales development department of ABC-TV, New York, as sales presentation writer.

Homer K. Peterson, station manager of KALL Salt Lake City, appointed general manager of following five Intermountain Network stations: KGEM Boise, Idaho; KOPR Butte, KMON Great Falls, KGHL Billings, all Montana, and KALL. Prior to his appointment as KALL station manager in March 1956, Mr. Peterson was regional sales manager for Intermountain Network for four years.

John C. Liddy, timebuyer at Dancer-Fitzgerald-Sample, New York, joins Robert E. Eastman & Co., that city, as sales promotion manager.

Ian N. Wheeler, producer-director and program manager of WETA-TV (educational ch. 26) Washington, D. C., promoted to operations manager.

Charles G. Drayton, controller of RKO General Inc., New York, elected vp for administration of RKO General Broadcasting, newly created division (At Deadline, Dec. 24). Mr. Drayton will be in charge of office operations for all 12 RKO General radio and tv stations.

Martin Weldon, former director of news and special events for Metropolitan Broadcasting, in Washington, D. C., joins RKO General Broadcasting as director of public affairs.

Ted Richardson, former air personality, named program director of WFOL (FM) Hamilton, Ohio. Jonathan Schiller appointed WFOL music director.

Russ Barnett, managing editor of XETRA (X-TRA News) Tijuana, Mex., and formerly with WFAA Dallas, named program director of KMPC Los Angeles. Scott Shurian, former European correspondent, joins KMPC news staff.

Mary Ann Casey resigns as program director and women’s news editor of KEYT (TV) Santa Barbara, Calif. Harold C. O’Donnell and Edward J. Ryan join outlet as program director and promotion-merchandising manager, respectively.

Buddy McGregor named program director of KTRH-AM-FM Houston, Tex.

William R. Demjan, former program director-announcer for WEIR Weirton, W. Va., joins WJAS-AM-FM Pittsburgh as assistant program director.

Richard J. Quigley, manager of St. Louis office of Blair-TV, elected vp. Prior to joining Blair 15 years ago, Mr. Quigley was account executive with KXLW St. Louis. He had also served with NBC and MBS in New York.

Dave Dary, member of CBS News’ Washington bureau since 1960, resigns to become news director of KWCH Wichita Falls, Tex., effective Feb. 1.

Kendall Smith, assistant program manager of WTCN-TV Hartford, Conn., promoted to program manager.

Clete Roberts, head newscaster-commentator at KTLA (TV) Los Angeles, is leaving station, effective Feb. 8, to devote more time to his Clete Roberts U. S. Newsfilm Inc., syndicated news-

Former trumpet soloist at WTAC’s sales helm

Charlie Speights (r), who last week was named general sales manager of WTAC Flint, Mich., should find “blowing the horn” for WTAC comes natural since he was first trumpet for Claude Thornhill orchestra before going into radio eight years ago. He has been salesman for WTAC since last August, recalling “big band” era with him are WTAC General Manager Gene Minor (l), and Ray McKinley (c), director of Glenn Miller band for which Mr. Speights played solo during Flint appearance Dec. 28 aired live by WTAC.

film operation, supplying American newsfilm for use abroad.

Sam Zelman, news director of KNXT (TV) Los Angeles and CBS Television Pacific Network, joins KTLA (TV), that city, as director of news and public affairs, effective Feb. 1.

Irwin Rosten, who has held that post, is returning to his previous position as director of KTLA’s documentary department. Roy Heatley, producer-reporter for KNXT’s news department, will succeed Mr. Zelman.

Charles Erickson, assistant to Los Angeles Times columnist Paul Coates, joins news staff of KNXT (TV) Los Angeles as writer. He succeeds Saul Halpert, who has been appointed field reporter for KNXT’s two weekend news broadcasts, The Big News and Eleven O’Clock Report.

Charles E. Bartling, news editor of WPDO Jacksonville, Fla., resigns to join Jacksonville (Fla.) Journal.

Rip Collins, former sports director of KRKO Everett, Wash., joins news staff of KVI Seattle.

A. L. Schafer, account executive with Lyle-Mariner Assoc., Denver pr consulting firm, joins KLZ-AM-TV, that city, as editorial writer.

Thomas M. Lawrence, former senior account executive of WRCV-TV Philadelphia, joins H-R Television, New York, in similar capacity.

Tom Gillies named farm director of WFLA-AM-FM-TV Tampa-St. Petersburg, Fla., replacing Frank Johnson, who resigns to become executive secretary of Florida Dairy Farmers’ Federation.

Ross Fichtner, member of Cleveland Browns of National Football League, joins staff of WWYN-AM-FM Erie, Pa., as sports director. Mr. Fichtner will remain with station until next July, at which time he will report to Browns’ training camp.

Linwood T. Pitman, executive-promotion director of WCSH-AM-TV Portland, Me., retires after nearly 35 years with stations.

Pat McGuinness, member of KNX-AM-FM Los Angeles news staff since 1953, resigns to do free-lance work. He has been succeeded by Russ Powell.

Otto A. Goessl rejoins WTVJ New Orleans after year’s leave of absence for active military duty.

Larry Ford, formerly with WHBG Harrisonburg, Va., joins announcing staff of WCRO Johnstown, Pa.

Robert Kennedy, for past four years administrator of KNBC (TV) Los Angeles advertising and promotion department, appointed manager of advertising and promotion, replacing Michael W. Gradie. KNBC merchandising, press and publicity will also be under Mr. Kennedy’s supervision. Previously, he was with NBC network advertising and promotion department in Hollywood.

Bob Dayton, disc jockey at WIL-AM-FM St. Louis, joins WABC-AM-FM New York, in similar capacity.

Lucienda Pace, former news writer and special features reporter of WLOS-TV Asheville, N. C., to assignment editor for station’s news department.

Rene Reyes, former media director of The Sackel-Jackson Co., Boston advertising agency, joins WHYN-TV Springfield, Mass.

Jocko Henderson, disc jockey with WADO New York, joins WWRL, that city, in similar capacity.

Larry Barwick, formerly with KOMA Oklahoma City, joins personality staff of KXLY-AM-FM Spokane, Wash.

Donald F. Barton, principal of Rodgers, Newman & Barton, Columbia, S. C., advertising agency, named public relations and promotion director of WIS-TV, that city.

Tom Burkhart, assistant national sales manager of WTJF (TV) Miami, Fla., appointed local sales manager, replacing Frank Boscia, who resigned post to assume duties as senior account executive with WTJF. Jim O’Reourke, account executive, succeeds Mr. Burkhart as assistant national sales manager.

Lee J. Hornback, director of special broadcast services for WLW and WLWT (TV) Cincinnati, appointed representative of tv industry on Ohio governor’s traffic safety committee. Mr.
Hornback will serve on state-level education committee.

Jim Lewis joins announcing staff of WCOP-AM-FM Boston.

J. J. Valley, program director of KSEM Moses Lake, Wash., resigns to join staff of KJR Seattle.

Lloyd A. Johnson, part-time employee of KING-TV Seattle, joins KGW-TV Portland, Ore., as floor director.

Tom Dickson, formerly with KDKA-TV Pittsburgh, joins WCAU-AM-FM Philadelphia as director of publicity.

Bill Nash, formerly with WDOD AM-FM Chattanooga, Tenn., joins announcing staff of WRGP-TV, that city.

PROGRAMMING

John Henderson 3rd, for many years sales and production head of Sarra Inc., New York production firm, joins Audio Productions, that city, as director of tv sales. Mr. Henderson, who was with Sarra for 16 years, had previously been associated with Handy Organization and directed film programs for American Cyanamid.

Bill Ashworth, former sales director of Eastern Sound Studios, joins Dolphin Productions, New York, as director of sales. Mr. Ashworth has also served in sales department of United Artists Assoc. and as sales manager of Toledo, Ohio, office of Storer Broadcasting Co.

Frederick F. (Ted) Sack, assistant general manager, promoted to general manager of Reela Films Inc., Miami, wholly owned subsidiary of Wometco Enterprises. Prior to joining Reela in January 1962, Mr. Sack was associate producer with Movius Films, Lima, Peru, where he produced series of 26 pictures for Peruvian Ministry of Education.

Michael Laurence resigns as executive vp of Robert Lawrence Productions, New York. Mr. Laurence joined Lawrence Productions last August following three years as pr director of WMCA New York. His future plans have not been announced as yet.

Noel Blanc, just released from U. S. Army Signal Corps where he directed and produced training films, joins his father's commercial production company, Mel Blanc Assoc., Hollywood, as general manager.

William Thomas, former national sales manager of Rozz-Danzig Productions, named sales manager of Wilcon Corp., sales subsidiary of Bill Burrud Enterprises.

Budd Grossman, veteran script writer, has been signed to long-term contract by Screen Gems to create, write and produce new comedy series. Mr. Grossman has written many scripts for Screen Gems' Dennis the Menace series and created and wrote pilot for Rockabye the Infantry, now being produced at studio.

Robert Butler has been signed to direct pilot of Desilu's projected series, The Greatest Show on Earth, hour-long show which will be broadcast in color on ABC-TV next season.

Henry Fonda, stage, screen and radio-tv personality, has been signed as host and narrator of new half-hour tv series, The Passing Years, which Wolper Productions is producing in association with United Artists Television for 1963-64 season.

Paul Frees, announcer and voice specialist who has worked for Disney, Jay Ward and other animation companies, joins Charles H. Stern Agency, Hollywood, for exclusive representation in field of radio and tv commercials.

Hugh Douglas has been set by Charles H. Stern Agency to narrate documentary film for Hughes Aircraft, marking 10th anniversary of announcer's association with Hughes.

INTERNATIONAL

David Tasker, personnel and administrative services manager of Canadian Broadcasting Corp., Toronto, appointed to newly created position of employe and talent services director. Mr. Tasker will be in charge of contract negotiations with all writers and performers who work for CBC as well as continuing to direct personnel, industrial and talent relations policies.

John Holden named advertising manager of CHCH-TV Hamilton, Ont.

Joseph Budd, sales manager of CKRM Regina, Sask., joins CKSO-TV Sudbury, Ont., in similar capacity. Donald Mackintosh, news director of CKSO-AM-TV, appointed sales man-

BROADCASTING, January 14, 1963
AGER of CKSO radio. Bruce Hogle, CKRM news director, to same post with CKSO-AM-TV, succeeding Mr. Macintosh.

Gordon Walker, formerly with All-Canada Radio & Tv Ltd., Toronto, named retail sales manager of CFAC Calgary, Alta.

Brian McFarlane, announcer and sportscaster with CFTR Toronto, joins CFTO-TV, that city, as sportscaster.

Ted Curl, announcer with CFTO-TV Toronto, has resigned to freelance. Mr. Curl will do announcements of Pierre Berton Hour, Screen Gems of Canada package show.

**EQUIPMENT & ENGINEERING**

Dr. Wendell B. Sell, group vp and member of board of directors of Packard-Bell Electronics Corp. (radio, tv, hi-fi), Los Angeles, elected to newly created post of executive vp. As group vp, position which will be eliminated. Dr. Sell directed three divisions of company. In his new assignment he will be chief operating executive supervising all line and staff managers of firm. Dr. Sell is former vp and general manager of Marquardt Corp.’s Pomona division.

C. Daniell Byrd elected executive vp of Dresser-Ideco Co., division of Dresser Industries Inc., Columbus, Ohio. Robert A. Vaughan elected vp of engineering, and Ray W. Gawronski named treasurer and controller. Mr. Byrd joined Dresser-Ideco in 1952 as advertising manager. He served subsequently as antenna sales manager and assistant to president, responsible for building products division and general sales management in tv tower and military markets. Mr. Vaughan has been with company for 25 years. Mr. Gawronski joined Dresser in 1958 as controller.

Caywood C. Cooley Jr., director of Jerrold Electronics’ industrial products division, appointed manager of firm’s community system division.

C. Donald Price, advertising and sales promotion manager of Sylvania Home Electronics Corp., New York, appointed promotion manager for electronic components group.

Frederick M. Hoar, former director of advertising and pr for Univac Div.

**TV Society’s new chief**

Sir Robert Fraser, O.B.E., director - general of Independent Television Authority (ITA) since its formation in 1954, elected president of Television Society, for two-year term. He succeeds Sir Harold Bishop, C.B.E., director of engineering for British Broadcasting Corp. Television Society, founded in 1927 as meeting place for all interests in tv, is specialist organization whose objects are furtherance of tv research and helping those who have made this medium their profession. Sir Robert is former director-general of Central Office of Information (1946-54).

**ALLIED FIELDS**

James E. Greeley, principal of Spear, Hill & Greeley, joins Washington, D. C., commercial branch of Wilner & Bergson (formerly Wilner, Bergson, Scheiner & Lassenco). Mr. Greeley, a native of New Hampshire, was with Cahill, Gordon, Reindel & Ohl, handling RCA-NBC matters, before leaving in 1958 to enter private practice. Also joining Wilner & Bergson is John G. Smith, formerly of Spear, Hill & Greeley. Messrs. Scheiner and Lassenco remain as partners.

**DEATHS**

Leonard R. Posner, 47, government attorney who handled MCA antitrust case and before that tv block-booking litigation, died Jan. 5 in Los Angeles of heart attack. Mr. Posner, a native of Connecticut and 13-year veteran with Dept. of Justice, resigned to enter private practice in Los Angeles last October following conclusion of MCA case. This resulted in consent order in which MCA gave up talent representation but continued in tv program production. It also permitted MCA to hold controlling interest in Decca Records, and through Decca of Universal-International Pictures Inc. He won court order prohibiting block booking against distributors of motion picture film to tv stations. This was recently upheld by U. S. Supreme Court.

Robert Elliott Freer, 66, former chairman of Federal Trade Commission (1939, 1944 and 1948) and one-time head of Federal Bar Assn., died Jan. 6 of multiple myeloma, a malignant disease of blood, at National Institute of Health in Washington, D. C. After his resignation from FTC in 1948, Mr. Freer became partner in private law firm of Freer, Church & Green. He rejoined government in 1960 as hearing examiner for Federal Power Commission, with which he served until his death.

James P. Shelley, vice president and account supervisor at McCann-Erickson, Los Angeles, died Jan. 2 following brief illness.

Noah C. Tyler, 48, newscaster and announcer with WTVJ (TV) Miami, died Jan. 6 at his home in Coral Gables, Fla.

John W. Vandercook, 60, radio news commentator, travel writer and novelist, died Jan. 7 in Delhi, N. Y., after long illness. Mr. Vandercook’s radio career began in 1940 when he joined NBC. He covered World War II campaigns in North Africa, Italy and landed in France three days after D-Day. Later Mr. Vandercook worked for Liberty Broadcasting Co. and then spent seven years with ABC where stroke two years ago forced his retirement as nightly news analyst.

Enno D. Winius, board chairman of Winius-Brandon Co., St. Louis and Kansas City advertising agency, and a founder of Continental Advertising Agency Network, died Dec. 31 in St. Louis. Mr. Winius joined agency in 1918 when it was known as Louis E. Anfenger Co. and became its president in 1928. Firm’s name was changed to Winius-Brandon in 1948. Mr. Winius was elected board chairman in 1961.
STATION AUTHORIZATIONS, APPLICATIONS

As compiled by Broadcasting Jan. 3 through Jan. 9 and based on filings, authorizations and other actions of the FCC in that period.

This department includes data on new stations, changes in existing stations and dispositions of hearing cases, rules & standards changes, and continuing roundup of other commission activity.

Inc. (WMEJ), Boston, both Massachusetts. Action Jan. 3.
• Granted petition by Osage Programmers and extended to Jan. 7 time to reply to opposition to petition to enlarge issues filed by Cherokee Bestg. Co. in proceeding on their applications for new stations in Barlineville and Pawhuska, respectively, both Oklahoma. Action Jan. 2.
• By memorandum opinion & order in consolidated proceeding on applications of Redding-Chico TV Inc. and Northern California Educational Television Inc. for new TV stations to operate on ch. 9 in Redding, Calif. (Northern California) to operate non-commercially. (1) Order: granted petition by Redding-Chico to extend to the extent of issues to determine whether Waller of multiple ownership rules is warranted and in view of petition of the parties adverse to Redding-Chico, financial qualifications of Northern California, and issues concerning Grade A and Grade B contours of both applicants; and (2) Denied Northern California's petition to enlarge issues, and its motion and supplement to dismiss Redding-Chico petition, and also denied latter's petition to strike certain issues and its request to file supplemental petition. Action Jan. 2.
• By memorandum opinion & order in consolidated proceeding on applications of Edina Corp. and Tedesco Inc. for new stations in Edina and Bloomington, both Minnesota, respectively, in Docs. 14739-40, (1) granted petition by Edina for enlargement of issues and (2) amended issues to determine (a) all facts and circumstances surrounding Tedesco's application for assignment of license of KUBLI Hot Air. Ark. and appeals and pleadings related thereto; (b) Whether Tedesco has violated Sec. 310 (b); and (c) Whether it possesses requisite character qualifications to be licensed. Action Jan. 2.
• By memorandum opinion & order in consolidated proceeding on applications of Northfield Bestg. Co. and Hastings Bestg. Co. for new stations in Northfield and Hastings, and Albert Lea Bestg. Co. to increase daytime power of KATE Albert Lea, all Minnesota, in Docs. 14684-6, (1) granted Hastings' appeal from order of Examiner denying its petition for leave to amend and (2) granted its petition to amend its application to revise ownership showing. In connection with joint petition for approval of agreement looking toward dismissal of Northfield application and payment of Hasting to Northfield of not more than $5,000 as partial reimbursement of expenses incurred in prosecuting latter's application, Review Board by separate memorandum opinion & order, directed Northfield to comply with provisions of Sec. 1316 (b) (2) concernng publication of its intended dismissal so that other persons may be afforded further opportunity to apply for facilities (1800 kc) to be set. Action Jan. 2.

CBS FOUNDATION INC.
News Fellowships for 1963-1964

CBS Foundation established in 1957 at Columbia University in New York a group of one-year CBS Foundation Fellowships, for eligible persons engaged in news and public affairs in the radio and television field. The Fellows have all University expenses paid and in addition receive a stipend designed to cover living and other necessary costs during the fellowship year. Eight fellowships are offered for 1963-1964.

Purpose of the Fellowships
CBS Foundation has established the fellowships to offer a year of study for men and women in radio and television news and public affairs who show promise of greater development and who seem most likely to benefit from the study year provided.

The fellowships make it possible for a holder to select, from the wide curriculum of Columbia University, courses which, in the opinion of the Fellow and with the advice of a University representative, can contribute most advantageously to a broadening and strengthening of his background for continued work in news and public affairs. Courses may range across such varied fields as diplomatic history, economics, modern languages, Far Eastern affairs, political science, labor relations, public administration, American history. With the approval of the University, the Fellow may become a candidate for a graduate degree.

In addition to the study program, CBS Foundation Fellows will meet from time to time as a group to hear invited speakers on subjects related to the news and public affairs field to discuss these subjects with them. The Fellows also will be invited from time to time to observe and discuss news and public affairs programs and techniques at CBS News offices and studios in New York.

The Fellowship Year
While Fellows will be expected to meet the attendance standards of the courses in which they enroll, no final examination or paper or report will be required. The year is intended to be one in which promising people can, through detachment from their routine work, find both formal and informal opportunities to build up their knowledge of particular subjects and, at the same time, increase their understanding of the potentials of radio and television for news and public affairs programming.

The seventh series of fellowships, for the academic year 1963-1964, will start in September 1963.

Address requests for application or other correspondence to: JULIUS E. BRAUNER, Executive Director, CBS Foundation Inc., 485 Madison Avenue, New York 22, N. E.

Applications must be postmarked not later than March 1, 1963. The Selecting Committee will announce its selections early in April.

Requirements for Applicants
1. Qualification in one of the following categories:
A. News and public affairs staff employees of (1) CBS News, (2) CBS-owned radio stations, (3) CBS-owned television stations, (4) U.S. stations affiliated with CBS Radio, but not owned by it, and (5) U.S. stations affiliated with the CBS Television Network, but not owned by it.
B. Regular members of the staff of non-commercial educational radio and television stations who are engaged for a substantial portion of their time in news and public affairs programs.
C. Teachers of courses in the techniques of radio and television news and public affairs at colleges and universities. An applicant must be fully employed in one of Categories A, B and C, and must have sufficient full-time experience in the field to indicate ability and promise of greater development.
2. A statement by the applicant’s employer promising the applicant his present job, or an equivalent job, at the end of the fellowship year.
3. A statement covering the applicant’s personal history; educational background; experience in news and public affairs; and the studies the applicant desires to pursue and the relation of these studies to work performed or contemplated.

The Selecting Committee (for 1963-1964)
Public Members:
MARK ETHRIDGE, Chairman of the Board, The Courier-Journal and The Louisville Times; Trustee; Ford Foundation; former President, National Association of Broadcasters; former Director, Associated Press; former Chairman, U.S. Advisory Commission on Information.
ALFRED A. KNOPE, Chairman of the Board, Alfred A. Knopf, Inc.; former member and Chairman, Advisory Board on National Parks, Historic Sites, Buildings and Monuments; member, Overseas Visiting Committees; History and English Departments, Harvard University and Council of the Institute of Early American History and Culture, Williamsburg, Virginia.
SOL I. MISHOF, President, Broadcasting Publications, Inc.; Editor and Publisher, Broadcasting and Television Magazines; former President, Broadcast Pioneers; member Awards Committee, Saturday Review; recipient Distinguished Service in Journalism Award, University of Missouri, 1952; former National President, Sigma Delta Chi.
Columbia University Members:
LAWRENCE H. CHAMBERLAIN, Vice President.
RALPH S. HALFORD, Dean of Graduate Faculties.
CBS Foundation Members:
RICHARD S. SALANT, President of CBS News.
BLAIR CLARK, General Manager and Vice President of CBS News.

The Selecting Committee reserves the right to revoke or terminate any appointment in cases where it deems such action advisable. The decisions of the Committee are final.

All expenses at Columbia University (including tuition and special charges) will be paid for each Fellow. In addition, each Fellow will receive a stipend for living and other expenses. These stipends are adjusted to individual family-size situations, and are therefore of varying amounts; they are intended, with the expenses paid to Columbia on behalf of each Fellow, to average approximately $8000 for each Fellow for the academic year.
OUR RESPECTS to Leslie Combs Bruce Jr.

Maximum ad budgets for aggressive sales support

Les Bruce, vice president for advertising and marketing research of Purex Corp., Lakewood, Calif., represents a new school of advertising who bear little resemblance to the grey flannel ad men of fictional fame. To Les and his cohorts advertising is “not the ad game,” but an integral part of the overall business operation which should be employed in a businesslike manner to produce the best results for the company they represent.

Answering a question at the 1962 meeting of Purex stockholders, Mr. Bruce said: “In our planning we strive to produce the maximum advertising and sales promotion budget for aggressive sales support within the profit goal of our overall operations. We forecast our probable sales and the overall profit objectives of the company and then determine the maximum advertising expenditures justified by these forecasts.”

Producer of a long list of cleansers and toiletries, Purex stands 29th among California’s industrial firms, but it is a small, though defiant, David when compared to its Goliath-sized competitors — Procter & Gamble, Lever and Colgate-Palmolive. To adopt an advertising policy of concentrating its advertising into one major medium, network television. “This permits us to simultaneously advertise all of our national brands as well as our Purex corporate theme of ‘The Woman’s Touch,’” Mr. Bruce told the stockholders. “It also serves to offset the sheer advertising tonnage of our competitors.”

The Big Look • The “real payoff,” Mr. Bruce continued, “results from the way in which this one principal advertising medium is used. First, it must, of course, deliver effective commercial messages at an efficient cost-per-thousand. . . . It must give the brand and the overall company ‘the Big Look.’” It must convey to our field selling organization and to retail customers across the country a feeling that Purex and its brands are identified with the best in television.

A native of New York City (born June 18, 1926), Leslie Combs Bruce Jr. grew up in the East. He attended Westminster School in Simsbury, Conn., and George Washington U. in Washington, D. C., where he majored in business administration but left before getting his degree, (“I wanted to get married and I had to have a job.”) He found the job—in New York with Benton & Bowles; married the girl—Sally Perkins Wilshire of Riverside, Conn., and that summer (1949) entered advertising as a trainee at E&B. Following his indoctrination into agency operations, Les began his education in soap-and-detergent advertising as assistant account executive on the Tide account, working on copy, copy research, trade advertising and media for the P&G detergent. In 1953, he moved to Sherman & Marquette (no longer in existence), to work on Colgate’s Ajax cleanser and Cashmere Bouquet toilet soap.

Young Man Goes West • Not long after his move to S&M, Les met Craig Davidson, who had left a New York agency berth (at Compton Adv.) and was then head of marketing (including advertising) for Purex. Les had for some time been feeling that he’d spent enough of his life in the East and it did not take much persuading for him to accept an offer to join Purex as associate advertising manager. He subsequently became brand manager and in 1957 director of advertising. Last fall, he was elected a vice president of Purex, in charge of advertising and marketing research.

When he joined Purex in 1954, the company’s advertising budget was a little more than $1 million a year, spent chiefly in print, Mr. Bruce recalls. The following year, Purex acquired Dutch Cleanser, whose advertising was handled by Weiss & Geller (now Edward H. Weiss & Co.), a Chicago agency, which fall put Purex into network television as co-sponsor (with Speidel) of The Big Surprise, a $100,000 giveaway show on NBC-TV. “After a slow start it took off like a wild bird into the top 10 and it helped make Purex a national name.”

Purex stayed with The Big Surprise for two seasons (“until we felt there were getting to be too many quiz shows on the air”), then became the original sponsor of Perry Mason (with Libby-Owens-Ford). “Then a year away from television convinced us that with six national or nearly national brands to advertise we needed its impact and its coverage and its effect on our own sales force, the trade as well as the public. An hour would be ideal, but we couldn’t afford an hour each week.”

“We asked Weiss to explore the problem with NBC and we got a package of seven special dramatic programs. There was Art Carney’s telephone monologue, documentaries on the Sacco-Vanzetti trial and Mark Twain’s America; it was an off-beat group of controversial and provocative programs that NBC hadn’t been able to sell so we got them at a bargain price. They got good reviews from the TV critics and, somewhat surprisingly, good ratings, too, so we really had it both ways—worthwhile programs and a good cost-per-thousand.

Daytime Specials • “We wanted to follow these programs with something just as good,” and Weiss came up with the idea for a series of monthly daytime specials, something that had never been tried but the statistics indicated would work. The original idea was to take our slogan ‘You’ll find the Woman’s Touch in every Purex product,’ and make a series—‘The Woman’s Touch’ in—politics, sports, art, the law and so on. It didn’t work out quite that way, but developed into the Purex Specials for Women—The Cold Woman, The Trapped Housewife, Life and the rest, which got the results we were after and an Emmy to boot. ‘Meanwhile, we continued with evening specials of one kind and another, which developed into our ‘The World of . . .’ series, the World of Bob Hope, Billy Graham, Jacqueline Kennedy and the others.”

Les and Sally Bruce live at Newport Beach with their children: Barbara, 11; Victoria, 8; David, 6, and Phillip, 4. “I play a little golf and a little tennis, but my family is my real hobby and we spend a lot of time together.”

His job and his family leave him little time for other activities, but Les makes a contribution to his community by serving on the advertising committee of the Southern California All-Year Club and he is general program chairman for the West Coast meeting of the Assn. of National Advertisers, to be held in April in Santa Barbara.
EDITORIALS

Practical birth control

THE NAB last week submitted a set of realistic recommendations that the FCC would do well to observe in the development of AM radio. As reported elsewhere in this issue, the NAB emphasized the need for a general repair of engineering standards and a tightening of the criteria governing financial qualifications of applicants for new stations. The association is to be commended for resisting the urgings of some members and high officials that it ask the FCC to invoke some form of economic protection that would shelter the haves and disenfranchise the have-nots.

Indeed there was a noticeable contrast between the presentation last week and the position taken earlier by NAB President LeRoy Collins.

At the NAB convention last April Gov. Collins decried the "over-population" of radio stations and said the NAB had no more important objective than finding ways to curb station population growth.

At the NAB-FCC conferences last week, George Hatch, chairman of the NAB delegation, said: "Radio does not need any transfusion, nor is it as sick as some would have us believe. With an expanding economy, with a growing America, with an increasing population, it is our belief that with greater reliance placed in an allocations upon sound engineering and adequate financial qualifications, the radio industry will reach new heights in prosperity and will continue to provide outstanding broadcasting service to the American people."

We side with the latest statement of NAB policy on radio's condition, and we hope it will not change with the next wind.

To be sure, some radio stations are in financial trouble, but the same can be said of businesses of every category, and it is unbecoming for broadcasters to wish for government protection against competition while also asserting their rights to operate under a First Amendment that guarantees freedom from government restraints.

We have no doubt that natural economic attrition will force some stations to close, but the possibility of failure is the risk that must be run by anyone who decides to enter business in any free marketplace. We have no doubt there will be station mergers, if the conditions suggested last week by the NAB are adopted by the FCC. But these too will be the products of natural competition, and the survivors that emerge will be made the better for the mergers.

The NAB took a forward step last week, largely because its more thoughtful members propelled it. Its forward progress will continue only as long as its more thoughtful members provide continuing propulsion.

Double whammy

FOR broadcasters the opening of the 88th Congress last Wednesday became official with the introduction of legislation to permit radio, TV and photographic coverage of House committee hearings. This has happened at each new session since 1954 and each session in turn adjourned with no action.

This has been so because the late, revered Speaker Sam Rayburn was unalterably opposed to "live" reporting of proceedings before the House or any of its committees. In the Senate, each committee chairman decides whether to provide access to the microphone and camera—the most modern vehicles of reporting—and most of them have afforded the access when broadcast media felt the proceedings warranted live coverage.

A year has passed since the speakership was assumed by Rep. John W. McCormack (D-Mass.). Mr. McCormack has made no flat commitment but is represented as feeling that the Rayburn ukase was too severe and that perhaps individual committees should be allowed to decide for themselves. Thus, prospects for favorable action on one or another of the several measures already introduced would appear to be better than they have been for nearly a decade. The various bills submitted last week would provide relief ranging from permanent changes in the House rules that would permit live broadcasting to temporary modifications that would give broadcasting a trial.

Certainly there is ample precedent. The Senate itself, for example. And the fact that presidential news conferences are available live. There are radio TV galleries in Congress and provisions for pickups in most of the executive departments. In fact the microphone and camera have equal access everywhere except in the House and most of the federal courtrooms where an archaic Canon 35 is still embraced by old-school jurists.

One of the ironies of the 88th Congress, in the light of the House lockout of radio-tv, is to be found in the preparations being made by a House subcommittee to investigate "news management" by the administration and more particularly the Defense Department. This involves the people's right to know what its government is doing.

The broadcast media, where the House is concerned, have been getting the double whammy. Radio and television, along with other media, have been victimized by suppression and purported "management" of the news. But in the House they are denied equal access to boot.

Curtain raisers

THE use of the RCA-built Relay satellite last Wednesday to transmit parts of NBC-TV's Today to Europe was a reaffirmation of the rapid approach of the international television era. The technical ingenuity that induced life in Relay after two weeks of failure and revitalized the older Telstar after a longer silence suggests that scientists have all but perfected the means of linking continents by live TV.

There may never be around-the-clock programming on international circuits, but even so the world's windows will be opened by occasional broadcasts of events of international significance. The Satellite Communications Corp. that is now in the process of formation could become a greater carrier of peace and understanding than all the doves that ever flew.

"Just listening to Joyce Brothers isn't enough . . . he has to have a couch."
TV Camera of the Sixties!

After five years of intensive development and two years of field testing, the TK-60 advanced studio TV camera is here! Big picture 4½" image orthicon pickup tube combines with stabilized circuits, ease of camera set-up, and simplicity of operation to make it every inch the TV Camera for the "sixties". Here's a great new monochrome camera that's sure to be a success with producers and station-men alike! The TK-60 produces pictures of sensationanly new quality...over extended periods, without alignment delays. You can control contrast and mood as never before. You can produce tapes and live commercials that show the client's product in sparkling, life-like detail, with effects not possible on any other camera. Where striking picture quality can mean stepped-up product sales, this is the camera that "says it" and "sells it" best! See the RCA Broadcast Representative for the complete story. Or write RCA Broadcast and Television Equipment, Building 15-5, Camden, N. J.

BROADCASTING, January 21, 1963
Garland vs. ‘Bonanza’

Two of its biggest program scheduling decisions for 1963-64 television season have now been made by CBS-TV. Network has decided to slot new Judge Garland Show on Sundays at 9-10 p.m. EST, back to back with Ed Sullivan Show—and opposite NBC-TV’s high-rated Bonanza. And new Danny Kaye Show will take over Wednesday 10-11 p.m. period long occupied by U. S. Steel Hour and Armstrong Circle Theatre. Garland sponsorship not yet set. U. S. Steel and Armstrong have been given first refusal on Kaye Show, and decision is pending.

Minow’s bait for uhf

Several networks and individual tv station operators have been urged by FCC Chairman Newton N. Minow to undertake operation of uhf stations alongside their vhf outlets and repeat at least 50% of programming at different hours to reach audiences that missed original vhf telecasts. Mr. Minow has indicated that such operations, even though experimental, would be allowed to accept sponsorship under waiver of both experimental and duopoly rules. Dual operation also would be calculated to encourage development of uhf audience.

Second bounce

Perplexing world of rating services is further added by this reaction to Federal Trade Commission consent order issued three weeks ago against The Pulse Inc., A. C. Nielsen Co. and American Research Bureau (Broadcasting, Jan. 7): One research firm reports customers are understanding and have expressed confidence in service but that problems are coming from firm’s interviewers and interviewees. Number of interviewers have resigned, claiming they didn’t want to be associated with “shady” or “crooked” organization. More than average number of respondents are refusing to cooperate, expressing concern they might tarnish their integrity by participating in survey.

‘Draft’ for McCollough?

Will Clair R. McCollough, president of Steinman stations, relinquish NAB joint board chairmanship this year? Mr. McCollough won’t be eligible for re-election as board member since he has served two successive terms, including year as interim head of NAB, and must stay out one term before becoming eligible again. By-laws provide that joint chair be elected from among either radio or tv board members, but they also provide that chairman shall serve until his successor is elected. Mr. McCollough’s present term will expire with adjournment of NAB convention in Chicago in April, but new board doesn’t take over until June.

Movement has developed among some radio and television board members to retain Mr. McCollough in chairmanship. Some have suggested referendum vote of membership to change by-laws or waive requirements where joint board chairman is involved. Suggestion was made that provision might be adopted to designate board chairman without regard to his election to either radio or tv board. Out of past 25 years Mr. McCollough has been NAB board member more than 20.

Hot want ads

First National City Bank in New York has been sitting on unusual “success” story for tv that developed during current newspaper blackout. Details now coming to light reveal bank, which has more than 40 branch offices in city area, attracted more than 500 phone calls and 100 personal visits in response to 15-second sign-off on Jan. 4 newscast it sponsors (11:11:15 p.m. on WNBC-TV) that noted bank had 200 clerical jobs which needed filling. Bank had no access to classified ad columns in papers. As result of initial response on first workday following Friday announcement, bank’s agency, BBDO, canceled two one-minute commercials client was to insert as local cut-ins within Today show on station. Sign-off was repeated one additional night but without giving phone number, and it initiated 200 people calling bank’s phone number and another 130 walk-ins. All 200 positions were filled.

Double jeopardy

There’s outside chance that broadcasters may find themselves targets of move to collect new performance fees for playing of records—in addition to fees now paid to composers and publishers through performing rights societies like ASCAP and BMI. Now under consideration is basic revision of U. S. copyright law that may include new protection for recordings of all kinds. Unless wording of new proposal is carefully drawn, it could mean that record companies and possibly recording artists would acquire copyright for records they make and hence be able to charge royalties to anyone playing recordings on radio and television.

Copyright law revisions are being drafted by panels of experts under supervision of U. S. Register of Copyrights. Plan is for draft to be submitted to House Judiciary Committee before end of this session of Congress. BMI and ASCAP attorneys attended panel sessions in Washington last week.

Waiting for the papers?

New York newspaper strike is thought by some as big factor in delay in issuance of Senate Juvenile Delinquency Subcommittee report on television by Sen. Thomas J. Dodd (D-Conn.), chairman. New York newspapers would be expected to give report bigger ride than broadcasters. Report is not expected to be kind to latter. Senator said a fortnight ago report was in final form and was being circulated to subcommittee members (At Deadline, Jan. 14); however, none approached Broadcasting had seen it by Friday (Jan. 18).

Mobile meter

A. C. Nielsen confirms it’s working on gadget which, if successful, would attach to transistor or portable radio sets to record total listening (story page 42); but there’s obviously no device in sight now that would show amount of listening to out-of-home sets and identify stations, as does Audimeter. Nielsen now uses only in its national radio measurements. Device being worked on apparently would resemble Recordimeter Nielsen uses in its local radio service as way of corroborating diary reports: Listening reported in diaries is added to determine if total is same as that indicated by Recordimeter.

One for all

White House tv newsmen fear that era of competitive coverage of White House events is coming to end. They point to objections by Andrew T. Hatcher, assistant news secretary to President, at Mona Lisa ceremonies (Broadcasting, Jan. 14), and also to new policy by White House News Secretary Pierre Salinger ending old Washington custom—background conferences between President and newsmen from which reporters were permitted to report views but could not quote or attribute them to President. At last backgrounder, in Palm Beach during Christmas holidays, American newsmen followed this protocol, but some British correspondents quoted President directly, claiming official White House approval.
IMPETUS IS A WORD IN MOTION

Webster says "... indicating the origin and intensity of the motion."

WOC-TV provides such impetus to advertising schedules by consistent promotions, merchandising information, and constant liaison between the advertiser and his retail outlet.

WOC-TV coverage area is the largest between Chicago and Omaha... St. Louis and Minneapolis. Effective Buying Income exceeds 2 billion dollars. There are almost 350,000 TV homes. Need more convincing? See your PGW Colonel today.

NAB backs news freedom from advertisers

JOINT BOARD ADOPTS PRINCIPLE AS MEETING CLOSES

NAB Joint Board of Directors, at closing session in Phoenix Friday, approved resolution endorsing principle that news, public affairs and information programs should "be kept free from sponsor control and influence, direct or indirect" and that they should be "the sole responsibility of the broadcaster."

Without mentioning developments following Howard K. Smith program on ABC-TV and subsequent withdrawal from network of advertisers who objected to appearance of Alger His, action was described as "resolution of principle" which reiterated existing recognized practice.

Board approved record budget of nearly $2 million on recommendation of its finance committees (see page 31). This is exclusive of approximately $500,000 realized by Television Information Office, which operates apart from but under aegis of NAB.

Board commended its freedom of information committee and endorsed plan for meeting of all news media with Pierre Salinger, presidential news secretary, and other government officials on equal access to news, which White House secretary said would be arranged at NAB's request. Other media, initially reluctant to participate, were reported now ready.

Establishment of new legislative liaison committee was approved to assist NAB government relations staff in advisory capacity. Group will work through Paul Comstock, recently appointed vice president for government operations (see story page 34).

Appointment of special committee to pass on building plans for new NAB headquarters was authorized by board. New association home will be constructed on recently-acquired lot adjacent to present building in Washington.

Fall Conferences • Board approved present format of NAB fall conferences, to run 1½ days, preferably in metropolitan areas. Staff was authorized to arrange programs, dates and locations.

Joint board approved report by Carlton D. Brown, WTVL Waterville, Me., chairman of membership committee, for establishment of 51-member (one from each state and Puerto Rico) liaison committee to ride herd on membership.

Everett E. Revercomb was unanimously re-elected secretary-treasurer of NAB.

Resolution commending Commission-
McAndrew honor

William R. McAndrew, executive vice president, NBC News, has been invested as Knight of Malta, one of highest honors bestowed on Roman Catholic laymen. Investiture in select order, numbering only 500 members in U. S., was conducted by Cardinal Francis Spellman, archbishop of Diocese of New York.

Anderson seen heading Senate space committee

Sen. Clinton P. Anderson (D-N. M.) is expected to emerge as chairman of Aeronautical & Space Sciences Committee, replacing late Sen. Robert Kerr. Sen. Warren G. Magnuson (D-Wash.), chairman of Commerce Committee, who had said he was interested in space post himself (BROADCASTING, Jan. 14), would, with Georgia's Sen. Richard B. Russell, step aside. Sen. Anderson would then create two subcommittees: one on peaceful uses of space which Sen. Magnuson would head and another on military uses to be headed by Sen. Russell.

FCC approves sale of KERN-AM-FM

Sale of KERN-AM-FM Bakersfield, Calif., by McClatchy Newspapers Inc. to Radio KERN Inc. for $145,000 has been approved by FCC. Radio KERN principals include Roger H. Stoner, former sales manager of KYA San Francisco, and J. Ward Wilkinson, Oakland, Calif., advertising man.

McClatchy retains KFBK-AM-FM Sacramento, KMJ-AM-FM-TV Fresno, KBEE-AM-FM Modesto, all California, and KOH Reno. Nev. KERN, founded in 1932, operates fulltime on 1420 kc with 1 kw. It is CBS affiliate. KERN-FM went on air in 1948 and operates with 9.1 kw on 94.1 mc.

One for all

Julian Goodman, vp, NBC News, told broadcasters Friday (Jan. 18) that every radio and tv station in U. S. should have qualified news director. Addressing South Carolina Broadcasters Assn. meeting (earlier story page 74), Mr. Goodman said "a station with trustworthy, imaginative news coverage, both national and local, will attract enough additional listeners to make the add-cost economically worthwhile."

WEEK'S HEADLINERS

John Sias, national tv sales manager of Westinghouse Broadcasting Co. and former tv executive at Peters, Griffin, Woodward, joins Metro Broadcast Tv Sales, new Metromedia rep division, as vp and director. H. D. (Bud) Neuwirth, vp in charge of Metro Broadcast Sales, New York, since its formation in February 1962, named vp and director of Metro Broadcast Radio Sales. Appointments were made as Metro Broadcast Sales was split into separate radio and tv units (see story, page 44). Mr. Sias has been with Westinghouse for past year and was associated with PGW on West Coast as vp. Mr. Neuwirth joined Metropolitan Broadcasting in March 1960 as assistant to John W. Kluge, president and board chairman, and later promoted to director of sales for WP-AM-FM Philadelphia. He was elected vp and director of radio sales for Metropolitan Broadcasting in 1961 and vp and director of new rep firm when it was formed.

Paul Miller, president of Gannett newspapers and broadcasting stations, elected to succeed Benjamin M. McKelway, Washington Star editor, as president of Associated Press news service. Mr. Miller, former AP first vp, is replaced in that position by Bernard H. Ridder Jr., publisher of St. Paul Dispatch and Pioneer Press. Prior to joining executive staff of Gannett newspapers in 1947, Mr. Miller had been chief of AP Washington bureau and assistant general manager. Gannett newspapers stations are WHEC-AM-TV Rochester, WINR-AM-TV Binghamton, WENY Elmira, all New York, and WDAN Danville, Ill. Resignation of Mr. McKelway and election of new corporate officers was announced at AP's winter board meeting in Phoenix.

Manny Reiner, vp in charge of international operations for United Artists Television, named vp in charge of Four Star Television's newly formed foreign operations, effective Feb. 15. Mr. Reiner's first step will be to establish Four Star offices in key centers of world. He has been active in foreign sales of motion picture and tv films for 20 years, and previously was with Television Programs of America and Samuel Goldwyn Productions.

Bernard Kramer, vp and account supervisor at Mogul, William & Saylor, New York, elected senior vp and member of board of directors. He also becomes a principal partner of agency. Mr. Kramer joined MW&S in 1956 as account supervisor and was elected vp in 1961. He is account group head on Rayco Mfg. Div. of B. F. Goodrich Co.

For other personnel changes of the week see FATES & FORTUNES

Consideration for Phileo's agreement to withdraw its application.

Broadcast Bureau said Phileo's $150 million suit against RCA was of far greater importance to Phileo than its application for ch. 3, and added: "serious question exists" as to whether application was merely device to enhance bargaining position in its suit court.

Sterling denies FTC charge

Sterling Drug Inc., maker of Bayer aspirin, issued statement Friday (Jan. 18) denying charge by FTC that its advertising misrepresents findings of clinical study of pain-relieving products (story page 48). Sterling declared its claims in advertisements are "true in fact," and said it was "confident" its position would be upheld.

Study of newspapers urged by Salinger

Pierre Salinger, news secretary to President, called on newspaper publishers and labor unions to empower group of impartial citizens to make "thorough-going" study of economics of newspaper business. He made suggestion in speech Friday night at Printing Week banquet in Philadelphia.

Move should be made now—"before other cities and other newspapers go through the throes of this agony [newspaper strikes in New York and Cleveland]."

Referring to decline in number of newspapers and growth of one-newspaper cities, he said:

"When you add to this the fact that in many of these cities the monopoly news operations also own key radio and television outlets in the same cities the problem of press centralization becomes most apparent."

Feb. 1—Deadline for entries in National Safety Council's annual Public Interest Award contest to public information media. Entries should be sent to National Safety Council, 425 N. Michigan Ave., Chicago 11. Final entry blanks available from same address.

Feb. 1-2—Radio-TV News Short Course, U. of Minnesota, Minneapolis, Sponsored by the university's School of Journalism and the Northwest Center for Radio and TV News Assn., the affair will include separate radio and tv news workshops, a series of presenta-tions by Time-Life Broadcast Div., and the annual NRTNA banquet and news awards presentations. Hecale Donan, chief edit-orial executive, Time Magazine, will be banquet speaker. Feb. 1. Other speakers include: John W. (Bill) Roberts, chief of...
**Pin a rose on us!**

A rating rose, that is, from the famed Tournament of Roses Parade. You might even say eight roses because, for the past eight consecutive years, the people of Los Angeles have made it clear that when a choice is available, they prefer KTTV's coverage of this breath-taking spectacle. This year, as an example, 20% more television homes were watching KTTV than the combined audiences of all other stations covering the Rose Parade.*

When important events happen in Southern California, sports...human interest...tragedy...spectacle, the people of Los Angeles depend on KTTV for live on-the-scene television coverage. At the 1962 Los Angeles County Fair, California Research Bureau asked over 950 people, "If you were to hear of any event of an unusual nature occurring in Los Angeles, such as a train wreck, a major flood disaster, fires, etc., which television channel would be most apt to have cameras live on-the-scene to televise the situation as it happens?" 57.9% of the respondents indicated KTTV. The next highest station garnered but a 15.5%. So you’re missing a great sales bet if you are not on KTTV, the people’s choice in the Los Angeles market. Check with your KTTV man in New York, Chicago, San Francisco or Los Angeles for choice selling availabilities.

Bruce Curtis, of Leo Burnett, joins the Tricorn Club

Membership in the Tricorn Club separates the men from the boys when it comes to market savvy. Bruce got tapped by correctly answering these two profound questions: (1) What is the Tricorn Market? (2) What is North Carolina’s No. 1 metropolitan market in population, households and retail sales? In case you’re pining to make this elite fraternity, the answer to both questions is the combined three-city “tricorn”: Winston-Salem, Greensboro, High Point. You’ll pass magna cum laude if you also know North Carolina is our 12th state in population. So—what does knowing the No. 1 market in the No. 12 state add up to? A sure sales scoop for clients. Maybe a raise from the boss. At least, an official hat from the Tricorn Club.

the Time-Life Broadcast News Bureau, Washington, D.C.; Pat Higgins, news director of KOGO San Diego; Robert F. Garvin, WFIL Indianapo., and Sheldon Peterson, WTCN Minneapolis.

Feb. 4—Reply comments due on FCC proposed rulemaking to require all applicants, permittees and licensees to keep file for public inspection of all broadcast applications.

Feb. 4—Hollywood Ad Club and Los Angeles Advertising Women, joint luncheon at Hotel Roosevelt, honoring Lucille Ball, comedienne and president, Desilu Productions. Elliott Lewis, producer of the Lucy show, will also speak.

Feb. 5-6—Fifth annual midwinter conference sponsored by Advertising Federation of America and Advertising Assn. of the West, Statler-Hilton, Washington. Legislative roundup will include speakers from government and business.

Feb. 6-7—Seventh annual legislative dinner and midwinter convention, Michigan Assn. of Broadcasters, Jack Tar Hotel, Lansing.

Feb. 7-8—Public Service Institute sponsored by NAB in cooperation with American U., American U., Communications Center, Washington, D.C.

Feb. 9—Annual awards dinner of the Directors Guild of America will be held simultaneously in Hollywood and New York. West Coast affair will take place at the International Ballroom of the Beverly Hilton Hotel; Eastern function at the Starlight Roof of the Waldorf Astoria Hotel. Highlights of the evening will be outstanding directorial achievement for motion picture to be announced at the Hollywood dinner with similar awards for television at the eastern function.

Feb. 9-10—Texas Assn. of Broadcasters spring convention in Austin at Commodore Perry Hotel.

Feb. 11—FCC continues NBC-Philo hearings.

Feb. 11-13—Electronic Sales-Marketing Assn. first annual convention, Americana Hotel, New York City. Charles Lewis, president and general manager of New York office of Burton Brown Adv., will be convention chairman. For convention applications and more details, industry members are asked to contact Alex White, ESMA executive director, P. O. Box 1, Bellerose, L. I., N. Y.

Feb. 14—British Columbia Assn. of Broadcasters annual convention, Empress Hotel, Victoria, B.C.

Feb. 15—Western States Advertising Agen
cies Assn., “Advertise the West” award luncheon, Ambassador, Los Angeles.

Feb. 15—Comments are due on FCC’s proposed FM allocations table.

Feb. 15—Entries due for fourth annual American TV Commercials Festival. Entries, accompanied by $20 entry fee, should be addressed to Wallace A. Ross, American TV Commercials Festival, 40 E. 49th St., New York 17.

Feb. 15—Academy of Television Arts &
The wonderful world of glop
Sink corrosion test samples in shallow sea water for a few months, and this is what comes back up with them. Glop. This test rack, encrusted with barnacles and other sea life, has just been pulled from salt water at Harbor Island, North Carolina, one of the places where U. S. Steel is trying to find out as much as possible about corrosion. Of course, glop is only one corrosive influence steel may have to withstand in service. So, we have acres of test racks all over the country, exposing samples of steels used in metalworking to rural, industrial, and marine atmospheres and to natural waters. We also have samples built into structures, pipelines, and process vessels. We perch architectural steels on rooftops and hang muffler steels under automobiles. Since we started our program 33 years ago, we've tested over 64,000 steel samples. Today, U. S. Steel does more corrosion research and offers a larger number of corrosion-resistant steels than any other steelmaker. The more corrosion problems we can solve for American industry, the healthier our economy will be. America grows with steel. USS is a registered trademark.
Winning Combination! "The Eddy Duchin Story"
...an unforgettable, bitter-sweet romance enacted with grace and beauty by two of Hollywood's greatest stars, Tyrone Power and Kim Novak...produced by Jerry Wald...
directed by George Sidney and written by Samuel Taylor. It's another of the 73
great box-office hits, newly-released for television, that have been added to the roster of the COLUMBIA POST-48's.

on the Washington diplomatic scene.
Only one shipping service delivers overnight... anywhere in the USA

Air Express is the faster way of sending and obtaining things by air... from anywhere to anywhere in the USA.

Only Air Express has scheduled service between 2,500 airport cities... plus scheduled surface express connections with another 21,000 off airline cities.

And Air Express shipments have official priority with all 38 scheduled airlines—first cargo aboard after air mail. 13,000 REA Express trucks speed door-to-door pick-up and delivery.

Cost? Less than you think. For example, 10 lbs. travels 1,000 miles for only $5.06.

Specify Air Express always—for shipping or receiving. Call your REA Express office for Air Express service.
The 1963 Yearbook

EDITOR: Your 1963 Broadcasting Yearbook looks great, and is great to locate key people in radio and tv, and also the important facts and figures we here must have instantly. It is truly the "one-book library of television and radio information."—Paul Arnold, radio-tv promotion director, Hearst Magazines, New York.

EDITOR: It (the Yearbook) came... I saw (the Yearbook)... and it (the Yearbook) conquered me. How you do it (the Yearbook) I'll never know. What it (the Yearbook) does for me is too long for one letter.

Congratulations for making it (the Yearbook) the favored book of the trade. And, thanks to the information in it (the Yearbook), things look great for '63.—William Mockbee, vice president, Doug Bailey Advertising Inc., Rockville, Md.

[FCC-NAB conference]

EDITOR: CONGRATULATIONS ON EXCELLENT REPORTING OF FCC-AM ALLOCATION CONFERENCE [LEAD STORY, JAN. 14]. WE APPRECIATE BROADCASTING'S EDITORIAL SUPPORT FOR OUR RADIO DEVELOPMENT COMMITTEE RECOMMENDATIONS.—GEORGE C. HATCH, KALL SALT LAKE CITY, CHAIRMAN, NAB RADIO DEVELOPMENT COMMITTEE.

EDITOR: Overpopulation is not the fault of the industry as a whole. Indeed, the NAB had no authority. By hortatory activity it could have attempted to persuade the commission to adopt a studious and well considered approach.

Historically, responsibility lies with the commission. Fifteen years ago at the NAB meeting, I chided the commission for a couple of unwarranted grants and warned of the ultimate result if the practice were continued. In simple terms, these fowls have come home to roost. Loss of money is bad. The resultant degradation of service is worse.

Tertiary alleviatives are of little avail. You cannot cure a fatal illness with an aspirin tablet. You must either operate and make excisions or leave them to suffer.—James Lawrence Fly, Daytona Beach, Fla.

[Mr. Fly was chairman of the FCC from Sept. 1, 1929, to Nov. 13, 1944.]

Attentive audience

EDITOR: During a weight-losing effort before the holiday season (lost 27 pounds!) I developed an original exercise which I think the tv industry should

LEADS IN SERVICE

WIBC...1070 on your dial! This means many things to many people...228 weekly news reports plus consistent editorials and news feature presentations such as "Telescope"...the 11½ hours each week that WIBC carries farm programs and the 10 hours of religious broadcasts...WIBC's sports coverage and top-rated music and announcers...traffic and school closing information during foul weather periods. In brief it means a good friend and neighbor.

LEADS IN AUDIENCE

WIBC has worked hard for 25 years to gain the respect and loyalty of Indianapolis and Indiana residents. Audience surveys indicate that this extra effort has gained for WIBC the largest audience morning, afternoon and evening in Indianapolis and Indiana.* WIBC's efforts have been rewarded and those rewards are available to you...the national advertiser.

A man with both feet on the ground

A solid, wide-awake, "get-ahead-in-business" kind of man, keeps his eyes open for information he can use on the job... for facts that will help him (or his company) perform better, faster, more efficiently, more profitably. He knows, from constant observation, that the ad pages of his business-paper are a prime source of this information.

Issue after issue, there's nothing else in print so packed with news, ideas, information—facts calculated to keep you and your business growing.

Of course, by helping you, advertisers help themselves. The fact is:

advertising in newspapers means business for you—and for the advertiser.

be particularly interested in publicizing:

Sit in a comfortable chair and watch TV. Every time a commercial comes on lift both feet from the floor and hold them in the air for duration of the commercial. This is doubly effective: it not only strengthens the abdominal muscles, but also keeps you away from the refrigerator during commercials.

Added benefit: It guarantees an audience for all commercials. The only disadvantage: It makes commercials seem doubly long. . .—Vert Bratton, broadcasting station management consultant, Colorado Springs, Colo.

Clarification

EDITOR: A little item concerning the translator situation out at Clyde, Kan., (GOVERNMENT, Jan. 7), I think, bears a little explanation.

Back a couple of years ago, before the commission adopted its present rules on translators, we responded to a request from the folks at Clyde and agreed to donate $500 toward construction of a translator to cost around $1,500. They proceeded to raise their money and file an application, but by the time it was granted, the commission had adopted the new rules concerning translators. They then asked us for the $500 after they received their license. We tried to explain the new rules to them... that although we would like to contribute, we could not do so.

As a last resort, we suggested they ask the commission for a waiver... Apparently the commission considered this point as indicated by the dissenter's votes of Chairman Minow and Commissioner Hyde. . .—Thad M. Sandstrom, general manager, WIBW-AM-FM-TV Topeka.

Sound argument

EDITOR: Re the letter of Ralph T. Winquist about modulating in accordance with Fletcher-Munson curve (OPEN MIKE, Jan. 7), how could this be accomplished?

The curves state that as level in a loudspeaker or earphones is reduced, the apparent reduction is greater at the extremely high and extremely low frequencies. Unless there were some way to guarantee that all receivers would play always at the same level, modulation in accordance with the curves would be self-defeating!

Since there is no way to electronically detect the difference in program content and commercials as to loudness, it would appear that Mr. Rex Howell is right in his comment that the FCC is really saying it doesn't like commercials delivered in a certain manner of speech.

Because of the widespread use of AGC and peak limiters in AM stations, I think most stations couldn't play commercials louder than regular programming if they tried to... TV? That is another matter.—Gene Bardo, chief engineer, WGGG Gainesville, Fla.

Radio as news medium

EDITOR: In the past few weeks I have heard numerous mentions of the New York City newspaper strike on various TV programs. Invariably the performer has lamented the loss of newspaper service and has stated that without newspapers the public does not have access to full coverage of news events...

If these performers feel they are not getting adequate news service they should be advised to tune in their radios... During the recent Cuban crisis... we were as much as 24 hours ahead of published newspaper stories, 8 to 12 hours ahead of TV coverage... and we maintained an edge ahead of our radio competitor... Television producers seem to have an affinity for promoting one of their prime competitors, newspapers... Yet, the average radio newsman, local or network, covers more news stories in a more exciting environment than any newspaper reporter I ever knew...

—Jon A. Holiday, president, WAIR Winston-Salem, N.C.

WDBS alumni

EDITOR: In deference to the pioneering gentlemen with whom I worked (WDBS-Dartmouth Broadcasting) back in 1941 and 1946-48, may I say that your story about WDCR, "the station which has been on the air since 1958" [MEDIA, Jan. 7] creates an impression that omits WDBS.

... We were one-tenth of the present staff (in all respects, I'm sure)... but history should not leave out WDBS from your pages, for many an old grad is still in advertising.—Gene Wilkin, general manager, WGAN-AM-FM-TV Portland, Me.

'Hats off' to FCC

EDITOR: Most of us feel that the decision of the FCC to freeze all AM grants temporarily was a wise and sound decision. Our only regret... is that it did not go into effect in the 1940s.

Some areas in the country today are more populated with radio stations than the area has citizens, causing the media to resort to screaming, gimmick commercials just to prove they are first in the area. To the commission, I say "Hats off, and clean it up!"—Brooks Russell, vice president & general manager, WESR T Dasley, Va.
—"does a big job for our members"
says NORMAN E. CASH, President, TV Bureau

"Since we have an RCA TV Tape Recorder, sales managers of stations can go before their TV Cameras and tape reviews of their programs, personalities and opportunities—then send them here for playback before reps and prospective advertisers. Our conference room with closed circuit facilities can be used to present sales pitches with the impact of TV itself. As a result, one station made a $30,000 sale...one rep's sales totaled $150,000...a station group sold $65,000 worth of television...all through our RCA TV Tape Recorder.”

You're really shooting for sales when you use RCA Taping equipment. With RCA, you get superb picture quality and outstanding operating convenience, in a completely matched line of equipment, for finest all around performance. Regardless of what model you choose, you know that it is backed by superior engineering and service. Call the RCA Broadcast Representative with complete confidence. Or write RCA Broadcast and Television Equipment, Dept. RC-22, Building 15-5, Camden, New Jersey.
From the start, the product and tv seemed made for each other

A certain resourceful magazine representative had been trying to get an audience with Arthur Fischer, head of Cole Fischer Rogow Inc., New York office, but was unsuccessful in piercing the sheltering armor of his protective secretary. As a last resort to get through to him, this rep sent Fischer a message via a Western Union CandyGram and bet him that he could sell him space in his publication if he submitted to a presentation. Otherwise, the rep stated, he would eat the CandyGram’s cardboard box. He got the interview and made the sale.

This was Fischer’s first exposure to CandyGram. He recognized its tremendous potentials as a door-opener, sales clincher, vote-getter, and as the sweetest, swiftest gift by wire. The more he thought about CandyGram, the more amazed he became that he had never previously heard of it. He couldn’t comprehend how anyone could possibly have kept this the nation’s top secret. Accordingly, he made a pitch to the owners of CandyGram for the account, and found of all things... a CandyGram! He got the account.

A little research into the history of CandyGram revealed that it was only three years old and its past advertising had been almost exclusively in print, with very little effect. We decided to switch to tv.

A Theory and a Test • The change was dictated by the uniqueness of CandyGram—a new product that is more than merely a box of candy plus a telegram. The first of its kind, the candy product with a communication service produces a catalyst resulting in a most exciting gift message. Television seemed ideally equipped to project CandyGram’s sales message.

To test this theory, we proceeded with caution, by first buying four spots on a late movie in the Los Angeles market. Before the movie was half over the telephone switchboards in all Western Union offices within a radius of 50 miles of L.A. lit up like Christmas trees. The unprepared night shifts found it almost impossible to cope with the sudden flood of CandyGram orders. A pleasantly alarmed district manager for Western Union aroused me from a peaceful slumber—I’d fallen asleep while watching this old movie—and anxiously inquired about the cause of this unusual spurt of CandyGrams. The events of that night determined the formula and set the future course of CandyGram’s advertising program. I felt that we were now definitely on the right track.

Instead of clear and easy sailing ahead, it was soon brought to my attention that CandyGram’s prior costly advertising efforts, together with other injudicious business transactions, had put the company in a precarious financial situation. Internal executive friction was also hampering the progress of the business, and on top of that, a substantial payment on a long-term debt was due soon and threatened the very life of the organization. The exposure CandyGram needed on tv was costly and the company was short of cash.

Other Problems • I was called in to solve the company’s financial problems and also to act as mediator of its internal problems. On previous occasions I have allowed myself to be talked into the role of peacemaker and found it time consuming and nerve-racking. But I did want to salvage this account for our firm, so I agreed to become involved in this phase of CandyGram’s affairs.

As I viewed the situation, it was obvious that CandyGram suffered from under-capitalization and over-mismanagement. For immediate relief, an amicable solution to CandyGram’s problems was proposed. It entailed a modest contribution by all the stockholders to support the capital structure of the corporation. That plan was stymied by certain dissident stockholders and a battle for control ensued.

Since drastic action was indicated, I made a few phone calls to friends, who agreed to back me financially in the contest. I appeared before the board of directors and offered to put the needed funds into the corporation in exchange for a controlling interest. The struggle for control became even more intensified from that point on and continued right down to the finish line, when Western Union’s representative on the board cast the deciding vote for our plan. That was Feb. 1, 1962.

Tv to the Rescue • Seven days later a new Valentine’s Day tv commercial had been produced and was actually being viewed in seven principal markets. The result—the biggest week in CandyGram’s history! Business tripled and 10 cities ran out of candy.

After 30 days, CandyGram experienced its first month “out of the red.” For Easter, CandyGram went on 28 television stations with a commercial featuring an animated bunny in an Easter bonnet munching a CandyGram. The result—on Easter Sunday, two officers of the corporation found themselves trucking cases from the candy supplier to Western Union offices which were screaming for more CandyGrams.

Last Mother’s Day, CandyGram had to cut back on its anticipated television appropriation because the supply of candy on hand could not keep up with the demand.

Now CandyGram is feeling growing pains. Production of quality candy in volume is the main problem. Western Union’s standards specify that only the finest quality of kitchen-fresh chocolates may go into a CandyGram. To obtain the necessary quantity production of such high-grade candy is not as simple as one would imagine. Consequently, the next objective will be CandyGram’s own manufacturing plant.

The recent Christmas-New Year’s business was another record breaker. All the returns are not in, but CandyGram can’t pause to count or look back. CandyGram is busy putting on full speed ahead for its next target date: Valentine’s Day. A beautiful new red and gold box label with a Valentine heart motif is coming off the press. We’re confident this cupid, abetted by tv, will set a new high mark for CandyGram on Feb. 14.

Marvin R. Cole is president of CandyGram Inc. and board chairman of Cole Fischer Rogow Inc. He moved to California in 1953 to head the agency’s west coast office. He started his business career in radio at WAT AT Trenton, N.J., then joined WINS New York. After military service in Europe during World War II, he returned to WINS, and later formed the advertising firm of Van Wood Assoc. Inc. in New York. The firm later became Van Wood-Fischer Inc. and is now Cole Fischer Rogow Inc.
The world and 28th Street

From one side of the world, we tell of despotism and an experiment in human misery. From the other, Thrifty Acres on Grand Rapids' busy 28th Street, we report the benefits of super-store merchandising. Their differences are dramatic but each gives potent stimulation to our aim: to keep our listeners and viewers among the best-informed, best-served and best-entertained people in the world. To do this, we have the use of an awesome array of talent and facilities — our own staff and equipment, the far-flung resources of Time-Life Broadcast and the full scope of NBC. How well we are succeeding may be measured by the ratings we get and the awards we win — more by the respect and confidence we have earned from the two million WOODlanders we serve.
Completely local, custom made for you and you alone, the Dick Clark Radio Show is now available on an exclusive basis to the first station that buys it. For 5 days a week, 2 hours every day you can have the hottest radio show in America working for you and with you at a price that’s guaranteed to show a profit.

More — here’s the one radio show you can build to the skies with the knowledge and security that America’s #1 disc jockey will always be yours. Get the complete story. Write or phone Stan Kaplan at Mars today. It could be the best investment you ever made.

Within two hours after the show was purchased by WQXI in Atlanta, Dr. Pepper placed its entire budget on the show — a 52 week buy across the board.

Now Lancaster has two television stations, and the newer one, WLYH-TV, is not only providing the community with 18 out of the 20 most popular network programs, but is working hardest at providing best community service. WLYH-TV provides more local news... reporting local people in local activities... social events... community events... weather... more local sports coverage... does more to support community and civic projects. WLYH-TV does more for Lancaster and does it with snow-free, ghost-free perfect picture television!
WHERE THERE’S SMOKE, NO FIRE

- After all that talk of ousting him, NAB embraces Collins
- It gives him three-year contract with better tax terms
- But it won’t go along—yet—on controls of cigarette ads

LeRoy Collins won the big one last week—a new three-year contract as NAB president—but lost a skirmish over controls on cigarette advertising.

The combined NAB radio and television boards, with 41 of their 43 members present, voted unanimously last Tuesday in Phoenix to give Gov. Collins a contract retroactive to Jan. 1, 1963, and extending to Dec. 31, 1965, at a base salary of $75,000 a year plus generous allowances (for details see page 36).

The next day the television board refused to go along with the president’s impassioned plea for a strong resolution on cigarette advertising. Gov. Collins wanted the board to authorize the director of the NAB code authority, Robert D. Swezy, to try to get cigarette companies to agree to abandon advertising that appeals to minors. The board settled instead for a recommendation of the television code board that action on cigarette advertising be deferred until the completion of a current study of smoking and health by the U.S. Public Health Service (see story page 38).

The Smoke Bomb • The subject of cigarette advertising had precipitated the latest controversy over Gov. Collins’ administration. In a speech last November at a regional NAB conference in Portland, Ore., the NAB president, in defiance of advice he had sought from influential members, condemned cigarette advertising directed toward the young. His speech aroused immediate reaction from broadcasters who saw a threat to the more than $130 million a year that cigarette companies now spend on television and radio advertising (Broadcasting, Nov. 26 et seq.).

Before the NAB board meeting last week, some directors had favored a one-year contract renewal for Gov. Collins; others had suggested a contract cancellable by the association or its president on three, six or nine months notice. These short-term proposals were jettisoned early in the discussion last week.

Traditionally, the radio and television boards of the association meet jointly on the last day of the semi-ann-

Carefree togetherness of the NAB’s negotiating team and Governor LeRoy Collins is apparent in this picture taken in Phoenix before the NAB joint boards voted unanimously to give their president a new three-year contract. Shown are (l to r) Willard Schroeder, WOOD Grand Rapids, Mich., chairman of the radio board; Ben Strouse, WWDC Washington, vice chairman of the radio board; President Collins; Clair McCollough, president of the Steinman stations and chairman of the joint NAB boards; James D. Russell, KKTV (TV) Colorado Springs, vice chairman of the tv board, and William B. Quarton, WMT-TV Cedar Rapids, Iowa, chairman of the television board.
NAB votes top award to Bob Hope

IT'S A FIRST FOR NAB, BUT THE JILLIONTH FOR THE COMEDIAN

The NAB boards voted last week to give Bob Hope the association's Distinguished Service Award for 1963, the first time the organization has bestowed its highest honor on an entertainer. But the novelty is all on NAB's side. Accepting honors never before given to a performer is an old story to Mr. Hope.

In 1958 he received the Murray-Green AFL-CIO award for service benefiting community relations, whose other recipients include Eleanor Roosevelt, Herbert Lehman and Dr. Jonas Salk. The Screen Producers Guild honored him with its milestone award, the first to a performer. And in March, the International Radio & Television Society will make him the first performer to receive its Gold Medal award.

These awards and many others, including the Medal of Honor, pinned on him by General Eisenhower, the Oscar, the Peabody, the Military Order of the Purple Heart award, the Air Force Assn. award and innumerable plaques, scrolls and citations have been bestowed upon Bob Hope because, in addition to his active professional career, he has always found time to help any worthwhile cause. An associate once remarked that if Mr. Hope had been paid for all of his appearances for charity, his income would have been more than double the $25 million plus he is credited with having earned as a performer.

Funny Man • As a comedian whose appearances have spanned more than a third of a century, Mr. Hope has contributed much to the world's store of laughter. But his unique contribution is his series of annual Christmas tours to far-off military camps, ships and bases where American troops are stationed. To millions of boys serving their country far from home, Bob Hope is the living symbol of the yuletide season.

Bob's first Christmas tour, to Berlin in 1948, was an extension of his soldier shows at home, which had started May 6, 1941 (well before Pearl Harbor), at March Field, California. The reception of Bob and his pack of entertainers, always including a number of shapely beauties, by the GI's in Berlin was overwhelming. In 1949 his destination was Alaska; it was the Pacific in 1954, England and Iceland in 1955, Alaska again in 1956, the Orient in 1957, the Azores, North Africa, Iceland and Europe in 1958, Alaska in 1959, the Caribbean in 1960, Newfoundland and Greenland in 1961 and, for the Christmas season just past, a Far Eastern junket to Japan, Korea, Okinawa, Formosa, the Philippines and Guam. (The years 1951 and 1953 were exceptions.)

He Likes It • Why does he do it, leave home and family to follow a frantic schedule? Bob gave the answer a few months ago on the Purex special telecast, "The World of Bob Hope," on NBC-TV. "As long as I'm healthy," he said, "I've got to do the things I like to do. I like to play golf and I like to entertain and I get the chance to help a few people here and there and I love it...."

Bob Hope was born Leslie Townes Hope, May 29, 1903, in Eltham, England. He was the fifth of a family of seven boys, whose father, a stonemason, moved to Cleveland when Bob was only four. Bob considers Cleveland his home town. He went to school there and learned to play an exceptional game of pool, to box well enough to begin a ring career but not well enough to continue it for long, and to tap dance. When Fatty Arbuckle, one of the movies' first comedy stars, came to Cleveland on a personal appearance tour and needed another act to fill the bill, Bob and a pal, George Byrne, formed a song-and-dance team and got the job. Hope & Byrne stayed together through vaudeville, but when Bob, introducing the act to follow, tried a joke and found it brought more applause than his dancing, the team broke up.

Radio Regular • Bob's first broadcast was in 1933, as a guest on Rudy Vallee's Thursday night hour on NBC. By 1935, Bob was working regularly on radio in addition to his Broadway appearances. He was sponsored successively by Bromo Seltzer, Atlantic Refining, Woodbury Soap and American Tobacco until, in 1938, The Bob Hope Show for Pepsi started a 10-year run as a weekly half-hour on NBC. Then Lever Bros., which had acquired Pepsi, switched Bob to other products.

In June 1950, NBC bought into Hope Enterprises, paying Bob Hope $1 million in a capital gains deal that gave the network a firm five-year contract and blocked any ideas he might have had of following Jack Benny, Amos 'n' Andy and others to CBS. Five years later, NBC made another payment and Bob, still-owner of Hope Enterprises, which produces all of Bob's broadcasts and some of his movies. On his own, Mr. Hope has an assortment of investments including real estate (he recently sold Revue 37 acres of land adjoining their studios for over $1 million, property he'd bought in the late 30's for a 20th of that amount); banking (he is a director of the First Western Bank & Trust Co.) and broadcasting (he holds 4.5% of Metropolitan Television Co., licensee of KOA-TV Denver and KOAA-TV Pueblo, both Colorado and both primary affiliates of NBC-TV).

Tv Debut in 1950 • Bob made his
tv debut on Easter 1950 for 'Frigid- aire, which sponsored him in five other tv specials during the following 12 months. Chesterfield, which sponsored his weekly radio show during the 1950-51 and 1951-52 seasons, also picked up the tab for several of his telecasts, as did General Foods, which succeeded Chesterfield as his radio sponsor, American Dairy Assn. was his last radio sponsor, from the fall of 1953 through the spring of 1956.

Other sponsors for Bob's tv specials (he has refused all offers to do a weekly series and from the first confined himself to not more than six or eight shows a year) have been Chevrolet, Timex, Plymouth, Johnson Outboard Motors, Dutch Masters cigars, Buick, Revlon, Scripto, Chrysler, Beechnut Gum, Chemstrand, Sara Lee and (last Wednesday) Pepsodent once more. With a price tag of $275,000 apiece, the Hope specials are generally co-sponsored by two advertisers.

The Hope broadcasting format is essentially the same for his hour-long tv programs as it was for his half-hour radio shows: a topical monologue to open, comedy routine with the guest stars, a musical number or two and a chorus of "Thanks for the Memories" to close, all heavily sprinkled with rapid-fire gags.

Earthy Humor • Bob's humor is inclined to be of the barnyard or Chie Sale variety, especially when he's playing to a GI audience. "This is the only hot spot I've ever seen where you have to wear long johns," he told one group. But neither his political gibes nor his earthy humor bothers NBC's continuity acceptance department as much as Bob's persistent use of brand names. He insists that to mention a familiar product by name adds to the point of a joke and if the joke is a good one it should be left in the script, trade name and all.

Bob's listing in the program credits as executive producer is far from puffery, his associates aver. "He works hard," one said last week. "It may take only part of a day to tape a show, but at 2 the next morning you'll find Bob there still going over the tape."

Serious Golfer • When he's not working, he can usually be found at the nearest golf club. He takes his golf very seriously, too.

"You might not think it from the pace he goes, but Bob's family is very important to him," an associate stated. "Once or twice a week is family night at the Hope house, with no visitors, just the Hopes and the children, and a full evening to talk over family affairs and get problems straightened out." Dolores Reade was singing in a New York night club when Bob was playing in "Roberta." He heard her, invited her to see his show and, early in 1934, they were married. They have four children, all adopted: Linda, 23; Tony, 22; Kelly, 16; and Nora, also 16.

The NAB Award • When advised last week that he would be given the broadcasters' Distinguished Service Award, Mr. Hope said: "This is what happens if you hang around the business as long as I have. It's got to fall your way... I don't know how you picked on me, and I don't want you to change your mind."

The award will be presented at the opening session of the NAB's annual convention in Chicago, April 1.

- Voted, 7-4, to reaffirm its previous position that community antenna systems should be licensed and regulated, but ordered that the words "stringent" or "strict" be eliminated in its resolution. The board authorized appointment of a new six-man committee on caTV which also would look into its pay-tv implications. The special committee will be appointed by Messrs. Collins and Shurton.

- Vetted a proposal that the Televisions Information Office be merged into the NAB public relations department and authorized its continuance outside NAB, with a separate membership budget of about $500,000. Roy Danish, TIO director, was given a vote of confidence. Sydney H. Eigges, NBC vice president, was appointed to replace Lester Bernstein, former NBC vice president who resigned last month to join Newsweek, as a member of the nine-man TIO board. Mr. McCollough is chairman.

- Heard a report that tv station membership in NAB now is at all-time high, with 396 members. Another peak has been reached with 400 tv station code subscribers.

Radio Board Meets • The NAB radio board, convening Thursday, had a fairly quiescent meeting, winding up by lunch time; the television board met until late afternoon the preceding day.

Actions of the radio board included:
- Approval of code board recommendations on cigarette advertising, corres-
NAB’s Comstock levels blast against FCC harassment

Paul B. Comstock, NAB vice president for government relations, last Friday made the strongest attack on FCC policies that has come out of the NAB since LeRoy Collins took over as president two years ago.

In a speech before the combined NAB board of directors, Mr. Comstock, Florida attorney who assumed his NAB post last September, leveled a blistering assault on the FCC’s “campaign of harassment” and what he described as “government coercion on programming.” He also warned broadcasters against the “fairness and equal time trap.”

“The FCC,” Mr. Comstock said, “continues to issue a ceaseless stream of proposals for rules and legislation to control broadcasting, letters of inquiry to licensees, questionnaires, probes, investigations, hearings, and sensational public utterances.

“No one of these jabs will kill broadcasting, but there is a limit to the capacity of our hide to absorb these waves of Lilliputian arrows. Quite aside from the constitutional and philosophical considerations involved here, all this useless froth and fuss wastes valuable time, asperses the good name of the broadcaster and imposes a financial burden, particularly intolerable for the smaller stations. Means must be devised to bring this harassment to a halt.”

Disclaiming any intention of impugning the integrity of members or the staff of the FCC, he said the commission, nevertheless, “is pursuing a dangerous and unwarranted course.”

**Doctrine Questioned**

“We are seeing the liberal doctrine of public interest contorted to support an illiberal scheme of coercion against programming.” Mr. Comstock charged. “It is an ingenious effort to use freedom of expression to stifle freedom of expression. Knowing that Sec. 326 of the Communications Act denies them the power to censor or interfere with the exercise of free speech and that Congress never presumed to grant the commission power to regulate program content, the FCC now seeks to accomplish these ends by arousing segments of the public. . . . We must object to efforts by the government to manipulate and exploit expressions that are not spontaneous.”

Mr. Comstock said government-inspired letter writing campaigns, public hearings unconnected with license considerations and other efforts to enlist segments of the public are beyond the scope of the commission’s responsibility. “Publicity is not its objective,” he said. “Neither is the stimulation of local interest. Simply because some irresponsible official in Washington may think that the public is not aware of its responsibilities or of those of the broadcaster, he may not arrogate to himself the role of a latter-day Paul Revere. Congress has not authorized the FCC to conduct a program to arouse and inform the people and it has not appropriated funds for this purpose.”

**Broadcasters Beware**

“Let us beware, too, of long reports colored in innocence of pious words about free speech, free enterprise, and desires to preserve a communications industry which are inwardly ravening wolves of coercion upon programming.”

As to fairness and equal time, Mr. Comstock said that if broadcasters must be bound to “counterpose an equal and opposite to every position they take, we will soon become nothing but a sterile conduit.” He urged continuance of the policy to seek repeal of Sec. 315, but said he did not believe it would immediately solve all problems. “If we are to be saddled with some unworkable doctrine we will be worse off than before.”

During last November’s election, he said, so many local disputes were appealed to Washington that the arbiter became some civil servant “deep in the bowels of the commission.” Any substantial growth of this practice, he said, would sentence broadcast journalism to death by bureaucratic strangulation.

**BROADCASTING, January 21, 1963**

**Mr. Comstock**

An unwarranted course

- Reduction in code dues of stations that are not NAB members (in a move to stimulate new subscriptions) so they will be equal to those of member stations, or one-half of the highest published one-rate per month. The maximum was reduced from $360 per year to $216.

- Accepted with thanks the report of the special committee on radio population and terminated the committee which prepared the presentation to the FCC (BROADCASTING, Jan. 14).

- Reappointed four members of radio code committee, whose terms are about to expire: Elmo Ellis, WSB Atlanta; Dick Dunning, KHQ Spokane, Wash.; Robert Pratt, KGFF Coffeyville, Kan., and Herbert Kreuger, WTAG Worcester, Mass.

- Approved appointment of a liaison committee to meet periodically (perhaps twice a year) with an RAB committee to effect closer cooperation.

- Endorsed a report submitted by FM Director Strouse on fm development which, among other things, sees protection under grandfather clause against reduction of powers of existing fm stations under proposed new fm allocations. The association also endorsed strict adherence to mileage separation standards and cooperation with the National Assn. of Fm Broadcasters.

- Radio Vice President John F. Meagher reported that progress is being made in efforts to arrange for group libel-slander insurance for NAB member radio stations.

- Instructed the NAB public relations service to arrange for the presentation of suitable awards to veterans radio performers who are still active. Awards would be made part of the 1963 Radio Music Model Program.

- Robert T. Mason, WMRN Marion, Ohio, reported on activities of the All-Industry Radio Music License Committee, of which he is chairman.

The radio board was told that the NAB membership is at an all-time high, with 1,852 am members, 663 fm members and 1,681 code subscribers.

**Record Budget**

An all-time high budget of nearly $2 million for the 1963-64 fiscal year, which begins April 1, was drafted by the association’s finance committee on Monday and was expected to be ratified at Friday’s final
This is Atlanta! The cable stretched from two television sets in a studio at White Columns northward to an NBC studio in Rockefeller Center, New York.

For almost a half-hour, all 800 miles of that cable were reserved for the exclusive use of over 150 high school newspaper editors and correspondents, who had a question and answer session with NBC's Frank McGee.

This was only one of the stimulating experiences on a November afternoon, during WSB-TV's presentation at the station's Fourth Annual News Conference. Ray Moore, WSB-TV's News Director, and the South's number one news team again demonstrated to these aspiring journalists the importance of considering broadcast journalism in their future.

Atlanta's WSB-TV
WHERE THERE'S SMOKE, NO FIRE
continued

combined board session.

Anticipated income for the approaching fiscal year is $2,006,122, with estimated overall expenses of $1,884,378, but the latter figure is exclusive of $60,000 from existing surplus for operation of the research department created a year ago. For the 1962-63 fiscal year, which runs through March, total income was budgeted at $1,808,000, with a deficit of approximately $16,000. The estimated totals for 1962-63, regarded as fairly accurate with less than three months to go, were $1,879,000, with a surplus of $245,500.

The proposed 1963-64 budget was broken down to include general fund income of $1,024,000; radio fund income of $271,000; radio code fund of $127,000; tv fund of $255,000 and tv code fund of $328,000, for a total of $2,006,122. Expenses were calculated at $911,000 general fund; $271,000 radio fund; $127,000 radio code fund; $246,000 tv fund; $328,000 tv code fund, for the total of $1,884,378.

Collins Renewal • At a Thursday morning news conference at the Camelback Inn, Phoenix, portions of which were filmed by Phoenix tv stations, Clair R. McCollough formally announced that Gov. LeRoy Collins had agreed to accept a new three-year contract as NAB president. Gov. Collins responded with the observation that he looked forward to "a continued constructive relationship" with the NAB board and its membership.

Most of the questioning by local news reporters and wire service men centered around the cigarette advertising issue (see page 38). Gov. Collins said he spoke out against cigarette advertising in his Portland, Ore., address last November because "I felt that way."

Gov. Collins said the board had not exacted promises from him that his "scripts" be cleared in advance. Asked the perennial question about FCC Chairman Newton Minow’s "vast wasteland" speech of nearly two years ago, Gov. Collins said he disagreed that there had ever been a wasteland and that there had been vast improvements in programming during the past year and that there would be continued improvement.

Public Office • Asserting that he liked "tough" jobs, Gov. Collins described his NAB duties as being in that class. He said he had nothing definitely in mind about running for public office but that he could not rule out the possibility that some day he would.

Stating that broadcasters want to be "masters of their own house," Gov. Collins said that they would "resist with all their vigor" any effort by the FCC to enforce the voluntary codes as part of the FCC rules. "We say to government, 'you leave this area alone.'" He called the codes "the finest collective effort in self-disciplining in the world."

Collins contract: all this and $75,000 too

LeRoy Collins' new deal as NAB president, granted him last week by the association's directors, is intended to extend for three years the take-home pay and perquisites he's been getting under his original contract.

That contract has provided him with a base salary of $75,000 a year, a special living allowance for him and his wife of $12,500 a year, and the reimbursement of the expenses of Gov. Collins and his wife "incurred while promoting the affairs, performing the functions and executing the policies [of the association], including but not limited to items of travel, entertainment, attending conventions, board meetings, other trade meetings and [meetings of] government, legislative, regulatory or similar bodies." In addition the contract has required the association to provide a "new" automobile, replacing those of the previous years, of a type "suitable to maintain the prestige" of the NAB president. (A Cadillac has been at his personal disposal. Cadillacs were also provided for his predecessor.)

Under his new deal, Gov. Collins will continue to receive his $75,000 salary, but some change in his expense allowances may be required to provide him with net revenue equal to what he has been getting. His $12,500 living allowance has reportedly been exempt from personal taxes, a condition that may be changed by the tightening of personal tax rules and the extension of his residence in Washington.

The original contract under which Gov. Collins was hired became effective Jan. 1, 1961, and still had a year to run. That contract was scrapped last week when the new one was negotiated for a three-year term retroactive to Jan. 1, 1963. The new contract provides that at the end of the second year, it will be subject to a review by Gov. Collins and the association. That apparently means that his deal is firm for at least two years.

Ambitious Research • NAB will embark on an ambitious program of research during 1963, including five separate projects costing approximately $45,000. The projects were outlined last Friday at the combined NAB board meeting by Donald McGannon, president of Westinghouse Broadcasting Co. and chairman of the NAB's research committee, and Dr. Melvin Goldberg, NAB vice president for research.

The five studies are targeted for completion either this year or in 1964. Some will be undertaken by the NAB research staff and others will be done by outside groups. The projects, as outlined to the board:

- The Role of Entertainment in Society, by Dr. Harold Mendelsohn, professor and director of research, radio-tv-film department, U. of Denver. Designed for completion in the spring of 1964, this study will cost approximately $2,500. It is designed "to develop a comprehensive overview of 'entertainment' as a psychological and sociological concept as it relates to the functions of the mass media (particularly radio and tv) in our society." From this overview, researchable concepts will be developed.

- Research Methodology Implementation of Madow Report, by Professor Herbert Hyman, Columbia U., and the NAB research department. It will cost approximately $5,000 and is to be completed in the late fall of this year. Basis of this study is a March 1961 report to the House Commerce Committee on rating services prepared by an American Statistical Assn. committee headed by William G. Madow of the Stanford U. Research Institute. Objective of the NAB project would be to implement the Madow report positively to show how rating services, despite weaknesses, may properly be used to provide radio-television management with valuable information.

- Radio Methodology Research Primer, to be undertaken by the NAB research staff and/or a major university and to cost between $7,500 and $10,000. It will be completed in the spring of 1964 and is "to provide a research primer for radio and television stations that have no research available or have no qualified research personnel but wish to conduct research at a local level."

- "Holistic Approach to Media (a study of all media's part of daily life," by Dr. Philip Eisenberg of Motivation Analysis Inc. It will be completed next winter at a cost of $7,500 to $10,000. This study is designed to provide a base and pilot for future research and its goal is "(a) to find out how people use all media and especially radio and tv in their daily lives; (b) to determine the role of radio, tv, magazines, newspapers and books in the lives of individuals and families; (c) to isolate

BROADCASTING, January 21, 1963
No crackdown seen on tv cigarette ads

There will be no immediate crackdown on televised cigarette advertising by the NAB TV Code Review Board, despite the urgings of NAB President LeRoy Collins.

Meeting in Phoenix last Wednesday, the NAB TV Board accepted the recommendation of its code board that no position be taken on cigarette advertising pending the outcome of a U.S. Public Health Service study on the effect of smoking on health. The action was taken after Gov. Collins proposed that the code-authority director, Robert D. Swezey, be instructed to contact leading tobacco manufacturers and seek to obtain their voluntary agreement to avoid advertising of "special appeal to minors." This motion was tabled.

The next day, Gov. Collins announced that the NAB boards had approved a continued study of the relationship of cigarette advertising and minors to be undertaken by the code authority. "I feel quite encouraged about the progress being made in this matter," Gov. Collins told a Thursday news conference. "I am confident that this action is a sincere and good faith effort on the part of the broadcasters to deal with this subject constructively," he said.

William Pabst, executive vice president of KTVU (TV) Oakland-San Francisco and chairman of the tv code board told the tv board that the code group's study failed to substantiate charges that cigarette advertising is directed toward encouragement of smoking by minors. The code board, he said, stands on its announcement of last Dec. 12 that "tobacco advertising having special appeal to minors, express or by implication, should be avoided" (Broadcasting, Dec. 19, 1962).

Pleasure • Gov. Collins told the news conference that he was satisfied and "quite encouraged" over the tobacco advertising action of the board and that the NAB study would be related to independent studies, including one under the auspices of the surgeon general of the U. S. 

Asked when the code board might take action on cigarettes, Gov. Collins said this possibly could come at the next NAB board meeting in June. He said he assumed some action will be taken then if the surgeon general's report is ready. If not, he said, the code board will not be prepared to report to the full board on the subject.

The radio board at its meeting Thursday took similar action on cigarettes following a report by its code review board chairman, Cliff Gill, KEZY Anaheim, Calif., which recommended a continuing study of the problem.

Men in White • The television board also approved a series of code review board amendments adopted at last month's Washington meeting. One amendment prohibits the use of physicians, dentists, nurses or other practitioners, or actors representing them, in television commercials. Previously only actors representing these professionals had been banned. The code authority left it to various professional organizations to cope with the problem of actual practitioners who appeared in commercials.

The new provisions go into effect July 1. The time lag permits replacement of the old commercials with new ones.

The new restrictions prevent "men in white" from being used either directly or by implication, such as the draping of a sheet over the chair of an actor in a tv commercial. Exceptions are made for institutional announcements not intended to sell a specific product or service to the consumer and public service announcements by non-profit organizations. These may be presented by accredited physicians, dentists or nurses, subject to approval by the broadcaster.

The board also ratified the appointment by President Collins of Douglas Mansfield, WBRZ-TV Baton Rouge, La., and the reappointment of Lawrence H. Rogers, II, Taft Broadcasting Co., Cincinnati, to the television code review board. Mr. Mansfield succeeds Mrs. A. Scott Bullitt, KING-TV Seattle, who has served two terms and therefore is ineligible for reappointment.

Editorializing • Also approved was a new code amendment on editorializing which reads: "Broadcasts in which stations express their own opinions about issues of general public interest should be clearly identified as editorials. They should be unmistakably identified as statements of stations' opinion and should be appropriately distinguished from news and other program material."

The board approved a code amendment clarifying a provision which permits limited waivers from the code's commercial time standards for programs presenting women's services, features and talks to talk shows, demonstrations and similar material with genuine audience interest.

A new feature for the NAB convention

**FREEDOM IN BROADCASTING**

A new feature on "Broadcasting in a Free Society" will be added to the 1963 NAB convention agenda in Chicago's Conrad Hilton Hotel, March 31-April 3.

The convention committee made final plans for this year's program at the combined NAB board meetings in Phoenix last week and announced the addition of the panel on freedom in broadcasting. It will be held Monday, April 1, with Erwin D. Canham, radio commentator and editor of the Christian Science Monitor, as moderator.

Opposing viewpoints on government control of broadcasting will be explored, with Washington attorney Theodore Picson speaking for fewer federal restrictions and Dean Roscoe Barrow of the U. of Cincinnati Law School arguing in support of increased government regulation. Dean Barrow is the author of the FCC's 1957 report on network broadcasting which recommended sweeping changes in regulatory philosophies and which resulted in studies still underway by the commission.

Four additional members of the panel will be selected later, the NAB said.

**FCC Back Again •** A popular feature of past conventions—the panel at which members of the FCC answer questions—will be repeated again this year the afternoon of April 3, the convention committee announced from Phoenix. Comedian Bob Hope will receive the 11th NAB Distinguished Service Award from NAB President LeRoy Collins at the opening session April 1 (see story, page 32). Gov. Collins later will greet the convention's keynote address at the luncheon that same day.

**FCC Chairman Newton N. Minow again will speak at the second-day luncheon, as he has done the past two years, and a speaker for the April 3 lunch will be announced later, according to James D. Russell of KKTU (TV) Colorado Springs and Ben Strouse,
What cuts the cutting out of video tape editing?  

Don't cut your tape. Cut your cost. How? Simply turn the knob on an Ampex Electronic Editor. The old scene is erased, the new one added—all electronically. And both old and new sections of the tape can be viewed during actual production. The Ampex Electronic Editor inserts new scenes, new commercials, production changes, or corrects goofs—without splicing. You save time, save tape!

The Electronic Editor also lets you do stop-and-go recording, multi-camera effects with a single camera, and squeeze action—all without cutting the tape. Best news of all: no special training is needed. For more details write the only company providing tape and recorders for every application: Ampex Corp., 934 Charter St., Redwood City, Calif. Worldwide sales and service.
Retail sales up in N.Y. despite strike

TVB STUDY IS BASED ON FEDERAL RESERVE DECEMBER FIGURES

A study showing that retail sales had perked up rather than slackened off during the current newspaper blackout in New York is being released today (Jan. 21) by the Television Bureau of Advertising (CLOSED CIRCUIT, Jan. 14).

The study is based on Federal Reserve Board reports showing gains or losses in retail sales in each of the five weeks from Nov. 25 through Dec. 29. New York's nine major newspapers have been shut down since last Dec. 8 by a printers' strike against four of them (BROADCASTING, Dec. 17, 1962, et seq.). The five other papers closed voluntarily.

TVB's compilation showed that in each of the two weeks preceding the strike, retail sales in New York City had been trailing both the national average and the levels maintained in the city during the comparable weeks of 1961, when all the newspapers were operating (see table below).

During the first week of the newspaper shutdown, sales picked up to within a percentage point of the comparable 1961 period; during the second week they went ahead by 1%, and in the third week (Dec. 23-29) they rose 21% above the same week of 1961.

Retail sales throughout the U.S. were lagging behind their comparable 1961 levels during the two weeks before the strike, but by less than in New York City. The national figures showed a slightly higher rate of increase in the ensuing three weeks, reaching 34% in the week ended Dec. 29.

For the New York Federal Reserve District, which includes most of the rest of New York State as well as New York City, the increase was a little faster than the U.S. average.

New York City Gains * In the week ended Dec. 29, sales in the New York district were up 37% from the same period of 1961, as compared to the 34% gain for the U.S. as a whole.

Making this comparison, the TVB report said that, in relation to retail sales for the entire country, New York retailers "have been doing better than average, . . . far ahead of last year [1961] . . . in spite of the strike of the newspapers."

Harvey Spiegel, TVB research vice president, added: "If anyone wanted to be silly enough to attempt to directly relate the volume of newspaper advertising with the volume of retail sales, these charts would show that retailers are better off without newspaper advertising."

But, he added, comparisons of sales in New York City with those in nearby Newark, where newspapers were operating, showed that Newark retailers did even better, relatively, than their newspaperless counterparts across the river.

Post-Holiday Report * Since the TVB study was made, Mr. Spiegel noted, Federal Reserve figures for the week ended Jan. 5 have become available. For this post-holiday period, traditionally slow, the New York district's gain over the same period of 1962 tailed off to 4%, as compared to 11% nationally, while sales in New York City dropped 5% below the same week a year ago and Newark's eased off to a par with its total for the same week of 1962.

The TVB study did not report on Cleveland, where another newspaper shutdown has been in progress, but Mr. Spiegel said FRB figures for that area showed that, compared to the same weeks a year ago, sales were down 13% for the week ended Dec. 15 but up 15% for the next week and up 23% for the week ended Dec. 29. For the week ended Jan. 5 they were running 3% ahead of the total for the same week a year ago.

But, the TVB study concluded, "more important than Federal Reserve figures is the picture of what's been happening to the individual stores, and from here it's possible to draw a moral that can help other retailers in other cities. How the newspaper strike affects a retailer can be predicted by seeing the type and consistency of the retailer's advertising."

"In New York (and in other areas) the store which through consistent advertising has created an image for itself isn't hurt by the loss of its newspaper advertising compared to the store that has used only special item promotions to attract business. It doesn't seem to matter whether the image is one of quality, variety or economy, the store that has it has an investment in public awareness that can carry it through longer periods of no advertising than can the hot-item special promotion type store."

Radio and television stations were the chief beneficiaries of retail advertising budgets when the newspapers closed down, with many stores entering the broadcast media for the first time and many others adding to existing schedules. There have been no official figures on billings thus gained by broadcasters, but the Radio Advertising Bureau reported last week that it was undertaking studies in both New York and Cleveland to ascertain radio's share (see page 46).

The following table shows the FRB figures on which TVB based its New York analysis. The percentages denote the retail sales gains or (losses) as compared to the same weeks a year ago.

THE LUCY SHOW
Music by
WILBUR HATCH and JULIAN DAVIDSON

JULIAN DAVIDSON played banjo and guitar for many great bandleaders, including Ben Bernie, for whom he wrote gags and special songs, even the first singing commercial. He served CBS for 14 years, joined the Desi Arnaz radio show and has been associated with the "Lucy" show since it went on the air.

WILBUR HATCH, a veteran of 40 years in broadcasting, has written dramatic music for and been musical director of many outstanding radio and television shows. Among his unusually long string of composing and conducting credits: Our Miss Brooks, December Bride, Gunsmoke, Pete and Gladys, Have Gun—Will Travel.

and there are 104 other regular network programs which use BMI music.

Short counts of the radio audience

SPOKESMEN CALL FOR MEASUREMENTS OF TRUE CIRCULATION

The cry for better radio rating methods continued to grow last week.

NBC Radio and its affiliates put new steam behind their drive for better measurements of the radio audience. Officials of the network have been vocal for some time in criticizing inadequate measurements of the full audience. Last week affiliates spoke up.

New radio audience rating techniques must be developed to adequately measure and “identify” the immense audience which listens to portable and automobile radios, insists Thomas S. Carr, secretary-treasurer of the NBC Radio Affiliates Committee.

Mr. Carr, who is vice president and general manager of WBAL, Baltimore, is exhorting NBC Radio affiliates to “speak out forcefully” on the “true dimensions” of radio.

In a letter he’s sending to the affiliates, Mr. Carr says existing ratings show that “plug-in” or in-home listening for the past three years has declined during the warm-weather months. Thus, the existing rating methods show a reduction in the radio audience during such periods, he says. What happens?

One Every Second • Well, he says, there are 29.5 million radio sets sold every year—nearly one per second. Of the 29.5 million, four out of five are self-powered portables or car radios, he says, producing set sales figures to show an upward trend in purchases of non-plug-in radios for the years 1957-61.

“Common sense tells us that these warm weather months are precisely the time when use of portables and car sets increases,” he says. “Clearly,” he adds, present ratings, “which are based on plug-in sets alone, are outmoded.”

Even though the total of radio sets has grown to 183 million (“the U. S. has nearly as many radios as people”), the growth is a mixed blessing to radio broadcasters as long as advertisers rely on ratings that do not accurately and adequately account for out-of-home listening, he says.

Thus, he continued, broadcasters need to know their “true circulation.” As long as the total radio audience is “under-measured,” he said, the medium will be under-priced.

Mr. Carr advised NBC Radio affiliates to be more aggressive in promoting radio’s “total” audience “through your promotion department, your sales staff, your national spot reps.”

30%-35% More Audience • At the NBC Radio Affiliates Committee meeting in Los Angeles a year ago, Mr. Carr said, the network revealed the results of a special C. E. Hooper Inc. pilot survey, commissioned by NBC and conducted in 15 metropolitan markets, which showed that an accurate measurement of out-of-home listening could add 30%-35% more to the present in-home audience figure reported by the ratings services.

Since then, A. C. Nielsen, too, has begun to explore out-of-home circulation, he said. He commended similar studies of listening to portable and car radios, now being planned by “several stations” in cooperation with colleges and universities.

NBC Radio affiliates together represent a “powerful voice,” he said. He asked the affiliates to “let your rating service know your dissatisfaction. If enough of us do, we’ll get action.”

Although he didn’t say it to NBC Radio affiliates, Mr. Carr had a grim warning for television stations who may be unsympathetic to the troubles radio is having with its uncounted audience.

“You can buy a little Japanese [portable] tv receiver today for not more than $135. Just wait until this summer and see how many of these receivers show up on the beach.”

McDaniel Talk • NBC Radio President William K. McDaniel said in a talk in Toronto the week before (Broadcasting, Jan. 14) that radio’s audience is growing “astronomically” but is virtually “invisible” to researchers; that the audiences of self-powered radios are not being measured satisfactorily.

There have been reports that the A. C. Nielsen Co., which inaugurated semi-
annual reports on battery-portable listening last spring (Broadcasting, May 28, 1962), may soon expand its activity in this area.

Nielsen and NBC authorities confirm that they have been "working together" on the problem and express belief that "something will come of it." They won't say what, however.

It was understood that part of the work involves a plan to install devices in portable transistor radio sets by which total listening hours could be measured through checking at specified times. The obvious shortcoming of the device at this point is that it will not measure shares of audience for each station.

The call for more complete listening measurement has been a recurrent one among broadcasters and has built into a crescendo during the past year.

Paulie Criticism • Robert Paulie, president of ABC Radio, has been one of the most outspoken critics of the old order, singling out the Nielsen Radio Service in charges that radio is being "short-changed" (Broadcasting, April 16, 1962).

He refused to go along with Nielsen's expanded service, and last September named Sindingler & Co. as market analyst for ABC Radio to provide detailed reports on both in-home and out-of-home listening and also on audience composition, attitudes and buying plans (Broadcasting, Sept. 17, 1962).

The other radio networks remained with Nielsen, but all in various ways have stressed the importance of transistor-battery-portable listening and the need to have it counted to give advertisers a true picture of radio's size.

They cooperated in the development of Nielsen's expanded service, which included the addition of special reports on listening to non-plug-in sets (so did ABC Radio, though it refused to go along with the result, claiming the new Nielsen service failed to correct shortcomings present in the old).

CBS Radio has underwritten at least two surveys whose results, released last March, indicated that more than 40% of all U. S. homes own at least one self-powered portable radio set— and hence that a substantial audience is being overlooked by conventional measurements (Broadcasting, March 12, 1962).

Hurleigh, Too • Mutual President Robert Hurleigh also has stressed the need to take transistor-set listening into account in measuring radio's audiences.

Nielsen's first special report on "battery-only-portable radio usage," issued last May, estimated that in wintertime portables add about 68% (Broadcasting, Oct. 8, 1962).

Pulse Inc. maintains that for the past dozen years its local radio reports have sought to measure all listening, no matter where it occurs or what kind of set is involved. Their interviewers, Pulse officials say, are constantly reminded to seek information of all listening.

In addition to its regular local reports, Pulse published last fall a special national study, "Dimension '62," which reported that listening to movable in-home sets amounts to 25% of total listening, while fixed-position in-home sets accounts for 54% (and out of home, 21%).

C. E. Hooper Inc. similarly says its regular local service measures all listening, and that it also has done special studies of listening to self-powered vs. plug-in sets.

NBC Radio sales are ahead of last year

NBC Radio last week reported it had scored at least one sale a day for the 13 business days preceding Jan. 16. According to William F. Fairbanks, vice president in charge of sales, radio network sales are over $3.2 million, and in the first quarter alone, net sales in new and renewed business are nearly $250,000 ahead of last year's mark.

Mr. Fairbanks added the network is averaging "well over $800,000 a week during the past four weeks and there doesn't seem to be any sign of sales activity falling off."

Merchandising stations listed in BBD0 guide

Radio and television stations which offer in-store display space to advertisers are listed in a revised study recently issued by BBD0's marketing department.

The 288-page, two-volume report lists alphabetically by city 396 radio stations and 85 television stations that make supermarket space available to advertisers. For most of these stations, the cooperating stores are named.

The report has been furnished to BBD0 clients but may be obtained at a cost of $5 by writing the agency's marketing department at 383 Madison Ave., New York 17.
METRO REP UNIT SPLITS TV, RADIO
Sias to head television sales; Neuwirth named for radio

Metro Broadcast Sales, New York, has split into radio and tv organizations effective today (Jan. 21), a move described by John W. Kluge, Metromedia president and board chairman, as "a blueprint of ... growth."

Metro Broadcast Sales is a station representative division of Metromedia Inc., which also is a station owner. The new organization will be known as Metro Broadcast Television Sales and Metro Broadcast Radio Sales.

In the expansion of the rep arm of Metropolitan Broadcasting-owned stations, two executives are involved. John Sias, who was national tv sales manager for Westinghouse Broadcasting Co., becomes vice president-director of the tv division, and H. D. (Bud) Neuwirth, who has headed the rep firm since its formation in February of last year, continues as vice president and director of Metro Broadcast Radio Sales (also see WEEK'S HEADLINERS, page 10).

The radio sales unit now will represent Metropolitan Broadcasting's stations WNEW New York, KMBC Kansas City, WIP Philadelphia, and WHK Cleveland. It also represents WCBM Baltimore.

The tv sales unit will represent Metropolitan Broadcasting's WNEW-TV New York, KMBC-TV Kansas City, WTTG (TV) Washington, D. C., KOVR (TV) Sacramento-Stockton, WTVH (TV) Peoria, and WTVP (TV) Decatur, Ill., and can be expected in time to add Metromedia's newly purchased KTTV (TV) Los Angeles (see story, page 72).

The rep firms have their headquarters in New York (at 3 East 54th St.), and operate regionally in Philadelphia, Chicago, Detroit, St. Louis, San Francisco and Los Angeles.

American Cyanamid is putting more consumer money into tv

A leading advertiser in trade and farm publications, American Cyanamid Co., Wayne, N. J., is making an increased effort to reach the general public via television.

The company, known primarily as a producer of chemicals, yesterday (Jan. 20) began sponsorship through Dancer-Fitzgerald-Sample, New York of a new tv program, Alumni Fun (Sundays, 4:30-5:00 p.m.), on ABC-TV. Although it is American Cyanamid's second venture into network tv, it is the company's first full sponsorship nationally of a weekly show. The firm was a co-sponsor of Eyewitness on CBS-TV last year.

American Cyanamid's continued moves toward network television are attributed to its growing emphasis on consumer products. Last year the company announced negotiations to acquire Dumas Milner Corp., a producer of cleaning and laundering products (Copper-Glo, Perma Starch, Pine Sol) and John H. Breck Inc., maker of hair preparations.

In the past few years, the company has added Formica decorative laminate and Creslan acrylic fiber to its list of products.

American Cyanamid, which had overall advertising billings of about $23 million in 1962, spent $630,367 in network tv and $32,370 for spot at gross rates, during the first three quarters of the year.

The company spends close to $1 million annually on corporate advertising-most of which is directed to the general public. There appears to be no call for a significant expansion of the current tv budget to accommodate sponsorship of the program series this year. The firm will drop some of its consumer magazine advertising.

Commercials on the new show will portray the company through products which are most familiar to the public. The commercials will illustrate how American Cyanamid's research leads to products which eventually reach the consumer.

As commercial is filmed (left) for American Cyanamid's new "Alumni Fun" show, announcer Bill Shipley describes company's Formica laminated plastic. Commercials on show will portray American Cyanamid through products which are best known to the public. At right, another of the tv commercials on "Alumni Fun," describes benefits of the company's Creslan acrylic fiber.
Why WTMJ-TV bought volumes 1, 2, 4 and 5 of Seven Arts' "Films of the 50's"

Says George Comte:
Vice President and General Manager, WTMJ-TV, Milwaukee, Wisc.

"We bought volumes 4 & 5 of Films of the 50's for the same reasons we bought Seven Arts' volumes 1 & 2. The films have been highly successful in our programming schedules. We select features by checking their ratings, stars, and type of story. This has PAID OFF IN AUDIENCE AND IN MARKETING RETURNS

If you'll check the rating books of the Milwaukee market you will find that WTMJ's Saturday Night Theatre has consistently been one of our top rated programs. Our audience is very pleased, very loyal, and very appreciative of this type of entertainment."

WHO'S RESPONSIBLE FOR AD ETHICS?

Catholic-sponsored session provides some varying answers

Who bears the responsibility for advertising ethics and what are the limits of freedom in advertising?

There were widely varying responses from business, agency, media and government representatives at the first CARTA (Catholic Apostolate of Radio, Television and Advertising) conference in New York last week. The format for the one-day conference included morning and afternoon panel discussions followed by question periods and a luncheon address by Sen. Eugene J. McCarthy (D-Minn.).

The principal morning speaker, Clarence Walton, associate dean of the Graduate Business School of Columbia U., said there is "no reason for the advertiser to be morally defensive" and said that charges of materialism in advertising are oversimplified.

The first panelist, Henry Schachte of the management committee of Unilever Ltd., said the advertiser ought to have control not only over advertising but over broadcast programming as well. He cited an instance when Lever Bros. asked a TV network to change a program. Unable to budge the network, the company agreed to honor its weekly participation—some $70,000—but withdrew its name from the particular show. In the end the network let Lever off free.

Mr. Schachte said it is "ridiculous" for a company to put a large amount of money into programming over which it has no control. Clay Buckhout, vice president of Time Inc., countered that ethical problems in advertising are the responsibility of the various media and he advised media men to think of advertising in the public's terms instead of as of pages bought or minutes sold. He said double standards do and ought to exist in advertising and that the criteria for ethical advertising is the composition of the particular audience reached by a medium.

FCC Commissioner, Robert E. Lee, another panelist, speaking on broadcaster responsibility, held a licensee should be an "expert" in the needs of his community. He called the recently uncovered letter-writing campaign of some FCC staff members (BROADCASTING, Dec. 3, 1962) regrettable and said some letters were "poorly worded."

Sen. McCarthy in his luncheon address asked media people for "a more professional approach" and said there is a need for more agreement on political guidelines, a code of ethics and enforcement. He disagreed with the position of Arthur Sylvester, assistant secretary of defense for public affairs, that control of information by the government is a legitimate cold-war weapon.

James A. Stabile, vice president and associate general attorney of NBC, was principal afternoon speaker before a panel consisting of Peter W. Allport, president of Assn. of National Advertisers; James R. Schule, vice president and director of BBDO; the Rev. Thomas M. Garrett, S. J., ethics professor at the U. of Scranton; Martin Mayer, author of Madison Avenue, U.S.A.; and James V. O'Gara, executive editor of Advertising Age.

Mr. Stabile said it's inappropriate for the government to define even the broadest outlines of advertising ethics; that the advertiser of a product must take the primary responsibility for how he sells that product and that industry codes of ethics are the proper means of defining ethical responsibility.

Mr. Schule, the only agency member of the panel, criticized the description of agency people as those "with gray flannel consciences." The agency must accept responsibility for advertising copy, he said, but at the same time the advertising industry must be allowed to exercise self-control.

Also in Advertising...

Sealy kit - Sealy Inc., Chicago, (mattresses) has supplied its local plants and dealers with a new kit of tv-radio commercials to be used along with other media during its February-March 52nd anniversary sale promotion. Agency is Earle Ludgin & Co., Chicago.

Retail lingo - Radio Advertising Bureau has issued a glossary of expressions used in the retail business field for use by radio salesmen. The glossary is one section of a two-part report on retailing for stations. The second part lists and describes nine types of retailing. In addition, the report contains a list of major retail chains with their gross sales for 1960 and 1961.

Rep appointments...

- WAIT Chicago: Robert E. Eastman Inc. as national representative.
- WROZ Evansville, Ind.: Mid-West Time Sales, Kansas City, Mo., as regional representative.

Keep the record straight

Radio Advertising Bureau hopes to keep tabs on retail business on radio in New York and Cleveland during the newspaper blackouts in those cities.

RAB said last week it's urging stations in the paper-struck cities to fill out weekly reports on billings from major retailers. The stations were asked to send the information to J. K. Lasser & Co., nationally-known accounting firm.

The survey proposes to "keep the record straight" should the newspapers "try to make promotional capital" from the current shutdown.
"Champions" cover the champions

NBC calls WMTJ announcers to the biggest games of them all!

Wisconsin supplied the teams — our Green Bay Packers for the NFL play-off, and Big Ten champion Badgers for the Rose Bowl. WTMJ sent the radio network co-announcers — Ted Moore (above left) to New York, and Mike Walden to Pasadena.

NBC's choice of Moore and Walden was not based simply on geographic sentiment. WTMJ's sports staff is known throughout the network as one of the nation's largest and ablest — champions in their own right. This recognition is one example of the quality of sportscasts, as well as outstanding general news coverage and balanced programing, broadcast on WTMJ to Milwaukee and the surrounding area.

It's a big area, responsive to good entertainment and timely information. It's a big, responsive market, too — and WTMJ is the radio station that can help you reach it big. Write and ask us how.
FTC MOVES AGAINST BAYER ASPIRIN
Agency seeks injunction against tv, newspaper advertising

The Federal Trade Commission last week issued a complaint of false and misleading advertising against Sterling Drug Inc. and its advertising agency, Dancer - Fitzgerald - Sample Inc., for Sterling’s recent newspaper and tv campaign in behalf of Bayer Aspirin.

At issue is a report by two doctors and a city health officer in Baltimore on a test of five pain-killer preparations for quickness of relief, duration and side effects. The report was published in the Dec. 29 issue of the authoritative Journal of the American Medical Assn.

Not only did the FTC act with unaccustomed speed in issuing the complaint, but, in an unusual move the agency also set the date, April 1, for a hearing on the charges. Hearing dates normally are scheduled after a 30-day period during which the respondent may reply to the charges. The trade agency also instructed its staff to apply for a temporary restraining order to enjoin the company from continuing the challenged claims pending disposition of the complaint.

The FTC charged that contrary to Sterling’s newspaper advertisements and tv commercials:
- The findings and conclusions of the medical team are its own and have not been endorsed or approved by the federal government or by the American Medical Assn.
- The clinical investigators did not

state as a finding that Bayer Aspirin will not upset the stomach, nor that it is as gentle to the gastrointestinal region as a sugar pill.

In fact, the agency stated, the investigators reported there is no significant difference in the degree of relief from pain afforded by other products tested after 15 minutes of administration.

In the challenged advertisements, Sterling implied that “a government-supported medical team” compared Bayer Aspirin and four other popular pain killers and that the report published in “the highly authoritative Journal of the American Medical Assn.” showed that Bayer Aspirin “had a somewhat higher pain relief score than any of the other products,” that “higher-priced combination-of-ingredients products” upset the stomach with “significantly greater frequency” than any of the other products tested, and that Bayer Aspirin “is as gentle to the stomach as a plain sugar pill.”

Ironically, the study was supported by a grant from the FTC for the very purpose of testing the speed, efficacy and side effects of leading pain killer products. Last year the FTC issued complaints against the heavily advertised pain-killer products, challenging their claims of “fast-fast-fast relief.” These are still pending.

AFM signs contract for radio-tv spots

The American Federation of Musicians has signed a new three-year contract with producers of radio and television commercials, calling for an immediate basic wage increase of 5% and an additional 21/2% in the third year.

Currently, musicians are paid on this basis: $60 for a solo sideman; $33.50 each for groups of two to four; $30 each for group of five or more. Leaders are paid twice the scale of sidemen. Another provision of the new contract, which becomes effective on Jan. 31, is that residual payments become effective after 13 weeks instead of 26 weeks.

National Airlines to Papert, Koenig, Lois

The airline, which was recently purchased by L. B. Maytag Jr., is undergoing a major management realignment. Former agency was McCann-Marschalk Inc., Miami.

An estimated near $1 million of National’s billing has been in spot radio on the East Coast and across the southern tier of states to California. No television has been used in the past.

Tvb to take its Jericho wall to D.C.
Television Bureau of Advertising will show its presentation, “Jericho — The Wall Between Us,” to advertiser, agency, business association and government officials in Washington, D. C., Jan. 25 at 8:30 a.m.

In preparation for the tv promotional meeting are L to r, George C. Huntington, executive vice president; James C. Hirsch, vice president; Norman E. Cash, president; and Jack B. Weiner, director of public relations. These men will represent the bureau at the program.

The breakfast-presentation also has been timed to coincide with the U. S. Chamber of Commerce’s sponsored Public Affairs Conference “Jericho,” a color film, was first shown publicly in New York last Nov. 16.
We pushed this button over 2,000,000 times
(Nearly 20 years of actual station use)

And found no appreciable wear. The button's in the Collins 642A-1/216C-1 Tape Cartridge System. It activates a special heavy-duty solenoid that assures you positive, fast, smooth operation. This is but one of the features that will assure you tight, quality production. Others: hand wiring throughout, three-belt flywheel minimizing wow and flutter (less than 0.2 of 1% rms), easy accessibility, flat frequency response (±2 db, 50-12,000 cps), steady speed (99.6% accuracy). For more information about the best buy for your spots, themes, formats, promos, top 40, and automatic spot rotation, call or write your nearest Collins representative today.
FCC is planning for 650-700 new uhfs

The addition of 650-700 uhf channel assignments to the tv table of allocations is planned by the FCC in the immediate future. The proposed new nationwide assignments of chs. 14-82 will probably be released for comments in the next few weeks, FCC spokesmen indicated last week.

The new channel assignments, possible within the existing uhf spectrum, will disturb none of the present 1,550 uhf allocations. They are intended to provide for the expected growth of both commercial and educational television over the next 10-15 years.

FCC engineers disclosed that their plans to add substantially to the allocations table are nearly complete with the release last week of a computer-prepared study of uhf allocations by the National Assn. of Educational Broadcasters. NAEB proposed a "saturated" uhf table of 3,298 nationwide assignments, placing every available uhf channel in some U. S. city whether or not it ever will be needed there.

The NAEB report was described by a commission official as a "useful study which verifies what could be done," but one which does not take into consideration several necessary factors. The commission has been working for several months, through manual computations, on additional uhf assignments and does not intend to offer a "saturated" table—one in which all possible assignments have been made.

A number of plans have been prepared at the FCC and release of the

Nebraska broadcasters ask 'who, if anyone, complained?'

Nebraska broadcasters last week fired a blast at the FCC's scheduled Omaha inquiry without even waiting to see the whites of Commissioner E. William Henry's eyes.

The Nebraska Broadcasters Assn. called the hearing on the local programming of Omaha's three television stations, set to begin Jan. 28, a "grandstand" play on the part of the commission and "a fundamental and violent invasion of the rights and integrity of broadcasting."

The Nebraska association said the "transcending question" troubling Nebraska broadcasters is whether the viewing public is to make the final decision on what is broadcast, or whether this decision "is to be evoked and promoted by a seven-man bureau sitting in Washington, D. C."

The association said the Omaha hearing—which will involve KMTV (TV), WOW-TV and KETV (TV)—and the similar inquiry in Chicago last year (Broadcasting, April 16, March 26, 1962), "must be considered as an ill-advised experiment."

The association called on the commission "to detail any and all recent complaints not engineered by the commission or its staff that have been received concerning Omaha's local tv programming." The statement said the "defendant" should know the charges.

Commissioner Henry, who will preside at the hearing, denied its purpose is to dictate programming. "This will be only a fact-finding inquiry" into the efforts being made to determine and meet the local programming needs, he said.

Furthermore, he said, "a large majority of the public witnesses" who intend to testify "are not those with complaints, but those who think the stations did a good job."

Governor Backs Stations • Among the favorable comments received were statements from Nebraska Gov. Frank B. Morrison, Sen. Jack Miller (R-Iowa) and Rep. Glenn Cunningham (R-Neb.), whose district includes Omaha. None of these will appear at the hearing. All told, the commission has received over 100 statements from witnesses who want to testify. Another dozen were submitted for the record.

This heavy volume of scheduled testimony was expected to require the hearing to extend into the week of Feb. 4. Originally, two days were to be given to the public witnesses and three days to the stations. But it appeared that at least three days would be required to hear the public witnesses.

As part of his preparations for the hearing, Commissioner Henry met on Thursday with the Washington counsel for the three stations. FCC Chairman Newton N. Minow also sat in on the meeting, which was held, Commissioner Henry said, to discuss procedures to be followed at the hearing.

The commissioner will have an opportunity to tell the Omaha viewing public the commission's side of the inquiry story on Jan. 31. He has accepted an invitation to appear that morning on WOW-TV's live Breakfast at the Plaza program. Bill McBride, the program's host, has been in charge of preparing WOW-TV's reply to the commission's inquiries.

Mr. Henry will be assisted at the hearing by four FCC staff members—James Juntilla, assistant chief of the Broadcast Bureau; Thomas Fitzpatrick, assistant chief of the hearing division; Martin Firestone, an attorney in the renewals branch, and Lonnie Emerson, the commissioner's legal assistant.
final draft for comments is being held up by (1) coordination with Canada, which also is planning new uhf assignments; and (2) efforts to place additional channels in densely-populated areas where none are presently available. The new FCC table will bring to approximately 2,200 the total of uhf assignments and would leave several hundred possibilities for later use.

Electronic Study • The NAEB study was undertaken through a $55,000 federal grant for the Office of Education of the Department of Health, Education & Welfare. Although the study makes several recommendations for future FCC actions, it has not been officially presented to the agency. It is titled "A Report of a Study of Nationwide Assignments of VHF Channels for Maximum Service & Efficiency by the Use of Electronic Digital Computer Methods."

Last week's report was a follow-up to an earlier report last summer which found that educational tv will need 1,200 channels in the next 10-15 years to meet expected needs (BROADCASTING, Aug. 27, 1962). That study also was compiled by NAEB for the Office of Education.

NAEB's suggested uhf table was prepared completely by electronic computations and did not take into account obvious faults which an engineer would spot or border agreements with Canada and Mexico. These were the two main criticisms FCC engineers made of the study. The NAEB-proposed table does not distinguish between commercial and educational assignments and makes no attempt to reserve any channels. However, it sets "priorities" for the number of channels a city should be allocated based on population and educational institutions.

Major Finding • "Probably the most significant result of the study is that over twice the number of usable channels has been added to the FCC table of assignments," the NAEB report concludes. "Most of these channels have been placed where they are needed, either now or in the future ... without disturbing any of the presently active or near active stations and adhering strictly to the established rules and standards of the FCC."

The report recommended that the FCC use the table derived from the computer as a basis for a reallocation proceeding and for expansion to meet the present and future needs of educational and commercial broadcasting. Vernon Bronson and James A. Fellows of NAEB were the project's director and associate director, respectively. The computer phase was written and processed by Jansky & Bailey, consulting engineers. FCC engineers cooperated in the study.

The Office of Education commissioned the allocations paper following last summer's report on the future needs of tv which "made it clear that the tv channel assignment structure presently in existence will not satisfy the growing needs of educational broadcasting." The latest report concluded that the present and potential needs be met to the fullest extent possible "by a precise determination of the most adequate and efficient system for distributing the channels in the tv spectrum."

Ignores vhf • The computer ignored vhf and observed all existing uhf allocations and mileage separations. The study established a table of priorities which provided 9 channels for all cities over 1 million (16 such cities); 8 channels for cities of 500,000 to 1 million population, (22 such cities); 7 channels
for cities of 250,000 to 500,000, (31 cities); 4 channels for cities of 100,000 to 250,000, (90 cities); 3 channels for cities of 50,000 to 100,000, (68 cities); 2 channels for cities of 25,000 to 50,000, (182 cities), and 1 channel for cities of less than 25,000 (1,008). This totaled 2,473 desired channel locations.

The total of 3,298 possible assignments was reached by assigning additional channels to cities of less than 250,000 without regard to priorities. Similar computer techniques could be applied to vhf, fm and microwave allocations, NAEB said.

NAEB concluded that the study "demonstrated conclusively the efficiency and effectiveness of using computer methods in solving the many complex problems of frequency assignment. The proposed table of assignments that has been developed appears to be one of the best arrangements possible. . . .

New York, Los Angeles, Chicago and other major cities do not gain additional uhf allocations in the computer's table. However, such cities as Ajo, Ariz., and Key West, Fla., were assigned 10 channels, and Craig and Lamar, both Colorado, got 8.

THAT POLITICAL QUIZ

FCC staff reviewing answers by broadcasters on elections

FCC staff members last week began reviewing and analyzing several thousand questionnaires returned by broadcasters on the political broadcasting they did in 1962.

A staff member estimated that as of the Jan. 14 deadline, 4,500 of the nation's 5,300 am, fm and tv stations had returned the questionnaires, which cover both the Nov. 6 general elections and the state primaries.

The questionnaires were mailed last November at the request of Sen. John O. Pastore (D-R. 1), chairman of the Senate Communications Subcommittee (Broadcasting, Nov. 26). He wants the information as background for hearings he plans to hold on proposals to liberalize the equal-time section of the Communications Act.

A report based on the questionnaires is not expected for "at least several months, probably the end of April."

Stations that editorialized in the primary and general election campaigns may be asked some follow-up questions by the commission.

The original questionnaire asked only whether a station editorialized. A staff member said the commission will probably want to know the number of editorials carried and whether the station provided air time for opposing views.

He said the questions were not included originally because of the belief that only a small percentage of stations editorialized. The number that actually did probably won't be determined for several weeks.

All licensees may get another political broadcasting questionnaire in the next few months. The Senate Watchdog Subcommittee, which has been investigating the fairness of broadcasters in political broadcasting, will decide whether it will query broadcasters after reviewing the information to be turned over to Sen. Pastore.

PERMANENT AIRBORNE ETV PLAN

Midwest project seeks six uhf assignments for six states

After a two-year experimental run, the midwest airborne educational television project is ready to be placed on a permanent basis and expanded.

This was the word conveyed to the FCC last week by Midwest Program on Airborne Television Instruction Inc. in a request for a rulemaking to:

1. Regularize the use of uhf channels for airborne etv in six midwest states.
2. Modify commission rules governing airborne etv.
3. Allocate six uhf channels for MPATI. Two channels are currently being used in the project.

The application doesn't specify the desired six channels, but MPATI said it will designate them in a supplemental filing. The group, which was directed by the commission last month to file its application by Jan. 15, said it wasn't able to complete the necessary engineering studies in the intervening period.

MPATI was organized early last year by midwest educators and civic leaders as the successor to the Midwest Council on Airborne Television Instruction. The council, established in 1959, launched the airborne etv project in cooperation with Purdue U. and the Purdue Research Foundation.

The licenses for the experimental stations—KS2XGA, operating on ch. 72, and KS2XGD, operating on ch. 76—are now held by Purdue U. But the FCC is being asked to transfer these licenses to MPATI.

Coverage Area. MPATI serves 1,160 schools and colleges in a 140,000-square-mile area that includes portions of Illinois, Indiana, Kentucky, Ohio, Michigan and Wisconsin. Some 26 million people live within the 200-mile range of the airborne stations, including 6.5 million children enrolled in 15,000 elementary schools and 700,000 students in 300 colleges and universities.

The two experimental stations have an effective radiated power of about 50 kw visual and 5 kw aural, from an airplane flying at 23,000 feet above sea level. The plane flies in a 10-mile circle, with an orbit reference point near Montpelier, Ind.

The proposed system, according to MPATI, would provide six educational services simultaneously, using six uhf channels "near the upper end" of the uhf band, with an effective radiated power of 100 kw visual and 10 kw aural.

MPATI says its six DC-6-carried stations could be operating in time for the opening of classes of the 1965-66 school year.

In requesting the rulemaking, MPATI asserts the experimental etv program has demonstrated the potential for meeting the rapidly growing needs of an expanding school population for improved education at practically no increase in per-pupil cost.

Greater Flexibility Needed. If six channels were available, MPATI says, the program's flexibility could be increased to the point where it could "provide a six-hour service offering some 72 courses—enough to supply a substantial portion of the needs not only of the 12 grades through high school, but at the college level, too."

But before the airborne etv can become a permanent service, MPATI says, existing rules will have to be revised to provide for the integration of such a system in an uhf allocation plan designed for ground-based facilities.

The engineering exhibit said the experimental program demonstrates that an aircraft-based uhf station can send a clear signal 200 miles, far in excess of that predicted by the usual propagation curves.

The exhibit recommends that the minimum co-channel mileage separation requirement of 155 miles for zone 1 and 175 miles for zone 2 be increased to 290 miles when applied to the orbit reference point of an airborne facility. It says that the adjacent-channel separation requirement should be increased from 55 miles to 200 miles.

But it also says that experience gained from the project indicates that there is no need for a number of other mileage taboos. MPATI recommends the discarding of taboos relating to intermediate frequency beat, intermodulation, local oscillator, sound image and picture image.

Airborne Advantages Claims. The MPATI application, consisting of two bulky documents, contains statements likely to draw rebuttal from advocates of ground-based etv. MPATI contends,
Sound Control with Sony

Sony CR-4 Wireless Microphone — The perfect transistorized microphone and pocket-size transmitter for active singer/dancers and TV performers to give complete freedom from entangling cables and obstructing mike stands. Mike and transmitter together weigh only 13 1/2 ounces. Complete with transmitter, receiver and carrying case: $250.

Sony EM-1 Newscaster Portable — A full track, all transistorized portable recorder designed for rugged service and dependable performance in remote locations. Meeting NARTB specifications, the EM-1 is ideal for on-the-spot interviews and sound recording.

- Governor controlled, constant speed spring wound motor
- Rewind while recording
- 13 1/4 pound weight.

Complete with microphone and accessories: $495.

Sony MX-777 Stereo Mixer — A six channel all transistorized self powered stereo/monophonic mixer featuring: 4 balanced microphone inputs, 2 balanced hi-level inputs and 2 balanced recorder outputs.

- Other features include individual level controls and channel 1 or 2 selector switches, cannon XL receptacles and switch for bridging of center staging solo mike.

Complete with carrying case: $175.

Sony C-37A Condenser Microphone — Remarkably smooth and uncolored natural response through the full range of recorded frequencies has earned the C-37A the title of "world's most perfect microphone." • Adjustable for omni-directional or uni-directional • Frequency response ±2 db 20-18,000 cps • Signal to noise — more than 55 db for signal of 1 micro-bar at 1000 cps.

Complete with CP-3 Power Supply, carrying case and 30 feet of cable: $295.

Sony C-17B Condenser Microphone — A miniaturized, uni-directional companion to the famous Sony C-37A Microphone. With outstanding background isolation characteristics, the uni-directional cardioid pattern is ideal for TV, night club and solo voice stereo recording application. The slim 1 1/16" diameter size minimizes visual problems.

Complete with CP-3 Power Supply, carrying case and 30 feet of cable: $350.

Sony CP-3 Power Supply — For the C-37A and the C-17B microphones, the CP-3 features: Switch for 3 positions of low frequency attenuation; special high cut filter switch for all frequencies above 10,000 cps.

For more complete specifications and name of nearest dealer, write Superscope, Inc., Dept. 3, Sun Valley, California.

In New York, visit the Sony Fifth Avenue Salon, 585 Fifth Avenue.

All Sony Stererecorders are Multiplex Ready!

SUPERSCOPE The Topway to Stereo

BROADCASTING, January 21, 1963
for instance, that an airborne system permits more efficient use of the spectrum and costs less money than ground-based etv.

The question of which type is a more efficient user of the spectrum has been a point of contention among etv groups and a matter of concern to the FCC. The MPATI engineering exhibit proposes the use of six alternate uhf channels, says such an airborne system would be about 50% more efficient, in terms of spectrum use, than a ground-based service.

In claiming financial advantages, the MPATI application estimates the capital cost of the airborne facility at $6,318,000 and the cost of a comparable ground-based service at $20,195,000. The annual operating costs were estimated at $2,650,000 for the airborne technical facility and $3,615,000 for a ground system.

MPATI estimates that the total annual expense budget of the airborne program will be $4 million—an amount the group says can be raised if 8,000 schools, or half the number estimated for the region by 1966, register as members and contribute $1 per pupil for each of the 4,000,000 expected students.

The price of $1 per pupil has already been approved by the present member schools, which have contributed $340,000 in the first year of MPATI's operation. This sum is called the first step to putting the system on a self-supporting basis.

The original funds were provided by private foundations and industry. The Ford Foundation alone contributed $7.2 million in 1959, and last April contributed another $7.5 million. This latter contribution will be allocated in decreasing amounts over the next three years to finance the system, with the increasing difference to be made up by contributions from a growing membership. MPATI says 8,000 members, as opposed to the present 1,160, will be needed by the start of the 1966-67 school year for the system to self-sustaining.

NAB asks more time for 'loudness' filings

The National Assn. of Broadcasters asked the FCC last week to extend its Jan. 18 deadline for comments on the commission's investigation of the "so-called 'loudness'" of commercials broadcast on am, fm and tv stations to March 18.

The NAB said that the problem "transcends questions of engineering technology ... [and that] physiological and psychological effects of noise on the individual" also should be considered. The association said several stations have indicated they would like to participate in a study of such subjective considerations.

Not only could the commission benefit, the NAB said, but additional time is of "urgent necessity" in this case and "no prejudice or harm" would occur if the proceedings are delayed.

'Material' change plan draws ABC objection

The difficulty of forming a rule requiring applicants to keep the FCC informed of all "material" changes in applications or station operation (Broadcasting, Dec. 3, 1962) may outweigh any advantages from such a rule, ABC told the commission last week.

ABC said the commission gave no clear definition of material change, and the area cannot be readily defined.

To keep financial data up-to-date, for instance, may be difficult since there is no established formula to evaluate an applicant's financial qualifications, ABC said.

The time required for the renewal of licenses is often drawn out, ABC noted, and the program percentages required by renewal applications may change because of some news break or other fluctuations.

"Under the emphasis of the proposed rule, there would be constant uncertainty on the part of the applicant concerning the matters required to be covered by an amendment." There would be further complications in comparative hearings, where the applicant is expected to serve notice of any change to all parties involved and where any change affecting the application could be of decisional significance, ABC claimed.

ABC asked the commission if the proposed rule would allow for the addition of changes after an application had been designated for hearing. Rules now require that it may be done only if good cause is shown.

ABC said that if the rule is adopted it may be ignored by many "because of its vagueness and ambiguity," while cautious applicants may feel that they must submit minute detail.

WLUC-TV protests translator invasion

WLUC-TV Marquette, Mich., asked the FCC last week to protect the station from severe financial injury that it said would arise from the operation of four translator stations proposed by K&M Electronic.

K&M has applied to the commission for four new translators—two in Calumet and two in Houghton, both Michigan. They would carry the programming of KDAL-TV and WDSM-TV both Duluth, Minn.

WLUC-TV is a primary CBS network affiliate and also carries some 15 hours weekly of ABC programs. Some of the network programs are broadcast on a delayed basis so that WLUC-TV can present local programming. If KDAL-TV, which is a CBS primary and carries ABC, and WDSM-TV, an NBC affiliate which also carries ABC, are brought into WLUC-TV's service area, the station's programming policy would be seriously jeopardized, it told the commission.

The Marquette station claimed that this programming plan bears much of the cost of its local productions which would be forced to compete with regularly scheduled network programs—brought in from an outside area—for audience attention. WLUC-TV said that the Calumet and Houghton areas account for about 25% of the station's advertising revenue. This represents income that it could not afford to lose if it is to continue its public service programs, WLUC-TV added.

Long Beach—WLUC-TV noted that the K&M plan would increase the coverage area of KDAL-TV and WDSM-TV by 165 miles.

WLUC-TV urged that the commission determine if the establishment of the translators is in truth non-profit, or an attempt to greatly increase the Duluth stations' coverage by "outside interests."

WLUC-TV also questioned the feasibility of K&M's engineering proposal. The station charged that a picking up signals from other translators in Grand Portage rather than directly from Duluth, an inferior service would be brought to area viewers.
Beneath it all... sales. The three most populated television counties in the country. A major test market. The kind of market that reflects the future of your product. A million plus market that responds most to the reach of WJAR-TV. TV 10... exciting television. PROVIDENCE... a market for any season.

Another FM Station goes FULLY AUTOMATIC!

WHBF-FM, Rock Island, Ill. selects ATC automated system

WHBF Chief Engineer, Robert J. Sinnett, is shown checking out the ATC system that will put WHBF-FM on a fully automated programming basis. The components selected will provide music, news, commercials, production aids, and program logging automatically. The system was selected by WHBF because the flexibility enables them to change programming structure as easily as dialing a phone. Broadcast personnel may be released from control operation for more profitable activities.

FREE BOOKLET ON AUTOMATED BROADCASTING
This 38-pg. booklet explains how ATC equipment can be adapted as an efficient programming system tailor-made to your station's needs. Write, wire or phone now for complete information.
JFK nominates Cox to part, full terms

President Kennedy last week nominated FCC Broadcast Bureau Chief Kenneth A. Cox to fill both the unexpired term on the FCC to be vacated by T.A.M. Craven and the succeeding seven-year term.

Earlier the President had indicated only that he intended to submit Mr. Cox's name to fill the five-month period left in the term of Commissioner Craven, who reaches the maximum retirement age of 70 Jan. 31.

Sen. Warren G. Magnuson, chairman of the Senate Commerce Committee, said Jan. 10 he hoped the President would send Mr. Cox's nomination to the Senate for both the short and long terms—as he had FCC Chairman Newton N. Minow's. A White House aide indicated the President might follow that course when Mr. Cox's name was announced late last year.

Mr. Kennedy nominated Chairman Minow in a similar way almost two years ago. The Senate approved Mr. Minow's nomination in March 1961 for both a four-month period, which remained from an expired interim appointment then held by his predecessor, and a regular term of seven years.

A filibuster on Senate rules which held up organizing activities last week also prevented scheduling of a hearing on Mr. Cox's nomination.

House Democrats get committee assignments

Organization of congressional committees proceeded on schedule in the House last week but a filibuster on rules in the Senate held up all efforts to assign senators to committees.

Freshman Rep. Lionel Van Deerlin (D-Calif.), a former radio and television news director (KOGO-AM-FM-TV San Diego, XETV [TV] Tijuana) and newspaperman, was named to the House Commerce Committee, which handles most legislation affecting broadcasting. New Rep. Gillis W. Long (D-La.) and Rep. W. R. Hull Jr. (D-Mo.) also were named to the committee.

The new members filled two committee vacancies left by the defeat of former Illinois Democrat Peter Mack and the retirement of Morgan M. Moulder, former Missouri Democrat (BROADCASTING, Nov. 12, 1962). Rep. Oren Harris (D-Ark.) remained chairman.

House Republicans had not announced committee assignments by Friday (Jan. 18).

FCC orders hearing on am economic issue

Whether Wauchula, Fla. (population, 3,411), can support more than one am station is among the questions to be determined at a hearing ordered by the FCC last week.

The commission acted thus on an application by Georgia M. and Jerald Brush for a daytime am station on 1600 kc at 500 w after WAUC Wauchula opposed the grant.

WAUC held that revenue in the town is not adequate to support two am stations and that the public interest would suffer as a result of the impair-

ment to both stations. The FCC feels the courts have held that it must hold a hearing to consider such charges.

Initial decision would grant am station to Falt

An application by J. B. Falt Jr., for a new am station in Sheffield, Ala., moved a step closer to realization last week when FCC Hearing Examiner Jay Kyle issued a supplemental initial decision advocating the grant.

Application of Mr. Falt, who already has controlling interest in three am's in Alabama, was denied in both 1961 and 1962 in favor of a competing application by Iralee W. Benne. After two reconsiderations by the commission Mrs. Benns withdrew her application because the FCC had granted a permit for a second station which would serve the Sheffield area. She also cited Sheffield's economy, which she felt would not support a second station.

Mr. Kyle, in his report, said that since Mrs. Benne had withdrawn, the
Bills introduced affecting radio and tv

The biennial convening of a new Congress brings with it a flood of legislative proposals of which only a small portion affect broadcasting. A summary of such bills and resolutions which had been processed through Jan. 17 follows (* indicates the measure has been introduced in similar form in other Congresses).

**Tax deductions for lobbying**: H.R. 69, Rep. Thomas M. Pelly (R-Wash.): to amend the Internal Revenue Code of 1954 and provide that expenses for legislative purposes (lobbying) may be allowed as deductions from gross income.

**Components definition for tax purposes**: H.R. 195, Rep. Thomas P. O'Neill Jr. (D-Mass.) and others: to amend the Internal Revenue Act of 1954 as it relates to a definition of radio and television components. The bill would restrict the tax to replacement parts, not original equipment ("radio and television components" would mean cabinets, tubes, power supply units and built-in antenna).

**National institute of arts and humanities**: H.R. 324, Rep. John E. Fogarty (D-R.I.); H.R. 1155, Rep. Frank Thompson Jr. (D-N.J.): to develop the nation's cultural resources; establish a National Institute of Arts & Humanities and a Federal Advisory Council on Arts and Humanities under the Dept. of Health, Education & Welfare; to commission works; to award fellowships and scholarships.

**Ad curbs on East German goods**: H.R. 414, Rep. Samuel S. Stratton (D-N.Y.): to prohibit advertising articles produced in the Soviet Zone of Germany unless products are identified by origin.

**Obscenity commission**: H.R. 470, Rep. Glenn Cunningham (R-Ohio); S. 180, Sen. Karl E. Mundt (R-S.Dak.): to create a Commission on Noxious & Obscene Matters & Materials, having subpoena power, composed of 17 members, including one from broadcasting media.

**Ban on boxing broadcasts**: H.R. 578, Rep. Multer: to amend the Communications Act to prohibit radio or television broadcasts of amateur or professional boxing matches.

**Unauthorized deletion ban**: H.R. 579, Rep. Multer: to amend the Communications Act to make it unlawful to make "unauthorized deletions" from certain matter submitted for broadcasting. This would apply when contracts specify matter included for broadcast and would prohibit deletions without permission.

only determination left was whether Mr. Falt had too much concentration of ownership. Mr. Falt owns WAFJ Decatur and is majority owner of WFIX Huntsville and WRAB Arab.

Examiner Kyle found, however, that Mr. Falt's stations are "operated entirely independent of each other" with little overlap of coverage, and that each is in competition with several other stations. In light of this, Mr. Kyle said in looking toward the grant, "It is apparent that the joint ownership and control does not give the stations any advantage over their competitors."

**Pastore heads joint unit**

Sen. John O. Pastore (D-R.I.), chairman of the Senate Communications Subcommittee, was elected chairman of the Joint Committee on Atomic Energy Jan. 15, succeeding Rep. Chet Holifield (D-Calif.). Rep. Holifield now becomes vice chairman. The top two posts rotate between ranking House and Senate members of the joint committee.

**Hill hearing held on false cure ads**

Print advertising in particular and broadcast advertising generally were criticized during a Senate hearing on problems of the aging last week for not doing enough to protect the elderly from fraud and deception.

Doctors, businessmen and congressmen took turns testifying against advertising of fraudulent cures for painful diseases in broadcast and print media and against "irresponsible journalism" concerning cures in magazines and on radio and tv. They testified for three days before the Senate Special Committee on Aging on "Frauds and Quackery Affecting the Elderly Citizen."

"Television and radio bring the glib, persuasive 'pitchman' with his often exorbitant, misleading claims into every room," declared Sen. Pat McNamara (D-Mich.), chairman. "We live in the 'Era of Hard Sell,'" Sen. McNamara said. "The senior citizen is particularly vulnerable to the spiel of the pitchman."

Dr. Ronald W. Lamont-Havers, national medical director of the Arthritis & Rheumatism Foundation, struck at "irresponsible journalism" in several consumer magazines and said false and misleading information on alleged cures also comes from television and radio, although he cited no specific examples.

"Cure's the thing * Jerry J. Walsh, executive director of the foundation, said Food and Drug Administration warnings about fraudulent claims and dangerous drugs do not seem to get into newspapers "as much as a new cure or a new thing on the horizon."

Dr. Robert E. Shank, chairman of the American Medical Assn. council on foods and nutrition, cited the association's efforts to keep the public informed about quackery, and said "The Medical Man," an educational film produced by the AMA, has been televised 926 times since it was released in 1956 and has had more than 12,000 showings before special groups.

Two recommendations on false and
to amend the Federal Trade Commission Act to provide for the issuance of temporary cease-and-desist orders to prevent certain practices pending commission action.

Municipal arts council: H.R. 685, Rep. Multer: to establish a municipal arts council in Washington, D.C., which would be representative of persons engaging in the arts (including radio and television): to provide funds from a municipal tax to defray expense of nonprofit art programs in the District.

Federal inventions administration: H.R. 701, Rep. Multer: to insure that inventions created through expenditure of public funds remain in the control of the U.S. through the establishment of a Federal Inventions Administration. This would apply to inventions developed by contractors with the federal government and by federal employees (when created in line with their authorized work).

Licenses for foreign hams: H.R. 750, Rep. Elford A. Cederberg (R-Mich.): to amend the Communications Act to allow aliens to obtain three-year licenses to operate amateur stations if the FCC finds the national security would not be endangered.

Too low prices*: H.R. 800, Rep. Wright Patman (D-Tex.): fair practices amendments to the Federal Trade Commission Act which would prohibit sellers from advertising below-cost prices in areas where they seek to drive out competition.

Fees for federal agency services*: H.R. 834, Rep. J. Arthur Younger (R-Calif.): to provide for the assessment and collection of fees to cover the cost of operation of certain regulatory agencies, including the FCC and FTC.

Reduce set manufacturing tax: H.R. 872, Rep. Silvio O. Conte (R-Mass.): to reduce from 10% to 5% the manufacturing tax on television sets, radios and some other entertainment equipment.

Transportation and communications department: H.R. 967, Rep. Younger: to create a Department of Transportation & Communications.

Satellite law amendments: S. 223, Sen. John Sparkman (D-Ala.): for himself and Sens. Mike Mansfield (D-Mont.), John O. Pastore (D-R.I.) and Leverett Saltonstall (R-Mass.): to amend the Communications Satellite Act of 1962 for the participation by small business organizations in the procurement activities of the Satellite Communications Corp.

Equal time suspension, 1964*: S. 251, Sen. Pastore: to suspend for the 1964 campaign Sec. 315 of the Communications Act as it applies to the President and Vice President (see story this page).

Equal time suspension, permanent*: S. 252, Sen. Pastore: to exempt from Sec. 315 political campaigns for the offices of President, Vice President, all congressmen and governors (see story this page).

deceptive ads were noted by Kenneth B. Williamson, president, National Better Business Bureau Inc.: 1. "That advertisers accept responsibility to present competent proof of claims when questioned, and 2. "That advertising media accept responsibility for requiring competent proof of claims prior to publication when copy is considered questionable or if it is subsequently questioned by any responsible source."

Pastore bills would limit Sec. 315

The first effort in the 88th Congress to change the "equal time" provision of the Communications Act was made Wednesday (Jan. 16) when Sen. John O. Pastore (D-R.I.) introduced two measures intended to limit that section.

Sen. Pastore, chairman of the Communications Subcommittee, offered bills to: suspend "the equal opportunities requirements . . . for nominees for the offices of President and Vice President" for 1964; permanently exempt from the requirements for equal opportunity campaigns for the offices of President, Vice President, the House of Representatives, the Senate and governors of all states.

The bills were referred to the Commerce Committee.

The senator told a reporter that these bills represented what he personally thought was as far as restrictions ought to be lifted. He favored removing the limitations "down to governor." "From feeling the pulses of the subcommittee," he said, he thought this was the consensus of its members.

However, if the FCC, when it concludes its review of political questionnaires on experience in the 1962 campaign, should ask for a further liberalization of Sec. 315, he would introduce such legislation for the agency.

But, he added, "Congress feels strongly about preservation of equal opportunity."

Nevertheless, the Rhode Island senator was quick to say, "I think broadcasters have come of age."

House group wants more tv ad hearings

A final report by the House Select Small Business Committee supports its subcommittee's recommendations for further hearings to determine whether small businessmen are getting "adequate opportunities to promote their products by television advertising" (Broadcasting, Dec. 10, 1962).

"The committee believes that a comprehensive survey of current time selling practices by individual stations, independent as well as affiliated, should be made," said the final report, released last week.

Although the six Republican members submitted minority views to the overall committee report, which covered the committee's full range of activities, they made no comments on the recommendation for more hearings on broadcast time sales.

No date had been set last week for future hearings.
President Kennedy last week asked Congress to appropriate $16.5 million for the FCC in the fiscal year beginning July 1, 1963. This is $2 million more than the $14,427,000 Congress appropriated for the commission for the previous fiscal year. Still to be requested from Congress, however, is $489,000 for fiscal 1963 to take care of pay increases voted by the last Congress.

Overall the President asked for an appropriation of $98.8 billion to run the United States in the 1964 fiscal year. He estimated that there would be an $11.9 billion deficit in the year. The 1964 request is $4.5 billion more than was asked for in 1963 fiscal year.

The major portion of the FCC increase is allocated to Field Engineering & Monitoring to add more personnel and to acquire technical equipment.

For broadcasting, the FCC budget includes $3,756,000—$612,000 more than was requested last year. This is not only for salary increases, but also provides for the addition of 20 new employees. Under broadcasting activities, the budget indicates that the FCC regulated 7,513 stations (of all types) in fiscal 1961, 8,552 in 1962, 9,053 estimated in 1963 and 9,386 estimated for 1964. The budget notes that the FCC expects to receive 350 applications for new tv stations, 300 for new am stations and 500 for new fms in fiscal 1964. The broadcast bureau also expects to handle 425 applications for new translators, the budget indicates.

TV Service Doubled • For the United States Information Agency, the President asked $146.5 million for fiscal 1964, an increase of almost $26 million over the 1963 request of $120,436,000.

The USIA budget indicates almost a 100% increase for the television service. In last week’s appropriation request, $7,102,000 is allocated to the tv service, compared to $3,920,000 for 1963 and actual appropriation of $2,144,000 in 1962.

For the Voice of America, the amount sought is $27,642,000—$4.3 million more than in 1963 when $23,349,000 was asked, and almost $8 million more than the $19,812,000 actually appropriated in 1962. In the broadcasting service the increase is expected to go for expanding foreign language broadcasts from 38 to 40, to take care of new overseas transmitters planned in Monrovia, Liberia, and on the Isle of Rhodes in the Mediterranean. “Significant” increases in programming for the VOA are planned, the budget message says, especially for Latin America.

Requests for other agencies:
• Federal Trade Commission—Requested was $13,028,000 for the FTC, up from $11,278,000 appropriated for 1963 fiscal year. The budget indicates that $3,253,000 is to be spent on investigation and litigation of deceptive practices. This includes false and misleading advertising. This compares to $2,976,000 requested for this activity last year.

• National Aeronautics & Space Administration—For NASA the President asked almost $5 billion, about $2 billion above the sum requested for the 1963 fiscal year.

For communications research and development, the NASA budget includes $55,407,000, compared to $49,747,000 for 1963 and $34,114,000 actually appropriated in 1962.

In 1964, the section reports, NASA intends to complete its work on the Echo project (reflection of radio signals from passive satellites). It will continue to work on Relay, the low altitude active satellite and on Syncom, the 24-hour orbit satellite. It will, it says, place major emphasis on technology for Syncom; the Dept. of Defense will pursue the development of the Relay type satellite.

NAB wants ‘expressway’ radio to be licensed

Expressway radio service should be licensed under an interpretation of the FCC rules, the NAB told the FCC last week.

The NAB said that while promoters of the proposed new service claim that it is exempt from licensing because of its limited radiation signal, it does not mean that “extensive communication systems could be installed and operated without specific justification or authorization.”

The highway radio broadcasts, as proposed, would consist of a wire over the center of the road that would radiate a signal which would cover only the width of the roadway. The system would carry commercial music programs, weather reports and road condition notices.

The NAB said that if the commission did not find an interpretation of its rules to cover the new system, it should then establish a new service under its rules, requiring licensing.
The only logical way you can see where you're going is to look ahead. This wisdom is just as profound for people in the business of broadcast advertising as for skippers of submarines.

Radio and television are entering 1963 after tracking a turbulent course through 1962. What's ahead in 1963? Where will broadcasting run into heavy weather; where will the sailing be smooth?

Will radio and television, in 1963, increase their share of the advertising dollar? What changes are in store in audience patterns and ways of evaluating them, in marketing techniques, in radio and television facilities? How do the experts in broadcast advertising look at the new year; what do they say and why do they say it?

Answering these questions calls for either the gift of prophecy—or the gift of interpretive analysis based upon solid knowledge. In short, it calls for perspective.

And that is exactly what a special issue of Broadcasting Magazine, scheduled for publication next February 18, will be called . . . "Perspective '63." Its many pages of special reports will add up to a chartered course for the year ahead.

Among all publications, only Broadcasting is equipped by skills, by staff and by the experience of years of growing up with radio and television to attempt so comprehensive an analysis. Each of the special Perspective issues that Broadcasting has published in past years has become a standard source work for the important decision-makers in broadcast advertising. Perspective '63, like its predecessors, will be kept, studied and re-read for months after its issue date.

Within the framework of such a basic working tool for advertising men, your message takes on special value. Through Broadcasting—in any issue—you command a guaranteed circulation of over 27,000. But in Perspective '63, your advertisement will command extra pass-along and re-readership that will make this the best buy of your year.

If you haven't reserved space yet in Perspective '63, we suggest you up-periscope and sound your klaxon. It will be heard (on your behalf) in all the most important and profitable places.

Deadline for advertising: Final deadline February 9.

Rates: No inflation here. For so much more, the cost is the same as any of Broadcasting's 51 other issues of the year.

Reservations: No time like now. Wire or phone us collect to make sure you'll be represented the way you want, with good position.
FCC asks GE for more corporate data

FITNESS TO BE A BROADCAST LICENSEE AT ISSUE

The FCC has asked General Electric for more information the agency hopes will help end a problem of more than two years—whether GE is qualified to be a broadcast licensee.

The commission wants to know what changes GE has made or intends to make in its corporate structure to "assure proper discharge of the responsibility of top management for operation of the broadcast stations in the public interest."

GE's applications for renewal of its licenses for WGY, WRGB (TV) and WGFN (FM) Schenectady, N. Y., have been held up since 1960 as a result of the company's pleas of guilty and no contest to charges of price-rigging in electrical equipment.

The commission, on Nov. 1, 1961, asked the company for information, "in the most detailed form," about its corporate structure and broadcast operations. A similar letter went to Westinghouse Broadcasting Company, whose parent, Westinghouse Electric Co., also pleaded guilty in the antitrust case.

But the answers the commission received from GE in a series of letters and documents have failed to satisfy the agency. "Our study of these materials has left unresolved a number of questions," the commission said, in a letter dated Jan. 9 and released last week.

The commission said it still was not satisfied that the company's "policies, procedures and organizational structure are such" as to assure operation of the stations in the public interest.

GE was requested to submit a statement within 30 days "as to what revisions you have made or propose to make in [the company's organizational] structure, or whether you have determined to continue the present arrangement."

FCC gets applications for etv reservations

The FCC has been requested by educational groups to make channel reservations for non-commercial educational use, has received an application for an etv station, and has granted the reservation of a uhf channel in place of a uhf channel. The following is a round-up:

- Commission granted a request by the U. of Idaho in Moscow, and shifted the reservation for noncommercial educational use to ch. 12 from ch. 15. The ch. 15 allocation will be retained in that city for commercial use.
- Cabrillo College, Aptos, Calif., asked the commission to reserve uhf ch. 22 in Watsonville for noncommercial use. The U. of California has proposed that an etv network for the Monterey Bay area be established and Cabrillo College wishes to operate a station as part of the network.
- Western Washington State College, Bellingham, Wash., requests that ch. 18 in Bellingham be reserved for educational use, on which it plans to operate an etv station.

- Commission has received an application for a new non-commercial educational tv station from the South Carolina Educational Tv Commission. The proposed station is for vhf ch. 7 in Charleston, with a power of 29.4 kw.

Initial decision gives ch. 3 to Cape Fear Tv

FCC Hearing Examiner Isadore A. Honig last week in an initial decision called for the granting of a new tv station on ch. 3 in Wilmington, N. C., to Cape Fear Telecasting Inc. Cape Fear is owned equally by William G. Broadfoot Jr., Elvin L. White and Percy R. Smith Jr.

Cape Fear was in a comparative hearing for the channel with WKLM-TV Inc., but the latter on Jan. 7 asked that its application be dismissed. This request was granted two days later. WKLM-TV received no consideration for withdrawing.

Applicant drops name of indicted principal

An applicant for a new am station in Blauvelt, N. Y., was permitted to amend its application last week to drop a principal who used the protection of the Fifth Amendment last summer in an FCC comparative hearing.

Hearing Examiner Herbert Sharfman permitted Rockland Broadcasting Co. to drop Sidney Fox as one of its principals, leaving George Dacre and Harry Edelstein as parties to the application. Mr. Fox was indicted last fall by a federal grand jury in New York on a charge of conspiracy and transportation of stolen goods (trade secrets of American Cyanamid Co., for which Mr. Fox formerly was a chemist).

Comments on a proposed rule to require licensees to make copies of all FCC applications available for public inspection (BROADCASTING, Nov. 26, 1962) were few but fiery last week.

Rockford Broadcasters Inc., Rock Island Broadcasting Co. and the Fetzer Broadcasting Co. jointly told the commission that the agency's function is to answer questions from the public.

The three licensees said if the rule is adopted the only other possible obstructions the FCC can perpetrate are (1) a rule requiring stations to help parties prepare complaints; and (2) make available a form the petitioner need only sign and mail.

WCST Berkeley Springs, W. Va., said the rule would benefit the interest of only a few "crack-pots" and competitors; that the commission would do better to alleviate some of the red-tape, not add to it.

WDEC Americus, Ga., charged that no other competitive private enterprise is required to open its records to the public, especially to competitors. The station said broadcasters must be as commercially skilled as other businessmen, WDEC felt the public is not particularly interested in program percentages and technical data, but only in program content and adequate reception.

WORZ Inc. asks okay to file ch. 9 reply

WORZ Inc., has asked the U. S. Circuit Court of Appeals in Washington for permission to reply to the FCC's recommendation that the Orlando ch. 9 case be remanded to the commission for reconsideration.

WORZ Inc., losing applicant in competition with Mid-Florida Television Corp., noted that the commission concluded that nothing in the record of the case reflects adversely on Mid-Florida's qualifications as licensee.

Remand of the case as recommended by the commission, WORZ Inc. said, "would place an advance stamp of approval upon the mere reissuance of . . . original decision."

WORZ Inc. said it should have the chance to be heard before the court considers its recommendation.

Comments are tart on record inspection plan

Comments on a proposed rule to require licensees to make copies of all FCC applications available for public inspection (BROADCASTING, Nov. 26, 1962) were few but fiery last week.

Rockford Broadcasters Inc., Rock Island Broadcasting Co. and the Fetzer Broadcasting Co. jointly told the commission that the agency's function is to answer questions from the public.

The three licensees said if the rule is adopted the only other possible obstructions the FCC can perpetrate are (1) a rule requiring stations to help parties prepare complaints; and (2) make available a form the petitioner need only sign and mail.

WCST Berkeley Springs, W. Va., said the rule would benefit the interest of only a few "crack-pots" and competitors; that the commission would do better to alleviate some of the red-tape, not add to it.

WDEC Americus, Ga., charged that no other competitive private enterprise is required to open its records to the public, especially to competitors. The station said broadcasters must be as commercially skilled as other businessmen, WDEC felt the public is not particularly interested in program percentages and technical data, but only in program content and adequate reception.
This is the highest rating in history for any single motion picture presentation on the New York station. "Hercules" overwhelmed all competition with 46.1% of the viewing audience according to Nielsen Station Index. The 35.1 average quarter hour rating exceeded that of the three major networks combined in the same time slot 7:30 to 9:30 P.M. Friday, January 4th.

This is the first of the thirty-three motion pictures purchased by WOR-TV, Channel 9 from Embassy Pictures.
SUPREME COURT Rejects ASCAP Case

Says it lacks jurisdiction to rule on TV music rates

The U.S. Supreme Court ruled without explanation last week that it lacked jurisdiction to hear the appeal of television stations on their bid for a new kind of ASCAP music license.

Officials of the all-industry TV stations music license committee, representing the stations, noted that the court's dismissal was based on jurisdictional grounds and said they would seek to transfer the appeal to a lower court.

They reasoned that the Supreme Court may have dismissed the appeal on grounds that it should have been taken to the lower court first. The committee had appealed directly to the Supreme Court under an expediting act which apparently is subject to conflicting interpretations.

The committee, headed by Hamilton Shea of WSVA-TV Harrisonburg, Va., plans to file with the Supreme Court within the next ten days a motion to transfer the appeal to the Second Circuit Court of Appeals in New York. This step was decided upon in consultation with the committee counsel, the New York law firm of Donovan, Leisure, Newton & Irvine.

If the appeal is transferred, the decision of the Second Circuit Court may still be taken to the Supreme Court by whichever side loses in the circuit court.

At-the-Source Clearance • The committee, representing some 370 TV stations, is seeking a so-called "at-the-source" license under which ASCAP music used in future syndicated and feature films would be licensed not by broadcasters but by the program producers at the time of production.

Thus stations would have to pay directly to ASCAP only for whatever ASCAP music they use in locally originated programs. They currently pay, on a blanket or per-program license basis, on all ASCAP music used in non-network programs (network music is covered in separate contracts between ASCAP and the networks).

The appeal to the Supreme Court was from a ruling by Chief Judge Sylvester J. Ryan, of the U.S. Southern District Court in New York, that ASCAP could not be compelled to grant the at-the-source licenses sought by the committee (BROADCASTING, Sept. 17, 1962).

In dismissing the appeal, the Supreme Court noted merely that it lacked jurisdiction. Justice Hugo Black said he thought the court should hear the case and at the same time rule on the issue of jurisdiction.

Committee leaders were disappointed but not disheartened.

Disappointed But Pleased • "As chairman of the committee," Mr. Shea said, "I am disappointed that the Supreme Court did not agree to hear our appeal. However, I am pleased that the turn-down was made on a jurisdictional basis rather than on the merits of the case.

"We plan to file a motion with the court asking transfer of the case to the circuit court and are hopeful the Supreme Court will act favorably on this motion."

"The committee never expected that we would have an easy road in getting fair treatment for television broadcasters. I am confident that in one way or another we shall eventually be successful."

Three Choices • The committee had several alternatives after last week's Supreme Court ruling.

One would have been to try—again—to negotiate a settlement with ASCAP. Apparently this course did not look especially promising at this time.

Another would have been to file a civil antitrust suit against ASCAP in an effort to get source-clearance. A third would have been to abandon the quest for source clearance and go directly into a hearing before Judge Ryan to fix fair and equitable rates under the same type of license now in use.

In electing to apply for transfer of the appeal to the circuit court, the committee obviously felt that, having gone this far in its bid for source clearance, it should go the rest of the way.

It was not felt that the circuit court approach would be unduly costly in either time or money. If the transfer is granted, it was thought a circuit court decision might be expected no later than the end of summer and possibly earlier. If the committee succeeds in upsetting Judge Ryan's decision, the case would then—barring a settlement—go back to him for further hearings on whether ASCAP should be required to grant source-clearance licenses, and on what terms.

While the case is in the courts, stations are operating under the terms of the old contracts, which expired Dec. 31, 1961. Any changes in the new contracts, when finally set, will be retroactive to that date.

UAA reports increased sales volume in '62

United Artists Assoc. announced last week that dollar volume on sales on its feature films and cartoon properties increased by more than 100% in 1962 over 1961.

UAA does not disclose dollar figures since it is a subsidiary of United Artists Corp. to which it reports its earnings, a spokesman said. He noted that 1962 was a "record year," achieved mainly through sales on post-'50 films but assisted by contracts made for pre-1948 properties.

Sales on "United Artists Showcase for the Sixties," consisting of 33 post-'50 feature films, continues "brisk," the spokesman said, with new contracts signed with KHI-TV Los Angeles; WTN (TV) Albany, N. Y.; WDAM-TV Scranton, Pa.; WTOL-TV Toledo; KROC-TV Rochester, Minn.; WOWL-TV Florence, Ala., and KMID-TV Midland, Tex.

UAA's record sales in 1962 received support, he said, from 2,000 pre-'48 features from the Warner Bros. and RKO libraries, and 570 theatrically-produced "Popeye" and "Bugs Bunny" cartoons.

Film on taxes offered free

A 28-minute film, The Great Tax Debate, is available free to television stations from the U. S. Chamber of Commerce. The film, which presents the pros and cons of federal tax-cut proposals, includes excerpts from President Kennedy's New York speech to the Economics Club, and statements by labor leader Walter Reuther, Sen. Harry F. Byrd (D-Va.), and Prof. Walter Hallstein, head of the European Common Market.

Requests for the film should be addressed to News Dept., U. S. Chamber of Commerce, 1615 H St., N. W., Washington 6, D. C.

BROADCASTING, January 21, 1963
Screen Gems makes big sale to KTVT

KTVT (TV) Dallas-Fort Worth signed an agreement with Screen Gems Inc. last week, calling for the payment of $1 million for the acquisition of three feature film packages and a cartoon package.

James R. Terrell, general manager of the station, said the agreement represented the largest program investment made by the new management of KTVT. He noted that the independent station plans to schedule feature films in prime time at least four evenings a week. (Station was purchased by WKY Television System [WKY-AM-TV Oklahoma City, WTVT (TV) Tampa, Fla.] last year for $800,000 [BROADCASTING, Aug. 6, 1962].)

Heading the list of programming acquired is the 73-title Columbia Pictures post-'50 package, which includes "From Here to Eternity." As part of the agreement, KTVT was given the world television premiere right to "Eternity," and will present the film on Feb. 15, 7:30-9 p.m.

The other packages in the KTVT purchase are the 210-title post-'48 Columbia features; the 65-title "Best of Universal" features, and a group of 156 five-minute cartoons made by Hanna-Barbera, consisting of "Touchie Turtle, Wally Gator and Lippy the Lion."

Robert Seidelman, vice president in charge of syndication, reported that in addition to KTVT, SG has made sales of the new 73-title Columbia group to WRGB (TV) Schenectady, N. Y.; WBAY-TV Green Bay, Wis.; WALB-TV Albany, Ga.; KSHO-TV Las Vegas; KGBM-TV Honolulu; KGW-TV Portland, Ore.; KHSJ-TV Chico, Calif.; and WJHG-TV Panama City, Fla.

Mark Century to provide radio program service

Formation of Mark Century Inc., a new firm specializing in radio programming services, has been announced in New York by Milton Herson, president.

Mark Century's creative arm is assisted by an agreement with Music Makers Inc., New York, a firm that specializes in commercial music. Dave Manber is the copy chief for Mark Century.

The new radio service carries the theme "radio a la carte" on the theory that the material provides a selected menu for stations which are in need of "quality, custom-tailored packages of the best in music, lead-ins, promotion ideas and special material." The material, provided on tapes or on disks and available in stereo or monaural, has been put together with the station program director in mind.

In an interview last week, Mr. Her-
A ‘scientific approach’ to radio music

The job of music selection has been taken out of the hands of DJ’s and turned over to the scientists in a new music programming service for radio stations.

Following a six-month experiment on WPOP Hartford, Conn., Irving Schwartz, creator of the service and president of Central Broadcast Corp., Kansas City, said his new “Centronic System” now is being offered for sale on an exclusive basis to a limited number of stations in major markets.

Mr. Schwartz’s “scientific approach” to music programming has been adopted by WPOP, where he is program consultant.

Under Mr. Schwartz’s formula records played are selected from categories of current hits, futures, standards, name artists and special releases. The composition for each hour is calculated as to sequence and balance, and the frequency of exposure of each tune is related to its popularity and trend. A track record is developed for each tune and artist aired. The weekly music lists, which are prepared in the Central Broadcast headquarters in Kansas City, are composed on special forms for each hour of the day and every day of the week.

Computer’s Choice • The first step in the formula, which is designed for widest possible range of acceptance in a particular market, is to conduct local research on listeners’ tastes and preferences. These results are compared with data on a national level, and the formula is “weighted” for the local area to correct differences between the two sets of statistics. Computer projections, based on charts, polls and all other available information, indicate when a record will be dropped from the “Centronic” list or when a new tune can be showcased.

Mr. Schwartz said station subscribers of the service will be charged according to market size, starting at about $640 a month.

son, who is also general counsel at Music Makers, specified his new firm has placed emphasis on originality and freshness in the music (all of it newly prepared).

A Six-Month Survey • Mark Century maintains it conducted a six-month survey of more than 200 radio stations now using similar “devices” and found there was dissatisfaction with the material being offered. Mr. Herson notes, his firm intends to supply quality material as contrasted to “quantity.”

Mark Century, Mr. Herson explains, is not packaging station-break jingles for sale to advertisers though the firm will package “commercially successful” material for building client relationships.

A typical “radio a la carte” package might contain new, original music; contest and new promotional aids; subtle aids for local advertisers; series of sound effect bands to blend with the other material; especially edited classical music for use as segues, and specialties for weather reports, identifications, commercials and stylized local programs and even public service themes.

Mark Century is located at 6 W. 57th Street. Telephone Circle 5-3741.

Ray Anthony to syndicate weekly TV music program

Band leader Ray Anthony whose new TV show is scheduled to start on KTLA (TV) Los Angeles next Saturday (Jan. 26) as a weekly half-hour (10-10:30 p.m.), is taping the program for syndication despite warnings that first-run syndication is no longer feasible.

“All this negative talk about the so-called softness of the syndicated television market is purely bunk,” Mr. Anthony said Thursday at a news conference in Hollywood. “After months of thorough research, we feel we are definitely on the right track and that a new trend is about to start in telecasting.”

The viewers are fed up with summer reruns all year long, and unhappily that’s exactly what the stations have been giving them. After all, what is a syndicated show ‘off network’ but a fancy name for a re-run?”

Mr. Anthony said he believes so much in the no-rerun plan that he is going to sell his own series only once.

“We’ve geared our financial thinking and budgets to recouping our investment on a once only basis,” he said. His own organization, Ray Anthony Enterprises, 9155 Sunset Blvd., Los Angeles 69, is handling the distribution of the programs.

ASCAP suing eight Washington state am’s

The American Society of Composers, Authors & Publishers announced last week that its members have instituted copyright infringement suits against eight radio stations in the state of Washington, claiming copyrighted songs were performed without authorization. The defendants are: KGMI Bellingham, KFKF Bellevue, KAPY Port Angeles, KARY Prosser, KUTI Yakima, KIXI Seattle, KGY Olympia and KALE Richland.

The plaintiffs are asking various federal courts in Washington to restrain the defendants from broadcasting the songs in the future and to award damages of not less than $250 for each unauthorized performance, plus attorneys’ fees and court costs.

New MGM features sold to 12 stations

License agreements with television stations for MGM-TV’s 30/63 offering of post-1948 feature films have approached 25 million, according to Richard A. Harper, director of feature and syndicated sales.

The package is being made available with each film priced individually in each television market (BROADCASTING, Dec. 17, 1962).

MGM-TV has signed licensed with 12 stations: WBNC-TV New York; WGN-TV Chicago; WFIL-TV Philadelphia; KSD-TV St. Louis; WTVJ (TV) Miami, Fla.; KENS-TV San Antonio, Texas; KOMO-TV Seattle; KTVK (TV) Phoenix, Ariz.; KATU (TV) Portland, Ore.; WTEV (TV) New Bedford-Providence, Rh. I.; KONO-TV Honolulu; and WLKJ-TV Green Bay, Wis.

Edison awards for science programs

NBC programs won five Thomas A. Edison Foundation national mass media awards presented last week at the foundation’s annual awards banquet. Stations cited were WLOF-TV Orlando, WSB Atlanta and WNDT (TV) New York. The Edison awards are given for contributions in the specialized field of science education, especially for efforts directed towards youth.

ABC-TV was honored for its Discovery 62 series which was named the “best science program for youth,” and in conjunction with Bell & Howell Co. for “furthering the understanding of education” in the presentation of the “Meet Comrade Student,” telecast which examined education in the USSR. It was one of the Close-Up! series.

NBC programs winning awards and their categories: Exploring, best children’s TV program; David Brinkley’s Journal, TV series best portraying America; U. S. #1 American Profile, TV program best portraying America; Why They Do What They Do, radio program best portraying America and How Will

BROADCASTING, January 21, 1963
**Man Shape Man's Future**, best science radio program for youth.

Individual station awards were presented to WSB for its practice of devoting a number of broadcast days during the year to educational subjects, to WLOF-TV for its weekly presentation of two scientific space-age reports and its Spanish language educational programming and to WNMTTV (TV), for “furthering educational television.”

A special citation, presented by the Edison Foundation's honorary president, Charles Edison, was made to AT&T for furthering world communications through Telstar.

**Sales of 'Supercar' hit $1.9 million**

Sales of Independent Television Corp.'s *Supercar* have reached $1.9 million, the distributor said last week. The syndicated series of 39 half-hours has been sold in 140 U.S. and 49 foreign markets to date.

ITC is planning a second year of production for *Supercar*, which made its TV debut on WPX (TV) New York in January, 1962. At the same time, ITC announced another series, *Fireball XLS*, a series consisting of 39 half-hours of science-fiction adventures in the 21st Century.

**Film Sales . . .**

*Seven Arts’ Volumes 1, 2 and 3* (Seven Arts Assoc.): Sold to WNF-BTV Binghamton, N. Y. Volumes 1, 2 and 3 now in 133, 108 and 88 markets respectively.

*Seven Arts’ Volumes 4 and 5* (Seven Arts Assoc.): Sold to WCKT (TV) Miami, Fla.; KPTV (TV) Portland, Ore.; KCBV-TV Lubbock, Tex.; KVIO-TV Tulsa, Okla.; WMAR-TV Baltimore and WNF-BTV Binghamton, N. Y. Now in 50 markets.

*Bachelor Father* (MCA TV): Sold to Louis Shanks Furniture Co. and Nash Philip-Copus Co. for use on KTBC-TV Austin and to Collins & Ryan for WBOV-TV Salisbury, Md.; also sold to WXYZ-TV Detroit; KXLY-TV Spokane, and KIRO-TV Seattle, Now in 18 markets.

**44% of U.S. tv homes saw 'Conversation with JFK'**

A. C. Nielsen Co. estimated last week that 21,960,000 homes, or 44% of all U. S. homes with tv sets, saw the three-network telecast of *Conversation with the President* last month (Dec. 17, 1962).

Nielsen said the average home viewing the program tuned in to an estimated 42 minutes of the one-hour show. The program was carried by 401 network affiliates.

Other figures of homes reached by combined network television coverage of major events during 1962, reported by the research firm: election night, Nov. 6—39,290,000; tour of White House, March 14—28,300,000, and the Glenn orbit, Feb. 20—39,900,000 homes.

**YOU'RE ONLY HALF-COVERED IN NEBRASKA IF YOU DON'T USE KOLN-TV/KGIN-TV!**

A good turn . . . in fact, the best turn in Nebraska these days is to the state's other big TV market, now rated among the most important in the nation.

Lincoln-Land is now the 76th largest market in the nation*, based on the average number of homes per quarter hour delivered by all stations in the market. And the Lincoln-Land coverage you get with KOLN-TV/KGIN-TV (206,000 homes) is a must for any sales program directed to the major markets.

Avery-Knodel has the full story on KOLN-TV/KGIN-TV—the Official Basic CBS Outlet for most of Nebraska and Northern Kansas.

*Broadcasting, January 21, 1963*
Hartford revisited: will pay tv work?

AFTER HALF YEAR 1,800 SUBSCRIBERS SPEND $8-10 MONTHLY ON SHOWS

After seven months of operation, pay television in Hartford, Conn., has 1,800 customers who are almost overwhelmingly "pleased," spend $8 to $10 a piece on it each month but don't find it cutting into their free-television viewing or movie-going.

Will it succeed? Nobody knows.

That was the consensus a Broadcasting editor brought back last week after an on-the-scene investigation. He had made a similar one last July, shortly after the experiment commenced (Broadcasting, July 9, 1962).

Although he found no statistical evidence that the test is moving toward success or failure, he did gain some impressions based on talks with subscribers, with RKO Phonevision officials who are conducting the experiment, with Hartford businessmen and Hartford people in general:

- Most of the individuals who have subscribed are "pleased" with the service.
- Non-subscribers believe pay tv either is too costly or doesn't offer enough in programming to warrant paying for it.
- The rate of subscription and installation will be more modest than originally envisioned by RKO Phonevision, though the company claims this is partly by design.
- Though progress has been made in acquiring additional feature films and special programs in the past six months, the Hartford system has not been able to schedule outstanding programs on a regular basis, a circumstance considered a pre-requisite for a successful pay television operation.
- Pay tv has made no dent in theatre attendance or in free television viewing and does not shape up as a threat for the next few years at least.

It cannot even be said definitely whether progress actually has or has not been made in Hartford over the past six months. It depends on the perspective from which developments in the city are viewed.

Detractors point out that RKO Phonevision officials were proclaiming last summer that the system would have 4,000 subscribers by the end of 1962. They stress that the figure now reported by the company itself is 1,800 after six months. Critics also noted that RKO Phonevision had indicated it would present Broadway plays, opera and ballet, but, outside of feature films, has presented some special programming of a variety act nature only.

RKO Phonevision's top officials—Vice President John Pinto, who operates from New York, and Charles Wood, general manager, who is on the scene in Hartford—have answers for the scoffers. They acknowledge that the 4,000 figure may have been an overestimation, but contend that over the past four months, RKO Phonevision, by design, has controlled the installation of the necessary decoding equipment. They insist they are "highly pleased" with progress to date.

"We have always said that we expect to lose money during the three years of the experiment," Mr. Pinto said. "We could have grown very rapidly in the first six months if we had so decided, but we found that for our purposes it is better to grow slowly and purposefully."

A Pilot Project—"This is a pilot installation, and we hope to learn all we can about all the ramifications of pay television. It is easier to learn more if the system grows gradually. Our research becomes simpler. Some of the things we want to learn are: how long a subscriber stays with pay tv, what types of shows he enjoys, how much he spends before he decides it's the cut-off point, how families of different sizes and different income levels arrange for the buying of our programs. These are only a few of the factors we are exploring."

Mr. Wood noted that an investment of more than $1 million has been made.
Sports programs are among the more popular offerings on pay television in Hartford. Football, basketball and hockey contests from New York and Boston are featured. Families like that of Richard Van Ausdall (r), of West Hartford, spend an average of some $8 to $10 monthly to watch the programs which include some name talent but lean heavily toward movie feature film which has already appeared in downtown Hartford theatres.

for decoding equipment alone and a speeding up of installation would lead only to a larger deficit at this time. Both Messrs. Pinto and Wood stress that RKO Phonevision, a subsidiary of RKO General Inc., expects to lose “considerable money” on the experiment, but believes that an orderly expansion of its audience and facilities suits the purposes of the test.

As to the charge that programming had not approached advanced billing, Messrs. Pinto and Wood insist that the entertainment it has provided has been satisfactory. They point out that in addition to so-called “subsequent-run features” (current films that become available shortly after the first run in downtown Hartford theatres), subscription tv in Hartford has carried a group of special entertainment programs not available on free tv or in motion picture theatres.

“We have had special shows produced for us that run from 75 minutes to two hours long,” Mr. Pinto said. “These have included the Kingston Trio as they appeared before a tent show; Hildegarde in an appearance at the Persian Room in New York; Betty Comden and Adolph Green in their presentation of ‘A Party;’ the Bolshoi Ballet, the Bayanihan Philippine Dancers, Carlos Montoya and a schedule of football, basketball and hockey contests from New York and Boston.

“We have on our schedule for the immediate future special programs spotlighting the McGuire Sisters and Bill Dana (Jose Jiminez), taped at top supper clubs throughout the country; a production of Gian-Carlo Monotti’s ‘The Consul,’ which we bought from International Telemeter Co., and a production of Chekov’s ‘A Country Scandal,’ which stars Franchot Tone. And we are planning others.”

As the number of subscribers expand, RKO Phonevision will plow back funds for additional special programming. Mr. Pinto agreed that it is difficult at this time to arrange for the telecasting of Broadway plays, remarking without elaboration that there are “some complexities” involved in putting together such a project. But he added: “That will come, too, sometime in the future.”

Backbone Fare • Insofar as the backbone of pay tv programming is concerned—feature films—Mr. Pinto feels RKO Phonevision has made “considerable progress.” At the outset of pay tv in Hartford, he said, only Paramount and Warner Bros. were willing to supply films. Both features on a subsequent-run basis and those produced within the last few years but not released to Hartford free tv are available to the Hartford system from United Artists, Columbia, Metro-Goldwyn-Mayer and Buena Vista (Walt Disney’s production company). Only 20th Century-Fox and Universal are “holdouts.”

“And we are hopeful that we can make deals too with Universal and Fox,” Mr. Pinto remarked.

The RKO Phonevision executive realizes that the success of subscription tv in Hartford will depend on two key factors: the number of subscribers and the number of times they watch the system.

“I must stress that the number of subscribers we are going to attain is a goal which we hope to build up to steadily and gradually,” Mr. Pinto observed. “We have a strong feeling that the figure in Hartford must be in excess of 10,000 homes. How much in excess we are not prepared to say.

“As for the number of times they watch this week, that is another important factor, certainly. We cannot say right now what that figure should be, but our research convinces us that it need only be a minority audience. We have always said that subscription tv should be a supplemental medium. Remember our main business is owning and operating commercial tv and radio stations.” (RKO General owns 13 radio-stations, wholly or in part.)

A Sampling • Mr. Pinto was asked to confirm the findings of a random
The Hartford system is being thoroughly researched, according to Mr. Pinto. The company itself periodically solicits the opinions of subscribers and "gets a remarkably high return," Mr. Pinto said. In addition, John J. Henderson & Assoc., New York, has been conducting a continuous research program in Hartford since the start of the project last July.

Mr. Pinto noted that information obtained by the Henderson organization is for the "internal use" of RKO Phonevision and RKO General and for the FCC. (The experiment required the approval of the FCC and at the end of the three-year test period in 1965, the Commission must decide whether to continue the subscription TV program in Hartford. The commission's go-ahead is required because Hartford, unlike the pay TV system in Etobicoke, in Toronto, Canada, is an over-the-air installation, utilizing WHCT [TV], an RKO General station.)

Mr. Pinto emphasized that RKO Phonevision was reluctant to divulge "too much of what we have learned in our research because we use it to guide our moves and also we feel an obligation to the company which is spending so much money on this undertaking which is really one big research project." He noted that a number of companies interested in pay TV have visited Hartford and New York to learn as much as possible about the Hartford test, and added:

$10 Million Investment • "At this stage, we are not about to tell them all the things we have learned. It is only reasonable that our company, which is footing the bill, should reserve this information for itself—at least for the time being. You can never tell when a competitor may crop up in a market in which RKO General may be interested some time in the future."

Mr. Pinto estimates that RKO General and Zenith, which is supplying equipment at a minimal cost, will have spent $10 million by 1965.

The contention of Messrs. Pinto and Wood that subscribers generally are "pleased" with pay TV was borne out by a sampling of 30 homes in Hartford by Broadcasting. The result: 27 subscribers said they were "pleased" with subscription TV; three said they were "displeased," and of the three, one reported he had cancelled his subscription. (RKO Phonevision states it has received 21 cancellations out of 1,800 subscribers over the past six-and-a-half months.)

The sampling, which was conducted among pay TV homes that had been receiving the service three months or more, showed:

• They were pleased with the programming generally, though several mentioned they hoped that Broadway plays would be forthcoming soon.

• The monthly fees mentioned invariably by respondents were $8, $9, $10.

• The reasons they cited for subscribing: "no commercials," "convenience of seeing movies and other attractions within the comfort of home," reasonable cost (entire family can view for one admission and no fees for parking, baby sitting)."

• They believed pay TV had lived up to expectations; they were spending as much money as they had anticipated; it had not "eaten into" the time they would be spending with either free TV or the movies.

The three individuals who were "not pleased" with subscription TV gave one main reason: the programming wasn't "good enough" to justify the expense.

Hartford businessmen, including operators of TV stations and motion picture theatres, told Broadcasting they are watching the pay TV development with interest. Operators of several downtown theatres said they could see no threat to their business for the foreseeable future and doubted that pay TV ever would appeal to a broad segment of the population. TV station officials reported pay TV had had no discernible effect on their operations but said they were following the Hartford experiment with interest.

Non-subscribers questioned by Broadcasting remarked generally they had no intention of paying for TV or said they might consider it if it offered programs they regarded as "a lot better" than commercial TV.

Though conclusive answers to pay TV in Hartford will not emerge until the conclusion of the three-year test in 1965, Mr. Pinto ventured, the next six months should be "noteworthy."

"We think by the end of this first year certain patterns will emerge," he stated. "Our installations are running about 50 a week. We will have a broader base to evaluate, and we will have subscribers with us for a longer period. This will give us, we hope, a better insight into the viewers' preferences and buying habits."

WIP helps strike-bound riders meet drivers

WIP is helping the City of Brotherly Love live up to its name. The Philadelphia station was afforded this opportunity last week when a local transit strike partially paralyzed the city.

When the strike was called at 12:05 a.m. last Monday (Jan. 14), WIP started a driver-meets-rider service on its early morning show. Announcements solicited phone calls from those in either category. A master chart of the city divided into five parts was utilized. Callers offering or seeking rides were immediately given names and phone numbers of others in the same general locality.

The WIP service was restricted to the morning show with the riders being sought for daylight hours only. Station spokesman said that the campaign started last Tuesday morning and despite use of all available phones at WIP, the station has been unable to keep up with the flood of calls.

WLW-AM-TV fund drive brings in $381,000

Ruth Lyons, WLW-AM-TV Cincinnati personality, raised $381,656.71 during her 1962 Christmas Fund Drive, it was announced last week. A tally of contributions shows that 271,540 people donated to the fund for an average donation of $1.40 per person.

Proceeds of the fund are given to aid hospitalized children in 59 hospitals in Ohio, Indiana and Kentucky, and are used to provide needed equipment, as well as entertainment (such as toys and games, tv and radio sets, libraries, indoor and outdoor play equipment and special gifts upon release).

The Christmas Fund, which began in 1939 (when Miss Lyons raised $1,000) has distributed $2,256,749.69 since 1952. The appeal for funds—which are cash donations, not pledges—is made on Miss Lyons’ daily WLW-AM-TV program 50-50 Club, and runs from Oct. 4 (her birthday) until Dec. 25. The program is also carried on Crosley’s WLWD (TV) Dayton and WLWC (TV) Columbus, both Ohio, and WLWI (TV) Indianapolis.

Drumbeats...

Change in the weather (men) • Bud Kraehling, WCCO-TV Minneapolis with Arthurman and Art Brock, his counterpart at KPHO-TV Phoenix, Ariz., will switch stations the week of Jan. 27. There will be a daily exchange of film clips showing each man’s regular audience what he is doing and the sights he is seeing. The switch coincides with the annual St. Paul Winter Carnival.

You are my sunshine • WXYZ Detroit listeners are being asked to predict the total number of hours of sunshine for the Detroit area between Jan. 14 and Feb. 16. The winning entry receives an all-expense-paid week’s vacation in Florida. The contest period coincides with a five-week ad campaign for Sunshine Biscuit Co.

10 cents a step • Tom Durand, program director, WTTM Trenton, N. J., and two companions, went on a 3.3 mile “march” for the March of Dimes. The three hikers “marched” one step for each 10 cent contribution made by WTTM listeners. It took them 3 1/2 hours to complete their trip.

Mutual sales winners

Winners of a nine-week contest among the 502 MBS affiliates, to see which could sign the largest volume of advertising from local Homelite Co. (power equipment) dealers, have been announced by the network.

Receiving $100 cash prizes are: Walter Stamper, commercial manager, WAPO Chattanooga, Tenn.; Samuel Searfoss, sales representative, WSJM St. Joseph, Mich., and Frank Donnelly, account executive, KVFD Fort Dodge, Iowa. Homelite Co. is one of Mutual’s leading advertisers.

WTKO personality goes a long way with a dime

Andy Andrews, air personality at WTKO Ithaca, N. Y., is trying to build a dime into $1,000 for the March of Dimes. On Jan. 2, Mr. Andrews asked listeners to bid for the dime. At the end of his morning program, the highest bidder, a teenaged boy, received the dime in exchange for $8.20, a knapsack and signal flags.

As the first week of his effort ended Mr. Andrews had built his original dime into $101.50 in cash, one snow blower and four puppies.

Among items which changed hands during the first week: 30 dozen donuts, two pure bred German puppies, a television set and a kitchen range. Other items bid included a Shetland pony, and two automobiles.

The bidding and trading will continue until the end of January, by which time Mr. Andrews hopes to have reached his $1,000 goal.

Stations DO Have Personality

IDENTIFICATION--Nine times out of ten, if a man says (anywhere in Michigan) "I'm from Paul Bunyan Network," the response is: "How is Les these days, say hello from me." Man after man, time after time, the immediate identification is with Les Biederman—an identification that personalizes the Paul Bunyan stations—that sells their products.
Improved emergency setup for California

BROADCASTERS, OFFICIALS MEET IN PLANNING SESSION

A plan to improve the emergency broadcasting setup in California for use in case of a nuclear attack is being drafted by the California Disaster Office following a meeting of broadcasters with federal, state and local officials in Sacramento. Allan K. Jonas, director of the CDO, who called the meeting, said that he expects a draft of the plan to be ready about Feb. 1. "The public needs shelters and an improved communications link that can only be provided by radio broadcasting," Mr. Jonas said.

The meeting discussed a plan to provide the use of fallout-protected broadcasting facilities, emergency power for these stations and arrangements to develop a state-wide network linking city, county, state and federal emergency operating centers. Such a hookup would enable the President and the governor to speak directly to the people in the event of such an emergency. John Upsher Smith, acting regional director of Office of Civil Defense-Dep.

defense Region 7, headquartered in Santa Rosa, Calif., said that federal funds could be available for the emergency broadcasting facilities and urged the California Disaster Office to develop plans in conjunction with the state industry advisory committee headed by W. H. Hartman, chief engineer of KCRA-TV Sacramento. Mr. Hartman promised full cooperation in developing such a plan. Mr. Smith said that when the California plan is completed and approved it will be submitted to the National Industry Advisory Committee in Washington. Several other procedural questions will be referred to Washington, he said.

Other broadcast executives at the meeting were Philip Lasky, vice president, Westinghouse Broadcasting Co.; Louis Simon, general manager, KPIX (TV) San Francisco; H. L. Blatterman, chief engineer, KFI Los Angeles; Thomas Mullahey, public service program director, KRON-TV San Francisco.

we give the facts a thorough airing

Media transactions present a risk as well as an opportunity to both buyer and seller. But the risks are considerably narrowed when all of the facts are available through our penetrating knowledge of the ever-changing market.

NAB planners

Four state broadcasting associations were represented in a committee named by the NAB last week to plan the 8th Annual Conference of State Presidents in Washington Feb. 26-27. Members of the program committee for the conference, conducted by the NAB, are:

Joseph Goodfellow, president of the Maryland-D. C. Broadcasters Assn., and vice president-general manager of WRC-AM-TV Washington; Robert R. Williams, WHLM Bloomsburg, Pa., and president of the Pennsylvania Assn. of Broadcasters; E. L. Rankin, executive secretary of the North Carolina Assn. of Broadcasters, and Jack Williams, executive secretary of the Georgia Assn. of Broadcasters.

The two-day conference will be held in the Shoreham Hotel.

Changing hands...

ANNUED • The following sales of station interests were reported last week subject to FCC approval:

- KTTV (TV) Los Angeles, Calif.: Sold by the Times Mirror Co. to Metromedia Inc. for a price in excess of $10 million (At Deadline, Jan. 14). The transaction includes the acquisition of all stock of the Times Mirror Broadcasting Co., licensee of the ch. 11 independent. Robert W. Breckner, president and general manager of the station, will remain in charge. Metromedia stations are: WNEW-AM-TV New York, WTTG (TV) Washington, KVOV (TV) Stockton, (Calif.), KMBC-AM-FM-TV Kansas City, all vhf tv outlets; WTVH (TV) Peoria and WTVP (TV) Decatur, both Illinois and both uhf stations. MM also owns WHK-AM-FM Cleveland and WIP-AM-FM Philadelphia, and the outdoor advertising firm of Foster & Kleiser. KTTV was founded in 1949.
- WPDX Clarksburg, W. Va.: Sold by Raymond C. Warden, Robert D. Hough and associates to George L. Kallam and Charles and Matthew Tierney for approximately $200,000. Mr. Kallam is treasurer of the Tierney Co. which owned WCHS-AM-TV Charleston, W. Va., until it was sold in 1960 to Rolfin's Broadcasting Co. for over $2.5 million. No change in management or personnel is contemplated, it was said. James T. Fawcett is general manager of the sta-
tion. WPDX is a 1 kw daytimer on 750 kc. Broker was Hamilton-Landis & Assoc.

- KTWN St. Paul, Minn.: Sold by Franklin Broadcasting Corp. to Gene Posner for $125,000. Mr. Posner owns WMIL-AM-FM Milwaukee. This is the first step in an expansion program to acquire the full quota of radio and tv stations. Mr. Posner said, Franklin Broadcasting also owns WED St. Louis, WWOM New Orleans, KOME Tulsa and WLOD Pompano Beach, Fla.

KTWN operates on 1400 kc with 1 kw daytime and 250 w nighttime. Broker was Hamilton-Landis & Assoc.

**APPROVED** • The following transfers of station interests were among those approved by the F.C.C. last week (for other commission activities see For The Record, page 82).

- WCAX Burlington, Vt.: Sold by C. P. Hasbrook and associates to James Broadcasting Co. for $300,000. James Broadcasting, which is headed by Simon Goldman, owns WJTN-AM-FM Jamestown, WOGO Salamanca, WDOE Dunkirk, all in New York and WWYN and WERC-FM Erie, Pa. Mr. Goldman has a personal 16 1/2% interest in WCUM Cumberland, Md. WCAX is a fulltime station on 620 kc with 5 kw.

- KASE Austin, Tex.: Sold by Austin Radio Co. to W. D. (Dub) Rogers Jr. for $225,000. Mr. Rogers formerly was principal owner of KDUB-AM-TV Lubbock and KEDY (TV) Big Spring, both Texas, which he sold for $3.8 million to Grayson Enterprises Inc. in 1961. KASE operates on 970 kc with 1 kw daytime.

- KASK-AM-FM Ontario, Calif.: Sold by Daily Report Co. (Ontario Daily Report) to J. William O'connor and wife, 50% and Frank H. Babcock Jr. 50% for $150,000. Approval was conditioned that assignment not be consummated until Mr. O'connor disposes of his interest in one of the following am stations: WBOW Terre Haute and WHUT Anderson, both Indiana; WGSB Geneva and WJRL Rockford, and 80% of WCVS Springfield, all Illinois. Messrs. O'Connor and Babcock own WPPO Peoria, III. KASK is 1 kw full-time on 1510 kc. KASK-AM-FM operates on 93.5 mc with 1 kw.

Eastman opens Boston office

Robert E. Eastman Co., New York radio station representative, last Monday (Jan. 14) announced the opening of its 10th office, in Boston, to serve New England and upper New York State. Raymond A. Gardella, sales promotion manager in the New York office, has been named manager of the Boston branch.

**CBS-TV REPORTS**

Network was 90% sold out for most of night schedule

CBS-TV has maintained nighttime sales to advertisers at the 90% or better level through most of 1962, the network notes in a year-end report.

The report emphasizes advertiser and program strength, including additions to its talent roster.

Highlights of the report follow:
- CBS-TV for the ninth straight year retained a position as the "world largest advertising medium," continued to emphasize "straight program sale" as compared to participations, marked 90% or better showing at night and nearly continuously maintained an SRO status in the daytime.
- A total of 177 different advertisers, of which 13 were new to network tv, were represented, and CBS-TV's "morning minute plan" (rotating spots) built to a high sales percentage and in the last three months of 1962 was SRO.
- Affiliates Total • At the year's end, CBS-TV had 202 stations in the U.S. as affiliates along with affiliates in Puerto Rico, Guam, Bermuda, Virgin Islands, and Mexico City (and in Canada via Canadian Broadcasting Corp. and its 48 affiliated stations).
- In programming: Dany Kaye, Judy Garland and Carol Burnett have been signed for next fall.
- A new hour series of dramas of American history and a 30-minute evening news broadcast on a Monday-Friday basis are planned.
- News and public affairs programming was up, the network estimating 34.5% additional time devoted to this fare in 1962 over 1961.
- CBS-TV said it devoted a record 292 hours to sports coverage. This figure represents 42% of the total sports programming on all the networks, according to the report.

**CBS owned tv stations show 6% sales increase**

CBS Television Stations Div. last year had a net sales increase of 6% over 1961, Merle S. Jones, president, said last week in a yearend review that describes 1962 as "the most successful year" in the division's history.

The division is responsible for non-network tv activities at CBS including the five owned tv stations, CBS Films, CBS Television Stations National Sales and international tv investments.

The CBS stations groups, according to the division, had an 11% net sales increase with sales at their highest point. Stations are WCBS-TV New York, KNXT (TV) Los Angeles,

**ATTRACTIVE STATION BUYS!**

**SOUTHWEST**—Daytime-only radio station grossing approximately $65,000.00 annually and capable of doing better under owner-operator. Good, stable market. Priced at $85,000.00 on ten years terms.

**MIDWEST**—Daytime serving area of 50,000-plus population. Excellent equipped, Land and building included in sale. Priced at $90,000.00 with $25,000.00 down and balance over seven years.
WBMM-TV Chicago, WCAU-TV Philadelphia and KMOX-TV St. Louis.

Cited in the review also are group programming projects, including "Reper- toire Workshop," a program to encourage new tv talent.

Other business increases: CBS Films, 10% rise in overseas gross billings; CTNSN reported gain of 15% in net sales from the owned stations. Trinidad- Tobago's first tv station, in which CBS owns an interest, went on the air in November, and Proartel, Argentinian production company partly CBS-owned, reported it produced 26 out of the 30 top programs seen regularly on ch. 13 in Buenos Aires.

**NBC CITES NEWS**

Year-end report says 25% of schedule was news shows

NBC cites increased news programming, a continuing emphasis on color, the owned stations' strength and NBC Radio's optimistic status in a year-end report released today (Jan. 21).

Some of the highlights:

- NBC News contributed a record 25% of NBC-TV's overall program schedule. The network reported a new high of 50 special news and information programs in prime time on NBC-TV in the 1962-63 season. NBC Radio devoted four-fifths of its broadcasting to news and public affairs programming.

- Color tv on NBC attained record levels in programming hours: the nearly 2,000 hours programmed in color in 1962 were estimated to be more than the total of U. S. motion pictures produced in color in the last eight years. More than 68% of NBC-TV's total 1962-63 nighttime schedule in the current season has been in color, and a total of 188 NBC-TV affiliates carried the network's color programming.

- NBC Radio's profits were the highest since 1950, claiming 43% of total sponsored hours on the three major networks and could record a total of 75 advertisers.

- NBC claimed record sales and profits for its owned-and-operated stations and record gross revenues for its two main NBC Enterprises divisions, international and domestic.

- NBC-TV had 262 advertisers represented in 26 product categories on its schedule.

- NBC reported that the radio network now devotes about 80% of its programming to news and information, and as much as 50 additional hours per month of special programming on current affairs. NBC News, moreover, reported its coverage of major world events included 180 special tv programs. Also during the year, two news series were added, enlarging NBC-TV's sched-

**Stanton in N.D.**

Dr. Frank Stanton, CBS president, is scheduled to address a joint session of the houses of the North Dakota legislature at Bismarck on Wednesday (Jan. 23) as the highlight of the legislature's third biennial "broadcasting day." He is expected to urge repeal of the Federal Communications Act's equal-time provision (Sec. 315) and removal of barriers to radio-television cooperation and legislative and court proceedings.

North Dakota radio and tv stations plan to carry the address.

NBC's Bunker wants 'credo for selling'

A voluntary "credo for professional selling" and an end to cutthroat radio competition are being urged by RAB President-elect Edmund C. Bunker.

His exhortations toward that objective were given last week at the South Carolina Broadcasters Assn. meeting in Columbia. These, he noted, are among his plans when he takes office as president of RAB on March 1.

RAB, Mr. Bunker said, must provide the leadership to lift radio selling standards and thus it is RAB that should develop the "credo"—not as a code but as a "voluntary conviction of station owners" evolved through discussions by a committee of broadcasters representing all parts of the U. S.

Said Mr. Bunker: "You can tell me by your support for this credo, or your comments on it, whether this plan can succeed. "If this makes me a visionary, that's what I am—and I hope to show that it is possible to be a visionary all the way to the bank."

Mr. Bunker suggested the "credo" include such points as these:

- A reaffirmation of the belief in the power of all advertising in general and radio specifically and in the loyalty of every responsible salesman to his own station.

In addition, it should decry negative selling.

Mr. Bunker felt that once accepted, the credo should be published and publicized, made available to all member stations, referred to periodically in RAB promotional material and stations surveyed for their support.

Bud Collyer, host of To Tell The Truth on CBS-TV, was recipient of the first annual Professional Broadcasters Award from SCBA. It was presented at the broadcasters' banquet.

**Fm group sets up N.Y. promotion office**

The National Assn. of Fm Broadcasters is establishing a New York office to promote fm radio among advertising agencies and their national and regional clients. The hiring of an executive director to head the office was authorized by the association's board of directors at a meeting in New York, Jan. 10-11.

T. Mitchell Hastings Jr., president of the association, heads a committee which includes Abe Voron, WQAL (TV) Philadelphia, and Lynn Christian, KODA (FM) Houston, and which is screening applicants for the executive director's position. Interested applicants may submit resumes to Mr. Hastings at WNCN (FM), 11 E. 47th St., New York.

The New York office will serve as a clearing house of information for advertisers, agencies and broadcasters "in selling and in obtaining maximum benefit from the use of fm radio advertising," according to Mr. Hastings.

The present plans call for introducing the new executive director to the membership during the association's annual convention and sales seminar, March 30-31 in Chicago.

**Keene, N.H., catv sold**

A community antenna system serving 2,300 subscribers in Keene, N. H., has been sold by Al Ricci to New England Video Inc. New England Video is owned by Narragansett Capital Corp., Providence, R. I., small business investment company, which has controlling interests in catv systems in Barstow and Laguna Beach, Calif.; and owns systems in Graham and Palestine, Tex.

Price for the Keene property was not disclosed. Mr. Ricci also owns a catv system in Bennington, Vt.
COLOR FOR CANADA URGED
Networks, CAB ask Broadcast Board for study; propose industry-wide committee on tint plans

Canada's two television networks and the Canadian Assn. of Broadcasters last week proposed the establishment of an industry-wide committee to study and plan for the introduction of color television in Canada.

The proposal was made to the Board of Broadcast Governors by Alphonse Ouimet, president of the Canadian Broadcasting Corp., and was endorsed by Spence W. Caldwell, president of the CTV Network, and Don Jamieson, CAB president. Messrs. Caldwell and Ouimet asked that the board withhold approval of color standards and licensing of stations to colorcast for the time being; Mr. Jamieson said stations should be allowed to telecast in color if they desire.

The proposed color TV committee should include representatives of the BBG, CBC, CAB, the Dept. of Transport and color set manufacturers, Mr. Ouimet said. Mr. Caldwell said he thought advertisers and Bell Telephone, which provides network TV microwave facilities, also should be represented on the committee.

A CAB resolution presented before the BBG said, "There appears to be no element of the public interest demanding any restraint upon new developments in full service in broadcasting and specifically the offering of broadcasts in color television to the Canadian public."

The CAB statement said stations should be "permitted to broadcast in color if they desire, each station being allowed to select its own starting time and procedure, and develop its pattern of color broadcasting in the light of experience gained from the initial experimental procedures."

The Station Representatives Assn. of Canada told the BBG "that any station, or group of stations, that prefer to provide color television to viewers should be given permission to do so, and at times and days of their own choice."

The association added that "the introduction of color television in Canada would add a dimension and excitement to broadcast advertising that would attract more advertisers to support the medium of television especially, and indirectly the radio medium. Obviously all these advertisers will not be able to afford color TV but will be sufficiently attracted to the broadcast medium that they will use TV or radio, or both."

"TV set manufacturers have been campaigning for the quick introduction of color TV in Canada.

BBC-Equity agreement to cost $5.6 million

An estimated $5,600,000 annual increase in BBC-TV costs will result from a pay increase just negotiated with Equity, the British actors' union. The new agreement sets up a pay structure which divides actors' work into three categories. The first, for engagements of six days or less, gives an $82.40 minimum. The second, for 11 days work has a minimum of $164.70 and the third, for up to 17 days' work, $247.

Before the agreement, an artist re-

Off-colour's on

The traveling salesman story is no longer taboo on the British Broadcasting Corp.'s light entertainment programs in peak viewing (evening) hours.

The BBC last Tuesday (Jan. 15) lifted a 15-year-old ban against humorous remarks about honeymoon couples, fig leaves, prostitution, lavatories, immorality, women's underwear, effeminacy, animal habits, chambermaids, etc.

The scrapping of the code also lifted a prohibition against jokes about the royal family, abuse of political figures, acts of Parliament and references to religious sects.

received a minimum fee of $16.50 plus $5.90 for each rehearsal day.

The increases bring actors' fees on BBC-TV up to the level of those established for the commercial companies last year.

The new agreement also makes changes in fees paid for programs sold

Return to Elegance with Hernando Courtright

The discriminating traveler will find at the newly cosmopolitan Beverly Wilshire Hotel all the concepts of gracious hospitality for which Hernando Courtright is famous: impeccable, personalized service, splendid surroundings, and above all, cuisine par excellence. "Classic elegance is the heart of the Beverly Wilshire-amplified by subtle luxury and unparalleled attention to your comfort and privacy. "Make your next visit to Los Angeles verify a return to elegance at the Beverly Wilshire — in the heart of fashionable Beverly Hills, where every conceivable convenience is at hand or in strolling distance.

Hernando Courtright's Beverly Wilshire Hotel

BEVERLY HILLS, CALIFORNIA
overseas. In the past overseas rights have been divided into groups for America, the Commonwealth, and the rest of the world. Now BBC-TV can negotiate for the rights to sell programs in individual countries and in some cases, individual cities.

$2 million offered for Montreal station

Jack Tietolman, CKVL-AM-FM Verdun, Que., has offered to buy CFDCF-AM-FM Montreal, Que., for $2 million. CFDCF, which started in 1919, is Canada's oldest radio station.

Purchase will be subject to approval of Board of Broadcast Governors, Ottawa.

Canadian Marconi Co., owners of CFDCF-AM-FM-TV Montreal, announced that the radio stations, but not the TV station, had been put up for sale. Mr. Tietolman has been operating CKVL-AM-FM with the highest amount of live talent programs in French and English of any Canadian station for some years. He is an independent operator, not being a member of the Canadian Assn. of Broadcasters, the national organization to which most Canadian stations belong.

CFDCF is on 600 kc with 5 kw. CFDCF-FM is on 106.5 mc with 7.7 kw. CFDCF-AM-FM are affiliated with CBC and ABC.

**Abroad in brief...**

Herr Dr. Kildare • Two NBC-TV series, Dr. Kildare and The Dick Powell Theatre have been sold to West Germany's new second television network. The sales are the first made by NBC International to the new network, which currently is under construction and will begin operations on April 1.

**MGM's Television Revenue Slides**

Company has $2.3 million loss in fiscal quarter

Television revenues slid off for Metro-Goldwyn-Mayer Inc. for the first quarter of the fiscal year ended Nov. 22, 1962, the company reported Jan. 7. TV gross revenue for the 1962 period was $5,386,000 compared to $5,630,000 for the same 12 weeks in 1961. Net TV income reached $1,470,000 for the 1962 period, compared to $2,030,000 for the same 1961 period.

The 1962 gross TV income breaks down to: $1,714,000 from licensing of feature films and shorts to TV stations, $3,672,000 from syndicated TV series and commercials produced for TV.

Overall, MGM had gross revenues of $27,310,000 and a net loss of $2,366,000 after taxes (92 cents a share) for the first 12 weeks of 1962. This compares to a gross of $29,362,000 and a net income of $2,173,000 (85 cents a share) for the same period in 1961.

**Repulic Corp. earns $1.7 million for year**

Republic Corp. earned a net income of $1,764,314 during the fiscal year ended Oct. 27, 1962, equal to 56 cents a share of outstanding common stock after payment of $400,000 in preferred stock dividends.

Comparable 1961 earnings were $1,977,629 or 74 cents a share, Victor M. Carter, president and chairman, reported Wednesday (Jan. 16). Gross revenues for 1962 totaled $43,285,706, compared to $31,729,670 for the previous year.

Mr. Carter reported highly favorable prospects for 1963, noting that contracts for the 850-film library being released through the company's Hollywood Television Service division are running ahead of schedule. The North Hollywood lot of Republic Studios, now operating at peak capacity, will be leased to CBS for five years starting May 1, which should add substantially to earnings this year, he said.

Abnormally cool weather last summer and California construction strikes adversely affected the profits of Republic's subsidiary Utility Appliance Corp. (ranges, air conditioners and other household appliances), Mr. Carter said. Another factor in trimming net income was the expense incurred in connection with the proposed acquisition of America Corp., New York holding company, which has been called off following Dept. of Justice objections that the resultant combination of Republic's Consolidated Film Industries with America's Pathé Labs would produce a monopolistic position in the film processing industry.

**Financial notes...**

Quarterly dividend • Directors of Gross Telecasting Inc. have declared a regular quarterly dividend of 40 cents a share on common stock and 7 1/2 cents a share on Class B common, both payable Feb. 12 to stockholders of record Jan. 25. Gross Telecasting owns WJIM-AM-FM-TV Lansing, Mich.

Paramount dividend • A quarterly dividend of 50 cents per share, on common stock payable March 11, 1963 to holders of record Feb. 25, 1963 was declared last Monday (Jan. 14) by the board of directors of Paramount Pictures Corp., New York.

**Disney announcement reveals officers' pay**

The annual meeting of Walt Disney Productions Inc. will be held at the company's home office in Burbank, Calif., on Feb. 5. Purpose is to elect directors, with the following nominated by management:

In a proxy solicitation sent to stockholders Jan. 11, aggregate remuneration of top officers for the fiscal year ended Sept. 29, 1962 was listed as follows:

Walter E. Disney, executive producer, $182,000; William H. Anderson, vice president (studio operations), $91,000; E. Cardon Walker, vice president (advertising and sales), $78,000, and Roy O. Disney, president, $52,000. The Messrs. Disney also have deferred com-

Kenneth Hatch, national account executive for KSL-TV Salt Lake City, promoted to national sales manager. Mr. Hatch joined station in May 1958.

Richard Sinclair resigns as advertising and promotion manager of KJTV TV Los Angeles.

Stanley Feinblatt, former director of radio research for Adam Young Inc.,
New York, joins Broadcast Time Sales, that city, as account executive. Robert Prater, account executive in Philadelphia office, joins New York staff in similar capacity.

George Patrick, manager of daytime program services at ABC-TV, New York, appointed program and commercial production manager, Mr. Patrick joined ABC-TV in 1954 as associate director, Edward Andrey, supervisor of presentation art, promoted to art manager.

Robert Kovaloff, formerly with WJJD-AM-FM Chicago, joins sales staff of WLS, that city.

M. J. Vosse, one-time merchandising and promotion manager of WMPS Memphis, Tenn., and more recently director of Vosse & Bick advertising agency, joins Ideas Inc., Memphis, as vp and member of plans committee.

Joe Tucker and Robert McLaughlin named account executives at WLW Cincinnati. Frederick M. Espy appointed account executive at WLWT (TV) Cincinnati. Both stations are owned by Crosley Broadcasting Corp.

Jeanne Maxey, traffic manager of KGFJ Los Angeles, joins KABC-AM-FM, that city, as sales coordinator.

Douglas Campbell, KABC’s national sales manager, promoted to sales manager of ABC-owned outlet, Mr. Campbell joined station as account executive in November 1959 and became national sales manager in February 1962.

Burke Ormsby, program director of KOGO-TV San Diego, elected president of board of directors of San Diego Employers Assn., organization founded in 1939 to assist members in better employee relationships and to keep them advised of new legislation affecting employer-employee relations.

Robert Hilker, WCGC Belmont, elected president of North Carolina AP Broadcasters Assn., succeeding Bud Abbott, WWGP Sanford. John Thomas, WCKB Dunn, was elected vp, and Tim Parker, Charlotte AP bureau chief, re-elected secretary.

James Landry joins WBOK New Orleans as operations manager.

Robert L. Link, production manager of WBBM-TV Chicago, promoted to assistant program director.

James Hawthorne, vp and program manager of Crowell-Collier Broadcasting Corp., with headquarters at CCBC’s Los Angeles station, KFWB, is candidate for Los Angeles City Council for Second District. For past nine years, Mr. Hawthorne has been honorary mayor of Studio City, section in which he and his family reside.

Johnny Blowers, bandleader, joins staff of WLIR-FM Garden City, N. Y., to head new variety show.

Richard Schaller, sales representative, promoted to local sales manager of WGR-TV Buffalo, N. Y. Before joining outlet in September 1960, Mr. Schaller was associated with WBEN-AM-FM, that city, for two years.

Charles L. Aronson, for past three years writer-producer with KGO-TV and KPIX (TV), both San Francisco, joins publicity staff of Matson Navigation Co., that city.

Art Schreiber appointed news director of KYW-AM-FM Cleveland. Donald Young Jr. and Ted Wygant named day and night news editors, respectively.

Lloyd Perrin, reporter-newscaster and foreign correspondent for KMPC Los Angeles, resigns after six years with station.

Richard Biddick and Joseph della Malva join news staff of WTCN-AM-FM Minneapolis.

Dave Schoumacher, former news director of KTIV (TV) Sioux City, Iowa, joins news staff of WKY-TV Oklahoma City.

William B. Hull, assistant chief engineer of WJW-TV Cleveland, named to newly created post of special services manager.

William R. Horine named producer in charge of public affairs for WHAS Louisville, Ky., replacing Dorcas Ruthenberg, who recently retired.

David Byrn, Don Day and Joe Robins join announcing staff of KXOL-AM-FM Fort Worth, Tex.

John Sweeney appointed music director of WDTM (FM) Detroit.

Lloyd Oliver appointed farm director of KAYS-AM-TV Hays, Kan.

Frank Benny joins KISN Vancouver, Wash.-Portland, Ore., as air personality.

Thomas O. Reed Jr. joins announcing staff of KPRS-AM-FM Kansas City.

Bill Calder and Mort Crowley join announcing staff of KHJ-AM-FM Los Angeles.

Frank Forrester, professional meteorologist at WRC-AM-FM-TV Washington, D. C., appointed public information officer of U.S. Geological Survey, that city, Mr. Forrester will continue his evening radio-tv weather reports.

Arnold C. Johnson returns to WGEE Indianapolis as general manager. Mr. Johnson is former station manager when outlet went on the air in 1956.

Kenneth L. Ross named local sales manager of KSDO San Diego, Calif.

Clair D. Miller, former news director and air personality at WFCJ (FM) Miamisburg, Ohio, joins WEEC (FM) Springfield, Ohio, as staff announcer.

Joe Kelly, formerly with WKYE Bristol, Va., joins WLS Chicago as disc jockey.

Rommie Loud, formerly with CKWX Vancouver, B. C., joins staff of WILD Boston in public relations and sales capacity.

Chester S. Miller, general manager and treasurer of Pocono Broadcasting (WVPO Stroudsburg, Pa.), elected president of Kiwanis Club of Stroudsburg.

Paul Miller, president of Gannett group of newspapers and broadcasting stations, has been selected as recipient of 1963 William Allen White Foundation award for journalistic merit. Presentation will be made at U. of Kansas, where Mr. Miller will deliver 14th annual William Allen White lecture on Feb. 11.

Joe Cell and Robert B. Frolicher appointed directors of promotion and publicity, respectively, for WLWT (TV) and WLW, both Cincinnati. Both stations are owned by Crosley Broadcasting Corp.

J. Dudley Saumenig, director of administrative services for WIS-AM-TV Columbia, S. C., retires after 30 years service with Broadcasting Company of the South, licensee of stations.

GOVERNMENT

Rep. Bob Wilson, of California, re-elected chairman of Republican Congressional Committee. Mr. Wilson was elected to post on June 29, 1961, succeeding Rep. William E. Miller, of New York, who resigned to accept chairmanship of Republican National Committee. Mr. Wilson entered advertising business in 1936 and since his election to Congress in 1952 has been an active partner of Champ, Wilson & Scolum, San Diego, Calif.

PROGRAMMING

Claude Akins, Benjie Bancroft and Dolly Jarvis elected to board of directors of Screen Actors Guild, replacing Marshall Thompson, James Gonzales and Louise Lareau, who resigned for personal reasons. New appointees will serve until Guild's annual election next November.

Stan Jones, for seven years director of radio, tv and theatre-screen advertising for Walt Disney Productions, resigns to move his family to another climate for health reasons.

Dorothy Seitz, public relations head for Mutual Broadcasting System, New York, has moved to Los Angeles to assume new duties as director of promotion and publicity for Mutual.

Ex-staffers form new firm

Three former WPAT-AM-FM Paterson, N. J., have joined Dickens J. Wright, owner of station until its sales to Capital Cities Broadcasting Co. 15 months ago, in new firm, Dickens J. Wright Assoc., New York.

New firm, which recently announced purchase of KRE-AM-FM Berkeley, Calif., subject to FCC approval, plans to buy other radio stations in U.S.

The three former WPAT staff members are William J. Calvert, vp and director of operations of Paterson station, who will be general manager of new Wright firm; David Gordon, WPAT music director, and John Burt, advertising, publicity and promotion director. Messrs. Gordon and Burt will assume same duties at Wright Assoc.

Harry P. Bailey, former radio-tv creative group head at McCann-Erickson and for past two years an independent creative consultant, appointed New York representative for Keitz & Herndon Inc., Dallas-based tv commercial producer. Prior to joining M-E, Mr. Bailey was creative account executive at Cunningham & Walsh from 1951-56 and creative radio-tv supervisor at Ellington & Co. for three years.

Ben Abbene, tv writer and off-Broadway producer-director, joins Henry Jaffe Enterprises, Los Angeles. Jaffe organization, in major expansion move, has created additional division of company devoted to development of new projects for tv, motion pictures and legitimate stage.

Lynn Heinzerling, assistant chief of London bureau of Associated Press, named chief of AP's Columbus, Ohio, bureau. He succeeds Burdette T. Johns, who was appointed administrative assistant to deputy general manager in New York office.

James N. Manilla, former senior producer at McCann-Erickson, New York, joins Filmex, that city, as producer-director. Prior to joining M-E, Mr. Manilla served as director of film production for Geyer, Morey, Ballard.

Mrs. Cavin

David E. Rubin, manager of purchasing department at Blonder Tongue Labs, Newark, N. J., elected vp in charge of purchasing.

Richard J. Goldberg, special projects director for Technicolor Inc., elected vp for research and development.

Don Cinalia appointed manager of industrial products division of Jerrold Electronics Corp., Philadelphia. He has been division's assistant sales manager since joining Jerrol last May.

Frank Parrish, advertising supervisor of Gates Radio Co., subsidiary of Harris-Intertype Corp., Quincy, Ill., promoted to sales promotion manager. Mr. Parrish assumes duties formerly handled by John R. Price, now vp for marketing at Sander Rodkin Adv., Chicago.

Charles H. Miller, plant manager in Ottawa, Canada, for Sylvania Electric Products, New York, named manager of Sylvania's receiving tube plant in Burlington, Iowa.

Sumner S. Averett, chief engineer for special projects at University Loudspeakers, White Plains, N. Y., promoted to manager of engineering. Victor Brociner, director of engineering, named manager of research.
ALLIED FIELDS

Eugene H. Levy, vp for sales and national director of advertising and promotion for Camera Equipment Co. (photographic equipment), New York, elected president succeeding Frank C. Zucker, who retires to become president of Local 644 (International Photographers of the Motion Picture Industry). Mr. Levy, who has been associated with Camera Equipment Co. since its founding in 1936, was elected to fill the board of directors in 1961 when company was purchased by CECO Industries.

Gerald Reiner, assistant project director at R. H. Bruskim Associates, New Brunswick, N. J., joins Audits & Surveys Co., New York, as senior project director. Lester Krueger, former research staff member at Aubrey, Finlay, Marley & Hodgson, Chicago, joins firm as assistant project director.

INTERNATIONAL

G. J. Bridgland, chief radio engineer of Canadian National Telegraphs, elected president of Canadian Radio Technical Planning Board, non-profit organization sponsored by 23 individual non-profit associations concerned with development of Canadian electronic communication services and conservation of radio frequency spectrum space. R. C. Poulter, Radio College of Canada, Toronto, elected vp and director of public relations.

J. R. DeBow, manager of Caldwell Television Film Sales, Toronto, named general sales manager of Caldwell A/V Equipment Co., Ltd., that city.

Dr. E. Eastwood appointed director of engineering and research for Marconi’s Wireless Telegraph Co. Ltd., Chelmsford, Essex, England. Dr. Eastwood joined Marconi's in 1948 as deputy chief of research from Nelson Research Labs of English Electric Co. In 1954 he became chief of research and in 1962 he was appointed to new post of director of research. R. J. Kemp, former deputy engineer-in-chief, named deputy director of engineering and research for Marconi Co.

Cyril Bennet, currently editor of documentary program This Week, named director of features for Associated-Rediffusion Ltd., one of Great Britain's four large tv production companies. Effective March 1, he replaces Lord Win-dlesham, who becomes specialist producer for company. Mr. Bennet, former newspaperman and parliamentary correspondent, has written many outstanding tv documentaries including "United They Stand," and "Two Faces of Japan."

Gordon G. Roth-rock, vp in charge of client services at Leo Burnett Co., Chicago, named director of client services of foreign subsidiary, Burnett, Nickolson & Partners Ltd., London. Burnett acquired control of English agency last year.

Jean Lenoir named publicity and promotion director of CFCM-TV and CKMI-TV Quebec City. Both stations are licensed to Television de Quebec (Canada) Ltd.

Frank Gillard, western region controller for British Broadcasting Corp., named director of BBC sound broadcast, effective Aug. 10, succeeding Lindsay Wellington, 61, who is retiring. John Johnson, former staff reporter in Southampton, England, for tv news magazine South at Six, joins BBC, that city, in similar capacity. James Dewar, former Bristol newspaperman and in recent years script writer for current affairs and documentary programs, joins BBC-TV as producer.

Bryan Hall, formerly of CHUM Edmonton, Alta., to sports director of CHUM Toronto.

Clarke Tait, tv cameraman and former actor at Glasgow Citizen's Theatre, appointed trainee floor manager for Scottish Television Ltd. in Glasgow.

DEATHS

David Donovan, 50, vp and account supervisor at Benton & Bowles, New York, died Jan. 13 at St. Francis Hospital, Manhasset, N. Y., following brief illness. Mr. Donovan joined Benton & Bowles as group head in copy department in 1946. Prior to joining agency, he served as assistant advertising manager for Interchemical Corp., and member of industrial advertising department of General Electric Co.

John Collingwood Read, 58, news analyst of CFRB Toronto since 1936, died Jan. 13 in that city. Mr. Read had also appeared in recent years on CFTO-TV Toronto and CHCH-TV Hamilton, Ont., as news commentator.

Noel Corbett, 56, Hollywood publicist, died Jan. 11 at his home in Los Angeles following brief illness. Mr. Corbett joined NBC publicity department in San Francisco in early 1930's and was transferred by network to Hollywood in 1933. He left NBC Blue Network (now ABC) staff in 1941 to enter business for himself. Later he worked for Bob Hope, Young & Rubicam, N. W. Ayer and Foote, Cone & Belding advertising agencies and Ben Sonnenberg. While with NBC, Mr. Corbett wrote radio column for Valley Times in North Hollywood. In recent years he was associated with William E. Doud real estate firm in Los Angeles.

Dorothy Mungar Skaithe, 52, Toronto radio commentator for Canadian Broadcasting Corp. network and commentator for CFTO-TV Toronto, died Jan. 13 in automobile accident on New York Thruway near Schenectady.

Marvin Murphy, 65, retired vp and pr director of N. W. Ayer & Son, Philadelphia, died Jan. 8 at his home in Bronxville, N. Y.

KAAS-AM Knoxville, Tenn.—Granted new license to WORX, as owner-assign. Consideration: $300,000. Action Jan. 9.

The Radio Markets are in Flux

Editor's Note: The radio market is in a period of change. In many cases, the changes are being driven by the need for stations to adjust to the growing competition from other forms of media, such as television and the internet. In other cases, the changes are being driven by the desire of station owners to expand their reach and influence. Whatever the reason, the changes are having a significant impact on the industry, and it will be interesting to see how they will unfold in the coming years.

Hearing cases

INITIAL DECISIONS

Hearing Examiner Isadore A. Honig issued initial decision looking toward granting application of Cape Fear Telecasting Inc. for new TV on ch. 3 in Wilmington, N. C. Action Jan. 16.
Hearing Examiner Forest L. Mc Clemmang issued initial decision looking toward granting application of Pender Best Co. for new am on 1470 kc. 1 kw. D. in Burgaw, N. C. conditioned and pre-sunrise operation with daytime facilities precluded pending final decision in Doc. 14419. Action Jan. 14.
Hearing Examiner Forest L. Mc Clemmang issued supplemental initial decision looking toward hearing upon Nov. 28, 1961, initial decision which would (1) grant application of Suburban Best Co. for new am on 540 kc. 250 w. D. A. D. in Jackson, Wis. with interference condition and added condition precluding pre-sunrise operation pending resolution of proceeding in Doc. 14419, and (2) deny application of Beacon Best Sytem. Though initial decision would deny Beacon application on other grounds, supplemental initial decision also concluded that Beacon lacks requisite character qualifications to become licensee. Action Jan. 11.

Hearing Examiner Arthur A. Gladstone issued initial decision looking toward granting application of Outdoor Broadcasting, Inc. for new station to increase daytime power of WJPA Washington, Pa. from 250 to 1 kw. continued operation at 1500 kc with 250 w.-n. conditions. Action Jan. 10.
Hearing Examiner Herbert Shurman issued initial decision looking toward granting application of Hayward F. Spinks for new daytime operation at 1600 kc. 500 w. in Hartford, Ky. conditioned that pre-sunrise operation with daytime facilities is precluded pending decision in Doc. 14119, and (2) denying application of Green ville Broadcasting Co., Inc. facilities in Greenville, Ky. Action Jan. 10.

DESERGATION FOR HEARING

By memorandum opinion & order, commission designated for hearing application of Georgia M. and Jerald Brush, d/b as Brush Best Co. for new daytime am to operate on 1600 kc. 500 w. in Wauchula, Fla. issues include determination as to whether there are adequate revenues to support more than one am in area without loss or degradation of service, applicant's financial qualifications and its efforts made to ascertain programming needs and interests of area; made WAUC Wauchula, which opposed grant, and WKG Key West, parties to proceeding. Action Jan. 16.

OTHER ACTIONS

By order, commission granted motion by WEXC Inc. to extend time to file exceptions to initial decision in consolidated proceeding on its application for new am in Depew, N. Y., et al., in Docs. 14631 et al. Action Jan. 16.
By order, granted petition by KWK Radio Inc. and extended time to Jan. 17 to file reply to exceptions and supporting brief of Broadcast Bureau, Inc. in proceeding on revocation of license of KWK St. Louis, Mo. Action Jan. 10.

By memorandum opinion & order, commission granted applications of Claremont TV Inc. for new tv translator stations on chs. 2, 6, 10 and 12 in Claremont, N. H., to rebroadcast *WENH-TV (ch. 11) Durham; N. H.; (ch. 32) Greenfield, Mass.; WCAX-TV (ch. 3) Burlington, Vt.; WJAC-TV (ch. 4) Johnstown, Pa., respectively, and (2) dismissed opposing arguments by Robert Bellows Falls Cable Corp., which provides cable service in Platt, Commrs. Lee and Ford dismissed, latter issue, hearing. Action Jan. 11.

Routine roundup

ACTIONS BY REVIEW BOARD

Denied as moot motion by Carroll Music Inc. for immediate stay in proceeding on revocation of license of WCLM (FM) Chicago, Ill. Action Jan. 15.
By memorandum opinion & order, commission granted application of WCLM Inc. and Al-Or Best Co. for new am stations in Ashboro and Mebane, respectively, both North Car. Inc. in hearing, denied Al-Or's petition to reopen record and enlarge issues for further hearing. Action Jan. 14.
In proceeding on applications of Olney Best Co., and John K. Williams Station Co. for new am stations in Olney, Tex., and Andarko, Okla., respectively, denied their joint request for temporary operation in proceeding for dismissal of Olney's application. Action Jan. 11.
Granted petition by Denver Area Bestrs. (KDBA), Arvada, Colo., and extended to Jan. 21, to file exceptions to initial decision in proceeding on applications of KACL, Lakewood Service, Inc. (KLAK), Lakewood, Colo., in proceeding on applications of KACL, et al. Actions Jan. 11.

Denied motion by 1540 Radio Inc. to proceed with oral argument in proceeding on its application for new am in Rich mond, and another for new tv in broadcast area for station in Hopewell, both Virginia, and directed that oral argument will proceed at scheduled time.

In proceeding on NBC-RKO broadcast transfers and related applications in Docs. 13957 et al., to file exceptions to initial consideration joint request filed by Philco Corp. and National Broadcasting Co. for extension and withdrawal of Philco application for new tv on ch. 3 in Philadelphia, Pa. Action Jan. 9.

German, Inc., Agents for the sale and distribution of EASTMAN Professional Film for Motion Pictures and Television, Fort Lee, N.J., Chicago, Ill., Hollywood, Calif.
Our Respects to Harold Heath Thurber

Spending other people's money well is serious business

There really isn't anything at all unusual in the fact that Hal Thurber, president of Wade Adv., Chicago, was once a pioneer broadcaster and later a pioneer in the buying of both radio and television advertising. Pioneering has been a family tradition ever since ancestor John Thurber ventured from England to the New World and settled in Salem, Mass., back in 1643.

This spirit of innovation and inquisitiveness is still very much a part of Hal Thurber today. It is a subtle quality, however. Just like the tinge of wry humor that often punctuates his conversation with others, tingles them a bit with surprise at first but then lingers on to reveal the depth and warmth of his human perception and understanding.

They seem to provide just the right temper to the firm, serious devotion which Mr. Thurber demands of himself as well as of his associates to the chief business of Wade Adv.: the investing of more than $30 million worth of other people's money in advertising that is both effective and efficient in winning customers.

Heavy in TV-Radio • Of Wade's total annual billing, more than 80% or nearly $22 million is spent by the agency in the broadcast media, mostly TV.

Wade Adv.'s principal broadcast accounts include Miles Products Div. of Miles Labs. (Alka-Seltzer, One-A-Day Brand Vitamins and other products), on which Mr. Thurber is account executive, and Toni Co. division of Gillette Co. (Deep Magic Dry Skin Conditioner, Deep Magic Facial Cleansing Lotion and Casual Hair Color). Among others on the list are International Milling Co. (Robin Hood flour and Velvet cake flour); Barbara Ann Baking Co.; Bond Stores (Southern California) and Seven-Up Bottling Co. of Los Angeles.

Wade Adv. itself is a TV sponsor. In the Thurber tradition of doing things unique, the agency presents a weekly half-hour program on WGN-TV Chicago, Mid-America Marketing on the March. It is a public-service forum (Wade tactfully omits commercials) from which the top business leaders of the area may speak.

Mr. Thurber usually doesn't like to skate on the thin ice of future predictions, but he does feel "there is going to be more regulation of advertising brought on by the bad boys of the business." He thinks it is unfortunate but a fact that self-policing by the "good guys" doesn't necessarily of itself correct those knowingly off base.

"There aren't many pressures you can bring to bear against the bad performers who bring the business into disrepute," he observes. "I'll say this, the American Ass'n. of Advertising Agencies is trying. They have put some teeth into their rules. But suppose you do throw an agency out? It just goes on and does as it pleases."

Early Writer • Born July 7, 1905, at Terre Haute, Ind., Harold Heath Thurber gained an early interest in the field of mass communication from his father, a veteran newspaperman who became city editor of the Indianapolis Star by the time young Hal was ready for school. Mr. Thurber recalls he had a keen interest in English and writing during his years in public grade and high school at Indianapolis.

His high school boasted a daily newspaper and he worked on it for a couple of years until the economic necessity of his after-school jobs forced him to give up his school reporting. One of these jobs was managing a small movie house and it gave him the chance to discover the power of advertising.

Once when the owner was in Europe, he ran a full page ad in his father's paper to promote a good film and drew long lines of people to his box office, shattering local precedent as well as the "gentlemen's agreement" among the local operators not to run big ads, of which he was not aware. After repeats of this successful method of promotion, he joined forces with a film seller to lease a vacant theatre and "had them on the sidewalk waiting to get in" until his boss came home. Anger soon became approval when the profit figures were reviewed.

Company Man • Mr. Thurber did not go on to college after high school. He felt working for the "tough" city editor at the Star would be more than a good education. After a year with the paper he became public relations man for an Insul utility, Interstate Public Service Co., and from there he moved to another Insul interest, Central Indiana Power Co., as public relations and advertising manager.

While with the latter utility he supervised the construction of its radio station, WFBM Indianapolis, which took the air in late 1924. Mr. Thurber became WFBM's first manager and quickly learned the impact of broadcasting as WFBM's activities drew "tons of mail." (WFBM now is a Time-Life station.)

In 1926 Mr. Thurber went to Chicago with McJunkin Adv., then the agency for Insul utility advertising. He didn't like the job.

Within a few months he was in Texas working for the Houston Chronicle. In early 1927 he joined Sweeney & James Adv., Cleveland, as copywriter on the Jordan and Peerless auto accounts. The next year he was back in Texas working for Tracy-Locke-Dawson Adv., Dallas.

Apart from gaining more basic radio advertising experience, his chief accomplishment there was to marry the president's secretary, Marie Gilliam. Mr. Thurber joined D'Arcy Adv., St. Louis, as account executive in 1934, an association he prides because of the friendship and inspiration of founder William C. D'Arcy.

On His Own • Mr. Thurber left D'Arcy in 1945 as vice president and chairman of the operating committee to become managing partner of Ewelly & Thurber Assoc., Toledo, Ohio. He signed Willys Motors as first sponsor of Omnibus on CBS-TV, one of many early TV ventures.

Mr. Thurber retired in late 1955 and went to San Francisco, but soon he was consulting for local agencies there and back in the business, Wade Adv. elected him vice president and a member of the board in 1957 and he became president in 1960 when Jeff Wade moved up to become board chairman.

The Thurbers live in the Chicago North Shore community of Winnetka where he enjoys his hobbies of photography and woodworking. The family pride and joy now centers on his grandson, named Timothy for the Thurbers' married son who is a TV technician. One hobby sadly gone: snapping satire at the Algonquin Bar in New York with his late cousin, James Thurber.
Collins and the future

No worthwhile purpose can be served in attempting to second-guess the action of the NAB board of directors in Phoenix last week in extending the contract of its controversial president, LeRoy Collins.

All 41 of the board members present were persuaded that the desirable and expedient action in the best interest of American broadcasting was to continue the Collins administration in office and give the former Florida governor a new and extended opportunity to prove that he can stem the tide of government encroachment upon the rights of broadcasters. It was a victory for the chairman of the joint NAB boards, Clair R. McCollough, president of the Steinman stations, whose philosophy prevailed not only with his five-man negotiating committee but also with the full board.

Militant and formidable opposition is promised in resisting the FCC in its hell-bent drive toward control of programming and business operations. It will be needed because broadcasters have never been in deeper trouble with the regulatory authorities.

We, along with all broadcasters, must hope that Gov. Collins has seen the light and that he will act as the advocate of the nation’s broadcasters against those inside government and out who would destroy broadcasting’s free estate. All too often in the past two years the NAB has been cast in the role of prosecutor instead of defender of the rights of its membership.

Table stakes

Another congressional investigation of television will be held if the House Select Committee on Small Business has its way. Last week the committee approved a report of a special subcommittee recommending a “comprehensive” hearing on time-selling practices that the subcommittee said are squeezing small businesses out of television.

The details of the subcommittee report were covered in Broadcasting, Dec. 10. What it charges is that option-time and discount practices work to the advantage of big national advertisers and to the disadvantage of smaller firms. What it asks is an investigation to determine whether new laws or tougher regulation are needed.

The subcommittee held hearings late in 1961, but was unable to dig into the subject as deeply as it wanted to. According to its report, however, it learned enough to justify its belief that “there is substance” to complaints of “growing monopoly of the airwaves by large national advertisers” and that further investigation is needed.

Now that the subcommittee’s report has been approved by the parent committee, there is a chance that the subcommittee will get its wish. That chance ought to be diminished if the parent committee stops to consider whether the investigation is really necessary.

No investigation is needed to prove that on a great many television stations in a great many markets prime time is largely occupied by national advertising. There are many reasons for this: The rates that can be charged in prime time are beyond the means of most local advertisers. The programming that occupies prime time is more expensive than small advertisers can afford.

Would the Small Business Subcommittee suggest that stations reduce their prime time rates and the quality of their prime time programming? If so, how would the public be served in those hours when it is convenient for the most people to view television?

As to option time and network-affiliate relations, two subjects that the subcommittee says are in need of special investigation, both have been exhaustively studied by the FCC. A new investigation can do no more than retrace the FCC records.

At this stage of television development it is an unhappy fact that the chips are too thin for thousands of advertisers to get into the game. It is unlikely, however, that the game would be improved by being changed to penny ante.

Lesson for retailers

An official gauge of retail sales during the current New York newspaper blackout is now available, and it promises little encouragement for newspaper space salesmen when they begin soliciting the stores again.

Federal Reserve Board figures, according to a study by TVB, indicate that instead of drying up, the Christmas buying season in New York turned into a shopping orgy after the newspapers closed down. Before the blackout, retail sales in New York City had been lagging behind both the national average and their own 1961 levels. A week later they had begun to pick up, and at the end of the annual shopping spree, the week of Dec. 23-29, they were 21% ahead of the same week of 1961.

Counting the entire New York Federal Reserve District, which includes most of New York State as well as New York City, sales for the Dec. 23-29 period exceeded the comparable 1961 week by 37%. This was even better than the national average, which was up 34%. In Cleveland, scene of another newspaper shutdown, FRB figures show that retail sales, after lagging in mid-December, picked up noticeably in the last half.

The figures bespeak much credit for television and radio, which have been drafted in both New York and Cleveland to handle a much bigger share of retail advertising than is normally entrusted to them. It would be foolish, however, to take the figures at face value and conclude that sales are as good without newspapers as with. TVB, noting this, pointed out that the FRB figures show that sales across the river in Newark, where there was no strike, were relatively better than those in struck New York.

We do not suggest that a community can do without newspapers, but it seems fair to say that retailers can do with less newspaper space than they’ve been buying. These strikes have shown that broadcast advertising can build sales. Retailers in all markets would be smart to study this evidence and adjust their advertising budgets accordingly.

Intermountain Network
Welcome to the Dan Ryan Expressway

JOIN OUR AUDIENCE ON WHEELS. Listen to Flying Officer Irv Hayden’s award-winning rush-hour traffic reports on WGN when driving on the new Dan Ryan Expressway. Presented in cooperation with the Safety Education Section, Traffic Division, Chicago Police Department.

Direct, exclusive air-to-ground communications between the WGN Trafficcopter and Chicago Police Communications Center will help make your trip more enjoyable.

Seven reports are presented in the morning starting at 6:55 a.m. during the Eddie Hubbard Show. Seven reports are presented in the peak evening driving hours starting at 4:30 p.m. during the Brickhouse-Hubbard Show and the Wally Phillips Show.

Keep tuned to WGN-Radio/720 for that something extra!

Another community service of WGN RADIO Dial 720

Another important plus!

An eye for what’s news in Chicago!

This salute appeared in 14 Chicago community newspapers—welcoming thousands of new expressway drivers to WGN Radio’s exclusive morning and early-evening rush hour Trafficcopter reports. Another important WGN Radio plus—more listeners for advertisers!

WGN RADIO on its toes and in the air in Chicago!

Join the Broadcast Pioneers—wear your pin with pride.
These are the serious citizens. They're building a home to fit the demands of their growing family. They're investing in the future. They do not make snap-decisions. They must weigh ... plan ... save. It is important that they know what to buy ... when to buy! They are the people you must reach in order to sell your product or service. Reach them ... sell them, and thousands of adults like them ... in the Baltimore metropolitan area every day on WCBM Radio. Serious citizens prefer WCBM's adult-level radio programming — the news — the music — the personalities — the programs! No doubt about it—WCBM Radio best delivers your message to the adult listeners ... the people with spending power in this rapidly-expanding mass market ... the 13th largest in the United States!
WGAL-TV delivers a loyal, responsive audience. This unequaled viewer following results from fourteen years of pioneering, finest facilities, and the most complete and modern equipment in the area. Channel 8 is the only single medium in this entire region that assures full sales power for your advertising dollars.

While spot radio is enjoying stepped-up activity (page 27), there’s no apparent let-up in spot tv. One tabulation by Broadcast Advertisers Reports from its new 10-market clock-around tv monitoring service shows that in just one product category—drug and pain relievers—42 different brand names were on air with 1,411 announcements in those markets in one four-day span. Bufferin was way out front in number of messages, followed by (in order) Contac, Alka-Seltzer, St. Joseph Aspirin, Bromo-Seltzer, Four-Way Cold Tablets, Thoroxin, Anacin, Isodet and Romilar CF Cough Syrup. Markets getting biggest shares of this business, all placed via national spot, were (also in order) New York, Chicago, Philadelphia, San Francisco and Washington.

Minow into space?

Report was making rounds in Washington last week that FCC Chairman Newton N. Minow may wind up on new Space Communications Corp., but confirmation was lacking. One of top posts—presumably presidency, according to well-founded reports—is slated for Air Force Undersecretary Joseph V. Charyk and reportedly will pay $125,000. Two other top jobs—chairmanship and vice-chairmanship—presumably would pay in same area. Another broadcast personage who had been under consideration for one of top posts is National Association of Broadcasters President LeRoy Collins (Broadcasting, Jan. 14).

Late, later, latest

Insomniac agency people (and other New Yorkers) may soon be able to watch television all night long. CBS-owned WCBS-TV, whose granddaddy “Late Show” reaches its 20th anniversary next month, just may celebrate occasion by announcing plans for 24-hour-a-day operation. If it works out, extra three to four hours per day, starting after existing Late Late Show, would be programmed with movies (Late Late Late Show and Late Late Late Late Show?).

The price of a strike

Not calculated to reassure agency and advertiser executives, either as readers or as media buyers, was report in New York last week that some newspapers there have drafted severe economy moves to go into effect when current newspaper strike is finally over. Obvious reason for economies: to help balance off wage and other cost rises resulting from strike settlement. There’s long been talk that some papers may not re-open after strike, or won’t last long if they do, but last week’s report anticipated probably substantial curtailments in news coverage of at least some papers whose survival has never been questioned.

The popular vote

NAB radio board members running for re-election are eyeing with interest nominations for new two-year terms currently being submitted by membership (see story page 87). Nominations, it’s felt, will reflect reaction of rank and file membership to reapportionment of President Roy Collins for three years (two years beyond existing contract) at joint board meeting in Phoenix Jan. 15.

If majority of candidates are re-elected, it’s deduced this would indicate vote of confidence in board’s bal- lot (41-0) in favor of Gov. Collins’ re-appointment. Fact that Gov. Collins last Monday in Los Angeles said at news conference that it was still his “deep and personal” conviction that tobacco advertising should be controlled may have bearing on elections.

Quiz for Cox

Memo to Kenneth Cox: Be ready to discuss FCC’s need for new quarters at your FCC confirmation hearing Thursday (Jan. 31). Your old boss, Sen. Warren Magnuson (D-Wash.), chairman of Senate Commerce Committee, has promised special all-industry committee dedicated to securing building for FCC that he will discuss subject. Harold Mott, Washington attorney and chairman of special committee, reported at group meeting last week on earlier discussions with Sen. Magnuson (Broadcasting, Jan. 21). Senator plans prompt action to secure FCC adequate housing, probably in building with other agencies, and Mott committee is soliciting general support to keep “dire” needs of FCC before Congress.

Cork buys Kaye

Armstrong Cork Co., through BBDO, New York, reportedly has decided to pick up first-refusal right on Danny Kaye Show that’ll be slated Wednesday, 10-11 p.m., in CBS-TV’s schedule next season (Closed Circuit, Jan. 21). Armstrong is keen on alternate-hour sponsorship of new series, but purchase has not yet been made firm. U. S. Steel, also BBDO client and other advertiser holding first-refusal on show, has not made decision on whether it wants tie with Kaye series.

Fitzpatrick next

Next appointment in current re-shuffling of FCC staff may be promotion of Thomas Fitzpatrick, assistant chief of Hearing Division, to chief. Decision on Mr. Fitzpatrick isn’t as firm as that on four other appointments, still to be announced officially (see story page 92). But Mr. Fitzpatrick is leading candidate to succeed Robert Rawson when latter moves over to chief of Renewal and Transfer post. Mr. Fitzpatrick, currently participating in Omaha local programming inquiry, joined FCC staff in 1950 after graduating cum laude from New York U. Law School and practicing in New York. He was assigned to Hearing Division in 1954, and named its assistant chief in January 1960.

Sports minded

Texaco has decided that sports programming on both radio and television is vehicle it wants and will buy for its advertising messages. Company has actively been seeking radio sports shows for its spot campaign in that medium (also see story, page 27), and currently is on lookout for sports programming on tv networks. Television purchase would be for next season. Benton & Bowles, New York, is company’s agency.

Regional group

New association of regional radio stations will take definite shape Feb. 8 at Mayflower Hotel meeting in Washington. It’ll be called Assn. on Broadcast Standards and will open Washington headquarters to protect regional members’ interests in clear-channel, daytimer and other proceedings that may affect them.

End in sight?

FCC’s latest letter to General Electric asking for more detailed information on company’s corporate structure may only be darkness before dawn in company’s long-pending effort to get licenses renewed for three stations (Broadcasting, Jan. 21). One reason commission has been unable to reach decision in case is conflict between Broadcast Bureau and General Counsel’s office on how to proceed. Broadcast Bureau would approve renewals without requiring hearing. Counsel’s office has been urging commission to hold hearing because of antitrust conviction of GE. However, source close to intramural battle indicated last week tide was beginning to run in favor of Broadcast Bureau.

HOW DO YOU MEASURE A BROADCASTING STATION?

The lady cannot see. Still, she knows our station and wanted to visit us. We are told that she "sees" WTIC-TV programs, as do many who are sightless. Their vivid imaginations supplement the audio with a video of their own. And, of course, WTIC Radio has been her friend and companion for many years.

But this lady had to "see" with her hands the statue of "The Broadcaster" which stands in Broadcast House.

Surveys, such as A. C. Nielsen and ARB, clearly define WTIC-TV's outstanding audience leadership in southern New England. The latest Politz survey of our area has proved that WTIC Radio is also without peer.

But somehow, a blind lady who came to visit us tells of another kind of leadership which cannot be measured in sheer numbers ... and reminds us anew of the awesome trust which our viewers and listeners repose in our station.

WTIC TV3/AM/FM

Broadcast House, 3 Constitution Plaza, Hartford 15, Connecticut

WTIC-TV is represented by Harrington, Righter & Parsons, Inc. WTIC AM-FM is represented by the Henry I. Christal Company
Lawyers delay move on regulatory revamp

Federal Communications Bar Assn. held annual membership meeting Friday (Jan. 25) without taking action on recommendations of special committee for far-reaching changes in government regulation of broadcasting (see story on page 44).

Leonard Marks, chairman of committee, reported to membership on recommendations. Official status of controversial report will be determined later, according to incoming FCBA President Donald Beelar. Report itself has not been circulated among lawyers in bar association but Mr. Beelar said new executive committee would meet this week to chart future course.

He will recommend report (which is summarized in detail beginning on page 44) be sent to FCBA members with special committee to be named to accept lawyers’ comments and recommend that association accept or reject all or portion of recommendations. He stressed report of Marks committee currently has no official status as views of FCBA but said work of planned new committee will be “a very important undertaking.” If executive committee approves, report will be sent to FCBA members early in February.

FCB was rebuffed by lawyers, it is understood, in agency request for copies of Marks report. Agency officials also were denied admission to Friday’s FCBA meeting. The report was not discussed by general membership at meeting beyond Mr. Marks’ verbal presentation, as lawyers hadn’t seen report.

Harold Mott, whose term as FCBA president expired Friday, said of report that “quite a good deal of thought went into its preparation. It deserves the serious consideration of all the bar.”

Student Loans • FCBA established a program of student loans to be made to advanced law school students attending universities in Washington area. Maximum loan under program will be $1,000 for scholastic year.

Students would be required to repay loan, plus 5% interest per year on unpaid balance. Requests for loans may be made to dean of law school attended by applicant.

Annual banquet of FCBA Friday evening followed membership meeting: entertainment was furnished by singer Hildegarde and drummer Gene Krupa.

Tele-Broadcasters buys Colorado outlets

Purchase of KTV (TV), KFMH (FM) Colorado Springs and KGHF Pueblo, Colo., by Tele-Broadcasters Corp. (H. Scott Kilgore, president) for $1 million was announced Friday, subject to FCC approval. Sellers of Colorado stations are James D. Russell and wife, Gifford Phillips and Robert D. Ellis. Mr. Russell is member of NAB TV Board of Directors.

Tele-Broadcasters now owns KALI San Gabriel (Los Angeles), KOFY San Mateo (San Francisco), WPOM Hartford, Conn., and KUDL Kansas City, Mo. Transaction was handled by Blackburn & Co. KTV is on ch. 11 with 85.1 kw; KGHF is on 1350 kc with 5 kw, day, and 1 kw, night; KFMH is assigned 96.5 me with 23 kw.

Also announced Friday was sale of WMFT Terre Haute, Ind., for $125,000 by Thomas Land and associates to George A. Foulkes. Mr. Foulkes is former vice president in charge of sales for WTHI-AM-FM-TV Terre Haute. Thomas group owns WFIW Fairfield, Ill. WMFT (1300 kc, 500 w, daytime only) sale was handled by Hamilton-Lands & Assoc.

Sunshine spot radio drive

Sunshine Biscuits, New York, through Cunningham & Walsh, that city, is using spot radio on large scale for first time in recent history. Company, which did not use radio last year, is spending major part of its advertising budget during first quarter for 50-market national spot campaign.

Former KPFK head admits Red period

Mrs. Catherine Cory Gumpertz, former manager of KPFK (FM) Los Angeles (1960-62), told Senate investigators Friday (Jan. 25) she had been communist “for a very few months” during “a foolish, short period” of her life in 1944, just after she graduated from college at Berkeley, Calif.

Latest witness to face Senate Internal Security Subcommittee behind closed doors, Mrs. Gumpertz said she answered all subcommittee questions, most of which centered on station’s programming, which includes appearances of communist spokesman among group of 14 regularly scheduled political commentators (earlier storyBroadcasting, Jan. 14). KPFK and other Pacifica Foundation non-commercial, listener-supported stations are being probed for alleged “communist infiltration” by Senate unit (see page 54).

Mrs. Gumpertz was complimented for her cooperative attitude, her lawyers said. She was excused from her subpoena and not asked to return, they added.

Foundation initially asked that sessions be made public, but subcommittee says it has no requests from witnesses for return to be heard in open sessions.

None of three senators present at Friday session would comment on meeting or on Mrs. Gumpertz’s statements.

KPFK (FM) won Du Pont and Peabody awards while Mrs. Gumpertz was manager, foundation reported.

Emerson reports jump in 1962 color sales

Mr. Abrams said that although color sales are still small compared to black and white, Emerson expects color tv “will gradually become a significant addition to sales and profits.”

Total tv sales by Emerson increased 20% and profits on those sales rose 30% over previous year, Mr. Abrams added.

Emerson reported consolidated net income for year ended Oct. 31 rose to $2,278,159 or $1 share from $1,851,684 or 81 cents share in like 1961 period. Sales for current fiscal year increased to $80,371,180, from $70,063,466 year ago.
WEEK'S HEADLINERS

Ken McAllister, vp in charge of advertising for Thomas J. Lipton Inc., Hoboken, N. J., since June 1961, elected to newly created post of executive vp. McAllister, who was elected to tea and food company's board of directors in December 1961, will supervise all marketing functions including advertising and market research, and will continue to direct Lipton's advertising, sales promotion and brand management. Prior to joining Lipton, he was senior vp, director and management supervisor of Benton & Bowles, New York.

Donald C. Beelar was elected president of Federal Communications Bar Assn. at its annual meeting, held Jan. 25 in Washington. He succeeds Harold E. Mott. Others elected: Thomas W. Wilson, first vp; Maurice M. Jansky, second vp; Phil Bergen, secretary; Herbert Schulting, assistant secretary; Ernest W. Jennies, treasurer. Elected to executive committee were Warren Baker and Marcus Cohn, for three-year terms, and W. Theodore Pierson, two-year term.

James B. Sheridan, special assistant to FCC Chairman Newton N. Minow and 22-year veteran with commission, was named Broadcast Bureau chief, succeeding Kenneth Cox, who has been nominated to commission membership. For other FCC appointments, see story page 92.

Dr. E. L. Deckinger, vp and media director of Grey Adv., New York, named vp in charge of media and network relations. He is succeeded by Harold Miller, vp and associate media director. Dr. Deckinger joined Grey Adv. in 1956 from former Biow Agency where he served as vp, director of research and acting director of media. Mr. Miller joined Grey also in 1956 from Benton & Bowles, New York, where he was vp and media manager.

For other personnel changes of the week see FATES & FORTUNES

Honors for Harry

Radio - Newsreel - Television Working Press Assn. announced Friday (Jan. 25) that former President Harry S. Truman will be given its freedom of information award at organization's annual dinner in New York April 22. Award to Mr. Truman will be for his recognition of "vital importance" of visual and radio journalism.

WLBW-TV notes costs of ch. 10 station

WLBW-TV indicated Friday part of its case for renewal of its license for ch. 10 Miami will be based on large expenditures for establishing facility. (See story page 52.)

Robert Marmet, counsel for station, said significance of evidence is that old Federal Radio Commission, FCC and courts have held that station's investment shouldn't be jeopardized "except for compelling reasons."

Charles H. Topmiller, president of WLBW-TV, said $722,462 was spent on facility. He also said L. B. Wilson Co., owner of WLBW-TV, spent $573,304 to keep station on stand-by basis between July 14, 1961, when it received temporary license, and Nov. 20 that year, when it finally went on air. W. Theodore Pierson, counsel for South Florida, one of three other applicants for channel, said issue will be raised to "full commission level." He said issue involves whether we're prejudiced" by station's expenditure of funds. He also noted proposals by two of L. B. Wilson's competitors for channel to "indemnify" L. B. Wilson if either of them gets grant.

Toward end of session Friday, Mr. Pierson raised question of "validity" of voting stock and trust agreement under which shares in L. B. Wilson are voted. He noted that company is Kentucky corporation with shareholders in Ohio and doing business in Florida. He indicated laws of three states involved might be in conflict. He asked Mr. Topmiller to provide information on where agreement was signed. "Relevancy," he said, "is that agreement through which L. B. Wilson established "substantial form of local ownership and control" might be invalid.

Agency president dies in New York

Sam M. Ballard, 61, president of Geyer, Morey, Ballard, New York, died last Friday (Jan. 25) of as yet unknown cause while lunching at The Forum of the Twelve Caesars restaurant in that city. Mr. Ballard joined New York agency (then known as Geyer Adv. Inc.) in 1953 as vp and chairman of account policy committee. He was elected president in May 1956. Prior to joining Geyer, Mr. Ballard was with Gardner Adv., St. Louis, for 16 years. He left Gardner from post of executive vp, director and chairman of management committee.

Long-range planning recommended for USIA

U. S. Advisory Commission on Information report released today (Monday) urges creation of special forward planning unit in USIA to handle long range information efforts.

Group of newsmen also said agency should give "highest priority" to role in space communication systems.

Advisory group, headed by J. Leonard Reinsch, executive director of Cox stations, commended 10 U. S. commercial stations which bolstered Voice of America programming during crisis.

Other recommendations: regular review of USIA radio, print output by "outside experts in radio and print," expansion of agency in new countries; elimination of unneeded publications; construction of one building for agency which now occupies 11 in Washington.

Gale to set up etv for Peace Corps

Robert Gale, vice president of Carleton College, Northfield, Minn., was named Peace Corps director of special projects Friday (Jan. 25) to set up Corps' etv projects overseas.

Corps is almost ready to go on Columbia project (Closed Circuit, April 23, 1962). Request has been approved by Agency for International Development. Ford Foundation, contributor to development of U. S. etv, is sending two assistants to Columbia.
December 7, 1962

Mr. Robert Newgard
West Coast Sales Manager
Screen Gems, Inc.
1334 Beachwood Drive
Hollywood 28, California

Dear Bob:

In the everyday course of business, we sometimes fail to extend credit where credit is due. In this instance, the greater portion of credit is due Hanna-Barbera for their superb cartoon productions.

I want you to know that we are exceptionally pleased with the package and feel that the cartoons have been highly successful in this market, as the ratings indicate.

Viewer acclaim! High ratings! Excellent sales response! Who could ask for anything more?

With best wishes for a successful 1963.

Sincerely,

Bob Guy
IN MEMPHIS

DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

JANUARY

Jan. 28—FCC hearing on availability of local television programming at the Old Post Office Building in Omaha, Neb. Commissioner E. William Henry presiding.

Jan. 30—March 3—Award winning examples of western editorial and advertising art, selected by Art Directors Club of Los Angeles in 18th annual competition, on exhibit at Museum of Science & Industry, Exposition Park, Los Angeles.

Jan. 31—Deadline for nominations to Radio Hall of Fame by those in broadcasting as well as public. Address: American College of Radio Arts, Crafts & Sciences, Conrad Hilton Hotel, Chicago 5.

Jan. 31—Minnesota AP Broadcasters Assn. annual meeting, Minnesota Press Club, Minneapolis. Chairman of Minnesota Democratic-Republican party will speak on the 1962 gubernatorial election and its news coverage, and will answer questions in an open forum.

FEBRUARY

Feb. 1—Deadline for entries in National Safety Council's annual Public Interest Award contest to public information media. Entries should be sent to National Safety Council, 425 N. Michigan Ave., Chicago 1, on official entry blanks available from same address.

Feb. 4—Hollywood Ad Club luncheon meeting, Hollywood Roosevelt Hotel, Lucille Ball, comedienne and president of Desilu Productions, will present the club's "Red Carpet Award" for outstanding achievement in the field of entertainment. Miss Ball and Elliott Lewis, producer of The Lucy Show, will speak.

Feb. 4—Reply comments due on FCC proposed rulemaking to require all applicants, permitees and licensees to keep file for public inspection of all broadcast applications.

Feb. 5-6—Fifth annual midwinter conference sponsored by Advertising Federation of America and Advertising Assn. of the West, Shattler-Hilton, Washington. Legislative round-up will include speakers from government and business. Speakers include: E. W. Nixon, postmaster general; James P. Mahoney, Jr. (Bell & Howell), Chicago; Donald H. McCannon, president of Westinghouse Broadcasting Co.; P. W. H. Atchison, chairman of Time Inc.; Palmer Hoye, publisher of Denver Post; Paul Rand Dixon, chairman of FTC; Newton, Minn., chairman of FCC; and Ralston R. Collins, vp of RCA.

Feb. 6—Stockholders meeting, Warner Bros. Pictures Inc., Wilmington, Del.

Feb. 6-7—Seventh annual legislative dinner and mid-winter convention, Michigan Assn. of Broadcasters, Jack Tar Hotel, Lansing.

Feb. 7—Public Service Institute sponsored by NAB in cooperation with American U. Hospital, American Communications Center, Washington, D. C.

Feb. 9—Annual awards dinners of the Directors Guild of America will be held simultaneously in Hollywood and New York. West Coast affair will take place at the International Ballroom of the Beverly Hilton Hotel, Eastern function at the Starlight Roof of the Waldorf-Astoria Hotel. Highlights of the evening will be outstanding directional achievement for motion pictures to be announced at the Hollywood dinner with similar awards for television at the eastern function.

Feb. 10—Texas Assn. of Broadcasters spring convention in Austin at Commodore Perry Hotel.

Feb. 11—FCC continues NBC-Philo hearings.

Feb. 11-13—Electronic Sales-Marketing Assn. first annual convention, Americana Hotel, New York City. A. D. Adams, vice president and general manager of New York office of Burton Brown Adv., will be convention chairman. For convention applications and more details, address the American Sales Executives of America, c/o Executive Director, P.O. Box 1, Bellrose, L. I., N. Y.

Feb. 11-15—British Columbia Assn. of Broadcasters annual convention, Empress Hotel, Victoria, B.C.

Feb. 15-16—Comments are due on FCC's proposed fm allocations table.

Feb. 15—Entries due for fourth annual American Tv Commercials Festival. Entries, accompanied by $20 entry fee, should be addressed to Wallace A. Ross, American TV Commercials Festival, 40 E. 49th St., New York, N. Y.

Feb. 15—Academy of Television Arts & Sciences annual ball, Coconut Grove, Hotel Ambassador, Los Angeles.
The Bell System will put more than
3 Billion Dollars into New Facilities this year
...to serve you and the nation better

We are moving full steam ahead with this big construction program because the country needs more and more communication service.

We are doing it because of our faith and confidence in the future of business and the nation. Surely, the course of America is upward.

We can see it and feel it in our own business. There is an aliveness in the day's work and in the research and the planning. The welcome necessities of growth are upon us and spur us on.

We have added 26,000,000 Bell telephones in the last ten years to meet the public's needs; a tremendous job in so short a time. The total is now 66,000,000. Some day, as population grows, it will be 100,000,000 and even more.

More service...More employment

The 1963 program will not only bring benefits to all who use the telephone but will provide thousands of jobs both inside and outside the Bell System. We'll be buying from tens of thousands of other businesses.

Many exciting new things are here or on the way, from the just begun to the nearly done.

The Telstar satellite and the new ocean cables are just parts of a new era in world-wide communications in which the Bell System has a leadership role.

Telstar is a first for our country, and has won world-wide admiration and respect. It has gone around the earth many hundreds of times, with two-way transmission of telephone calls, TV and radio programs, movies, etc.

A few months ago it relayed business-machine-type data across the Atlantic at nearly 1,500,000 words a minute. This is an example of the almost incredible speeds that new developments are putting into many forms of telephonic communication.

New buried cable for defense

A project of special importance at this time is a new underground cable system from coast to coast. It is being built to supplement present networks and withstand any nuclear blast except a direct hit. It's already over one-third completed.

We aren't sitting back or resting on our oars. You wouldn't think much of us if we did. And we wouldn't think much of ourselves. We know what is needed and we're going right to it.

Of course there will be ups and downs in the business cycle, but we aren't going to let temporary things scare us. This business isn't put together that way.

We're backing our faith in the near months and the far years with the biggest construction outlay in our history.

The money for the job

It can hardly be said too often that a well-balanced, forward-looking program of this kind depends on our ability to maintain good earnings.

It is only by reason of such earnings that we can go out and raise the necessary capital to do the job.

By building for the future, we are making an important contribution to the country's over-all economic welfare right now.

We go forward in this new year with a renewed resolve to serve the public and the nation in every possible way.

FREDERICK R. KAPPEL, CHAIRMAN OF THE BOARD
AMERICAN TELEPHONE AND TELEGRAPH COMPANY
Owned by more than two million Americans
THE MACE, emblem of authority of the South Carolina House of Representatives, borne ahead of the Speaker to open every session. Made in London, in 1766, of solid silver with gold burnishing, standing almost man-high, it is the only mace in use in the United States that antedates the Revolutionary War.
highest commendation the performance of WIS-TV"

unanimous resolution of the South Carolina General Assembly

"We evaluate with highest commendation the performance of WIS-TV, Channel 10, particularly for its alert, fair, and comprehensive news coverage of the affairs of our State government, its initiative in bringing thought-provoking discussion to enlighten our citizens on the problems of our State," says a recent resolution, unanimously adopted by the State legislature. The resolution adds that "there is urgent and compelling public need for the continuation of this praiseworthy performance by WIS-TV and its highly-trained personnel."

Need we add that our constant effort is not only to continue but to improve the performance our legislature has found praiseworthy? This has been our unending task in over 30 years of operating broadcasting facilities in South Carolina.

KTVH IS KANSAS TELEVISION WITH TALL TOWER POWER!
THE EFFICIENT WAY

RCA 25 KW Transmitter...

This is the new TT25DH designed with compact walk-in cabinet using half the usual floor area. Diplexed circuits plus air-cooled tubes and transformers assure the ultimate in reliability and trouble-free performance.
This "Traveling Wave" antenna design based on slot radiators results in improved signal effectiveness, excellent circularity, low VSWR, high power handling capacity and low wind load. Simplicity of construction means virtually no maintenance and it is resistant to lightning damage.

This RCA "package" provides the most efficient and most economical combination of antenna gain and transmitter power. The 25 KW transmitter, with an antenna gain of 15-18, provides an ERP (Effective Radiated Power) of 316 KW. A carefully designed vertical radiation pattern satisfies requirements for close-in as well as far-out coverage. It's the "easiest way to get 316 KW." Compared to other transmitter-antenna combinations this one (a) uses only half the transmitter power; (b) requires only a fraction of the usual floor space; (c) cuts operating costs in half; (d) requires lower capital investment. RCA offers single-source supply, undivided responsibility, and matched equipment. RCA supplies all hardware—arranges for installation, if desired. And RCA is on call for service 24 hours a day.

Your RCA Broadcast Representative is ready to help you work out the best proposition to fit your requirements. Call him, or write RCA, Broadcast and Television Equipment, Dept. RD-22, Building 15-5, Camden, N. J.
Equal space package

EDITOR: Congratulations on your "Equal space" editorial [EDITORIALS, Dec. 31, 1962]. This is an excellent presentation of a very fundamental fact and the whole matter is neatly tied up, indeed, in your closing paragraph. . .—T. J. Allard, executive vice president, Canadian Assn. of Broadcasters, Ottawa.

The 1963 Yearbook

EDITOR: We just received our 1963 Broadcasting Yearbook. Congratulations on a fine job. The expanded information will be most useful.—Fred J. Archibald, General Motors Corp., Washington.

EDITOR: . . . We have used the Broadcasting Yearbooks in the past, and I know that this one will get a workout, too.—R. E. Hunter, administrative assistant to Sen. Russell B. Long, Washington.

New directions

EDITOR: I am sure you know there has been an argument going on for centuries as to whether it is easier for man to read from left to right or from right to left. The Chinese resolved the problem by devising a system where one reads vertically, from the top down. Broadcasting Yearbook solved this centuries-old problem by printing . . . from the bottom up.

Those little identification words on the margins save all of us who use the Yearbook as a bible a great deal of time, aggravation and irritation. Whoever thought of it deserves a new 750-kw clear channel station in New York.—Marcus Cohn, Cohn & Marks, Washington.

[Mr. Cohn refers to the marginal headings on each page which tie in with the six thumb-index tabs separating the major business areas of broadcasting—all of which facilitate fingertip location of desired information in this 632-page, one-book library of television and radio.]

Challenge to Collins

EDITOR: A tip of the hat to Joe Klas of KYA San Francisco, whose letter [OPEN MIKE, Jan. 14] is recommended reading for all who would advocate or impose further ridiculous controls on an already "caged" industry.

The broadcasting industry is currently in a financial plight, caused in part by poor management, inferior programming and rigid regulations. Only a competitive industry can possibly hope to survive and prosper.

I would urge NAB President Collins to undertake a survey of arrests for under-age drinking in the metropolitan New York area and compare the results with others compiled before the news-

BROADCASTING, January 28, 1963
paper strike. It should prove there is negligible difference in spite of the fact that a main source of hard liquor advertising has been cut off.—Thomas E. Lague, WGHQ Kingston, N.Y.

**Adult education on tv**

**EDITOR:** . . . One of your articles, “NEA says educators neglect etv in-the-home,” arrested my attention.

The National Education Assn.’s plan to instruct adults through television has many advantages. . . . It would be a mistake to limit this program to only educational tv stations, for the commercial stations offer an excellent opportunity to reach a larger and more diversified audience at one time. . . . —Ray L. Cox, engineering student, Duke Universiity, Durham, N.C.

**Completing the list**

**EDITOR:** In your article, “Specialists sell most programs” [LEAD STORY, Jan. 7], you list Goodson-Todman as sales representatives for To Tell the Truth and Password. We also currently have What’s My Line and I’ve Got a Secret on CBS, and The Price Is Right, Play Your Hand, Say When, The Match Game and the new Richard Boone-Cif ford Odets one-hour anthology series on NBC. . . . —Harris L. Katleman, executive vice president, Goodson-Todman Productions, Beverly Hills, Calif.

**Awards-naming contest**

**EDITOR:** I noticed your article about naming the award sponsored by the Hollywood Ad Club [BROADCAST ADVERTISING, Dec. 31, 1962]. Why don’t you call the award “ADDY” or “AD-DIE”? It is an abbreviation for the word advertisement, which a commercial is in the strictest sense. . . . —Rada Vargas, Logan Sales Co., San Francisco.

**Medicine show?**

**EDITOR:** WINR recently featured some “Music to Have an Operation By”—for a few minutes, anyway.

WINR personality John Bartholomew Tucker was on the air when one of his listeners called from Binghamton’s Lourdes Hospital to request a record—or rather, a nurse called for her patient. The woman listener was ready for surgery.

Mr. Tucker played the request, “But Beautiful,” by Nat King Cole, for the listener’s pre-operative mood. Next morning he called the hospital and found that the listener-patient was doing well, perhaps aided by the WINR music from her transistor set.—D. F. Snyder, program director, WINR Binghamton, N.Y.

**Experience does count**

**EDITOR:** In your report of my ANA speech [BROADCAST ADVERTISING, Dec. 31, 1962], just one thing might be misunderstood because it seems to be taken slightly out of context.

You paraphrase me as saying: “Age, experience and training were not found ‘critical’ factors, although undoubtedly influential.” It was in the relation between test scores and performance ratings where we discovered poor correlation with age, experience and training of salesmen. Although age may have little to do with it, there is certainly much to be gained in sales success if the individual is well trained and thoroughly experienced.

Since creative aptitudes are inherent, a person of any age can indicate his degree of potential through the tests we use. As to experience, the tests are so designed that they call for the everyday experiences of life rather than experience in selling, advertising or any other field. Again, since the aptitudes are inherent, they obviously cannot depend upon specialized training in any field. The tests are based upon our common experiences.

The basis for establishing our norms in the fields of public relations, advertising and selling, was the known performance of successful individuals, and we do find the standards are somewhat different from field to field. . . . While we have general population norms, they are of no value for distinguishing between the more and less creative people in the live business world in a given field of successful practitioners.—John D. Dale, Ph.D., Dale, Elliott & Co., New York.

**Wrong impression**

**EDITOR:** May I call your attention to an article which implies a situation regarding our Claremont, N.H., station, WTSV-FM, that is not true [GOVERNMENT, Jan. 7].

The article regards station WWHM and its request to go off the air because of financial considerations. In the last paragraph the implication is made that our station also is silent because of financial difficulties. This is not the case. WTSV-FM went off the air because of a serious and total fire, making it impossible to operate till repairs were made and equipment replaced.

Because readership of BROADCASTING is so great you can understand our desire to have the proper situation brought to your readers. . . .—Shirley I. Roy, director of planning and development, Knight Management Corp. (Knight Quality Stations), Boston.

[Boomerangs refer to the unintended implication that WTSV-FM may be in financial difficulty. An FCC staff official stated that the stations listed in the Jan. 7 article had requested permission to go off the air for financial reasons.]
Jim Uebelhart is news in Toledo

Jim gets radio ratings comparable to TV's top shows. One of America's highest rated and most respected newscasters, his daily WSPD news programs gain audiences as high as 16.8 (a 51% share) at noon, 14.2 at 8 a.m.!

Newscasters like Toledo's Jim Uebelhart (a 25-year Storer veteran) are the rule, not the exception, on Storer stations. Spencer Danes in Miami, Doug Adair and Mike Prelee in Cleveland, Jac Le Goff in Detroit, Milwaukee's Carl Zimmerman (and many more) — all top newsmen in key time segments — provide Storer audiences with the most thorough and authoritative news coverage in their markets, as well as Storer's famed daily editorials. Outstanding news facilities are just one more reason why all the Storer stations... television and radio... are IMPORTANT STATIONS IN IMPORTANT MARKETS.
Restrain: secret salesman of today's tv or radio commercial

The time was when a minute was so much sand in an hour-glass, and two minutes worth was a swell measure to boil a good egg for breakfast. Now something remarkable has happened to the minute. It's enough time to move mankindise all over the country—thanks to television—and very often you need only one minute's worth.

Never before have so many millions and man-dollars been spent preparing advertising that moves, talks, sings, cajoles, threatens and advises. These minutes—and their shorter brothers—run the gamut: from the quick-cut "home-movie" style of the film opening for an off-Broadway play to the awesome luxury of one 60-second continuous shot from a helicopter under, over and around a bridge across the Colorado River—and a Chevrolet the only salable product in view.

Let's examine any trends and portents that may be emerging.

There seem to be just as many commercials to draw angry criticism, but several approaches are emerging that I believe will make 60 seconds mean more than just a minute of air.

Simplicity • To counter-balance the overwhelming amounts of time and money being spent on television productions, I believe there is a wonderful underwhelming fact: good ideas are becoming simpler and more graphic. Research and creative forces within the advertising agencies are reaching a common conclusion: a direct idea, simply and graphically stated, is worth a lot of sales.

Let's examine the various applications of this trend towards directness in television advertising.

Example: Pillsbury decided to spend a minute talking about its frosting. For a full minute, the camera saltivated over the beaters, the spatula icing the cake, and finally showed the package with a screen full of icing as a background. Just icing. Unforgettable.

Example: Johnson & Johnson decided to invest lots of money in air time on a minute concerned with selling baby powder. J&J showed a baby, the baby being powdered, and the can of baby powder. That's all.

Example on radio: American Airlines decided to invite people to fly to San Francisco. In what amounts to a tone poem in sound, American recreated the foreground sounds of a street musician against the background sounds of ships way down there in San Francisco Bay. A picture for your mind's eye from sightless radio.

Example on television: Procter & Gamble decided to use a different approach in selling Camay soap. So P&G showed a girl washing her face, rinsing her face and drying her face. You left her face only twice—to follow her hand and her glance down to the bar of Camay—covered with sud.

Warmth • So much for directness. What else is new in 60 seconds? Well, for one thing, warmth seems to be on the way in. And the strangest things can be warm. Like aluminum. And corn flakes. And cars.

Let's talk about warm corn flakes.

What could be more simple, direct and warm than to show a six-year-old boy at the breakfast table trying to read the back of a Kellogg package while his older and slightly exasperated sister urges him to eat, not read. Overdone, it could be disastrous. Underplayed as it was, it was the personification of warmth—and good selling.

There are fewer cold pitchmen holding up packages, and more warm people emptying them. There are fewer competitive claims and more factual statements.

With these underlying trends towards directness and warmth, let's examine the production techniques employed.

Example: In discussing the "workability" of aluminum, Alcoa used a total of 39 scenes, each separate and distinct from the other. The editing was skillfully done, building to a climax of eye-catching versatility. And, as a parallel for the same product, when the quality of aluminum in another commercial was "beauty," one long travel shot lasted a full minute. Same product. Two completely opposite filmatic techniques, but each served its purpose. The vigor of 39 scenes made "workability" dramatic. The simplicity of one probing, pausing scene made "beauty" restful.

So, as television advertising becomes more sophisticated, and the television viewer more satiated, certain forces seem to be cutting through. Originality must now have a reason, for the audience has seen all the tricks. Words are not enough, because the television air is full of noise. Silence within the commercial minute can be meaningful, even startling. This should not be too unusual a thought, when you think of the wonderful ads in magazines that have used "white space"—and that's really what silence is.

Brevity • As television advertising becomes more direct, warmer and more graphic, it also is becoming obvious that sometimes you don't need a whole minute to suggest a purchase. More and more effective use is being made of 30-second or 20-second commercials.

To sum up television commercials are learning to:

1. Tell it straight—arrows don't turn corners.
2. Tell it simply—you have an audience only as long as you are interesting or informative.
3. Say LESS than more—a commercial is not a one-breath talkathon through the advertiser's whole plant.
5. Be warm. You would like your product to be wanted again.
6. Sell. That's what it's all about.

A closing thought, quoted from a Leo Burnett house ad: "Whistler once said it took two men to produce a good picture—one to paint it, and another to beat him over the head and make him quit."

Hooper White is manager of tv and radio commercial production for the Leo Burnett Co. in New York. He started as an announcer, writer and program director at radio stations in East St. Louis and Kalamazoo, and spent eight years as a producer-director at WBBM Chicago, before joining Earl Ludgin in Chicago. He produced and directed the first on-location tv commercials in Europe for Helene Curtis in 1954. He worked with J. Walter Thompson before joining Burnett 3½ years ago.

A MEMBER STATION OF THE COMMUNICANA GROUP • JOHN F. DILLE, JR., PRESIDENT
Now a push for a modern law to govern broadcasting

A major effort was begun last week to update the aging Communications Act and to replace the FCC with a new agency equipped to regulate modern radio and television. The start was made by influential lawyers in Washington. In four monographs the members of a special committee of the Federal Communications Bar Assn. urged sweeping revisions in the concept and practice of federal regulation of broadcasting.

A wholly new kind of regulatory agency was proposed. The functions now performed by the seven-member FCC would be divided among an administrator, a communications court and a five-member policy-making body. Among the objectives this proposal is designed to achieve:

- A swifter processing of cases that now get clogged in the tangled pipelines of the FCC.
- A more orderly planning for long-range uses and development of broadcasting.
- A tidier system of establishing criteria in the issuance of station grants.
- A surer way of keeping political influence from determining the outcome of contested cases.

In addition, the Communications Act would be revised to tighten the prohibitions against government interference in programming and to clarify the government's power to assess penalties for violations of regulations.

Authors of the monographs were Leonard H. Marks, W. Theodore Pierson, Philip G. Loucks and Reed T. Rollo. Their proposals were submitted to the bar association by last week and are expected to precipitate demands for prompt congressional action.

Full report on the move to modernize the law: page 44

RADIO SELLING LIKE TV IN 1963?
At least that's how some advertisers are buying, rep reports

Radio business is getting off to its briskest January pace in years. The new stimulant being provided by this increased spending level of national radio spot advertisers has station reps optimistic.

Network radio business also appears to be gathering momentum this year on the basis of orders received and on first-quarter estimates.

A canvass last week of advertisers, agencies and reps active in radio brought estimates of spot radio business gains from a low of 3% to a high of 15% in the January-March period compared to last years first quarter. One representative reported some advertisers were spending money in radio as though it were television.

The news of a quickened pace for radio coming during a period traditionally sluggish is especially heartening for radio sales executives in view of the drop in time sales reported by FCC for 1961.

There was indication last week, moreover, that the level of national spot volume in 1962 is above that of 1961 (see box, page 28) and of further gains that may be expected this year.

Several national advertisers are singled out as giving radio its stepped-up business trust in 1963. Among those most frequently mentioned are such advertisers as Sunshine Biscuits, Texaco, Campbell Soup, R. J. Reynolds Tobacco, Pontiac Cars, Sealtest Co., Nestle, American Tobacco (Montclaire Mentholated Cigarettes), a newly expanding General Motors division called Harrison Radiator, Sinclair Refining, and Ford Cars.

Also Philip Morris, Chevrolet, Union Carbide, Equitable Life Assurance Society, and Mennen.

Network Reports • All four radio networks report business on the rise. ABC Radio estimated volume may be up 22% this quarter and credited such advertisers as R. J. Reynolds, P. Lorillard (Spring cigarettes), United Motors, Kraft Foods, Parkay Margarine, Philip Morris and William Wrigley as leading the business climb.

CBS Radio sees this first quarter as much as 20% ahead of the period last year if the current "trend" continues upward. In the past few weeks alone, the network took in new business representing some $2.5 million in billings. Among the top spenders on the network: Chevrolet, Oldsmobile and Ford cars; Philip Morris, Campbell Soup, Bristol-Myers, Kellogg's and Kraft Foods.

NBC Radio, from early reports, has increased its business in the first quarter this year some $250,000 ahead of last year's period (BROADCASTING, Jan. 21). The network said it picked up at least a sale a day in a 14-business-day period, with no sign of any leveling off.

Mutual is projecting a "slight increase" in business for the first quarter over the comparable period last year. This is based on present renewals and new business signed recently by Ford Motor Co. and Bristol-Myers. In recent weeks renewals of 52-week contracts have come from Liggett & Myers, Mennen, Monroe Auto Equipment Co., Philip Morris and Reynolds Tobacco.

Spot Reports • Among the spot reports from station reps:

Ben H. Holmes, vice president of the radio division, Edward Petry & Co., said he was "certainly bullish" about
Business is getting better and better, radio pitchmen agree

Optimism laces the statements of three radio executives in searching out this year’s business prospects in radio.

Kevin Sweeney, president of Radio Advertising Bureau, predicted in a speech before the Advertising Club of Richmond last week, that: “1963 will not only be the radio’s largest volume year in history, but its most profitable year in the past 10 years, too.”

Mr. Sweeney’s talk was predicated on a belief that radio has found formulas for effectively competing both with newspapers and television and in the process assuring itself of millions of dollars in new advertising volume. Reason: radio now has documentation as to why advertisers should use the medium in place of print or TV.

Principal “advertising problem” remaining for radio, says Mr. Sweeney, who retires as president of RAB at the end of February, is to cut through “caked-on layers of prejudice, half-facts, habit and opinion that surround so many decisions.”

He feels radio’s strength will come from its coverage of adults, particularly in the June-September period, and from its access to a greater share of retail dollars now being spent in newspapers.

Major Climb • In an announcement last week of a planned meeting of company executives in Chicago on Feb. 1 and 2, Arthur H. McCoy, president of Blair Radio, a division of John Blair & Co., said that 1963 had taken on the look of a year that could mark the beginning of a major “upsurge” in national spot radio.

Mr. McCoy, in measuring the first-quarter business. His impression was that business is ahead of last year at this time, though precise accounting figures are not yet available.

Mr. Holes said West Coast business has been especially brisk and that farm advertisers continue active. He cited as encouraging signs spot radio contracts made recently by Equitable Life Assurance Society, Nestle, Ford Motor and Bayuk Cigars, among others, but pointed to one setback—the decision of Hill Bros. Coffee to cut back on the number of spot radio markets.

Arthur McCoy, president of Blair radio, said he was optimistic about the first quarter, based on business sold and sales pending. At Blair, he said, 1962 was better than 1961, and he believes that this year will surpass 1962 levels.

Spot radio, he conceded, is a “spotty business” subject to change. At present, Mr. McCoy said, stations in the East and the West are doing well generally, in contrast to outlets in other sections. But the situation is fluid and can change, he added.

He detected some improved interest in spot radio among advertisers and credited Radio Advertising Bureau and some of the station representatives with sparking this interest. But he acknowledged that it is “a hard fight and you have to work hard to keep business up.”

He singled out as “bright spots” Colgate’s test of spot radio and recent spot investments by Nestle and Sunshine Biscuit.

Mitch DeGroot, vice president in charge of radio, Paul H. Raymer Co., was enthusiastic about first-quarter business. Preliminary estimates indicate, he said, that Raymer volume is at least 5% above the 1962 quarter.

Top Markets Best • The top 50 market stations, in his opinion, are doing well, but he added: “Of course, most of the business is going to the major stations in the major markets and we are fortunate to be represented in some of them.”

Bright spots at Raymer have been the West Coast generally and farm business, but the company has done “mighty well” with newcasts in some markets, according to Mr. DeGroot.

Ralph Guild, executive vice president, McGavren-Guild, reported the first-quarter business outlook “fine.” But he said it was too early to project an increase over first-quarter of 1962. He said there are some soft spots, generally but not universally, in the South and Midwest and that the trend toward spending more and more money in the top 50 markets continues.

Mr. Guild was not sure he could pinpoint the reasons for the healthier business prospects but said that at his company the upgrading of the station list was a contributing factor. He voiced belief that many reps are selling “more creatively” than in the past and that this is a sales stimulant.

James Alsopough, vice president of H-R Representatives, commented that business for the first quarter “looks extremely good.” In recent weeks, he said, H-R has signed campaigns for such clients as TWA, Rambler, Robert Hall Clothes, Skippy Peanut Butter, Ford, Equitable Life, My-T-Fine desserts and Mystic Tape.

Lengths of the campaigns vary, Mr. Alsopough noted, with a few 52-week efforts but the large number averaging four to eight weeks. Similarly, the number of stations ordered varies, and he conceded that large campaign lists are rare (Equitable, he remarked, is in well over 100 markets).

Mr. Alsopough thought spot radio generally is in for a “brighter year.” At H-R, he said, “business in 1962 was up 19% over 1961. We hope to double the increase this year.”

Never So Good • Another radio representative said he’d never seen business so good as now, and predicted 1963 will be excellent.

Another executive estimated his firm’s business is running 5-10% ahead of last January, depending on the market. He pointed to an increasing tend-
year ahead, felt that the breakthrough would come from station groundwork already accomplished and from future selling and development.

Lawrence Webb, managing director of Station Representatives Assn., told Broadcasting:

"While the gain shown in national spot radio for 1962 may not be substantial, there is every reason to believe that the total dollar-volume figure for the year will be over $200 million and more likely will be in the neighborhood of $205 million, as compared to $197 million in 1961.

"The year 1963 will show even larger gains. The overall picture in radio is much brighter for a number of reasons. Foremost among these reasons is the renewed selling efforts on the part of the entire industry, coupled with far greater emphasis by the stations on good, solid programming."

"The first quarter of 1963 has gotten off to a good start by an increase in the month of January over the same period of 1962. I feel sure that the first quarter of 1963 will show a substantial increase over the same period of last year."

ency for smaller advertisers to spread their budgets to two or more stations in a market in order to attract different segments of the audience.

He listed Reynolds Tobacco, Sunoco, Thomas Leeming Co., Equitable Life, Union Carbide, Sealtest, and Texaco as currently among the more active clients.

Billings for first quarter are definitely on the rise, with activity in New York picking up considerably for February and March starts and all 14 out-of-town offices reflecting large increases from the like period a year ago, according to Richard G. Koenig, vice president, radio, Bolling, New York.

In markets below the top 50, increases are sporadic, Mr. Koenig said, but nevertheless on an overall basis, gains are healthy.

With the exception of additional revenues in New York resulting from the newspaper strike, CBS Radio spot sales business during the first quarter of 1963 is at about the same level as a year ago, Maurice Webster, vice president and general manager, said.

Mr. Webster noted that interest in spot radio by several major national advertisers which CBS expects to turn into new business in 1963 is not reflected in these figures.

Joseph J. Weed, vice president of Weed Radio Corp., said his firm's January business would probably be 4-5% ahead of January 1962, and he noted this year probably would be good because of a reactivation of previously dormant radio accounts.

Mr. Weed said most radio advertisers in the past have been buying "numbers" rather than a particular type of radio station, but he pointed out that many clients are becoming selective and in fact are "beginning to look seriously at fm."

Clifford J. Barborka, vice president in charge of radio, Adam Young Inc., said more concentrated business for the first quarter would be about 2-3% ahead of the same period last year and perhaps even better in the second quarter.

John S. Stewart, radio sales manager at Avery Knodel indicated that his firm's spot radio business was holding steady but spoke of growing competition from network sales particularly in morning and afternoon traffic time.

Another Increase Mogul, Williams & Saylor, an agency which has moved several radio-active clients, reported there would be a marked increase in its spot radio activity especially in the second and third quarters. That agency also noted a trend to shorter campaigns with a much higher frequency of exposures. It reported Rayco, for example, would increase its national spot budget 15 to 20% over last year, this surge coming mostly in the middle of the year with exposures as high as 250 times per week in some markets. Another MW&S account, Renzoni Macaroni plans a 10% increase in its use of spot radio for the first half of the year.

Henry Fownes, senior vp and general manager of tv-radio division at McManus, John & Adams said that Pontiac was increasing its spot radio budget to about a half million dollars.

Other clients, Cadillac and Dow Chemical—expect to stay with the same levels.

Among the various radio advertiser reports:

It is estimated that American Tobacco co will spend 5% more this year in spot radio in the first quarter as compared to that period last year in connection with its new Monticello cigarette.

Campbell Soup Co., through BBDO, which is winding up its winter spot radio campaign, will begin another flight in March. Details of the buy were not disclosed.

Sealtest Co. this year is beginning a radio spot campaign concentrated in states east of the Mississippi River.

Much of the budget for the new radio work is coming from Sealtest's former network tv expenditures of last season.

Although market plans were not disclosed, the dairy products firm will use top rated morning air personalities and afternoon spots, along with a few scattered evening exposures, in its markets. The campaign's emphasis will be in certain markets of "greatest potential."

A spokesman at N. W. Ayer & Son, New York, Sealtest's agency, cited spot radio's efficiency, flexibility and reach as reasons for using the medium.

The Harrison Radiator Div. of General Motors Corp., which first used spot radio three years ago in the south for its car air-conditioning units, this year will use spot radio nationally.

D. P. Brothet, Harrison's agency, has scheduled a campaign from January to July on radio stations in 126 markets, to introduce the firm's new four-season car climate control sys-

---

Spot specials in advance

Advertisers can now become spot radio sponsors of special news bulletins before they go on the air.

The radio div. of the Katz Agency, New York, is offering spot radio advertisers the opportunity to sign up in advance as sponsors of news bulletins broadcast by 37 Katz-represented stations. The new plan is known as "Radio News Alert."

The advertiser may choose the stations he needs, and he becomes 'owner' of up to 18 bulletins in any 24-hour period until he uses up his 'bank'—60 one-minute announcements. If events demand more than the basic buy of 60 bulletins, the sponsor has first right to buy additional messages.

Cost to the advertiser (if he buys all 37 participating stations), based on the highest one-time minute rate, would be about $72-000.
A major breakthrough in advertising research—a way to compare the supposedly incomparable "apples and oranges" typified by different media—is being reported today (Jan. 28) by the CBS-TV network.

The new technique was disclosed in a presentation that showed television with a strong advantage over magazines when both were measured by the common yardstick of "total advertising effectiveness."

Four years in conception, development and execution, the study put television and magazines to the same tests and came out with these findings:

- Television had a 83% greater impact than magazines in increasing the average respondent's awareness of advertised brand.
- Television had a 109% greater impact than magazines in making the average respondent more certain of a brand's advertised values.
- Television had a 196% greater impact than magazines in increasing the average respondent's evaluation of an advertised brand.
- Television had a 197% greater impact than magazines in making the average respondent more eager to buy an advertised brand.

Translated into terms of cost efficiency, these findings meant that for each advertising dollar spent:

- Television made 25% more people more aware of an advertised brand than magazines did (tv, an increase of 122 persons per dollar; magazines, 97.9 persons per dollar).
- Television made 42% more people more certain of a brand's advertised values than did magazines (tv, 33.6 persons per dollar made more certain; magazines, 23.6 persons).
- Television made twice as many people increase their evaluation of an advertised brand as did magazines (tv, 40.3 persons per dollar increased their evaluation; magazines, 20 persons).
- Television made twice as many people more eager to buy an advertised brand as did magazines (tv, 78.1 persons per dollar made more eager to buy; magazines, 38.6 persons per dollar).

Three Waves - The new approach was developed by CBS-TV research department under the direction of Jay Ellasberg, and the studies—in three waves in 1960 and 1961—were conducted for CBS-TV by Audits & Surveys Co. and Eugene Gilbert & Co.

The techniques and findings have been highlighted in a 14-minute color film which CBS-TV plans to start showing to advertising agencies in New York next week and to those in about 10 other major cities in the near future.

Historically, the audiences of different media have been regarded as "apples" and "oranges"—impossible to compare—because different media define their audiences by different standards. The CBS-TV study points out, for example, that a magazine or newspaper does not equate with a television set, nor an issue-reader with an average-minute viewer.

The new approach goes beyond "audiences" and deals with "total advertising effectiveness." Here, the CBS-TV presentation asserts, it becomes possible to apply the same tests to different media and get comparable results. Thus "we can, for the first time, fairly compare magazines and television."

(Actually, CBS-TV officials say, the principle applies to other media as well as magazines. However, certain basic data for newspapers is missing, so that a newspapers-tv comparison probably would have to rely in some degree on estimates and to that extent might be challenged as less precise.)

Comparability - In its study CBS-TV used brand advertising that (1) was running on television and in magazines at the same time and (2) was making

**COMMERCIAL PREVIEW: Schaefer beer**

Shooting of this new Schaefer beer commercial involved first commercial usage of "Gemini," MGM Telestudio's new tape-film system eliminating the need of kinescope for film prints of video-tape commercials (Broadcasting, Jan. 14).

The commercial, third in a series by Schaefer, pictures a billiards match, in which a variety of trick shots are performed. It is scheduled to be seen sometime next month.

Beer is served to players to the tune of the regular Schaefer jingle. Commercial was shot in MGM Telestudios New York studio. It will be telecast in key northeastern markets through BBDO, New York, agency for Schaefer.

What's Discretionary Income?

Are you kidding?

One man's Porsche is another man's patio. But all kidding aside, however they spend it, there's 27% more discretionary income in Ohio's Third Market than the national average, and no medium—but none—covers it as thoroughly as WHIO-TV, AM, FM. Ask George P. Hollingbery.

Additional morsel for thought:

*Dayton continues to lead the state's eight major cities with the highest weekly gross earnings.*

Big kick for Secure

Helene Curtis Industries, Chicago, has announced that it will spend $2 million in television and print media during the next three months to introduce a new pressed powder deodorant and anti-perspirant product for women. Neither the kickoff date nor the exact media budget split are set.

Using the brand name Secure, the new product will be packaged in a dainty white hinged compact which can be carried in the purse as well as displayed on the vanity. Curtis considers its powder puff Secure to be the most significant innovation in the over $100 million deodorant field since the firm’s Stoppette “pouff” deodorant of the early 1950’s. Agency is McCann-Erickson, Chicago.

the same copy points in both media. The study included all product categories—and virtually all brands—that met those requirements.

In all, 22 magazine ads and 30 tv commercials for 13 products were tested. These represented all the advertising done by these products in nighttime network television (15 commercials on CBS-TV, 10 on ABC-TV and 5 on NBC-TV) and in four leading national magazines during the periods when the study was in the field. The magazines: Life, Look, Reader’s Digest and Saturday Evening Post.

Approximately 6,000 interviewers, selected from 30,000 specially trained and tested for this study, conducted a total of 8,779 interviews with more than 6,000 adults—in all cases members of their own households.

So that the interviews could be conducted under comparable circumstances—immediately after exposure to the advertising, whether in magazines or on television—husbands interviewed their wives in some cases, wives interview their husbands in other cases, and high school and college students interviewed one of their parents in yet other cases.

Those finally chosen to do the interviewing were schooled and then given written exams before being allowed to take part in the study. The wives, husbands and parents they interviewed did not know they were going to be questioned—until the questioning started.

Matched Samples • The respondents, all adults and divided about 50-50 between the sexes, were first separated randomly into two matched samples.

One group, designated the “before” group, was interviewed on the day before the advertising appeared. This established a base against which to compare the results that would be found after the advertising appeared.

(In order to eliminate the influence of people who may not watch television or read magazines and thus would be unlike those tested after seeing the commercials or ads, the tabulators did not include in the final figures the answers of any “before”—group members who were not later observed to be exposed to the advertising.)

The second, or “after” group of respondents was interviewed, in each case, immediately after exposure to the ad or commercial. Exposure was determined by the interviewers observation.

In the case of magazine ads, the interviewer knew when the ad he was to check would appear. He then noted the location of the ad in the magazine—and waited. As soon as he observed that the wife—or husband or parent—had been exposed to that particular page, he conducted his interview, asking prescribed questions.

Same Questions • In the case of tv, the interviewer knew what program would carry the commercial he was to investigate. When the respondent was watching (or listening, without watching) that program, the interviewer waited for five minutes and then, as soon as the commercial had been presented (whether the respondent saw it or not), asked the same prescribed questions.

For all interviews the questions were:

“What brand comes to your mind first when you think of (product)?”

“If you yourself were to buy (product) today, which one brand would you most likely buy?”

“Now I’d like to ask you some questions about one brand of (product)—(brand). Even if you may not use (brand) yourself, you probably have some ideas about it. How would you rate it on each of the following? Would you say it is excellent, good, just fair or poor? (at this point interviewer read a list of statements consisting of attributes which were claimed for the brand in both the magazine ads and tv commercials that were being tested.)

“From whatever you know or may have heard about (brand), how would you rate it overall? Would you say it is excellent, good, just fair or poor?”

For each ad, the study determined the difference between the “before” attitude percentage and the “after” attitude percentage. Using standard sources on audience, these percentages were then translated into terms of people, or “total effect.”

The “total effect” figures of all the tested magazine ads were then added to get a “total advertising effect” figure for the magazine ads under investigation.

Averages • The same procedure was followed for the commercials. The fact that the study covered eight more commercials than magazine ads, CBS-TV’s report asserted, “in no way affects the findings” because the comparisons are made on the basis of averages.

The “total advertising effect” figure for magazines was then divided by the total cost of the magazine advertising involved (using standard sources on costs). So was the “total advertising effect” figure for television (using known costs or estimates from standard sources). This arithmetic, the researchers noted, produced “advertising effect per dollar” figures which “could be directly compared,” television versus magazines.

The attitude changes produced by the average magazine exposure and by the television exposure were reported as follows:

CBS-TV authorities said no “after” respondent was interviewed more than once on any given brand. Some were interviewed after exposure to a message in each medium, but not for the same brand. Nor, according to the researchers, did interviewers try in any way to induce respondents to look at the magazine or program in which test ads were to appear.

To calculate tv audiences, the study used Nielsen total-audience homes figures, multiplied by American Research Bureau data on audience composition (adults only). For magazines it used an ad-page-exposure report compiled for the Reader’s Digest and Saturday Evening Post in 1959, covering all four of the magazines involved in the studies.

Cost Data • Cost figures were based on Standard Rate & Data space rates information adjusted for estimated earned discounts. Television cost data came from the CBS-TV controller’s office in the case of advertising on CBS-TV, with estimates from Nielsen and other sources in the case of advertising on the other networks.

CBS-TV authorities said that, if anything, the basic information they used over-stated the case for magazines and 32 (BROADCAST ADVERTISING)

under-stated television's.

The products covered in the survey were as follows (but no breakdown by product category or brand is available, officials reported): Bayer aspirin, Campbell soups, Dial soap, Ford Falcon, General Electric refrigerators, Goodyear tires, Kellogg's corn flakes, Kraft barbecue sauce, Marlboro cigarettes, Pal blades, Sanka instant coffee, 7-Up and Sunbeam electric shavers.

The film presentation summarizing the study and its results was produced and directed by Louis Dorfman, creative director, and George Bristol, operations director, of the CBS-TV network advertising and sales promotion department. Design was by Saul Bass & Assoc. in collaboration with the CBS-TV network; film production was by Format Films Inc.

Details of the study, its mechanics and findings are contained in a 47-page booklet, "Taking the Measure of Two Media."

Business briefly...

Wilson Sporting Goods Co., River Grove, Ill., through Campbell-Mithun, Chicago, and Goodyear Tire & Rubber Co., New York, through Young & Rubi-cam, that city, will sponsor NBC-TV's coverage of the final three holes of the Palm Springs Golf Classic on Sunday, Feb. 3 (5-6 p.m. EST).

Pontiac Motor Div. of General Motors Corp., through MacManus, John & Adams, will sponsor the Victor Borge Show, first tv variety-entertainment program to originate from Philharmonic Hall of New York's new Lincoln Center. Show will be telecast on ABC-TV, Monday, Feb. 25 (9-10 p.m. EST).

Ten national advertisers in the past three weeks signed with ABC-TV for prime-time participations which the network said represented $4 million billing in new business. Advertisers included Bristol-Myers (Young & Rubicam), Brown & Williamson (Ted Bates), Block Drug (Grey Adv.), Carter Products (Sullivan, Stauffer, Colwell & Bayles), Dodge (BBDO), General Foods (Benton & Bowles), Gulf American Land Corp. (Paul Venze Assoc.), Helene Curtis (McCann-Erickson), Plymouth (N. W. Ayer), and Toni Div. of Gillette (North Adv.).

Georgia-Pacific Corp., Portland, Ore., has bought into ABC-TV's Wide World of Sports, beginning in April. It is G-P's first buy on ABC-TV. Agency: McCann-Erickson Inc., Portland.

Leonard Lavin (c), president of Alberto-Culver, discusses his company's tv success story with Donald G. Gannon (l), president, Westinghouse Broadcasting Co., and Larry Israel, president, TVAR.

34 (BROADCAST ADVERTISING)

ADS SHOULD RUN ALL YEAR
Alberto-Culver's Lavin says buying and selling done year-around and advertising should be too

Tv advertising ought to be all-year round for companies which use the medium. Neither the business of selling nor of buying takes the summer off.

This was stressed by television booster Leonard H. Lavin, president of Alberto-Culver Co., Melrose Park, Ill., in recounting the advertiser's success with the medium at a management meeting of a station representative firm in New York last week.

Mr. Lavin was featured at Television Advertising Representatives' second annual management meeting on Jan. 23. Sessions included seminars for general and sales managers of the eight TVAR-repped stations, for Westinghouse Broadcasting Co. executives and top-level media client executives, TVAR officers and sales managers.

Another highlight on the program was a panel discussion on computers. Panelists included Robert Liddle, a Compton Adv. vice president; Michael J. Donovan, vice president and associate media director at BBDO, and Joseph St. Georges, vice president and manager of media department at Young & Rubicam.

Mr. Lavin said:

"We are fully aware that advertisers cut back expenditures and take hiatuses during the summer. This philosophy is not shared by Alberto-Culver. The business of selling goes on all year round. The business of buying goes on all year round.

"And the business of advertising and influencing likewise go on all year round, including the summer. Because spot television has been instrumental in our growth, it is a day in, day out proposition as far as we're concerned."

Alberto Culver Co.'s use of television has been a major—and continuing—success story. The company conservatively expects to boost its advertising budget this year to more than $30 million from an estimated $23 million in 1962. About 98% of the budget is in network and spot tv (BROADCASTING, Dec. 17, 1962).

Mr. Lavin discussed his company's use of spot television in new product introduction, in making initial impressions in large markets, as a method of shoring up sagging sales within specific market areas, in "blitzing" (where a particular product needs an added edge against competition in a market), in exploiting markets which have the greatest potential and in market testing products.

A Cost Warning • In his talk, Mr. Lavin warned of a rising cost per thousand as "one dark cloud in the spot-television horizon." He said the cost hikes he referred to were those which are made without comparable increases in tv homes "and by the fact that audiences are more evenly divided today among stations."

Mr. Lavin said that A-C's cost per thousand for spot in 1960 was $1.66 per minute commercial but is now over $2.25.

He acknowledged that Alberto-Culver was finding ways to lighten a higher cost effect. Among the weapons used, he said, is the bridged commercial that permits two low-budget brands to share the cost of a minute announcement and giving each the frequency desired. Broadcasters can benefit, according to Mr. Lavin, because bridging allows for a greater number of brands to use the medium.

Larry H. Israel, president of TVAR, predicted that this year would top the 1962 levels of record billings for the
Have you ever heard of our "Party Line"?

We don't want to spoil it by trying to compress the whole story of our "Party Line" program into this brief space.

Suffice it to say here that "Party Line" is a participating program on the most popular TV station anywhere near the great Red River Valley. It is producing big results for some big advertisers. For example, we recently offered a Party Line Pattern Book, at $1 a throw. Result: 14,928 copies!

Ask PGW, will you? They have the whole story of this spectacular program.

FARGO, N. D.
eight stations represented by the firm.

Mr. Israel cited a growing awareness among advertisers of a "composite of many individual markets" as contrasted to "a broad national market" and an increase in new product introduction and market testing in tv.

He noted that magazines and networks have attempted to follow the spot formula but without spot's success. Network scatter plans and spot carriers and magazines with regional editions "cannot hope to approach the fast-breaking flexibility and individual marketing aspects of spot tv," Mr. Israel said.

**PULSE DATA ON RADIO**

*Average home said to listen 6.4 hours daily*

In the course of a day, between 6 a.m. and midnight, 67% of all homes spend time listening to radio, Dr. Sydney Roslow, director of The Pulse Inc., said last week in a report on a national study undertaken by Pulse last year.

In a speech to the Detroit chapter of Station Representatives Assn. on Monday (Jan. 21), he said the national study of the radio audience also found:

- Listening of all persons in the average home totals 6.4 hours per day.
- Teenagers listen much less than adults. He split up the daily 6.4-hour per-home total as follows: adult women 3.3 hours; adult men 2.0 hours; teenagers 0.7 hours and children 0.4 hours.
- Auto listening contributes 10% to 20% of the total radio audience daily.
- All out-of-home listening contributes 15% to 30%.
- By income groups, 87% of the homes with incomes of less than $5,000 were found to have listened during a day; 80% of those in the $5,000-$7,499 bracket listened, and 88% of those with incomes $7,500 and over.
- Radio listeners are "good customers": 35% of the "heaviest listening clientele" includes homes with incomes from $7,500 and up, while 34% of this heavy-listening group are in the lowest income level. Among the "heavy listeners," 54% have no children—but 34% have five children or more.

Dr. Roslow also reported that Pulse plans to go ahead, starting in 25 markets, with its "TelePulse PDQ," a form of "cross-breeding of the face-to-face personal interview and the one-day diary." Tests in Los Angeles, he said, produced an 82% return as compared to "perhaps half of that in conventional diary systems," and also "got answers to important qualitative product questions about every local tv program."

He said another new Pulse service, "LQR-100," a qualitative study of local radio in 100 markets, already has been ordered by 160 stations.

Dr. Roslow predicted that "in the late 1960s and 70s we'll see a lot less irresponsible nit-picking at ratings, and a lot greater appreciation of their true role and limitations." The "first big revolution" of the next ten to fifteen years, he said, will be the bringing of qualitative research within financial reach of all stations.

The emphasis in audience measurement, he predicted, will be "on persons rather than homes," while the "out-of-home and out-of-the-living-room audience, just now being generally discovered, will become increasingly the object of attention."

Dr. Roslow went into detail on Pulse's measurement techniques, particularly in light of the Federal Trade Commission consent decrees signed by Pulse, A. C. Nielsen Co. and American Research Bureau (BROADCASTING, Jan. 7).

He said that although the FTC made no announcement until a few weeks ago, Pulse signed its consent order last August—and that even "long before" then, "we had already done everything necessary to comply with the detailed changes involved."
HOW AUTOMATION HELPED BOOST WBFM BILLINGS 250% IN 7 MONTHS

New York City FM Station Moves From 4th to 1st in Pulse Rating

Monthly billings up from only $2000 to $7000 in the period May-Nov. '62! Pulse rating up from 4th to 1st among independent FM Stations, Oct.-Nov. '62 study! A growing list of sponsors and renewals! That’s the success story of FM station WBFM, operating in the intensely competitive New York City market. And only the beginning!

Automated O-Vation Music Programming

Much of WBFM’s success is attributed to the benefits derived from automated programming. The station uses automated equipment and O-Vation Music supplied by Programatic Broadcasting Service. This has resulted in substantial savings on personnel, music and programming time. These savings in turn have enabled WBFM to program live and live-on-tape to a degree otherwise impossible.

Station Personality Attracts Sponsors, Audience

By astute scheduling of automated and live programs, WBFM has built a bright, adult station “personality” for itself, attracting more listeners and a growing roster of diversified sponsors, which includes: Merrill Lynch, Pierce, Fenner & Smith; Norel Electronics; Staten Island Savings and Schaefer Brewing Company.

Sponsors Get Direct Dollar Results

Concourse Travel Bureau, for example, sold nearly $4000 worth of vacation tours in the first six weeks of a 13-week advertising campaign over WBFM.

Why WBFM Uses Programatic O-Vation

Automated for economy and unequalled programming flexibility, O-Vation Music features 8-hour tapes of new and exciting instrumental and vocal arrangements, programmed to today’s adult audiences, performed by top talent and reproduced in true tonal quality. Programatic start-stop automation provides for pre-selected news breaks, commercials, local broadcasts, allowing creative broadcasters to build their own format, tailored to the specific needs of each individual market. O-Vation Music is available to only one station per market. Make it yours.

BROADCASTING, January 28, 1963
Network tv planned for new Polident size

A 33% increase in sales of economy-size Polident denture cleanser after recent test marketing of the product has resulted in plans for its heavy exposure on network television.

Block Drug Co., manufacturer of Polident, now plans to advertise the large size cleanser during all "billboard" used for Polident commercials which will include exposures of 15, 10, 5, and 3 seconds on these network shows: Going My Way, Naked City, Sunday Night Movies, 77 Sunset Strip and Laramie. The campaign is scheduled definitely for February and March and tentatively for April. Block Drug's agency is Grey Advertising.

Agency appointments...

- Chesbrough-Pond's Inc., New York, to J. Walter Thompson Co. in Japan, to handle advertising in that country, starting March 1.
- Moore Co., Newark, N. J., has appointed Venet Adv. Agency, Union, N. J., to handle advertising, marketing and public relations for its Bon Vivant soups. Initial radio campaign for 13-weeks with five one-minute spots per week will begin April 15 on two stations in New York and is expected to expand into other major markets.
- Wait & Bond Inc., Newton Highlands, Mass., has appointed Chirurg & Cairns Inc., Boston, as its advertising agency for four brands of cigars. Account, which currently uses spot radio and tv, has a total advertising budget estimated at $250,000.
- Whitehall Labs Div. of American Home Products Corp. has appointed Donahue & Coe, New York, as agency for its Hill's cold tablets, effective Feb. 1. Former agency was Cunningham & Walsh, New York.
- Campbell Soup Co. is transferring its frozen soups account to BBDO, New York, from Leo Burnett Co., New York, effective July 29. Account bills estimated $700,000 of which 50% is in tv.

Isodine appoints Kenyon & Eckhardt

The appointment of Kenyon & Eckhardt, New York, as agency for five products of the Isodine Pharmacal Corp., New York, was announced last week by Edward W. Dooley, vice president and general manager of the company. Billing for the products are estimated at $1.5 million, of which approximately $1 million is in spot tv.

The products, which have been assigned from Reach, McClinton & Co., New York, effective immediately, are Isodine antiseptic, Isodine gargle, Isodine mouthwash, Isodine throat spray and Isodettes antibiotic throat lozenges. Isodine Pharmacal is a division of the International Latex Corp.

Rep appointments...

- KSAY San Francisco: Avery-Knodel, New York, as exclusive national representative.
- WLEC Sandusky, Ohio: Weed Radio Corp., New York, as exclusive national representative.
- WSEE (TV) Erie, Pa.: Ohio Station Reps., Cleveland, and Penn Stations Reps, Pittsburgh, as representatives in those areas.
- KETO-AM-FM Seattle and KPAM Portland: Broadcast Time Sales, New York, as exclusive national representative.
- WVNO-FM Mansfield, Ohio: Frederick W. Smith, New York, as national representative.
- WWOK Charlotte, N. C.; Adam Young Inc., New York, as national representative.
- KLIN Lincoln, Neb.: Mid-West Time Sales, Kansas City, Mo., as regional sales representative.
- KUDL Kansas City, Mo.: McGaven-Guild Co., New York, as national representative. Mid-West Time Sales, Kansas City, is regional representative.

GOVERNMENT

It wasn't raining rain at FCC

WIDESPREAD CRITICISM DIRECTED AT TODAY'S OMAHA TV HEARING

It rained brickbats on the FCC last week.

All scored bullseyes on the commission's inquiry into local tv programs offered by the three Omaha, Neb., tv stations beginning today (Monday) and some were thrown by former FCC chairman and present commissioner Frederick W. Ford in an address to the National Religious Broadcasters (see story, page 87).

Without mentioning Omaha by name, Commissioner Ford said there is "great danger" that the FCC is stepping out of bounds in such hearings by taking over the programming functions which properly belong to the broadcasters.

Other attacks on the Omaha hearing took these forms:

- NAB President LeRoy Collins, speaking to the Nebraska Assn. of Broadcasters last Wednesday (Jan. 23) in Lincoln, used the strongest anti-FCC words he has uttered since becoming NAB president two years ago in blast-

ing the Omaha hearing. He demanded the FCC cease such hearings, which he labeled "efforts to govern by harrassment, by needling, by nibbling."

- The next day, the Nebraska state legislature (unicameral) unanimously adopted a resolution charging the Omaha hearing is "an unwarranted intrusion by the federal government into the freedom of broadcasting and the affairs of this sovereign state." The resolution, introduced by Sen. William Moulton of Omaha, was passed 39-0.

The legislature resolution said the hearing was scheduled by the FCC "without just cause or reason." Copies were sent to President Kennedy, the attorney general, all members of the Nebraska congressional delegation and the FCC.

- Meeting in Athens Wednesday, the Georgia Assn. of Broadcasters said it is "unalterably opposed to the FCC investigation of qualitative services of local television in Omaha or in any other city unless there are compelling and spontaneous demands emanating from the general public." GAB said that such hearings constitute an "automatic indictment" against the stations involved and presupposes the stations are guilty of not performing in the public interest.

The attendant publicity, particularly in competing media, creates the impression of wrongdoing and far outweighs any positive results, the Georgia broadcasters charged.

- At the same GAB meeting (see story, page 86) Stephen Labunski, vice president-general manager of WMCA New York, said the FCC has prepared for the "broadcaster fry in Omaha" by soliciting testimony from "vigilante committees" of unrepresentative witnesses for hearings on local programming.

Some Difficulty - Commissioner Ford said the FCC has held [in Chicago] and proposes to hold [in Omaha] hearings
BY A KNOCKOUT!

KLZ-TV in Denver

The list of victories by KLZ-TV always has been impressive, but nothing compares with its most recent defense!

The November ARB showed KLZ-TV is in first place—ahead of all competition in every “Broad Day Part” time bracket from sign-on to sign-off, seven days a week. Never before has a Denver television station received such a large share of the total television viewers.

KLZ-TV has 17 of the top 20 programs in Denver! These include the highest rated news—morning, afternoon and night; the highest rated weather and sports; the highest rated network program; the highest rated syndicated program!

The winner, and still champion as the best television buy in Denver—KLZ-TV!
THEY'RE HAVING A GREAT TIME
(so is all of Cleveland)

WBZ - WBZ-TV BOSTON • WINS NEW YORK • WJZ-TV BALTIMORE • KYW • KYW-TV CLEVELAND
KDKA • KDKA-TV PITTSBURGH • WIND CHICAGO • WOWO FORT WAYNE • KPIX SAN FRANCISCO

They’re only some of the nationally known participants appearing on *The Mike Douglas Show*, a Cleveland daytime television program seen live Monday through Friday for 90 minutes on KYW-TV. Some of them have done week-long co-host shots. All have had a chance to take part in discussions, to interview other guests and studio audiences, to express their own opinions.

Cleveland really has something to be excited about! *The Mike Douglas Show* is big on entertainment. It’s big on public information. It’s big on current, topical, and provocative content. And it’s locally produced.

What KYW-TV is doing in Cleveland reflects the WBC group as a whole. Westinghouse stations are encouraged to create exciting, local television programs to supplement their network schedules. Like the unique pantomime of *Lorenzo and His Friends* in Baltimore. *The John Reed King Show* every morning in Pittsburgh. The crime documentary series, *Works of Darkness*, in San Francisco. Live telecasts of Cleveland Symphony and Cleveland Play House performances. *Boomtown*, from Rex Trailer’s “ranch” in Boston.

Such programs arouse community interest. They demonstrate daily the fact that community responsibility evokes community response.
FCC plans parties for departing T.A.M. Craven

Commissioner T. A. M. Craven, who is due to step down from the commission Thursday when he reaches the retirement age of 70, will be honored by his colleagues at two affairs this week.

He will be the guest of honor Tuesday (Jan. 29) at a luncheon given by the commission’s engineers. On Thursday (Jan. 31) he will be feted at a reception given by the commission for the entire staff, in the reception room at the FCC.

The commissioner, who is five months short of completing his second seven-year term (his first was 1937-1944), will be succeeded by Kenneth Cox, now head of the Broadcast Bureau. But he will stay on beyond Thursday if the Senate doesn’t confirm Mr. Cox by then (see story page 61).

Although he is leaving office as a commissioner, the veteran official will continue to serve the commission as a consultant on space communications and will attend the Geneva conference on allocation of communications satellite frequencies.

Two of his assistants will also remain with the commission. Fred Heister, his engineering assistant, is moving into the new Office of Satellite Communications. Robert Koteen, his legal aide, has been assigned to the general counsel’s office.

in local areas, not on specific renewal applications, but more in the nature of an inquiry to give citizens an opportunity to testify concerning their likes and dislikes concerning local tv stations. Now, if we conduct hearings of this kind without any specific object in mind we run into some difficulty,” he said.

“In our program policy we charged the station with the specific responsibility of conducting a continuous survey of the needs of the community. We specifically refrained from telling him how to do it. For us now to go into an area and conduct a hearing in which we develop on our own the needs of that community would seem to require us to exercise a judgment on ... what should or should not have been broadcast.”

Commissioner Ford said that then the FCC has taken over the functions of the licensee “and is doing what he should do, ... By this course, I fear there is great danger of us stepping out of bounds in an excursion into areas properly reserved to the broadcaster himself.”

He said the FCC should not impose its evaluation of programming needs and facts on the local broadcaster. Commissioner Ford, a Republican whose term on the FCC expires in June 1964, was one of three commissioners to vote against holding the Omaha hearing (Broadcasting, Nov. 26, 1962). He did not participate in the 5-1 decision to hold the first local tv programming hearing in Chicago last spring.

Commissioner Ford made his comments on the local tv hearings in an address last week before the National Religious Broadcasters convention in Washington. He also hit the proposal to adopt the NAB code into the FCC rules and promised official clarification of the staff’s role in questioning renewal applications (see page 87).

Basic Grievance • In a speech telecast live by KMTV (TV) Omaha, Gov. Collins told the Nebraska association that he has a “basic grievance I wish to express ... against the FCC.” The hearing in Omaha “is not in the best interests of broadcasting, is not in the best interests of the public, is not good government,” he charged.

The Omaha stations do not require a government-sponsored hearing to tell them what the people of Omaha want or need, he said. “With no importuning from any known source, the FCC decided to put these stations on the mat by holding this hearing ... ” the NAB president continued. “The effect, of course, has been to suggest failure where there has been success, to impugn the motives and efficiency of the management of these stations where there has been full confidence, to create doubt where there has been faith, to divert the personnel and resources of these stations from their broadcast duties to the development of defenses against unknown charges and implied wrongs.”

He charged this is irresponsible and meddling government. “It is government pouching on lands properly dedicated to free enterprise, hoping to flush some unknown bird it can shoot down, but feeling that whether it finds any bird or not it can reap public favor just by openly hunting for one.” Gov. Collins made these demands:

“We demand that the FCC cease its efforts to govern by harrassment—by needling, by nibbling—indicted discriminatorily against all broadcasters.

“We demand that the FCC ... stop impugning, and embarrassing and handicapping the mass of good broadcasters for what may be the sins of a few.”

He said he is greatly concerned about the indirect consequences of the Omaha-Chicago hearings—the overall effect on freedom of communications.

Labuski Views • Mr. Labuski said the FCC gives distinction to the narrow and almost universally critical views about popular media by its apparent inability to distinguish between the people and spokesmen. The latter are “pugnacious and unyielding” and in attacking radio and tv, “march forward into battle unversed, uninformed, unsophisticated and undaunted.”

He charged the “FCC encourages the proliferation of these flying squads by staging public hearings and inviting groups to gather up their complaints and come forth.” This policy, he said, is contrary to frequent FCC announcements that its role is to protect the public interest against imbalance and turmoil which result from the activities of special interest groups.

“When it comes to something like the upcoming broadcaster fry in Omaha, what does the FCC do?” Mr. Labuski asked. “It calls letters to groups urging them to catalogue their gripes and, presumably, to bespeak the interests of the community as though the views expressed by officials of the Camp Fire Girls or Alcoholics Anonymous [two organizations the FCC contacted about the Omaha hearing] could be readily equated with the broad public interest.”

Just 10 days ago, the Nebraska Assn. of Broadcasters adopted a strong resolution of its own condemning the Omaha hearing (Broadcasting, Jan. 21).

Hearing Preparations • The hearing starts at 10 a.m. this morning with the FCC’s newest member, E. William Henry, presiding. Walter Daniels of the Omaha Area Council of Churches is the first of 135 public witnesses scheduled to testify.

WOW-TV will present its case ahead of the other two Omaha stations with KETV (TV) and KMTV (TV), following in that order. Four WOW-TV witnesses will begin testifying either late this week or early next week. They are Payson Hall, president of licensee Meredith Publishing Co.; Frank Fogarty, vice president-general manager; Al Larson, WOW-TV manager, and Bill McBride, program director.

KMTV said that Commissioner Henry has accepted an offer of “equal time” to reply to Gov. Collins attack and that the commissioner will devote his opening statement this morning to outline the purpose of the hearing and to answer the NAB president. This, too, will be carried live by KMTV.

WOW-TV will tape the entire hearing and will teletascast up to 90-minute excerpts each day. KETV and KMTV plan to cover the proceedings in regular newscasts.
5 million families just like yours

C. J. Grayson, plantation owner, banker, ginner, and cattleman, in Fort Necessity, Louisiana, is president of the Northeast Louisiana Power Cooperative at Winnboro.

Mrs. Robert Rengel, farmer's wife and mother of three, has been a director of Corn Belt Electric Cooperative, Inc., Bloomington, Illinois, for the past six years.

Dr. B. W. Gibbs, a dentist in Star City, Arkansas, finds time to be a member of the board of locally owned C & L Rural Electric Cooperative Corporation at Star City.

Fred Schones operates his own barber shop in Selfridge, North Dakota. He also serves on the board of Mor-Gran-Sou Electric Cooperative, Inc., with headquarters at Flasher.

Milton B. Scott, partner in a general store in Pinetops, North Carolina, is also president of the board of Edgecombe-Martin County Electric Membership Corporation at Tarboro.

Jack Zavadil, editor of the weekly newspaper at Humphrey, Nebraska, is a member of the board and treasurer of the Cornhusker Public Power District at Columbus.

These six consumers are the kind of people who own and operate America's Rural Electric Systems. They are typical of the rural people who found it necessary to join with their neighbors, borrow money from the Rural Electrification Administration, and build their own electric power systems to get electricity.

The REA doesn't own or operate a mile of line. It acts only as a banker whose job it is to make and collect loans and interest. Ownership of America's 1,000 rural electric systems rests solidly with the five million families—the 20 million people they serve. They're as local as your newspaper and as private as your signature.

AMERICA'S RURAL ELECTRIC SYSTEMS

Owned and operated by people they serve
CLEAN SWEEP OF RULES, REFEREES?

Top lawyers start a drive to rewrite Communications Act, scrap FCC, create new agency to regulate tv and radio

The FCC and the Communications Act under which it lives are overdue for a thorough overhaul, according to a series of four monographs prepared under auspices of the Federal Communications Bar Assn.

It's time to make drastic changes in the commission's structure and to bring the communications law in line with industry and technological progress, the monographs recommended in perhaps the most thorough and sweeping indictment of federal regulatory processes within memory.

Recommendations were made by a nine-man committee named June 26, 1962, to investigate all aspects of the commission's performance. Heading the committee is Leonard H. Marks, long active in FCBA affairs.

Experienced Critics - Other members of the committee are longtime practitioners before the FCC who know its problems and what is needed to resolve the confusion, delays, censorship, incongruities, inconsistencies and inequities said in the monographs to characterize the commission's history. They are Fred W. Albertson, Philip G. Loucks, Edward P. Morgan, W. Theodore Pierson, Harry Plotkin, William Porter, Reed T. Rollo and J. Roger Wollenberg.

The committee's report had not been acted on by the FCBA's executive committee prior to the Friday (Jan. 25) annual meeting of the association. The executive committee at a mid-January session is understood to have defeated a motion to submit the monographs to the FCBA membership prior to a proposed two-day membership meeting at which the proposals could be reviewed.

At the Friday afternoon meeting it was expected the study committee's monographs would be discussed though there was no assurance that it would be placed on the official agenda (see story in At Deadline, page 9).

No matter what happened Friday there was a feeling in FCBA's membership that it had on its hands the hottest and most provocative FCC scolding in the association's history plus a set of significant recommendations meriting serious study on Capitol Hill, at the commission, around the industry and among communications attorneys.

Summed up, the monographs recommend:
- A regulatory structure replacing the FCC and based on horizontal segments consisting of an administrator, a communications court resembling the tax court and a five-man policy-making commission. This monograph was written by Mr. Marks.
- Removal of Sec. 315 (equal-time and political rules) from the law. Written by Mr. Loucks.
- Amendment of Sec. 326 (program control-censorship) to ban FCC evaluation or judgment as to the public interest in the composition, nature or character of programs transmitted by broadcast stations. Written by Mr. Pierson.
- Complete modernization of common carrier regulation, now based on interstate commerce policies of past decades. Written by Mr. Rollo.

The Marks committee's report and monographs were based on FCBA's call for a study of FCC rules and the law "to determine whether or not it might be appropriate either (1) to draft new legislation relative to the regulation of the communications industries by a federal agency; (2) to amend the present law and the rules and regulations pursuant thereto; or (3) to recommend that nothing be done with respect to this matter."

The committee reported it also felt "consideration should be given to the theory of comparative hearings or alternative methods of determining conflicting claims on applications for frequency assignments; for the enforcement of the provisions of the law, and for the concept of the administration of the law by the executive branch as compared to its administration by a commission as an extension of congressional authority."

Monographs were prepared by individual committee members, it was emphasized in an introductory statement, which added, "The committee decided that its functions could best be carried out by calling attention to the shortcomings of the Communications Act and by stimulating discussions on these vital topics."

"These reports are merely the first step in a process of careful and deliberate consideration and discussion by members of the bar and other interested parties on the subjects outlined. All interested parties, private and public, are invited to give these monographs careful attention and to submit their viewpoints."

The committee's recommendation, not acted on by the FCBA executive committee, proposed that at some future date an open meeting be held for members of the federal communications bar.

An important beginning based on serious study has been made, the Marks committee believes. Now members are awaiting reaction.

Following are resumes of the four monographs, containing the reasoning behind the separate reports and presenting detailed recommendations.

The Marks recommendations recalled the report of James M. Landis to then President elect Kennedy in December, 1960. This report called the FCC "a somewhat extraordinary spectacle," noting that while the FCC had "considerable technical excellence," it has "drifted, vacillated and stalled in almost every major area." Dean Landis said it seemed "incapable of policy planning, of disposing within a reasonable period of time the business before it, of fashioning effective procedures . . . ."

The report recalled that most students of commission history would agree at least in part with the Landis
conclusions though they are in agreement as to cause or cure.

Weak Processes • After reciting efforts of the last three decades to reform administrative processes, the Marks report noted the weaknesses of these processes and the FCC’s recognition of its own problems when it retained the Booz-Allen & Hamilton management survey organization. This agency recommended that the FCC use its powers to delegate additional functions to a review board as a way to save time involved in routine procedures.

While some start was made by the FCC in implementing the recommendations, including addition of an executive director, the Marks report suggested partial structural reform “will not eliminate the basic causes of the commission’s inability to function effectively.”

The commission’s most important duty, the report continued, “is to create broad standards and policy for communications media by radio and wire. ... Clearly defined policy is necessary, therefore, for the rational development of service to the public and for the administrative implementation of the act in particular licensing or adjudicatory proceedings.”

At this point the Marks report observed bluntly, “In the am field, the commission has floundered interminably.” In support it referred to the decade-long clear channel proceeding and the fact that “no final steps have as yet been taken to effectuate it.”

On top of that, the report said, “Even as the commission is about to embark on the implementation of the clear channel decision, it has now established a new freeze on am grants. Like the clear channel proceeding, the new freeze is an attempt to repair conditions which have been permitted to grow because of the inability of the commission to decide upon standards and policies before the evils were created or became difficult to remedy. The Booz-Allen report makes clear that it is in areas such as this that the commission has been deficient.”

Not only does the FCC lack time and organizational support to develop national communications policy and carry out long-range planning in a fully effective manner, Mr. Marks said, but “this is true not only in the am field but also in television as well.

Uhf ‘Debacle’ • And the report recited in sharp terms the FCC’s uhf actions, which the Landis report had called a “debacle.” The Marks report explained:

“Poor planning by the commission resulted in the establishment of television in the uhf even though it was clear to all that these frequencies would be inadequate for a nationwide television system. By the time steps were taken to use the uhf, the problem of incompatibility had become too severe to permit either a transition from vhf to uhf or a complementary establishment of the uhf portion of the spectrum alongside the vhf.

“The commission still vacillated and took no steps to remedy the situation. The proposal for mandatory all-channel television receiver legislation was not made until recently although it was clearly essential to any chance of success of intermix of uhf and vhf.

“The ‘on again-off again’ policy with respect to deintermix was a continuation of the same incapacity to create and adhere to policy. There are many other examples of inability to act in a forceful and prudent manner which need not be recited here.”

The Marks report cited congressional pressures “which, while always vigorous and vocal, are not always consistent. One committee would belabor the commission for its failure to deintermix uhf and vhf, while another would press the commission into agreeing to stop deintermix. The commission has been investigated for discriminating against newspaper owners, while it now faces investigation because newspaper owners are allowed to be station licensees.”

Congress, it was suggested, expressed itself through many divergent individual voices instead of through enactment of laws.

Yet the basic problem is not one of congressional interference, individuals or political philosophies, the Marks report suggested. He put the problem this way:

W. Theodore Pierson
Censorship language must be revised to limit FCC’s program controls.

Philip G. Loucks
The equal-time and political clause should be taken out of the law.

Reed T. Rollo
Common carrier regulation is out of date and must be completely revised.

No Policy Staff • “The prime cause of the failure of the commission to perform well in the field of policy making is that the commission does not have the time or the staff to create sound, broad policy while it administers the act (Communications Act) at the same time. The Landis report, the Hector report (Problems of the Civil Aeronautics Bureau and Independent Legislative Commissions by Louis J. Hector, Sept. 10, 1959, Memorandum to the President) and the Booz-Allen report, among others, all make clear that the largest portion of the time of an agency such as the FCC is taken up with deciding administrative, prosecutory and executive matters.

“The detailed Booz-Allen report
makes clear that the greatest part of the agenda of the commission's business is taken up with such matters. When there are added to this work the adjudicatory functions the agency now has, it is fully understandable why the policy making and rulemaking functions of the commission have broken down and why the commission cannot adequately dispose of pending problems, let alone forecast and explore solutions to problems on the horizon.

Of the three administrative studies, the Booz-Allen and Landis reports would keep the existing framework and delegate administrative and executive authority to subordinates of the commission; the Hemon memo would abolish many agencies and transfer their functions to the executive and to courts.

But the Marks report stated, "The committee is of the view that the commission should be retained as a policy making body but that its administrative and enforcement functions should be transferred to an independent administrator and its adjudicatory functions should be transferred to a special administrative court."

To do this, it was explained, would require "carefully drafted amendments to the organic statute."

Following are the texts of the Marks report comments on its concept of a communications administrator, communications court:

The Communications Administrator

"Many of the commission's administrative and enforcement activities would be much more efficiently handled under the supervision of a single executive. As a matter of political theory and pragmatic experience, multiple-party executives are inefficient and constitute basically devices for obtaining inaction rather than action. The task force of the first Hoover commission said:

'The common experience is that groups are better fitted for judgment and decision than for the execution of large-scale operations.

'The very qualities which make these agencies more suitable for regulation, especially group deliberation and discussion, make them unsuited for executive and operating activities. The work of day-to-day regulation and decision and the related supervision of staff fully occupies most of the commissions and overtaxes the capacity of some of them.

'ordinarily, we believe, such operating functions should be placed in the regular departments where they may be carried out under the direct executive supervision and responsibility. This is compatible with the departments and with the position of the President as chief executive.'

"The committee believes that the communications administrator must have a position of independent stature,

'He should be appointed by the President with the advice and consent of the Senate but be subject to removal by the President at pleasure.

'The communications administrator would take over the myriad of individually day-to-day functions of licensing and enforcement which do not involve adjudicatory hearings on the one hand, or the adoption of general rules or policies on the other. In short, it would be the administrator's duty to carry out the provisions of the Communications Act. He would have much of the discretionary authority now exercised by the commission but he would be bound to carry out all commission policies and rules adopted under the act. Since the commission's policies and rules would be administered by an administrator independent of the commission, the commission's role should be encouraged to be comprehensive and articulate in its rule-making pronouncements.

The Communications Court

"The adjudicatory functions now exercised by the commission would be conferred upon a new administrative court patterned after the tax court. The judges would be appointed by the President with the advice and consent of the Senate and would have long terms (at least 12 years) to assure their judicial independence. They would sit individually but review by the entire court might be provided in matters of unusual importance. Appeal would lie to the court of appeals as is now the case with FCC cases.

'The idea for an administrative court is not a new one. The 1955 Hoover commission and Mr. Hector, among others, have both recommended the establishment of such a court. Three main reasons exist for the establishment of such a court. The first is that it would meet some of the objections of those who feel that the combination of administrative and prosecutorial functions in an agency is objectionable. It is unnecessary to repeat here the argument over this question that has gone on for over two decades. A student of the administrative process recently said:

'It bears emphasizing that there is nothing sacrosanct about the union of prosecuting and adjudicatory functions in one agency. The union was not received on Mount Sinai; it is merely an experiment in government, and a comparatively recent departure at that.'

"Where other advantages will flow from such action as well, the separation of adjudicatory and rulemaking and prosecutory functions is clearly desirable. Congress has attempted to meet this separation of functions problem but has compromised and satisfied no one because all of its attempts have been within the framework of the existing structure of the commission. Once a true separation by reason of a change in structure is adopted, the temporizing and compromise may be abandoned. The new communications court, made up of jurists, would function and act like a court, consulting with no one but its own employees involved solely in judicial functions. The problem of improper ex parte contacts would be as exceptional as it is with other Federal courts.

"The second reason for transferring the adjudicatory functions of the commission to a court is to improve the nature of the institutional decision by which decisions are made. This is a matter of the commission. Because it lacks the time, professional background, and perhaps the inclination, the commission has never been able to decide cases as judges, but has insisted on the institutional approach which places study of the record and the opinion writing in a staff which necessarily rationalize results previously arrived at by the commissioners, . . . Dean Landis states in his report (pp. 19-20):

'Generalizations as to the organization of agencies are agencies not only difficult but dangerous to make. One generalization, however, can safely be made. Unlike the judges of the federal judiciary, members of administrative commissions do not do their own work. The fact is that they simply cannot do it. In adjudicatory matters, the drafting of opinions is delegated to opinion writing sections or assistants so that the rationalization upon which a purportedly informed decision rests is not truly their own . . . But worse than this, it is a general belief, founded on considerable evidence, that briefs of counsel, findings of hearing examiners, relevant portions of the basic records, are rarely read by the individuals theoretically responsible for the ultimate decision. It is difficult for them to do otherwise, for as the analysis of the work load of one commissioner indicated, he had to make a decision during his work-day every five minutes, or as another commissioner recently testified, he made 18,000 decisions in five years. The fact is that delegation on a large scale, not patently recognized by the law, characterizes the work of substantially all the regulatory agencies and certainly all the major ones. Absent such delegation, the work of these agencies
cies would grind to a stop."

"There is no doubt that these observ-
vations properly describe the Federal Communications Commission.

"A concomitant of the institutional decision is the failure of the Federal Communications Commission to estab-
lish adequate standards or criteria for reaching decisions in quasi-judicial pro-
ceedings. This is not a new failing, but has existed throughout the life of the
commission. See Final Report of the Attorney General's Committee on Ad-
ministrative Procedure 469 (1941)."

Unfortunately, the situation still exists and there does not appear to be any
reason to assume it will end. Despite the multitude of cases in the broadcast
field, Dean Landis said in his 1960 re-
port (p. 53):

"In broadcast license cases no criteria for
decision have evolved. True, criteria of
various different kinds are articulated
but they are patently not the grounds
motivating decisions. No firm decisional
policy has evolved from these case-by-
case dispositions. Instead the anony-

ous opinion writers for the commis-

sion pick from a collection of standards
those that will support whatever de-
cision the commission chooses to make.

"Other leading critics have agreed
that the commission's comparative pro-
cesses have become an elaborate ritual
in which the criteria used obscure rather
than serve the decisional process. Fre-

dy, The Federal Administrative Agen-
cies: The Need for Better Defini-
tion of Standards, 75 Harvard Law Re-
view 1055, 1964 (1962); Jaffe, The
Second Stage of Licensing, Harpers Mag-
zine, September 1957.

The establishment of an administr-
ative court made up exclusively of law-
yers should be a step toward a solution
to the problems created by the failure of
the present commission to establish ade-
quate decisional criteria. While con-
cededly the questions presented in a
comparative licensing proceeding may
involve the exercise of more discretion
than may sometimes be presented to
courts of law, they are not so different
from the problems presented in equity,
in patent and trademark law, in sur-
gates court, in the divorce court, or in
the children's court so as to make it
impossible for adequately defined cri-
eria to be established for the disposi-
tion of comparative licensing proceed-
ings. If the Commission were deprived
of the power and relieved of the bur-
den of deciding individual cases, it
could devote itself to establishing mean-

ingful criteria on an objective basis.
And it would be reasonable to expect
the court to apply the criteria in a man-
ner which would make precedents
meaningful.

"It is the hope of the committee that
the communications court would be

given a mandate to make full use of
modern pretrial procedures, including
discovery, depositions, interrogatories,
and motions for summary judgment or
to dismiss, which have contributed
greatly to the efficiency of the Federal
courts.

"The unconscionably lengthy pr-

"The decisions which would have to
be made by such a commission have
many political aspects, if not overtones.
The adoption of rules allocating fre-
quencies, governing political broad-
casts under Sec. 315 of the Communications
Act, establishing criteria for preference in
comparative proceedings and estab-
lishing eligibility of carriers to hold
stock in the new communications satel-
lie corporation are illustrative. In the
common carrier field, ratemaking stan-
dards and policies would be laid down
by the commission and the lawfulness
of particular rates would be adjudicated
by the communications court on the
administrative record."

"The Congress and the public have
more confidence in the policies which
are formulated if it is felt that these
policies are being created only after
views of those with differing philoso-
phies are considered. Congress has
shown itself in the past more willing to
confer policy making powers on such
a bipartisan agency than upon the ex-
cutive.

"It is hoped that the role of the com-
mission as an agency independent of
both the Congress and the executive can
be strengthened. The commission
would, however, continue to be the respon-
sive to popular will through appoint-
ment of its members by the President
with the advice and consent of the Sen-
ate on staggered terms (although such
terms might well be lengthened to ten
years if a five man commission is util-
ized), and through the power of Con-
gress to override commission policy de-
cisions by legislative enactments.

"Most of the vexing problem of in-
proper ex parte communications would
be eliminated with the transfer of ad-
judicatory functions to an administra-
tive court. There will remain the prob-
lem of borderline rulemaking proceed-
ings like that involved in the Sangamon
case (Sangamon Valley Television
D. C. 30, 269 F. 2d 841). Also re-
mainig is the more general question
as to the extent to which, as a matter of
policy, it is desired to conduct rule-
making proceedings generally in a man-
ner which will permit maximum expo-
sure of opposing viewpoints through
making all communications to the com-
mision or its members part of a public
record. See Note, 73 Harvard Law Review 1178. It is believed that no rigid statutory determination of this question should be attempted at this time. It should be left to commission determination on an ad hoc basis."

Summation

"This committee believes that the adjudicatory and administrative functions of the Federal Communications Commission should be reassigned to a communications court, and a communications administrator, respectively, and that a bipartisan commission of at least five members should be retained for policy-making and rulemaking functions."

The Loucks report listed three divergent problems involved in Sec. 315 (political) in urging that it be abolished:

1. The public interest in an informed electorate;
2. The private interest of a political candidate in obtaining public exposure as an important aid to campaigning, and
3. The public interest in freedom for mass communicators.

Those who examine the problem often say Sec. 315 is essential to protect the first two interests from the assumed danger of an irresponsible exercise of freedom by the broadcaster, the report said. But it added that such persons should be aware of the absence of underlying historical facts to support a conclusion that such a danger exists to an extent which should override all other considerations.

(Sec. 315 is summarized this way in the Loucks report: "In substance Sec. 315 requires a broadcast licensee who permits a legally qualified candidate for any public office to use his facilities to afford equal opportunities to all other such candidates for that office and further provides that the licensee shall have no power of censorship over the material so broadcast.")

The report points to a tendency toward blind acceptance of Sec. 315 as "a valid definition of public interest upon the strength of a major premise that an informed electorate is essential to our system of government. While we would be the last to challenge the validity of this major premise, there is a propensity to ignore the historical accumulation of circumstances destroying the remainder of the sometimes assumed syllogism."

"History demonstrates that Sec. 315 has been restrictively rather than expansively: its effect is neither to expand free speech nor to increase the flow of political information to the public. Rather, as a matter of practical necessity, it has served to restrict and suppress the flow of information which might otherwise have been made available to the public."

On the Contrary • The opposite effect is noted in the report, which said the section has restricted and supressed the flow of information which might otherwise have been made available to the public.

Roundtable discussions and debates are often impossible during an election year because there are a number of candidates for the same office since they would be unwieldy if too many were involved, the Loucks report explained, and stations often have been unable to present discussions of leading political issues by candidates because one hour granted one or two candidates "may proliferate into a total of 10 or 20 hours granted to obscure candidates."

The recent Cuban crisis, it was added, confronted stations with a Sec. 315 problem in interviewing incumbent Congressional leaders about the situation. Such interviews in an election year would have opened the door for demands for equal time from opposing candidates.

And this problem was recited in the report: "While the 1960 amendments to Sec. 315 were intended to give greater scope and flexibility to broadcast stations by exempting bona fide newscasts, documentaries, on-the-spot coverage of news events, panel shows, etc., recent interpretations by the commission of these exemptions have indicated a marked tendency to construe them against the station and in favor of the right of the complaining political candidate to equal time. Thus, licensees who thought they were clearly within these exemptions, while broadcasting information concerning important political issues of the day, have found themselves suddenly in the position of having to supply substantial additional time to obscure fringe candidates."

The net result is that attorneys hesitate to recommend to stations that they may rely upon the exemptions. Of course, this is restricting the flow of information to the public which the stations might otherwise make available to the public."

Narrow View • Here's an anomaly pointed out in the report—a licensee's main duty is to the public under the Communications Act, yet this Sec. 315 responsibility is not to the public but solely to the candidate, resembling the duties of a common carrier. A candidate thus has a personal private right to use broadcast facilities and the candidate's remarks are "the only material which may be broadcast over which the licensee is not required to assume responsibility for content."

The Loucks report finds little basis in fact or logic for such treatment of candidates. The broadcaster as a license holder, however, is considered qualified to select and reject messages of non-candidates. "The candidate may force his message upon the public whether or not, in the broadcaster's judgment, the public needs or wants to hear or view the candidate's particular message," the report said. "On the other hand, the non-candidate is entirely dependent upon the broadcaster's judgment as to the needs or desires of the public for the non-candidate's message."

Another anomaly is seen in the ban on censorship of a candidate's broadcast material. The report explained this way: "Once a political candidate is entitled to equal time, he may then use the station's facilities and time for any purpose whatsoever, including his own personal private business interests, singing folk music with a family hillbilly band or reading the funny papers. Neither calumnny, ribaldry, scandal nor adjudicated criminality may be restrained by the licensee if the speaker is a legally qualified candidate."

Responsibilities • A broadcaster's duty in respect to controversial public issues, it is stated, is to his audience, so he owes it to his audience to present all significant sides of the controversy. However, the broadcaster may choose those who speak with no obligation to those rejected. The public, through the FCC, can enforce its right to be able to receive all sides but it's up to the broadcaster to determine the manner of presentation, according to the report.

This argument is advanced: "We can find no logical explanation for the existence of the benefits conferred by Sec. 315 upon political candidates except that it is a unique, discriminatory and unusual privilege sought by a class of persons who had the power as legislators to obtain the privilege. In sum, we believe that the unique private privilege that Sec. 315 vests in the political candidate adversely affects the public's interest in an informed electorate, is a highly discriminatory provision and is inconsistent with the principle of free communicators striving in competition to serve the public."

Constitutional issues warrant a reexamination of Sec. 315, the report holds, denouncing the argument that no freedom of speech restraints exist because the licensee has discretion to refuse all candidates the use of his broadcasting facilities and Sec. 315 merely requires equal time to other candidates if one is granted time. After all, the
report said, the commission has often indicated it would consider a policy of arbitrary refusal by licensees to allow candidates to use their facilities as being against the public interest.

Mr. Pierson's Views — In submitting a change in Sec. 326 Mr. Pierson, expressing his own views as did Mr. Marks and Mr. Loucks in their reports, proposed the section be amended "in a manner that would retain its present provisions and, in addition, provide that the commission has no power, duty or function to directly or indirectly evaluate or make judgments as to the public interest in the composition, nature or character of programs transmitted by broadcast stations."

(Sec. 326 provides: "Nothing in this act shall be understood or construed to give the commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the commission which shall interfere with the right of free speech by means of radio communication.")

In a lengthy philosophical discussion of the premises and purposes of freedom of communications, the Pierson report reminded that many liberties are due to government constraints that prevent such liberties from being destroyed by private action, adding that the government must interfere in certain areas of human activity. "Freedom is not a thing to possess as an end in itself, but a way of life to be valued and pursued to ever new and changing ends," it was stated. "A government that exists by the consent of the governed, if allowed to interfere with freedom of communication, will always tend to repress the unconventional and press the conventional."

The report continued, "Governments of and by the people cannot substantially employ political freedom for material, intellectual and spiritual programs unless government is denied the power to interfere with the thoughts, beliefs and communications of its people."

Lack of Agreement — Mr. Pierson said highly sophisticated experts can't agree to what extent Sec. 326 proscribes the commission's powers with respect to broadcast programs, the controversies centering around the words "censorship," "interfere" and "free speech." Avoiding a long treatise on these words, he observed, "The commission and its predecessor (Federal Radio Commission), in varying degrees have acted in a manner that does constrain broadcast communications and in a manner that is incompatible with the basic concepts and purposes of freedom to communicate; hence, modifications of the statute are desirable in order to free this medium from these constraints."

First taking up applications for new stations where a comparative hearing is likely, the report said, "We doubt that any lawyer experienced in practice before the commission can gainsay the truth of the following statement: The commission gives virtually no credit for entertainment programs; it gives great credit for educational and discussion programs. Nor do we suppose he would deny that he tells his clients as much and that his clients normally respond by proposing more of educational and discussion and less entertainment programs than would otherwise be the case. A substantial volume of programs that are broadcast have such government origins."

"With respect to such programs, the licensee's judgment was exercised, but not to determine what his audience wanted or needed but to determine what the commission wanted or demanded."

Only minor differences in program proposals of comparative applications are found, it was stated. "First, in the great majority of cases, all will propose the same network affiliation. But even if they propose different ones, the commission will not grant personal credit or discredit for the network's programming. The applicants will subscribe to the same or similar news services and have available the same sources of recorded program product. They will have the cooperation of the same local organizations, and each will be analyzing the needs of the same community."

"But the most conforming influence of all is that each will have striven to avoid an adverse finding by proposing as many of the commission-favored programs as his opponents. To do otherwise would be a deliberate adventure in defeat. Thus, the very process itself tends inevitably to equalize program proposals, and the commission, left with no differences, is bereft of a decisional device."

"This inevitable result is supported by more than its logic. Our research demonstrates that in only an insignificant number of comparative television cases has a comparison of commission credits been a principal premise of the decision—and never the sole premise."

After scanning arguments opposing these views, the Pierson report cites encouragement by the FCC of discussion and educational programs but adds that "man's whole experience with the problem of communication indicates that the so-called 'entertainment' or esthetic forms have been equally effective means... Things that entertain can and do teach, and often to teach, one must entertain."

The FCC uses a programming lever, also, in renewal and transfer applications, the report said, continuing, "If applications for renewal are filed and the applicant does not show a significant volume of programming in certain selected fields, staff letters usually result, questioning the absence of such categories in a manner that clearly indicates commission disapproval. While the degree of pressure varies from case to case and from time to time, it is frequently made quite clear that the problems can be resolved by the applicant's modifying his proposals to include significant programming in the favored areas. Conversely, the implication is clear that costly delays and even costly litigation will result unless the favored programs are added."

Lost Time — Valuable time is lost in transfer cases where favored categories of programs are subject to FCC queries, with the same threats about failure to conform, it was stated.

"None of these pressures or influences brought by the commission upon the broadcaster to modify his program proposals are necessary as an incident to the commission's performance of its other duties under the act, unless program control itself is a commission duty," the report held. "To say that the commission has the duty to control the programs of broadcast licensees is to deny any meaning whatsoever to Sec. 326 or the First Amendment. Moreover, it substitutes constraint for freedom in broadcast communication."

The puzzling justification for commission control of program proposals has been that it has some duty under the act to weigh and consider over-all programming. This is said not to be bad because the commission does not deal with specific programs but general and overall considerations. "The puzzling thing is that if the commission's activity in this regard does not result in a change in programming, it is the most futile and burdensome exercise imaginable. If it does result in a change in programming, it can only be manifest through the individual programs that stations will broadcast. Thus, the term 'overall programming' is a cliche that makes no practical or logical contribution to a determination of the problems discussed here."

The Pierson study calls the FCC's "balanced programming" concept an alibi for program interference justified because the commission has the duty to achieve balance in each station's programming or should have such discretion... The report continues: "Balance would seem on the surface
to refer to some proper mixture of program types—entertainment, religion, educational, agriculture, public affairs, discussion, live, etc. In actual practice we are witness to the fact that it has been used to coerce licensees into carrying types of programs the commission favors at the expense of programs that it disfavors or favors less. The fact is that the balanced program concept where it has been applied has generally been used to coerce stations into carrying relatively unpopular programs at the expense of relatively popular programs . . . .

"It is our belief that a wide variety of program types meeting a wide variety of interests and needs was intended by the Communications Act in a manner completely reconcilable with basic concepts of freedom of communications as far as the device of requiring that licensees compete with each other in an attempt to accommodate the needs and wants of the areas they serve. The more extensive this competition becomes the more balanced the response of the industry as a whole. The commission's interference with this natural process can only abort the plan for broadcast communications adopted by Congress and conceived in accordance with basic concepts of freedom of communication.

"We believe that the commission has gone too far in the device of requiring that any acceptable concept of freedom of communication, when it limits its function to promoting full, free and fair competition, and to selecting licensees who are demonstrably qualified by character and otherwise to search out and be sensitive to the needs and interests of the people served.

"We believe that it is possible and quite proper for the commission to require an applicant to show, as a matter of qualification, that he is equipped in all respects to search out audience wants and community needs and to develop responses to what he finds and chooses. But whether his choice of the needs and wants to be served is proper or his mode of response the most effective cannot be usurped by the commission without making a ridiculous sham out of the concept of license freedom and responsibility.

"That he cannot be trusted to make these judgments without constant supervision and correction by the commission is to posit his irresponsibility, not responsibility. Our system would not thus be based upon responsible licensees but upon irresponsible licensees whose weaknesses are offset by a bureaucracy that is presumed to be responsible and superhumanly prescient. If this is to be our system, then, we believe it cannot serve the purposes of freedom.

"We believe that the commission can quite properly require that an applicant demonstrate capacity to reach an informed judgment, but the commission should not interfere with his right to decide that his informed judgment was right or wrong. That his judgment was informed is enough. If it was wrong, the corrective process of many judgments being made by many licensees in competition with each other will make insignificant and short-lived the error of one. On the other hand, commission error in judgment is uniformly felt, and there is no natural corrective process.

Public Domain • The Pierson report next took up the thesis that the government should interfere with broadcast communications because radio frequencies are in the public domain and therefore should be less free than other mass communicators. It said, "The truth of the premise is subject to the caveat that broadcast frequencies are created by costly privately owned equipment and would not, but for this private action or substituted government action, otherwise exist. But the argument as to whether public or private property is the real or principal source of this communication medium is both unnecessary and inconclusive. Regardless of who 'owns the airwaves,' it is a completely new, unique and novel concept in our system that freedom to communicate can only be allowed to those who shun the public domain.

"The public ownership of parks, lecture halls, auditoriums, legislative halls, schools and streets has traditionally been thought to require fewer restraints upon individual liberty, rather than more. Indeed, the very purpose of many expenditures of public funds is to facilitate and enhance freedom of intercourse, not to debilitate it. We know of no valid reason for now forsaking this principle. Moreover, the distinction between broadcasters and other mass communicators is only one of degree, since it is palpable that in our complex modern society, no mass communicator can operate without using the public domain in some manner or form.

"The technological scarcity argument, the report said, is obscure if it is intended to distinguish the the broadcast communicators from others and in any case there is substantial promise that technological scarcity "may be virtually eliminated in the near future."

As to the claim the FCC should extract detailed program promises from applicants and then see they are performed, all for the public benefit, the report said, "The anomalous nature of this proposition is evidenced from the fact that the commission on many occasions has emphasized that public interest and needs are dynamic and not static, that a broadcaster must constantly and vigorously keep abreast of the changing circumstances and that he must program in response to such changes. It is utter nonsense to say that he can maintain this posture and yet predict his programming for a period of three years with the specificity required for an enforceable promise. We believe that the promise-vs-performance cliche has been a pure shibboleth for program meddling and a rather ridiculous one.

"We conclude, therefore, that no valid excuse exists for the commission to itself evaluate the public interest in the composition of program proposals.

FORD FROWS ON CODE AS FCC POLICY

Sees virtue in self-regulation efforts of broadcasters

FCC Commissioner Frederick W. Ford made a strong argument last week against government adoption of NAB codes on commercial continuity and Omaha-Chicago hearings on local tv programming (see page 38).

Speaking to the National Religious Broadcasters in Washington, Commissioner Ford also probed concern that FCC attention to its staff in the "sensitive area" of letters to licensees on programming. (For full report on NRB, see page 87).

"When industry develops a satisfactory code for self-regulation, I think it would be wrong for the commission to take that work product and include it in its own rules and regulations which have the force and effect of law," he said. "Such a course would undermine the desire for self-regulation and it would be more effective for a broadcaster to be sanctioned by his associates than to "be condemned or receive a nasty letter" from the FCC, Commissioner Ford said.

Present NAB radio code does not provide for many radio stations which must violate commercial restrictions during given days or seasons to survive, he pointed out. For example, he said, to enforce the code against daytime stations in the northern U. S. during winter months or summer resort areas, outlets could cause their elimination.

Instead of adoption of the NAB codes
or performance. Lacking such excuse, such commission activity can only have the discrete purpose of controlling the proposals and performances. This very activity not only implies that the broadcaster is frequently irresponsible and untrustworthy, but that political agencies are always responsible and trustworthy. Neither proposition is true. Each party is subject to human imperfections. Each has distinctive interests that on occasion abort proper action.

"If we accept these points as true, it may still be asked, 'Since each has weaknesses of like kind, why let the broadcaster control and not the commission?" The answer lies, we believe, in the overriding considerations: That centralized control in the commission is inconsistent with the premises and purposes of freedom to communicate and does not advance, but retards this nation's goal of a free, open, progressive and diversified society of individuals who, with a high standard of life, are clothed in the dignity and blessed with the happiness that freedom of thought, belief and communications nurtures."

An addendum to to the Pierson report discusses objections and doubts voiced within the committee on the FCC's review of an applicant's determination of audience wants and community needs. Objection was made to "the commission having this power" and doubts "that it could be meaningfully exercised unless coupled with review of programming." Mr. Pierson said the commission should have the power to review an applicant's determination of audience wants and community needs so long as its activity does not involve program review or substitution of commission for licensee program judgment results.

The Pierson subcommittee, which included Mr. Loucks and William J. Dempsey, was critical because the fairness doctrine respecting controversial public issues wasn't treated in the report (see Sec. 315 report). Mr. Pierson said he believed the licensee duty expressed by the doctrine is valid and vital, and must be accepted by the broadcaster in his tasks as a modern selector of mass communications, giving an explanation of his position.

As to criminal program conduct, the Pierson report said the law puts primary responsibility for enforcement of the criminal code on the Justice Dept. and courts but said the commission ought to deny applicants of demonstrably bad character. The final section of the addendum dealt with a series of several cases decided in past decades and then discussed the effect of a new Sec. 326 on regulation of commercial practices.

"The proposed addition referred deliberately to 'programs' and was not intended to prevent evaluations of commercial practices to the extent that such evaluations concerned themselves with program interruptions, length and frequency of commercial announcements, false and misleading advertising, bait and switch advertising, etc." the report concluded.

Common Carrier Procedure • The FCC's common carrier procedure is decades old and needs overhauling, according to a recommendation of Reed T. Rollo, chairman of a subcommittee. The recommendation represents his personal views. Others members are Mr. Albertson and Mr. Porter.

Actually the statutory provisions in the communications act are adapted from the Interstate Commerce Commission, dating back to the mid-1920s or earlier, and no significant revision or reappraisal has taken place, Mr. Rollo said. He recalled that for a time the FCC had three divisions, one devoted to common carriers, but this activity "has deteriorated to the point where it is largely a subordinate staff responsibility with relatively little attention or interest at the policy level of the commission." He said broadcasting predominates in political interest, appointments, organization, operations and appropriations.

The Rollo report said the radio spectrum should be under one authority with no other function but if this isn't possible, new legislation should separate broadcasting (by wire or radio) from all other communications (by wire or radio, domestic or international, common carrier or private).

The present statute was described as "a patchwork which lacks coherence or direction. Radio licensing is totally under federal regulation. Common carrier services, whether by radio or other means, are in some instances exempt from federal regulation, in other instances partially under federal regulation, and some services, although local in character, are totally FCC regulated."

Major AT&T activities are not under federal regulation, it was stated, as the statute exempts telephone exchanges, regardless of their interstate character and intrastate services. Small miscellaneous common carriers, however, are totally under federal regulation as to licenses, tariffs, certificates, etc.

Regulation should foster competition in all types of service, it was stated, excepting only telephone exchange service which should be redefined. Listing some of the carrier regulatory problems, the report called for "a complete re-examination of the division of state and federal regulatory authority." Furthermore modern modes of communications in the microwave field and the act should be realigned with provisions of the satellite act and modern needs of the public.

Procedures in common carrier cases, aside from radio licensing, need to be revised, the report said, noting that the FCC's bureau is judge and jury as well as party-litigant. A total reorientation of the common carrier portion of the act (Title II) was advocated.

As to forfeitures, it was recommended that the terms "willful" and "repeated" be more accurately defined, to clear up the forfeiture situation, with a cease and desist procedure proposed.
industry then will have full knowledge of the delegations and the authority of the staff," he said.

The 1960 program policy statement developed a formula which, if followed, he said, "will keep us out of any suggestion of censorship or attempts to direct the types of programs that are broadcast."

Economics & Radio • The economic aspects of radio's alleged overpopulation probably are not as serious as many had thought, Commissioner Ford told the religious broadcasters. He said, contrary to his earlier belief, the recent FCC-NAB conference (BROADCASTING, Jan. 14) had convinced him that the problem probably could be handled through engineering standards and a closer look at finances.

He predicted all-channel TV sets will help the growth of UHF but that it may not be the complete solution and that the FCC will have to take additional steps. He said the FCC is planning to add 600-700 new UHF allocations to the table of assignments (BROADCASTING, Jan. 14). Commissioner Ford theorized that it may be desirable, to assure equal competition among the three networks, to drop in a third VHF channel to all major markets which do not now have three.

Once the market is saturated with all-channel receivers, it will be possible for new UHF stations to be built in areas which do not now have local service and there will be an incentive for "risk capital" to build, he said. Manufacturers must begin making all sets capable of receiving UHF by April 1964.

U.S. news policy to be clarified by conference

Clarification of federal government news policies will result from NAB-suggested discussions between top Administration and news media representatives, NAB President LeRoy Collins predicted last week.

Speaking to the Oklahoma Broadcasters Assn. in Oklahoma City last Tuesday (Jan. 22), Gov. Collins expressed confidence that "greater unity" among news media backing freedom of communications will emerge from the planned talks which are being spearheaded by NAB's Freedom of Information Committee. The conference will "lead to a clarification of government news policies and a correction of any abuses or restrictions which may impair the people's right to know," he said.

President Collins said that Howard Bell, NAB vice president for planning and development, has met with White House News Secretary Pierre Salinger to work out details for a full discussion with news media of government information policies. He said the NAB is hopeful that all segments of the press will participate in the discussions for "restrictions and discriminations imposed on any arm of the press constitute a threat to, and limitation upon, all media."

The NAB committee asked for the conference with Mr. Salinger following the Cuban crisis last fall during which the Administration was accused of "managing" the news.

Miami ch. 10 hearing opens in Washington

A comparative hearing to determine which of four applicants should be licensed to operate on ch. 10 Miami opened in Washington last week.

WLBW-TV, which is now operating on the channel and seeking renewal, began presenting its testimony first. The other applicants: Civic TV Inc., South Florida TV Corp., and Miami TV Inc.

Throughout the first four days of the hearing, WLBW-TV sought to show, through exhibits and testimony, that its officials were residents of the Miami area who have made extensive efforts to determine programming needs and to program the station accordingly.

The witnesses were Charles H. Topmiller, president; Thomas Welstead, vice president and general manager; Lin Mason, program and station director; and J. Abney Cox, a Coral Cables businessman who serves on the station's program advisory committee.

WLBW-TV was given a temporary license by the commission in July 1960, after the three other original applicants for the channel were disqualified for improper contacts with then FCC Commissioner Richard Mack. WLBW-TV went on the air with a four-month li-

DID McLendon Corp. Mislead FCC?

Hearing set on program complaints about WYNR Chicago

An abrupt change in the programming of WYNR Chicago is going to have to be explained at a hearing in that city the FCC ordered last week.

The commission said that it ordered the “investigatory proceeding” to determine if the McLendon Corp., the station licensee, was candid with the commission or if it failed to disclose its program intentions when it acquired WYNR (then WGES) last August.

Rep. Roman C. Pucinski (D-Ill.) had asked the commission to order WYNR to show cause why its license should not be revoked, because the station dropped its foreign language broadcasts (German, Italian, Polish and others) five days after McLendon began operating it. He said that WYNR increased its 80% Negro programming to 100%.

The commission noted that McLendon had proposed, in its application for an assignment of license of former WGES, to maintain some 32 hours weekly of foreign language programs. But on or about Aug. 28, 1962, WYNR eliminated this programming. “A serious question is raised as to the licensee’s candor in representing in its application that it intended to continue the same programming as . . . WGES.”

The commission also wants to determine if McLendon misrepresented facts to it when it asked about WYNR’s program changes last August and if the licensee delayed informing the commission of the proposed changes until after the sale from WGES had been approved, and time for protests against it had passed—“thus misleading the commission and those in the service area who might have protested . . . against . . . a licensee who planned to deprive them of an existing programming service.”

Senate continues probe of Pacifica

The appearance in Washington last week of a former California radio station manager is evidence that a Senate investigation of a radio chain for “communist infiltration” is not over.

Mrs. Catherine Cory Gumperz, now a director and vice president of the Pacifica Foundation (licensee of four non-commercial fm stations) and manager of KPFK-FM Los Angeles for two years, from 1960-1962, was in the capital to answer a subpoena issued by the Senate Internal Security Subcommittee, which has questioned seven witnesses behind closed doors earlier this month (Broadcasting, at Deadline, Jan. 14).

Trevor Thomas, president of Pacifica, said in Berkeley, Calif., Wednesday (Jan. 23) that the FCC still is holding up renewals of the foundation’s licenses for KPFA (FM) and KPFB (FM), all Berkeley, WBAI-FM New York and KPFK. The FCC staff has said it’s been holding up the Pacifica licenses—some for several years—because of complaints on programming.

Mr. Thomas said he asked a high FCC official whether the Senate investigation also is involved in the holdup and was told the investigation had “some bearing.”

Another FCC official said last week that the subcommittee has not requested that the licenses be held up, although there have been contacts between the agency and the investigators.

Directors Approve • Pacifica’s board of directors met in Berkeley Jan. 19 and “discussed the problem at length,” Mr. Thomas said. There was no disapproval of the manner in which the management has handled its relations with the Senate investigation nor any indication the stations’ programming policies should be altered, Mr. Thomas said. Pacifica stations, all listener-supported, have featured controversial discussion programs since the foundation was established in 1949.

Subscriptions to the stations have picked up since the investigation was publicized earlier this month, Mr. Thomas said. More than 500 new subscribers have enrolled this month.

WDKD seeks stay for appeal of license case

WDKD Kingstree, S. C., has asked the FCC to stay its order that the station cease operation on Feb. 8 while its continuing fight to have its license renewed is pending in the court of appeals.

The commission was told that severe injury would be wrought on the station and the public interest if it has to leave the air. WDKD told the commission that while cases such as its own are pending before the courts, a stay is usually granted pending a final decision.

Advertiser quiz: Will Celler’s reach exceed his grasp?

If the top 100 advertisers give complete answers to all the questions about their advertising policies and behavior a House subcommittee has asked in a questionnaire, they will help present the clearest picture yet on what traditionally has been a fuzzy subject, even for media and advertising people.

The big advertisers have been asked to submit the information to help the House Antitrust & Monopoly Subcommittee prepare for hearings—probably late next month—on the concentration of ownership in the news media (At Deadline, Jan. 8, 1962).

Companies now trying to answer some of the subcommittee’s questions may have a sizable job. Some may not know all the answers, so vast are their advertising programs. The subcommittee indicated last week it expects no quick reply to its letters sent Dec. 31 and signed by Rep. Emmanuel Celler (D-N.Y.), chairman of the subcommittee, and of the parent Judiciary Committee.

Question No. 4 hints at the scale of the query: What did the company spend each year between 1956-62 on advertising in each of these media: newspapers, general magazines, business publications, farm magazines, spot television, network television, spot radio, network radio, outdoor advertising, direct mail and other media?

Question No. 6 asks: What has been the impact of television on the company’s advertising in newspapers (generally) and in “second” newspapers (the second-choice publications in any given market)? To what extent would more widespread color television affect the company’s advertising in newspapers generally? in “second” newspapers?

Other points on which the subcommittee has asked the firms to cooperate (without benefit of anonymity or confidentiality): participation of main and regional offices in allocating advertising budgets among media, and in the determination of an advertising agency, and selection of media for particular markets. Firms were asked about experience with “double billing,” group rates and regional advertising. Whether policies toward “second” newspapers had changed during the 1956-62 period also was asked.
ONE always stands out
and in the Birmingham television market, WAPI-TV is always that one... because: WAPI-TV offers the cream of NBC and CBS. WAPI-TV owns every major film package available. WAPI-TV offers one of the largest, most experienced, best equipped news and sports staffs in the Southeast. Make your outstanding buy... the station that stands out... WAPI-TV BIRMINGHAM, ALA.

PASTORE: ‘KEEP THE HOUSE CLEAN’

Radio-tv liquor ad query brings threat of legislation

Circulation of a questionnaire asking radio and television stations if they would use liquor advertising has raised anew on Capitol Hill the threat of a federal ban. There are hints that such legislation also could be aimed at beer and wine advertising—large sources of broadcasting revenue.

The questionnaire has been circulated by an unnamed advertising agency. It asks whether stations would carry liquor advertising and, if so, what kind: hard liquor, liqueur, or beer and wine.

The threat comes from Sen. John O. Pastore (D-R.I.), chairman of the Communications Subcommittee.

“I would hope broadcasters on their own initiative would see the great error [in such a practice] and would exercise restraint,” he said. “If one is prepared to introduce legislation to prevent liquor advertising on broadcast media, said the senator. There is some sentiment among some senators against beer and wine advertising on radio and television as well, Sen. Pastore added, although he said he would not want to go that far in any legislation he might offer.

(Another lawmaker, Rep. Eugene Siler [R-Ky.], already has introduced legislation on the subject. Rep. Siler, however, would ban all transportation and advertising of liquor [Broadcasting, Jan. 21], but his bill is a perennial, offered in each Congress by representatives and senators acquiescing to pressure from dry constituents. If Sen. Pastore were to propose a ban on liquor advertising on radio and television—as he has suggested he may—such a bill might earn serious consideration.)

Do-It-Yourself • Sen. Pastore was quick to point out he believes broadcasters are interested in “cleaning their own house,” and he hopes they can do it. Earlier experience, he recalled, showed they could take care of the problem adequately (Broadcasting, Aug. 21, 1961, et seq).

Liquor advertising was a serious issue on Capitol Hill in the summer of 1961 when Sens. Pastore and Warren G. Magnuson (D-Wash.), chairman of the powerful Commerce Committee, wrote the NAB that plans of some distillers to advertise on radio and television had been brought to their attention by “stories in trade publications.” The senators warned that an ad ban had been forestalled in the past by promises of broadcasting spokesman that such advertising would not be accepted. The Distilled Spirits Institute supported the plans.

Sen. Magnuson went to the Senate floor Aug. 25, 1961 and said, “I hope there will not be any breakthrough or letting down of the voluntary code under which the broadcasters have lived for 25 years.”

Sen. Pastore indicates he hopes recent reports of the questionnaire is not a sign of the breakthrough.

FCC sound machine

FCC engineers have built a machine they hope will help them in analyzing some of the problems involved in the commission’s efforts to determine whether commercials really are loud and, if so, what could be done to tone them down.

The machine, built of components, consists of an am-fm-tv sound receiver, a vu meter, type-approved modulation monitor, cathode ray oscilloscope, and sound-level meter.

“The machine won’t give us any answers,” Ralph Renton, associate chief engineer, is quick to admit. “But it will provide some means of judging various methods now used for adjusting ‘gain’ at radio and tv stations.”

What is really needed, he said, is a loudness meter. “But there isn’t anything like that available on the market.”

Sen. Case proposes loudness preventative

Sen. Clifford P. Case (R-N.J.), leading congressional critic of loud commercials on radio and television, has suggested the FCC consider a requirement that stations preview commercials from outside sources to prevent airing of announcements that are too loud.

Sen. Case also called on the NAB to “give additional attention to this problem with a view toward setting an industry standard banning such things as noisy sound effects, machine-gun delivery and other devices.”

His suggestions were contained in a statement to the FCC filed today (Monday), deadline for written complaints to the FCC for its announced inquiry into loud commercials (Broadcasting, Dec. 24, 1962).

The senator complimented the agency for looking into the subject and said he hoped “the inquiry will result in a promulgation of a rule ending this annoying nuisance.”

AMST director writes Lee another letter

RESTATES VIEWS ON NEW YORK UHF TELEVISION TEST

The Assn. of Maximum Service Telecasters refused last week to let FCC Commissioner Robert E. Lee have the last word in their disagreement about what was proved by the FCC's uhf test in New York.

Lester Lindow, executive director of AMST, reasserted his view that the uhf test demonstrated that, although uhf can provide substantial television service in a canyon-like city such as New York, vhf superiority ranged between 10% and 50%.

Mr. Lindow first offered this conclusion in a newsletter to AMST members in November (BROADCASTING, Nov. 26). A month later Commissioner Lee, in a letter to Mr. Lindow, said there was no basis for concluding that vhf was superior (BROADCASTING, Jan. 7).

Mr. Lindow made his comments last week in a letter to Commissioner Lee, who has long championed the cause of uhf.

The AMST executive said that the FCC report on the uhf test showed that householders had rated ch. 31 below Grade 3 (passable) in 9% of the locations, whereas they had rated ch. 2 below that mark in 4.7% of the locations and ch. 7 in 4.9% of the locations.

"In other words," he said, "only about half as many locations failed to get a 'passable' or better vhf picture as failed to get a 'passable' or better uhf picture.

Householders' Ratings • Commissioner Lee had said that the report "attached little significance to householders' reports vis-a-vis those of the trained technicians." But Mr. Lindow said this downgrading is unwarranted in view of the "demonstrated reliability" of such ratings in TASSO surveys.

Mr. Lindow also stood by his original assertion that technicians had found vhf to be substantially superior to uhf. Mr. Lee said the report showed installation crews found a 10% inferiority in uhf for grade 3 or better pictures with indoor antennas, little or no difference with outdoor antennas, and 5% superiority for uhf grade 2 or better pictures using outdoor antennas. The commissioner said this doesn't prove "substantial" vhf superiority.

Mr. Lindow, however, said a 10% difference is "substantial," particularly whereas "in New York City," a 10% difference in locations represents a population of some 1,300,000. He said the fact that vhf superiority was reduced when outdoor antennas were used "underscores the greater ease with which the public is able to receive vhf reception." This is particularly important, in apartments where installation of roof top antennas might not be possible, Mr. Lindow said.

He also sought to neutralize the statistical point that technicians gave uhf a 5% superiority on Grade 2 or better pictures when outdoor antennas were used. He said reports on "overall picture gradings" for all 313 outdoor installations indicate a Grade 2 or better picture on ch. 31 at fewer locations than for either ch. 2 or ch. 7.

Mr. Lindow's letter continued the controversy over the procedures used in the test. Commissioner Lee expressed surprise at the criticism, first advanced in Mr. Lindow's newsletter, in view of AMST's participation in the preliminary planning.

Mr. Lindow said the organization had been anxious to assist in the preparations but that the coordination between the commission and industry representatives "fell far short of what the Congress intended" when it approved the appropriation for the test. The AMST executive said meetings were infrequent and that industry representatives were given little time to study and comment on written material dealing with the project.

KISN's $2,000 fine sticks, FCC decides

Misleading identification by KISN Vancouver, Wash., has cost the station a $2,000 fine. The FCC last week upheld the amount of its original citation. (BROADCASTING, Sept. 10, 1962)

KISN was found guilty of misleading "the listening public into believing that KISN is licensed solely to Portland," the commission said. An example given by the commission when it made the original citation was:

"Current climatological readings from KISN, Vancouver Radar Weather Control, the word is overcast. This hour's forecast for Portland, Sandy and Beaverton, rainy periods." The complaint was that "there was no pause between the words 'Vancouver' and 'Radar' so that the report was being supplied by Vancouver Radar Weather Control."

The commission said it warned KISN in June 1961 against improper identification but that further offenses occurred in December 1961 and January 1962.

"KISN said the $2,000 forfeiture was "highly unjust" and that the identifications did not mislead the public, harm any other station or "corrupt the morals of the community."

FCC told to deny WWIZ renewal

The FCC was advised last week to administer stern punishment to broadcast Sanford Schafitz for a series of alleged offenses. The most serious charge was that he transferred control of WWIZ Lorain, Ohio, to the Lorain Journal Co. without prior consent of the commission.

The Broadcast Bureau, in proposed findings, said that evidence developed at hearings last summer and fall indicates that such a transfer did take place and concluded that neither Mr. Schafitz, Harry Horvitz, president of the Journal nor the Journal itself has the character qualifications to be a broadcast licensee. The charges were denied by the Journal and WWIZ.

The Bureau recommended that WWIZ Inc., headed by Mr. Schafitz, be denied a license renewal for the Lorain station and that its application for transfer of control of the station to the Journal be dismissed.

The Bureau also recommended denial of the renewal application for WFOR Farrell, Pa., which is owned by Mr.
This reliable camera is best for 20% of your live shows

This new one handles all the rest at one-tenth the cost/hour

The top camera is General Electric's 3"/4½" image orthicon TV camera, Type PE-20. Over a year of field experience has proved its unmatched reliability for "action" shows requiring I-O performance (probably about 20% of your shows).

The new one below is the first truly professional transistorized studio vidicon camera—General Electric's Type PE-23. It offers outstanding performance for such studio productions as news, panel, and quiz shows (which constitute up to 80% of today's live studio programming). The PE-23's initial cost is 50% less and its operating cost is 90% less than its I-O counterpart. For more data, contact your General Electric Broadcast Equipment Representative, or write Technical Products Operation, 212 W. Division St., Syracuse 8, N.Y.

New bills introduced in Congress

The following legislation introduced in Congress was processed between Jan. 17-24 and was not therefore mentioned in Broadcasting's summary of legislation in the Jan. 21 issue. Proposals which duplicate earlier bills and resolutions are so noted (* indicates legislation introduced in the same or similar form in earlier congresses).

Language communication study: H.R. 977, Rep. Alphonzo Bell (R-Calif.): to create a division of language science within the National Science Foundation to coordinate, promote and facilitate an intensive national program of language communication and cultural exchange.

Public information*: H.R. 1063, Rep. Ed Edmondson (D-Dokla.): to amend the Administrative Procedure Act and open to the public records and papers filed with agencies.

Overtime: H.R. 1680, Rep. James G. O'Hara (D-Mich.): to amend the Fair Labor Standards Act of 1938 and improve its overtime standards. Communications would be included in a definition of industries of "major economic importance," and employees would be entitled by law to double-time pay for work beyond the "maximum work week."

Obscenity commission: H.R. 1894, Rep. E. Y. Berry (R-S.Dak.): to create a commission on noxious and obscene matters and materials (Broadcasting, Jan. 21).

Ban pay-tv*: H.R. 2096, Rep. George Huddleston (D-Ala.): to prohibit the charging of a fee to view telecasts in the home.

End daylight saving time*: H.R. 2335, Rep. Kenneth J. Gray (D-Ill.): to amend the Standard Time Act of March 19, 1918 to provide that standard time be the measure of time for all purposes (the effect would be to eliminate daylight saving time).

Spy watchdog: H.J. Res. 145, Rep. William Fitts Ryan (D-N.Y.): to establish a joint committee on foreign information and intelligence. This House-Senate unit would examine the activities of the United States Information Agency, Central Intelligence Agency and information services within the Executive.

International tv: H. Con. Res. 46, Rep. Kenneth A. Roberts (D-Ala.): to express the sense of Congress on promoting international educational radio and television broadcasting as a means of achieving better understanding among and promoting education of the peoples of the world.

National arts foundation: S. 165, Sen. Jacob Javits (R-N.Y.), for himself and Sens. Joseph S. Clark (D-Pa.), Hubert Humphrey (D-Minn.) and Claiborne Pell (D-R.I.): to establish a United States National Arts Foundation with up to $5 million for operations and grants in its first year and not more than $10 million in succeeding years.

Cultural center site: S. 315, Sen.

Schaftiz, and a license covering a construction permit for WXTV (TV) Youngstown, Ohio, owned jointly by Mr. Schafitz and Guy W. Gully. The television station is now dark.

Mr. Schafitz's difficulties with the commission stem from discussions he had with Mr. Horvitz in September 1958, which led to the formation of WWIZ Inc., assignment of the WWIZ license to it, and the sale to the Journal of a 45% interest in the corporation for $55,000.

Mr. Schafitz needed the funds for construction of WXTV. The Broadcast Bureau said Mr. Schafitz was so preoccupied with financial problems in completing the television station that he was willing to sell a share in WWIZ "upon such conditions as Horvitz would dictate, including the transfer of effective corporate control to the Journal."

Agreed to Journal's Terms - The Bureau contended that even before the corporation was formed, on Nov. 12, 1958, Mr. Schafitz agreed to terms that would give control of the station to the Journal and that after the corporation was organized, the Journal exercised this control.

The bureau held that Mr. Horvitz controlled the votes of two of the three directors—his own and that of Harry Wickens, who had been an attorney for the Journal. Mr. Schafitz was the third director. The Bureau also said that Mr. Horvitz controlled the keeping of records and financial affairs through his employees, who were secretary and treasurer of WWIZ.

According to the bureau, the Journal's alleged control of WWIZ was concealed from the commission and the "nature of the understanding was not revealed, except through the hearing process under cross examination."

The Journal and WWIZ however, said there was no agreement to sell and transfer full control until May 2, 1961.

In a joint pleading, the Journal and WWIZ said that Mr. Schafitz not only controlled the corporation through his majority stock ownership but retained actual control of the operation of the station. The Journal and WWIZ said Mr. Schafitz was solely responsible for hiring and firing employees, for determining the banks WWIZ Inc. would use, and for the advertising, business and programming policies of the station's operation.

Regarding Mr. Wickens' role in the corporation, the two sides maintained there is no evidence to support the inference that he acted as an agent of the Lorain Journal.

Newsmen deny pro-Cuban leanings

A refugee Cuban journalist's charges that five U. S. newsmen slanted news to favor Cuba in broadcasts and newspaper stories were denied and sharply criticized in statements to a Senate subcommittee released today (Monday).

Sen. Kenneth B. Keating (R-N.Y.), who presided at 1962 hearings of the Senate Internal Security Subcommittee (Broadcasting, July 23, 1962), said last week he regretted the charges by Carlos Todd had been made "in public without an opportunity for evaluation and out of the presence of the accused parties." The senator also said, "At no time was it proved to my satisfaction that the reporters named by Todd were either the instruments or the dupes of the communist conspiracy."

Mr. Todd, now head of the Cuban Information Service named:

Charles Kuralt, CBS News Latin America correspondent; John Hlavacek, NBC News correspondent now stationed in Miami; Hendrick J. Berns, formerly a commentator and feature reporter on WGBS-AM-FM Miami; William J. Oliphant, commentator; and Sam Halper of Time Inc.

The Replies - An analysis of an
The FCC last week...

* Designated for hearing the applications of Central Wisconsin TV Inc. for more time to construct WCWT (TV); ch. 9, Wausau, and to sell the station to Midcontinent Broadcasting Co. Wisconsin Citizen's Committee for Educational TV and WSAU-TV were made parties to the proceeding. The citizen's etv committee had petitioned the FCC for denial of Central's applications, charging that it was trafficking in licenses (BROADCASTING, June 4, 1962). Central countered that WSAU-TV had financed the citizen's committee to block competition in Wausau. Chairman Newton N. Minow, who favored further inquiry, dissented.

* Granted request by NAB and extended to March 18 this Monday's (Jan. 28) deadline for comments concerning the commission's inquiry into loudness of commercial announcements and their continuity over am, fm, and tv stations (BROADCASTING, Dec. 24, 1962).

* Granted request by Reliable Broadcasting Co. that issues in its comparative hearing with Blue Ridge Mountain Broadcasting Inc. for new am stations in Calhoun and Ellijay, both Georgia, respectively, be enlarged to determine if the Blue Ridge application was filed solely to prevent a grant to Reliable. Reliable charged that WCGA Calhoun had instigated filing of the Blue Ridge application to keep competition out of Calhoun and submitted affidavits to this fact by a former WCGA employee.

* Gave notice that the Nov. 28, 1962, initial decision granting the application of North Alabama Broadcasters Inc. for a new tv station on ch. 19 in Huntsville, Ala., is effective. North Alabama was originally a competing applicant with Smith Broadcast Inc., which amended its application for a new tv in Huntsville to read ch. 25 (BROADCASTING, Nov. 19, 1962). North Alabama is owned by Aaron Aronov and Tine W. Davis, each 33⅓ ⅓%, and Charles F. Grisham and John C. Godbold, each 16⅔%.

* Was requested by the National Educational TV & Radio Center to institute a rulemaking proceeding to assign and reserve for non-commercial use uhf ch. 68 to Livonia, Mich. NETRC said that Livonia is one of the fastest growing cities in the state and plans to establish an etv station in conjunction with its public schools.

SENATE FILIBUSTER STALLS HILL

Scheduled hearings now uncertain till Senate clears decks

Congress was stalled last week, still unable to take up its tasks in earnest and get into legislation affecting broadcasters: Sec. 315, ownership of news media, space communications, broadcast measurement service, community antenna television and other subjects.

House Republicans announced committee assignments Thursday (Jan. 24) and cleared the way for committees to organize themselves for the first time since Congress convened 19 days ago.

The House Commerce Committee was scheduled to meet Tuesday (Jan. 29) to organize itself and name subcommittee members and chairmen.

The Senate, however, still was hung up by a filibuster over a proposed rules change. When it might get down to business was uncertain last week as the Senate prepared for longer sessions, beginning today (Monday) at 10 a.m.

The Senate Commerce Committee scheduled two hearings on communications matters, but both face postpone- ment if the filibuster on rules is to con- tinue.

One hearing was set for this Thursday on FCC Broadcast Bureau Chief Kenneth A. Cox, nominated by President Kennedy for the unexpired term of Commissioner T. A. M. Craven, who retires that day at the age of 70. Mr. Cox also was nominated for a full seven-year term beginning July 1, and both nominations will be heard together (BROADCASTING, Jan. 21).

A hearing of the Communications Subcommittee was set for Tuesday (Jan. 29) to question scientists how successful the Nation's two communications satellites have been.

Here is the lineup of the House Commerce Committee, which is composed of 33 representatives under the chairmanship of Rep. Oren Harris (D-Ark.), now on his fourth term in that post.

* Denotes first term
D'ANTONI, BAER FORM TVPA

Former MBS officials start new firm, plan to enter tv production, represent talent

The formation of Television Productions of America Inc., New York, a tv production and talent representation company, was announced last week by Philip D'Antoni and Norman Baer, partners, who have resigned from MBS as vice president-general sales manager and as director of news and public affairs respectively.

TVPA has signed with Greshler Productions, Hollywood, to co-produce three musical-variety specials starring Vince Edwards of the Ben Casey series, and on its own TVPA is planning another variety special, Salute to Harry Richman.

TVPA also will serve as the east coast sales representative of Diamond Artists, a talent representation firm headed by Abe Greshler, whose clients include Mr. Edwards, Don Knotts, Tony Randall, Tina Louise, Don Wilson, John Ireland and Denise Darcel. The specials will be either 60 or 90 minutes in length, and the Richman program will spotlight well-known personalities, including Sammy Davis Jr., Bob Hope, Jack Benny, and Sophie Tucker, according to Mr. D'Antoni.

Mr. D'Antoni has been with Mutual four years in various sales executive posts. Mr. Baer has been with the network news operation for five years and earlier was a partner in Gross-Baer Productions, radio-tv programming company.

TVPA is located at 77 W. 55th St., New York 19. The telephone number is LT 1-1130.

Cleveland merger forms Cinecraft-Continental

Cinecraft Productions Inc. and Continental Motion Pictures Inc., Cleveland film companies, have been merged as Cinecraft-Continental Productions Inc. Facilities of the new company, which produces documentary films, include three sound stages, a staff of 16 persons and a creative writing department.

Officers of the new company are: Ray Culley, president; Paul Culley, vice president and general manager, and Julius Potocsky, vice president and executive producer.

 Studios are at 2515 Franklin Blvd., Cleveland 15. Telephone: 781-2300.

Second-year sales made for Official's 'Biography'

Renewals on the second year of Biography, which currently is in production, have been made by Official Films in 15 markets, it was announced last week by Seymour Reed, Official president.

Topping the list of renewals was a regional buy by Pacific Gas & Electric Co., San Francisco, through BBDO, that city in California on KRON-TV; San Francisco, through KERO-TV Bakersfield; KHSL-TV Chico; KIEM-TV Eureka; KFRE-TV Fresno; KSBW-TV Salinas and KSBY-TV San Luis Obispo. Other renewals, Mr. Reed said, have come from Chemical Bank-New York Trust Co., through Benton & Bowles, New York, on WNBC-TV there and from KNBC-TV Los Angeles, KLZ-TV Denver; KCRA-TV Sacramento; KOGO-TV San Diego; KOAA-TV, Pueblo, Colo., and WWLP (TV) Springfield, Mass.

Among the subjects for the second year of the series are George Bernard Shaw, Dag Hammarskjold, Herbert Hoover, Princess Margaret, Babe Didrikson and Madame Chiang Kaishek. The first year of Biography has been sold in 175 markets.

 Daly and CBS-TV at odds on 'What's My Line?'

John Daly, former ABC news and public affairs executive and host of What's My Line? on CBS-TV, appeared to be at a standoff last week with CBS-TV on his future role in the program next season.

As of last week, there was a faint glimmering of reconciliation—and a new contract—for Mr. Daly, who told Broadcasting late last week that a "third party" had now entered the picture as an "intermediary."

Mr. Daly had turned down CBS-TV's offer of a "flat, non-negotiable" contract. CBS-TV's position was that it had offered him a new long-term contract but that he had decided not to accept it. The current contract expires at the end of September.

Mr. Daly has been on the popular weekly quiz show (Sunday, 1:30-11 p.m.) for the past 14 years. It's reported his show earnings come to some $2,500 weekly.

ABC buys tv rights to winter Olympics

ABC-TV has secured worldwide tv rights to the 1964 Winter Olympic Games at Innsbruck, Austria, Jan. 29-Feb. 9, 1964.

Although no exact figures were divulged, it was revealed that ABC-TV paid around $500,000 for the rights, worldwide except for Eurovision and Intervision, which will carry the coverage to European nations. Negotiations were handled for the Olympic Committee by Kenyon & Eckhardt Inc.

Video tapes of the games will be flown daily to New York for telecasting over ABC-TV.

Study finds radio programming "more conservative"

A report on radio programming changes in 1961-62, which indicates a trend toward "more conservative" programs, has been made by Sherman L. Lawton, coordinator of broadcasting instruction at the U. of Oklahoma, Norman, Okla.

Mr. Lawton, who made a similar survey for 1960-61, based his findings on questionnaires sent to 600 stations in selected geographical areas, 51% of which were returned.

"By far the greatest changes," the report says, "have been in the direction of more conservative programming, and a marked increase in editorials, news and weather." Mr. Lawton found that 21.6% of the replying stations changed their program policies during the period studied.

The major increases:
- News services were implemented by 38.7% of the stations.
- Special features programming was up by 21.8% of the respondents.
- Editorializing increased 18.3%.

- Weather reporting gained by 12.4%.
- Public service programming, including talks, interviews, etc., was up 26.8%.

Mr. Lawton noted that 81.5% of all reductions reported were in music, with rock 'n' roll losing the most ground. In fact, the report said, 27.2% of the stations classified themselves as "top tune" in 1960, compared to 9.3% in 1962, while the "good music" classification has increased from 4.6% to 24.7%.

Sports Network to cover another golf match

100 STATIONS TO CARRY SECOND GOLF MATCH IN MONTH

Sports Network Inc., New York, reported last week it is arranging a lineup of at least 100 TV stations throughout the country to teletcast the Ballplayers Golf Tournament from Miami Springs, Fla., on Feb. 16-17.

The tournament, which presents the outstanding professional baseball players, is the second golf event for which SN1 will be handling arrangements in less than a month. On Jan. 19-20, with advance notice of two weeks, Sports Network Inc. assembled a group of 120 stations for the national Pro-Amateur Golf Championship from Monterey, Calif., according to Richard Bailey, president of SN1.

The ballplayers' competition, as in the case of the pro-amateur championship, will be teletcast live. It will be scheduled from 4:43 p.m. on Feb. 19 and 5-6 p.m. on Feb. 20. Mr. Bailey said he is concluding negotiations with several sponsors, and their names will be disclosed shortly. SN1 handles production, sales and arranging of facilities and stations for the event.

One contingency for which SN1 will be prepared, Mr. Bailey said, is a late ending of the tourney on Feb. 20. He noted that the pro-amateur tourney (the host of which was Bing Crosby) ran 38 minutes longer than had been anticipated on Jan. 20. Working with officials of KTTV (TV) Los Angeles, which originated the teletcast, SN1 executives notified the telephone company and 120 stations, while golf play was still in progress, that the outcome would not be decided by 6:30 p.m., the original time. Mr. Bailey was "delighted" they were able to reach all stations and only eight of the 120 withdrew because of previous program and advertising commitments.

AFTRA local to fight bills

The Los Angeles local of American Federation of Television & Radio Artists (AFL-CIO) has begun an all-out fight against legislation it believes is designed "to curb the rights of labor."

The local union's board, representing a membership of over 7,000, unanimously recommended to the national union that "all steps be taken to implement an action program against bills in Congress that will in effect destroy the freedom of union activity and curb the operation of union organizing." The board acted after David Zisking, legal counsel, warned that labor activities in Congress are part of a historic pattern, and that detailed blueprints were planned in 1961 for control of unions.

Way opened for May start of Denver pay television

Macfadden Telelobe Denver Corp. has signed a contract with Mountain States Telephone & Telegraph Co. to provide circuits for transmission of sound for subscription tv, paving the way for the start of pay tv in Denver in May of this year, Gerald A. Bartell, president of Macfadden Telelobe and of Macfadden-Bartell Corp., reported last week.

Mr. Bartell said the contract with the telephone company was signed last Monday (Jan. 21). Last October the FCC authorized a three year test of the project. The Denver system will utilize KTVK (TV) Denver (ch. 2). The tv picture will be broadcast without scrambling, while the sound will be carried over the direct wires of the telephone company to speakers in the homes of subscribers.

It is expected that there will be a $10 installation charge for the speaker and direct telephone line and a minimum $3.25 monthly charge for programs, priced from 50 cents to $3.

ITC sells shows to etv

Independent Television Corp., New York, has sold two more documentaries made in the United Kingdom to the National Educational Television & Radio Center (NET). The sale of Out of Burning, a half-hour show about the rebuilding of the
Coventry Cathedral and Oxford, a one-hour study of the university city, represents the third group sale made by ITC to the educational network.

The programs were produced by Associated Television Ltd., British producer of documentary and public affairs programming. The sale was made through ITC's recently-created division of public affairs and educational program sales.

Film sales...

Boston Symphony Concert Specials (Seven Arts Assoc.): Sold to KRON-TV San Francisco and CFPL-TV London, Ont. Now in one Canadian and 32 U. S. markets.

The Law and Mr. Jones (Four Star): Sold to WPIS-TV Paducah, Ky. and WICS (TV) Springfield, Ill. Now in 14 markets.

Thriller (MCA TV): Sold to WINK-TV Ft. Myers, Fla.; WSAU-TV Wau- sau, Wis., and KGGM-TV Albuquerque, N. M. Now in 81 markets.

Supercar (ITC): Sold to WLVA-TV Lynchburg, Va., and WTKO-TV Meridian, Miss. Now in 142 U. S. and 49 foreign markets.

Sugarfoot (Warner Bros. TV): Sold to KMSP-TV Minneapolis-St. Paul; WJZ-TV Baltimore; WSPD-TV Toledo; KTUL-TV Tulsa; WSIL-TV Harrisburg, Ill. and KJEO (TV) Fresno. Now in 30 markets.

106 features including titles from "Cavalcade of the 60's," groups I and II and others (Allied Artists TV): Sold to CKLW-TV Windsor, Ont.-Detroit.

SAG puts damper on runaway production

PACT WITH FOREIGN GROUPS ERASES LOWER COSTS

American producers of tv programs will no longer be able to save on performers' fees by runaway productions in Canada, Ireland or Great Britain. An agreement reached last week by the Screen Actors Guild with British Equity, Irish Actors' Equity and the Assn. of Canadian TV & Radio Artists calls for the foreign unions to police production of tv, motion pictures and recorded programs within their jurisdictions by imposing SAG scales and conditions on American producers operating in their countries. In announcing the agreement, SAG expressed the expectation that it will soon be extended to cover films made for theatrical exhibition as well as on tv.

The runaway tv film pact was the first concrete result of a meeting of representatives of performers unions in Australia, Canada, Ireland, the United Kingdom, and the U. S. held Jan. 18-20 in Toronto. The meeting was called by the American Federation of TV & Radio Artists and British Equity with Canada's ACTRA as host and SAG, IAE and Australian Actors & Announcers Equity Assn. also represented. The sessions were also attended by observers from L'union des Artistes de Montreal and Federation des Artistes et des Artistes du Canada.

In addition to eliminating savings from runaway production of tv programs on film or tape, the agreement reached at Toronto also urges the establishment of additional compensation for performers of tv programs distributed abroad by film or tape or of live shows transmitted instantaneously by Telstar or other communications satellites.

Explaining how the agreement on runaway production will work, Chester Mulgen, assistant national executive secretary of SAG said: "If, for example, a runaway American producer goes to the United Kingdom to make a tv series that should be made in the U. S. and is obviously intended for the American market, the guild will lay the facts before British Equity which will after investigation incorporate all guild pay rates, conditions and residuals in the contract which the producer must sign with British Equity before obtaining the services of actors. The Toronto conference was confined to tv matters and therefore we could not include theatrical films immediately but we hope to do so at an early date."
Program notes...

WB pilot • New hour-long TV series with a prison background, The Key, is being planned by Warner Bros. for 1963-64. William T. Orr, head of TV production, has signed James Komack to write the script for the pilot. Sam Gallu will be producer; Les Martinson the director.

Jazz package • SESAC Inc., New York, has released a basic jazz package entitled The Jazz Set, consisting of about 115 selections on 10 long playing albums. Each cut is standard length; there are no extended numbers or long takes. Price is $19.95.

New office • Sports Network Inc., New York, has opened new offices at 530 Fifth Ave., zone 36, effective immediately. The firm's present telephone number, Murray Hill 2-0117, will be changed to Monument 1-1000 on March 18.

GAC and 'Mrs. America' • General Artists Corp., New York, has been appointed to represent the 24th annual "Mrs. America" contest for television rights. A network telecast of the grand finals (April 22-29 in Miami Beach) is being planned. ABC-TV and CBS-TV have carried the finals in the past.

WGA negotiations begin with radio-TV networks

The Writers Guild of America begins negotiations today (Jan. 28) with the television and radio networks in New York on a new contract to replace the three year pact that expires on March 31.

The contract will cover live television programs, free-lance radio programs, network documentary programs and staff employment. A WGA official estimated that approximately 300 staff members will be affected by the outcome of contract talks. In any given year, from 400 to 500 members, who free-lance, operate within the provisions of the contract, according to the WGA executive.

The union declined to reveal any of the contract demands, except to state that it would seek a wage increase.

Entertainment programs on film are not involved in the negotiations. A separate contract for these programs is made by WGA with the networks, the Alliance of Television Film Producers and major motion picture studios. This pact does not expire until 1966.

CBS-TV program changes

Three program changes in CBS-TV's nighttime schedule to be effected in March were formally announced last week.

Fair Exchange, which started the season as a weekly hour program (Friday, 9:30-10:30 p.m.) and was then dropped in favor of a half-hour version, returns on March 28 to the Thursday, 7:30-8 p.m. slot. To make room for it, Mister Ed now in that period moves to Sunday, 6:30-7 p.m. on March 24. Another change: Password, now in the Sunday period moves to Monday, 10-11:30 p.m., on March 25 when The New Loretta Young Show is dropped.

FINANCIAL REPORTS

IRS issues expense account guide

DETAILS DO'S AND DON'TS FOR NEW REGULATIONS

Internal Revenue Service released a "comprehensive pamphlet" last week designed to assist businesses and individual taxpayers in deducting business travel, entertainment and gift expenses for their 1962 income tax returns. The pamphlet also explains new rules which became effective Jan. 1, 1963.

Illustrative examples and questions and answers on the stricter expense account rules are included. The booklet covers such items as what constitutes legitimate business travel away from home, when meals and lodging are deductible, laundry expenses, tips, automobile expenses, club dues, entertainment and reimbursement and allowance arrangements.

Commissioner of Internal Revenue Mortimer Caplin said the new tax law ends the abuses of "expense account living" and reflects the will of the people. Addressing a joint meeting of the Tax and Law Committees of the Electronic Industries Assn. in Washington last week, Mr. Caplin emphasized the law is not aimed at legitimate business and entertainment expenses but seeks only to curb abuses.

"Congress is not telling you what or how to spend to advance your business — only what you can deduct," he said.

Under the new requirements, individuals and businesses will be required to substantiate entertainment claims with "adequate records" such as the amount of expense, time and place incurred, business purpose and business relation to the person entertained.

Receipts must be submitted for all entertainment expenses of more than $25 and business gifts to one individual over a year are limited to that amount.

Further "substantive rules" spelling out in more detail other IRS requirements will be issued next month, Mr. Caplin said. Copies of the pamphlet, titled "Travel, Entertainment and Gift Expenses," Document 5049, may be obtained free from any Internal Revenue office. Bulk quantities also are available at no cost to business organizations for distribution to employees.

RCA officials predict more profitable 1963

RCA sees a "new era of profitability" in which 1962 first-quarter levels of record sales and earnings will be surpassed in 1963, and serve as a new and higher base for the company.

The bullish report for RCA was delivered last week by its top management team to the New York Society of Security Analysts.

Among the executives were Brig. Gen. David Sarnoff, board chairman; Elmer W. Engstrom, president, and Robert W. Sarnoff, NBC board chairman.

Once again stress was on color TV receivers and picture tubes as providing the greatest profit contribution of any RCA products last year. It also was predicted that RCA will cross into the profit column in electronic data processing within two years. Its losses in this and other new-product areas are falling off rapidly, it was added.

Also noted: NBC has increased sales in each of the past 15 years and expects to continue upward this year. RCA scientists are protecting several Laser systems and, it was noted, color TV production has been started in Canada by RCA. Its English subsidiary will begin first sales of color receivers this year for experimental purposes.

TAC membership 52, executives report

Television Affiliates Corp. reports that membership in TAC has grown from 12 stations in January 1962 to 52 stations in January 1963. Dividends to producing stations amounted to $31,000 last year.

TAC, which was organized in 1961 and began functioning in 1962, serves as a clearing house for the exchange of public affairs-cultural tv programs among its members. A subscriber pays an annual fee, depending on the size of his market. A producer station, which need not be a member of TAC, earns credits for programs accepted into the TAC library on the basis of the number of plays the programs receive and the number of markets where they are carried.
A SPECIAL REPORT

Once the Saturday night gathering place of roving geetar pluckers, foot stompers and blowers of corn likker jugs, Nashville has suddenly been discovered by some of the most sophisticated tastes in the U. S. music industry. The Nashville Sound is sweeping the charts in national music popularity—propelled by best-selling records cut by performers like Ray Charles (above). The city is now the No. 2 source of American popular music.

A big new sound blows out of Nashville

IT'S COUNTRY DOLLED UP, CORN REFINED AND HOTTEST THING IN MUSIC

The industrial city of Nashville in Central Tennessee's rolling hills provides the setting for a cultural revolution that has rocked the nation's music industry.

Within a decade a cozy little recording center whose musical attainments once scarcely drew a sneer from Tin Pan Alley has now burgeoned into a $40 million economy, with Nashville second only to New York as a source of popular music.

This combined commercial and cultural phenomenon has risen out of the adenoidal moans and strident strings of a past era of country and western music—though the word music is applied with some misgiving by those of sophisticated tastes.

But the fact remains that one out of every two records now sold in the U. S. and a heavy proportion of the records played on U. S. radio come from a Nashville studio.

For want of a truly representative term, the diversified product of Nashville's 15 recording studios and its army of composers and musicians is loosely defined as country or country-and-western music. Actually these are trade terms applied to this flourishing industry in a fruitless effort to find a descriptive name for a product that covers the gamut from hoedown through gospel and romantic to far-out jazz.

Big Names Join • Some of the biggest names in pop music are turning to country-style songs; many are starting to record in Nashville because the studios produce a relaxed type of musical support that performers like and the public buys over the counter.

This type of background is popularly known as the Nashville Sound. The term has become a symbol of prestige in an industry that once belittled Nashville as the corn crib of the music industry.

The transformation of Nashville into a music center of national importance can be traced to these factors:

- For years the city has had a basic reservoir of musical talent. The Grand Ole Opry, a Saturday night feature on WSM Nashville since 1925, has launched literally hundreds of careers in the country music field (see separate story page 70).
- The native Nashville talent was given outlets and polish by Broadcast Music Inc., which needed to develop new sources of music to compete with the older American Society of Composers Authors and Publishers. When BMI came into being, ASCAP owned just about all the established composers of popular tunes, and those composers were in New York and Hollywood.
- The growing need for music in radio programming, as the music and news format spread throughout AM broadcasting, gave impetus to the development of BMI and its music sources.

In any scanning of the present state of Nashville's musical progress it's necessary to face up to the blunt facts of American musical tastes, By city folk standards, much country music is corn. There's no disputing this label, if basic emotions and simplicity of musical form can be considered corn. Yet blue grass, a primitive version of country folk music, has suddenly become the rage of campuses and coffee houses all over the nation, and the Opry's roaring reception in Carnegie Hall a year ago threatened to shatter the chandelier-and-rococo decor of that august auditorium. In Nashville the Saturday night Opry performs with a cast of 125 singers, yodelers, guitar pluckers, fiddlers and jug blowers before an audience of 3,500 paying devotees (see page 70).

It Sells • Country music in its raw

BROADCASTING, January 28, 1963
BIG NEW SOUND BLOWS OUT OF NASHVILLE continued

forms may be an anathema to music's social leaders and their followers, but the hard-money men who deal in musical merchandise operate on the theory that more people are corny than sophisticated. The basic human emotions—love, joy and grief—guide the musical programming of most radio stations. Any broadcast manager who takes the time to investigate will soon discover that Nashville music ranks one-two-three as a source of station programming. Unfortunately, those who haven't kept abreast of musical progress are likely to slough off this trend with the comment that if it's Nashville music, it's country and western drivel.

They are only partly right, for Nashville has broadened its product to include progressive jazz, tuneful ballads, the latest in pop and more than a score of other types. In fact, Nashville is fast becoming the musical style-setter, a role long held first by New York and later influenced by Hollywood's movie scores.

At the Christmas weekend two country-western albums ranked right at the top of best-selling records—Vol. I and II of "Ray Charles Sings Country & Western Music." Their significance rests in the conversion of another major pop artist to the Nashville type of music.

Top vocalist Nat King Cole reflects the Nashville influence in his popular "Ramblin' Rose" release, based on a plain little tune that has what a Washington bureaucrat might call a high coefficient of melodic persistence. Bureau or laborer—people who hear "Ramblin' Rose" can't keep from singing or whistling it. At a recent National Press Club dinner in Washington, D. C., Mr. Cole had an audience of correspondents and government officials howling through a dozen choruses of this typical country tune.

Hard Facts • The basic economics of Nashville, 1963 version, aren't easy to document for statistical analysis. But the spirit of Nashville is felt in the southern section of the city, where its Record Row is congegated. Plant investment in Record Row isn't heavy by New York standards because the studios are noted for their technical efficiency rather than architectural beauty. The two largest—RCA-Victor and Bradley—are often booked around the clock, seven days a week. Artist bureaus and music publishers can operate in an ordinary office suite; composers and musicians need only a stubby pencil and envelope or a wall plug for an electronic guitar.

A good share of the records taped in Nashville usually go out to a distant processing plant. Since the invention of tape it's been possible to run a substantial music business from a desk or clothes closet, depending on the number of people involved, though this doesn't fit into Nashville's growing insistence on technical quality.

In any case, it doesn't take much capital to decide on a label name and produce a record. A Nashville cabbie, catching the spirit of the recent 11th Annual Country Music Festival, popped this question to his fare, "You in the music business?" Without waiting for a reply, he went on, "I'm starting my own label, Bucket Shop Records. I'm getting a terrific combo together and we're ready to go."

New Music World • Nashville is in the music business up to its ears. It now has the facilities, earned and skilled musicians who like to play, interested technicians, a vast supply of active composers and the urge to turn out good records.

This onetime gateway to the West is now "open sesame" to a new world of music because broadcasters were forced a score of years ago to start a new music source. This happened when they organized Broadcast Music Inc. in an effort to cope with an ASCAP rate increase they considered intolerable.

BMI was formed, and at last the frustrated composers who had tried vainly to crash ASCAP's gates now had a market. They still have this market because BMI easily leads the current lists of top tunes.

The records are coming out by the hundreds, artists are booked all over the world, publishing houses turn out sheet music, better background musicians or side men are busy. But ask the executives of recording houses about their business and you'll get an embarrassing silence. If Gimbel's wants to know, Macy's isn't supplying the information.

A series of inquiries brought this recap of estimates about the national grosses in the recording industry: RCA Victor may do $70 million from all its records, Columbia $68 million, Capitol $53 million, Decca be between Columbia and Capitol. The rest are said to be under $50 million. ABC-Paramount, Mercury, Dot, United Artists and the others are mum when their private business is probed.

Signs of Progress • Yet there are some educated estimates about the basic facts of Nashville's music industry. Many can't be fed into a computer, but here are some of the figures picked up around Record Row:

Like so many other popular singers and musicians Gogi Grant finds the Nashville atmosphere to her liking. Recording here, in the RCA-Victor studios, she is accompanied by Bobby Moore, bass, and Buddy Harmon, drums. Nearest the star at the piano is Dick Pierce, a&r for Valiant.
Half of U. S. recordings originate in Nashville.
Three out of four Decca pops are from Nashville; RCA-Victor and Columbia pops may run around 50%.
Over 60% of all single records have country influence.
Over 75% of successful singles are country oriented.
In the average week the U. S. recording industry turns out 465 records, 60% of them country oriented. Nashville is absolutely dominant in singles; New York and Hollywood lead in albums.
The year's most successful recording company, according to trade talk, is the one whose country-and-western department is the most active; pops are the big money makers.
Probably half the records spun by radio stations that feature current hits (the "top 40" format, for example) have country music roots.
BMI has 208 publishers in Tennessee (mostly Nashville); SESAC has three; ASCAP has some, but no figure is available.

Growth symbols abound in this new music economy. ASCAP opened an office in Nashville a few weeks ago. Jules Collins, ASCAP sales manager, said the society is about to update its 1957 bulletin listing country-and-western songs. "Our publishers have always had a lot of music in this field," he said, mentioning three favorites as examples—"Don't Fence Me In," "Last Roundup" and "Wagon Wheels." He recalled that Gene Autry (Western Music Publishing Co., an ASCAP publisher) had been a powerful force in building the popularity of country-and-western music.

Mr. Collins said many old, established ASCAP songs have been recorded in the Nashville style. He credited WSM Nashville and its Opry with a lot of the growing popularity of music having the country and western flavor.

**BMI Strong Point**

BMI has long dominated the Nashville music industry. It maintains an office there, second only to its New York headquarters, with Frances Williams Preston in charge. Mrs. Preston knows practically every personality, writer and executer in the field and serves as a combination goodwill ambassador, counselor and reference source.

BMI's annual awards are cherished by country musicians. It presents them during the annual festival week that draws thousands of music industry delegates to Nashville each fall. It's buzzed around Nashville, incidentally, that BMI has bought a site for a new building to house its spreading operations.

Although BMI's leading role in the Nashville music supply is conceded, it likes to emphasize that its library is broad-based and points to a strong classical repertoire. But as far as Nashville is concerned, there's one type of success story for BMI and it goes like this—at the yearend 58 of the perennial singles hits recommended by Billboard's Music Week as standards for year-round programming by radio stations are licensed for performance by BMI. This is BMI's answer to the ASCAP claim that the society is far superior in the field of standards, or numbers that persist as popular favorites for around five years or more.

Another spreading influence in the country field is SESAC. Its library has a rich store of folk, western, country and gospel music. SESAC recordings use such Nashville favorites as the Anita Kerr Singers and Jordanaires, Webb Pierce, Chet Atkins and other prominent artists. Like BMI, it lends encouragement to composers who haven't been able to break into Tin Pan Alley, which is ASCAP's stronghold.

Another recent growth symptom has appeared: ABC-Paramount, often called the largest entertainment organization in the world, had its eyes opened in mid-1962 when Ray Charles, blind pop singer, quickly hit the million mark with his first "Modern Sounds in Country & Western Music" album. Volume II naturally followed shortly, in the musical tradition that when something is a smash hit, everybody gets on the bandwagon in a hurry. When "I Can't Stop Lovin' You" was pulled out of the Ray Charles album for a single, it too hit the million mark and kept going.

These Ray Charles recordings reflect the growing interest in the country type of music. The songs weren't recorded in Nashville, but they were strictly country-type selections. In this first venture into a new field, the artist used his customary background—a big orchestra for numbers recorded in New York and a strings-and-chorus group for Hollywood recordings.

**Then the Flood**

The ABC-Paramount venture with Ray Charles touched off a flood of country and western recordings by labels that hadn't done much in the field, contributing to the 1962 convergence of the recording industry toward Nashville. And Tommy Roe's first ABC-Paramount recording in Nashville brought him numerous personal appearance offers and a chance to do a pilot film for ABC-TV.

Such are the typical symptoms of Nashville's growth. The extent of this expansion is put this way by Charles.
BIG NEW SOUND BLOWS OUT OF NASHVILLE continued

Lamb, publisher of the trade journal, Music Reporter:

* Nashville is the home of 1,100 musicians, 350 songwriters, 110 publishing houses and 15 recording studios, plus artist bureaus and booking agencies.

* Of the 1,100 musicians, 750 are members of American Federation of Musicians. The rest are non-union performers who saw at cigar box fiddles, puff mouth harps and kazoos and perform numerous other rites on impromptu instruments unfamiliar to most concert halls.

The parade of big pop names into country music constantly amazes those who have waged the long fight to attain national recognition for the city's product.

Among feminine stars who have sampled or embraced country orientation are Connie Francis, Patti Page, Joni James, Kay Starr, JoAnn Campbell, Connie Stevens and Della Reese. Besides Ray Charles and Nat King Cole there are Bobby Vinton and Johnny Tillotson, to mention two male vocalists. And of course Nashville boosters were delighted last autumn when Stan Kenton and Walter Brennan recorded Bill Anderson's "Mama Sang a Song.”

Then there's Burl Ives, whose record sales have multiplied since he embraced the Nashville Sound. He opened a whole new career by utilizing Nashville's able technicians and side men. Fats Domino, another established performer, has recently been playing songs written by Hank Williams, revered country composer of the last decade.

**Matter of Taste** - Records become hits overnight, with no scientific explanation. The vagaries of the public's tastes constantly baffle those in the business. No one was more surprised last autumn than composer Bill Anderson when his "Mama Sang a Song" became a top-seller for Decca. It was a personal thing, Bill explained. "I had always wanted to write a song about the way my own mother sang to me as a kid when I had problems. She would sit me on her knee and sing 'Rock of Ages' and soon the hurt would go away." Radio exposure of "Mama" was effective, just as it pushed the cur-

Opry fans jam ugly, old Ryman Auditorium each Saturday

A musical miracle appears in downtown Nashville every Saturday night as 3,500 or more howling people pay $1.50 or $1 to worship in pews at an old tabernacle. These semi-hysterical folks jam Ryman Auditorium to take in WSM's **Grand Ole Opry**.

Ryman is big and it's ugly—traits that are cherished by WSM as well as the performers and those who squeeze in to see the show. Another squeeze is the responsibility of Otis Devine of WSM, motorman of the show, who has to fit 125 performers plus assorted guitars and bull fiddles into the limited backstage facilities.

Two WSM executives—Robert E. Cooper, radio manager, and Mr. Devine, WSM program manager and manager of Opry, say the stringy, nasal music of the 30's is giving way gradually to romantic, rhythmic styles though Roy Acuff's breakdown fiddle will rattle the timbers at old Ryman on a Saturday night. Roy was the first big country singer. **Hay Originator** - The history of Opry dates from 1925 when George D. Hay, an announcer on WLS Chicago, moved to the new WSM and started what was then known as the WSM Barn Dance. The name was changed two years later. The Opry's still riding high, and artists cheerfully give up a $1,000 booking to get the $31 scale Opry pays. Most country musicians are Opry alumni.

Mr. Cooper likes to discuss the Opry's success stories. It's a highly effective sales vehicle, he said, mentioning Martha White Mills (flour), a small local enterprise that started on Opry a decade-and-a-half ago and quickly spread out over 17 states. At one time it opened 200 dealers in roughly a month. The sponsor sends artist groups around and includes local talent in its shows.

But Opry's place in the history will always be that of the show that launched hundreds of careers.

One outstanding alumnus is Elvis Presley, an old Opry bull fiddler who has passed the 25-million record mark for RCA-Victor. Mr. Presley is usually considered a rock-'n-roll performer, but he has drawn heavily from the country repertoire.

And Opry history will always pay a tribute to one man—Edwin W. Craig, board chairman of National Life & Accident Insurance Co., which owns WSM. Last November during festival week the then governor-elect of Tennessee, Frank Clement, presented Mr. Craig with a scroll signed by Opry personnel and called him "an old mandolin picker." Gov. Clement said Mr. Craig once told him, "I would rather be complimented by the people responsible for country and western music than by any group in America."

Saturday night is "Grand Ole Opry" night in Nashville. Then 3,500 of the faithful pay $1-$1.50 to jam into the pews in Ryman Auditorium to hear the WSM program that originated in 1925. It was such "Opry" singers as Roy Acuff and more recently Elvis Presley who are responsible for the growth of Nashville as the nation's leading country and western music center.
Music City didn't just happen. It grew...slowly and over many years and from the kind of talent that has appeared regularly on WSM's GRAND OLE OPRY, THE WAKING CREW, SUNDAY DOWN SOUTH. Without WSM's long tradition of live music programming, Music City's reservoir of competent musicians would never have developed. Without these musicians there could be no Music City.

WSM
NASHVILLE, TENNESSEE

WHERE IT ALL BEGAN

WSM
CLEAR CHANNEL 650
OWNED AND OPERATED BY THE NATIONAL LIFE & ACCIDENT INSURANCE COMPANY
rent “The First Family” album, mimicking President Kennedy, into multimillion figures. Mr. Anderson is one of the five top country-and-western writers and holds a number of BMI citations.

All discussions of the growth of Nashville's music eventually get around to the profound influence of radio—playing records all day long, especially best-sellers and catchy numbers. A country record was a freak 15 years ago if it sold 300,000; now million records are almost commonplace and much of the explanation rests in the steady exposure of records provided by thousands of stations.

**How It Began** - Radio's recognition of the Nashville product goes back to the post World War II days when RCA-Victor and Decca sensed the potential of this type of music. Decca was one of the first labels to do something about it, using Owen Bradley as its artist and repertoire (a/k/a) man. Red Foley and Ernest Tubb, still active, were among early successes. Like many performers they didn't want to record in New York or Hollywood, preferring to be among friends in Nashville. Hank Snow, RCA-Victor, was another artist who preferred Tennessee.

Columbia has bought the original Bradley studio, ugly but highly functional and an engineer's dream. Like RCA-Victor's more elegant plant, it's familiar territory for technicians and performers who know every bounce and decibel off its baffles.

While Nashville was acquiring modest recognition, another phenomenon was developing in music—sheet sales started to slip with the arrival of television. Often the piano was in the living room along with the television set, which naturally captured family attention. Television's musical quota is not heavy so the public turned to radio and phonograph records for music, and radio played what it felt the public wanted to hear.

Augmenting these influences was the development of the German-born tape recorder into a simple and economical American gadget. Thus the Nashville musical revolution began to assume serious proportions.

**Constant Changes** - Television still grows, music remains popular but in varying forms and Nashville is alert to cash in on the trends. Times are still changing, however. The four-year-old Country Music Assn., new center of industry activity, is a serious trade association whose staff is headed by Mrs. Josephine Walker, executive secretary. CMA elected Gene Autry as its president last November. Wesley Rose, publisher, recorder and artist bureau head, is board chairman of CMA, which has 737 individual and 27 organizational members.

CMA is interested in the impact of radio and tv on country music. A new CMA survey shows over 1,300 radio stations programming 2 to 24 hours of country music daily. Ninety-seven stations program country music on a full-time basis. In television, CMA found, 70 stations use live country talent and 32 country music; 28 use both film and live. This makes a total of 130 tv stations active in the country field.

Ken Nelson, RCA-Victor and retiring CMA president, said CMA should make “the invasion of television its No. 1 project and objective for 1963.”

When he took over the CMA presidency last November, Gene Autry recalled the slow acceptance of country and western music three decades ago. “Now country music is accepted all over the world,” he explained, “and is performed by leading artists and bands who use, copy and borrow from country music.” He added that requests have come recently from Japan, where the music has been heard on American Armed Forces Radio.

CMA is a serious successor to the old Country Music Disc Jockey's Assn., a semi-formal organization that once met in Nashville every autumn under somewhat convivial auspices, earnestly soliciting all the free discs in sight.

**Widely Travel** - Nashville's roving troupe have had indescribable millions of dollars worth of free promotion in the form of radio announcements that go about like this, “And don't forget folks, you can hear Harry's Bobcats in person...”
ROUTE 66, NAKED CITY
THE UNTOUCHABLES and SAM BENEDICT
Music by
NELSON RIDDLE

and there are 101 other regular network programs which use BMI music.

NELSON RIDDLE, who received the Billboard Award as "arranger with the most hit records in 1955" and "best orchestrator-arranger in motion pictures" Award from Down Beat in 1958 along with countless other musical honors, should now receive an award as "composer-arranger-conductor of the most top-rated TV network shows." His current TV successes match his brilliant work in the recording field as arranger-conductor for Judy Garland, Frank Sinatra, Nat Cole, Peggy Lee among many others.

BROADCASTING, January 28, 1963
Saturday night at the Odd Fellows Hall.

At one time a country troupe ranged out maybe 150 miles maximum. Now they're everywhere, including Canada and Europe, as a result of the fame that has come from radio and recordings. The WSM Opry paced this geographical spread in the two decades it was on NBC Radio network plus limited TV exposure. National Barn Dance at WLS Chicago performed a similar role along with other favorite radio programs.

The Opry and Barn Dance coverage is no longer national, but country music spreads from coast to coast. The CMA radio study, while incomplete, is valuable for its demonstrations of broadcasting's use of country music.

Stations featuring this music sometimes have trouble trying to convince Madison or Michigan Avenue their audiences are profitable buys, according to Jerry Glaser, vice president-general manager of WENO Madison-Nashville. "They still look at me on nine out of 10 calls with those marinied eyes and ask sneeringly, 'You mean people listen to that stuff?' But we try to sell them a way of using country music rather than to attempt to convert them to the charm of the music itself. After all, we've got to get them exposed." Mr. Glaser made his comments at a panel discussion during the music festival last autumn.

"On the other hand," Earl Hotze, account executive of Gardner Adv. Co., St. Louis, said, "nobody really tried to sell us on country music this year. Reps and station personnel sell the stations but not the music. Agencies are just beginning to recognize the country music market but it's not yet well defined in the advertising world."

Los Angeles Listens • Metropolitan Los Angeles has a 24-hour country music station, KFOX-AM-FM at Long Beach. "Don't make the mistake of downgrading country music," vice president Dick Schofield warned. "It's the music of Americans." He said 86% of the Los Angeles population has a country background, adding that the am-fm operation is sold out solidly midnight to 6 a.m.

"Country music needs careful programming," he said, catering to the tastes of an audience that is mostly middle-class augmented by the more recent college and coffee shop set. He added a reminder, "Nashville's musicians are the best songwriters; they're ad lib virtuosos."

Metropolitan Washington has two country music stations, WAVA-AM-FM Arlington, Va., play "Americana" music. WDON Silver Spring, Md., started the new year by going country from sign-on to 2 p.m. CKLW Detroit has joined the country list. There's at least one country station around most major markets.

WCMS Norfolk, Va., cites its rating progress to show the popularity of carefully programmed, diversified country music. It scorns the nasal vocalists.

A national representative firm, Country Music Sales, handles Country Music Network. It is headed by Charles Bernard and represents 50 stations in 26 states that feature basic country music. The rep firm has headquarters in New York.

The explanation for this nationwide musical transition can best be stated by those most responsible. Jim Denny, who at 52 operates his own artist bureau and Cedarwood Publishing Co. in Nashville, went through chore boy tasks and Opry operations at WSM to become head of the station's artist bureau—and then he decided to go in business for himself.

At any given moment he'll have one or more artists or troupes in distant countries in addition to American bookings. His list includes two top country artists who play $500 to $5,000 a show. Cedarwood has 25 employees and writers in Nashville, plus offices in Berlin and London. In addition Mr. Denny owns three Georgia radio stations—WJAT Swainsboro, WBRO Waynesboro and WSNT Sandersville. Among his artists are Webb Pierce, Jimmy Dean, Minnie Pearl and Justin Tubb. "We're giving people what they want," he said simply. His calculations lie behind the $40-million estimate of Nashville's music economy.

European Origins • The popularity of country music in Europe takes this art form right back where it started. Many of the old folk songs were brought over by immigrants from the British Isles and the Continent. They headed out into the hinterlands, many stopping in Tennessee after pushing through Cumberland Gap. This is often cited as one of the reasons folk music has been especially well liked in Tennessee. A foreign musician, Bill Fuller of the Royal Showband of Waterford, Ireland, says Americans "have no idea how popular country music is in Europe." Interviewed during an American tour, he said, "We play your Nashville numbers in Ireland and they like it because it's our kind of music." And a December dispatch from the Rome bureau of the Chicago Daily News said, "The folk singing revival in the United States has spilled over to Italy. American folk songs are repeated everywhere." The Kingston Trio and Harry Bellafonte lead in record sales, the News said, but the youngsters like to play folk music themselves and it has spurred the learning of English lyrics.

"Country music was rebuffed in New

York,” Wesley Rose recalled. “Even in the postwar years they looked down their noses at us as Tin Pan Alley turned over its business to a younger generation that commutes from the suburbs and takes a three-hour lunch. On the other hand many of our Nashville composers start their writing day at 6 a.m. They write of memories, the only permanent thing you get out of life.”

One of the leading figures in Nashville music, Mr. Rose said the city will continue to grow as a music center so long as it provides good songs. His composer father, Fred Rose of Tin Pan Alley background (“Red Hot Mama,” “Deed I Do”), started Nashville’s publishing industry with Roy Acuff, featured Opry star, as anchor man.

Looking back a decade and more, Mr. Rose said Nashville’s music industry was small and backward for years. Then a young composing genius started turning out songs that started to draw nationwide attention. His name was Hank Williams, whose works are still on the top-tune lists 10 years after his death.

“Hank gave us the strength to crack the popular music field,” Wesley Rose said. Now the business started by the elder Rose has grown and the Acuff-Rose publishing firm is often classed as one of the largest in the music world.

Incidentally the still-important sheet-music business has undergone a technical overhaul. Music Type Service, in Nashville, has an intricate but cost-cutting method of providing camera-ready masters for music printers. It started in 1959 with Acuff-Rose Publications (BMI) and its Milene Music affiliate (ASCAP) as first customer.

The younger Rose appraises a song by having it performed while he works at his desk. “If I judge a song by hearing it,” he said, “If it pulls me away from the sheaf of papers, then I know it has something. To me Broadway show music is all alike.” He said the classical influence is spreading in Nashville but added, “Our music will always be simple because modern people are heading toward ways of simplifying the living process.”

Role of Broadcasting — “Radio is the basic cause of Nashville’s musical growth,” Mr. Rose says. “It reaches the masses and plays the music they want. We owe radio tremendous thanks.” A portrait of Hank Williams hangs in the Acuff-Rose office. The Williams royalties are said to exceed those of Jerome Kern and Cole Porter.

Owen Bradley, who with his brother owned the Bradley studio (sold to Columbia recently) noted that pop records build names and the pops get the most radio exposure. He’s Decca’s a&r man in Nashville but remains active as a performer and directs his own 16-piece band over weekends.

Shelby Singleton, vice president of the Mercury label, makes another point. “Nashville is uninhibited,” he said, “providing a chance to experiment. Our music isn’t just a job; it’s a way of life to these sincere musicians.”

Others emphasize the lower production costs due to simple arrangements that are often jotted down on scratch pads and to the ample talent supply. The spontaneous arrangements are conceived in minutes whereas a New York arranger may require a week of writing, lots of money and a costly orchestra.

Single Center — Goddard Lieberson, president of Columbia Records Div., CBS Inc., estimated nearly 80% of single record hits come from Nashville. He said the success of the local product traces back to early American folklore, the post-Civil War minstrels and the ability of the songs to document the growth of a pioneering nation. “Nashville is finally finding its level in the musical world,” he said.

Harlan Howard and Boudleau Bryan, successful composers, agree that radio is paramount in the spreading popularity of country music. Like many other composers they cite the opportunity provided by BMI, augmented by radio performances, to give new composers a chance to be auditioned and performed. The bearded Bryant is a former symphonic violinist in Atlanta. Now he collaborates with Mrs. Bryan and sings some of his own numbers.

Joe Allison, a&r for the Liberty label, said, “Radio is the greatest single force, the omnipotent factor, in the Nashville miracle. This city is the new Madison Avenue of the popular-country music

Nashville's composing - performing couple, Felice and Boudleau Bryant, combine professional musical activities with helpful hints in performance of Bryant compositions, many of which are among national favorites.

Among delighted beneficiaries of all this Nashville progress and the popularity of country music are the musical instrument companies. At the Nashville festival last November Michael Cole, eastern sales manager of Pender sales, Santa Ana, Calif., said sales of guitars and other musical instruments are "way up" and attributed this fortuitous trend to radio performance of country music. A plain or acoustic guitar runs from $40 to $500, depending on the quality of workmanship; electronic versions are $300 to $400.

And so Nashville sits in the spotlight of musical growth. Its music may be simple, weepy, joyous, reverent. Whatever its type, people feel it's meant for them—even for New Yorkers. After contemplating Flatt & Scruggs recordings, a New York Times reviewer wrote, "The Jamboree and Banjo discs capture the driving excitement... and..."
are showcases for Mr. Scruggs' widely imitated use of the five-string banjo and Mr. Flatt's buoyant singing." He added that Flatt & Scruggs and their Foggy Mountain Boys have established themselves firmly in New York. Flatt & Scruggs are heard weekly on the popular CBS-TV series, *Beverly Hillbillies*.

Corny, simple, heartstring-tearing or whatever it is, music talks in Nashville —$40 million worth.

**Music festival week draws the faithful**

One week out of every 52 the patient citizens of Nashville turn over their downtown to the uninhibited antics of several thousand visitors who come in November to worship at the shrine of country music.

The might of the electronic guitar is goaded into assorted sonic booms with the aid of the nearest 110-volt floor plug as gaudily costumed instrument luggers huddle in hotel lobbies and corridors, exalting in the cacaphony and hoping an astute talent scout might be overwhelmed by the sheer muscle of their artistry.

Most civic rules are off during Music Festival Week, which is sponsored and programmed by WSM Nashville and shared by the four-year-old Country Music Assn. The panels, meetings and feedouts are supported by major recording firms for the benefit of several hundred radio disc jockeys, a thousand or more guitar and bull fiddle players and assorted fan clubs whose teenage, or even middleage, members often have artists' names crocheted on their sweaters or, in some exhuberant cases, on the seats of their pants.

All these migrants to country music's mecca join artists, record company executives and other members in the crushing crowds that overwhelm hotel lobbies and exhibitors' hospitality suites.

**Business Too ●** Despite this chaos, important business is done by the Country Music Assn., which manages to read its minutes, hear reports and stage an orderly convention beyond reach of those who come just for the fun.

Many in the music industry aren't quite sure whether it's all worthwhile. Nashville hosteries make a killing; WSM is still amazed at the magic of its *Grand Ole Opry*; the local gendarmes, who years ago had their paddy wagons booked hours ahead, now have few major incidents except for the double-parked, block-long Cadillacs of visiting dj's who make the trek to meet others of their ilk and to chat with names artists they have helped direct to fame.

The 1962 version, the 11th festival

*BIGGEST UNDUPPLICATED AUDIENCE*

Represented Nationally by Adam Young, Inc.
week, reflected the steady transition from abandoned revelry to the somewhat restrained enthusiasm that has been taking place in the last decade. Sartorially there's not much difference.

A name performer would sooner be caught without his guitar than undressed in the bizarre, crocheted, high-chrome rigs his fans seem to expect.

Aside from a hotel crisis during festival week, businessmen making Nashville calls are likely to see little evidence of the city's $40-million music economy unless they happen to be in the same phase of the music business and run out to the 15 studios and scattered offices in the section loosely known as Record Row.

A Clan Apart • The local folk pay little attention to the music industry except during festival week. A dial twister motoring around Nashville on the eve of last November's festival was surprised to find WSM playing incidental music from Mendelssohn's Midsummer Night's Dream instead of good old mountain music or a range dirge.

A tour of night clubs during festival week revealed this musical curio—there isn't a country combo within five miles working regularly at a club. Cocktail lounges play standards instead of country stuff. WENO Madison, a few miles out, is the only fulltime country music station.

The metropolitan city of Nashville, with a total population of 415,000, is an industrial center fanning out from the Cumberland River. Main income sources are industry (chemicals, glass, apparel and shoes), government (it's the state capital) and music, plus the various commercial complexes of the modern community.

Business and artistic talents are merged in Nashville's music industry, carrying the city to high rank in this phase of American business and culture. L to r: Roy Acuff, one of the early developers of Nashville popularity in the broadcast and recording fields, and music publisher as well as talent agent; Carl Smith, vocalist; Don Gibson, composer-singer; the late Hank Williams, whose songs are classics in the country field and are featured in the Ray Charles albums; Chet Atkins, RCA Victor executive, performer, a&r man; Sue Thompson, vocalist.

**Eastern, western music meet in Nashville**

**UNION OF TWO POSES A SEMANTIC MYSTERY**

Wanted: a definition of "Country Music."

And another: "the Nashville Sound."

They're basic and they're real in this fast-growing musical center but efforts to analyze the semantics of Nashville often end up in confusion.

At the current stage of musical history the term country music is a complete misnomer. Often it's linked with western music—shortened to c&w. Country or c&w—neither term is accurate or adequate.

**Many Types •** Actually the general terms cover many musical types, including a substantial share of the popular (pop) record production. There's a saying around Nashville that goes like this: A country record becomes a pop when it sells 100,000 copies.

Just to make it confusing, there's a fast-growing type of music coming under the classification of country-oriented. A record is known as country-oriented when it is recorded in Nashville, or when it is based on a song with country influence, or when it reflects the informal accompaniment typical of Nashville.

One of these years the semantic mysteries of country music will be solved and more precise terminology will arise out of normal evolutionary processes. Meantime there are a score of terms that come under the general category of country music.

Here are some of the terms tossed about in the musical business: folk, authentic folk, hard folk, country folk, pop folk, blue grass, hoedown, moun-

Decca executives and two stars confer at a Nashville studio (l to r): Owen Bradley, a&r executive; Webb Pierce and Brenda Lee, performers; Martin P. Salkin, vice president; Leonard Schneider, executive vice president.

and they keep coming back. Country music performers are really actors who tell a story so the public will believe it," he adds.

Country music is hard to define but it's easy to discuss; around music centers it's hard not to get involved in a swapping of views about the subject. There are a few thoughts that generally run something like this:

- Country music has the soul-searching touch of a mother's tear and the hippy rhythm of a bull-fiddler with 50 fingers.
- It's calculated corn—music about the things that make people tick.
- The old fiddlers whose screeches must haunt Stradivarius in his grave are waging a losing battle against violinists who've had music lessons.
- Grandma's corn cob pipe is giving way to a cigarette holder.
- Most country music has an itchy-foot beat that appears in endless and often uncharted variety.

Add them up and the result is a plain indication that a new and typically American musical art form is in an evolutionary stage.

**Definition Wanted** • ''Nashville is still seeking a formula, a label or a definition for its product," said Owen Bradley, Decca artist-and-repertoire man who has grown up with the city's music industry. "Right now it could be said to be 'down the middle with the masses.' People's tastes change and our music is becoming broader. Actually we're a cross-section of many types of music. Whatever we do, whatever the name of our product, it will always be spontaneous, natural and deep out of the heart."

"Don't use the term hillbilly around Nashville," suggested Stephen H. Sholes, West Coast operations manager for RCA-Victor Div. He recalled that originally one country record might sell well at Dallas, another at Charlotte and a third at Atlanta. "This sectionalized acceptance has disappeared," he said.

The term "Nashville Sound" is applied to recordings that come out of the Tennessee city's studios.

Around the recording industry Nashville Sound symbolizes free-and-easy background music that puts vocalists at ease. Pop, rhythm, hayseed—no matter the style—it's relaxing and catchy.

**Not Always Simple** • They like to say around Nashville that recording sessions are unplanned and unarranged. Actually they aren't always that simple. An arrangement may be merely the spontaneous offerings of the side musicians who support a soloist or it may be a well-planned musical score. Generally it's the former.

Everybody talks constantly about the Nashville Sound but the sum of these observations is a symptom rather than a specific type of music. There's plenty of agreement that Nashville recordings have a feeling of informality. But any discussion of the technical aspects of this sound winds up in a maze of engineering terms, musical jargon and the latest sales data for hit records.

In essence, artists like to record in Nashville because the studio people are skilled and know every echo that bounces off each baffle. They know the control room boys and are at home in their chairs and will make every instrument come out effectively—not too loud and not too soft. They like the friendly cooperation of the side men, who join in a round-robin arranging session that may consume only a few minutes but emerges as a smooth production.

**Musicians Cooperate** • Nashville's side men are good. Many who profess they can't read a note of music are merely living up to a tradition that is fed in the belief it helps sell records. Their cordial cooperation with artists always delights those who have endured the clammy gaze of Hollywood and New York musicians.

And the artist and repertory representatives, who guide a recording through from selection of song and artist to the studio performance, know their music and their performers and—of course—their public. Their role is absolutely critical. The presence of Owen Bradley, Joe Allison, Chet Atkins or any other a&r men practically guarantees a professional product.

A New Yorker has described the Nashville Sound as merely "fewer musicians." Often they're fewer but by no means inferior. Among the recent converts to Nashville's family-style recording procedure is Johnny Ray (see photo, page 69).

The Nashville Sound fits into the out-of-the-heart motif of the city's recordings. Some pros claim they can identify some of the side men or the choral combo in a blindfold test.

What is happening is a meeting of styles. New York and Hollywood, finally catching up with current musical history, now borrow heavily from Nashville libraries and musical styles. And Nashville is adding diversified instrumental backgrounds, often using symphony players in supporting casts.
THE MEDIA

STANTON: ‘END LIMITATIONS’
CBS president calls for an end to barriers to coverage of Congress, courts, politics

In an address before a special joint session of the North Dakota Legislature, CBS President Frank Stanton called last Wednesday for an end to limitations on radio-tv coverage of Congress, legislatures, courts and political campaigns.

He urged the lawmakers, who were observing their third biennial “Broadcasting Day,” to give their support “by both action and advocacy.”

“If it is difficult to tell Congress that in meeting 20th century responsibilities we ought to avail ourselves of 20th century tools,” Dr. Stanton said. “It may be convincing to show them” by admitting microphones and cameras to cover state legislative sessions, as some states have done.

He also called upon the legislators and their guests, who included Gov. William L. Guy and other North Dakota officials, to help lift the barriers of the American Bar Assn.’s Canon 35 against courtroom access, which he called a “canon of a dead age”; and to speak out for repeal of the equal-time law governing political broadcasting (Sec. 315), which he said “needs to be thrown out.”

Horse-and-Buggy Treatment • Dr. Stanton said that “no one could conceive of a workable government functioning today without the typewriter or the telephone or the airplane.” Yet, he said, the advantages of “the fastest and most immediate tools of communication that we have” are being curtailed by failure to give radio and tv the same rights as the rest of the press.

He called for support of measures introduced by Rep. Martha Griffiths (D-Mich.) and Rep. George Meader (R-Mich.) to permit radio, tv and photographic coverage of the House of Representatives’ public hearings (BROADCASTING, Jan. 14). The measures (H. Res. 53, 54, 77, 78) would give House committees discretion—as Senate committees now have—to permit such coverage.

“I myself do not think that such discretion is alone a satisfactory answer,” Dr. Stanton said. “But the Griffiths and Meader resolutions are at least a start in breaking down an absolute and rigid barrier.

Dignity Issue • He said the bar association is worrying about “the wrong things” in clinging to Canon 35 on grounds that it protects “the essential dignity” of court proceedings.

“In my own view,” he said, “the essential dignity of the proceedings of any court of any free people consists in their being open and freely accessible to the people. Dignity does not mean merely austerity or remoteness or seclusion... decorum is utterly meaningless once the courtroom door is closed to public surveillance. A first definition of dignity is ‘intrinsic worth,’ and from ancient times, dating from the abandonment of the star chamber, the intrinsic worth of our courts is centered on their openness... .

“Technical advances no longer make applicable old arguments about the obtrusiveness of broadcasting equipment. Charges that broadcasters would sensationalize trials are unsupported by facts. It is a strange irony indeed to find, in defense of justice, a theory that broadcasters be concluded guilty of something that they have not done on the ground that they might do it.”

Dr. Stanton said that “any society that stands still will go under,” and that “in some respects we are either standing pat or crawling with tortuous slowness when we ought to be moving with speed, with courage and with confidence.”

Standing Still • In failing to un-do the restrictions of the equal-time law, he said, “we are not even crawling—

CBS Inc.’s Stanton

Lower the barricade

we are standing stock still.”

He expressed hope that in setting aside a “Broadcasting Day” the North Dakota legislature was presenting “an example that other legislatures will follow in recognizing the invaluable—perhaps the pivotally important—part that radio and television can play in a modern democracy.”

He suggested that North Dakota might go even further:

“Is it not possible that you might accelerate and simplify the complex process of representative government if there were greater use of electronic reporting?... This state, with its widespread broadcasting activity, could serve as the pacesetter of a 20th century self-governing society determined to make the fullest use of 20th century tools to interest and inform its voters.”

Dr. Stanton’s address was carried, live or delayed, on television and radio stations throughout the state.

KMEX-TV sues KALI, for over $1 million

A suit for over $1 million damages has been filed in Los Angeles Superior Court by KMEX-TV, Spanish-language uhf (ch. 34) tv station, against KALI San Gabriel, Calif., Spanish-language radio station.

Citing unfair competition consisting of trade libel and disparagement, the complaint states that James Coyle, manager of KALI, and others at the station have circulated a pamphlet among advertisers and advertising agencies containing allegedly erroneous information about the number of tv sets capable of

‘Nonsense’ on ratings

Dr. Frank Stanton last week said a published article’s implication that an “overemphasis” on gaining good ratings makes “neglected stepchildren of news and public affairs” was “plain nonsense.”

Dr. Stanton, president of CBS Inc., made his comments in a newsletter to network employees.

His remarks were in obvious reference to a recent Newsweek magazine article that professed to discuss what was at stake at CBS-TV from the viewpoint of the network having achieved high ratings in its programs this season.

To the contrary, CBS-TV’s record, according to Dr. Stanton, reveals “news and informational broadcasting” increased 34.5% in 1962 over 1961.
No radio for postmen

Regional postal authorities prompted KCRC Enid, Okla., to air an editorial on what it considers an unwarranted government intervention.

KCRC's complaint is that postmen are now forbidden to carry portable radios in their appointed rounds. The station's editorial said, "... with the Civil Defense warning systems and the severe weather season coming on, we feel it is doing a disservice to our postmen not to let them carry and listen to a transistor radio. ..."

receiving uhf tv programs. The pamphlet sets the total at 25,000, according to the KMEX-TV complaint, whereas the actual number of sets capable of getting KMEX-TV programs is well over 75,000.

The suit seeks $500,000 for damage to KMEX-TV's reputation, $500,000 for punitive damages and over $100,000 for loss of prospective advertising. Defendants are Telebroadcasters Inc., operator of KALI, Mr. Coyle, Associated Research Co. and a number of John Does.

SALES TOTAL $9.4 MILLION

WDBO-AM-FM-TV sold for $6 million to Outlet Co.; The Gannett Co. buys WREX-TV for $3.4 million

Two station transfers totaling around $9.4 million in considerations were announced last week. The Outlet Co., the department store licensee of WJAR-AM-TV Providence, R. I., is buying WDBO-AM-FM-TV Orlando, Fla., for around $6 million. The Gannett Co. Inc., which owns several broadcast and newspaper properties, is paying $3,420,000 for WREX-TV Rockford, Ill.

The Orlando preliminary agreement was announced by Joseph S. (Dody) Sinclair, president of The Outlet Co., buyer, and trustees of the estate of the late William S. Cherry Jr., representing Cherry Broadcasting Co., the Orlando licensee whose outstanding stock will be sold. The sale does not include the Cherry-Plaza Hotel in Orlando, now owned by Cherry Broadcasting.

The Rockford transaction was announced by Paul Miller, president of Gannett, and Swan Hillman, president of Greater Rockford Television Inc., licensee of WREX-TV. The price includes station land and buildings.

Both transactions are subject to FCC approval. Arnold F. Schoen Jr. will continue as general manager of WDBO-AM-FM-TV. Mr. Hillman and Joe M. Baisch, vice president-general manager of WREX-TV, will continue as directors of the new purchasing company formed by Gannett, WREX-TV Inc., of which Mr. Miller will be president.

WDBO-TV is on ch. 6, operates with 100 kw visual and 50 kw aural and is a primary affiliate of CBS-TV; WDBO ($500 kc, 5 kw, night directional) is a CBS Radio affiliate; WDBO-FM (92.3 mc, 25 kw) duplicates WDBO programs.

WREX-TV has Rockford's only vhf assignment (ch. 13); the station operates with 229 kw visual and 115 kw aural and is a primary affiliate of ABC-TV and secondary affiliate of CBS-TV.

Rockford Broadcasters Inc., licensee of WROK (1440 kc, 1 kw day, 500 w night) and WROK-FM (97.5 mc, 16 kw) and 22.8% owner of WREX-TV, is not included in the sale.

Gannett Newspapers stations are WHIC-AM-TV, Rochester, N. Y.; WINK-AM-TV Binghamton, N. Y.; WENY Elmira, N. Y.; and WDAN Danville, Ill. Its once-proposed plans to purchase WAVY-TV Norfolk, Va., were canceled some time ago.

The Rockford transaction was handled by Philip L. Kelser & Assoc., New York financial counsel.

Changing hands

ANNOUNCED - The following sales of station interests were reported last week subject to FCC approval:

- WDBO-AM-FM-TV Orlando, Fla.: Sold by the Cherry Broadcasting Co. to The Outlet Co., for about $6 million (see story above).
- WREX-TV (ch. 13) Rockford, Ill.: Sold by Greater Rockford Television Inc. to The Gannett Co. Inc. for $3,420,000 (see story above). Sale was handled by Philip L. Kelser & Assoc., New York.
- WMAS-AM-FM Springfield, Mass.: Sold by Gerald Harrison, estates of Carl S. Wheeler & Amelia Wheeler, and others to Southern New England Broadcasting Co., principally owned by Julian Gross, for $340,000. Mr. Gross is former owner of WKNB-AM-TV New Britain, Conn., and is currently applicant for a new am in West Hartford, that state. Sellers also own WLLH

APPROVED • The following transfers of station interests were among those approved by the FCC last week (for other commission activities see For The Record, page 96).

• KBIC-TV Los Angeles: Sold by John Poole to Martha White Mills Inc. and H. C. Young Jr. for $180,000. Mr. Young Jr. along with Walter Duke owns WENO Madison, Tenn.; Martha White Mills plans to buy Mr. Duke's half interest in WENO. The Young Jr. and White Mills combined ownership of KBIC-TV will then be transferred to Central Broadcasting Corp., licensee of the Madison station, making that company the parent (95%) of KBIC-TV licensee Central Broadcasting of California. KBIC-TV, now dark, is assigned ch. 22, with 540 kw.

• KOAT-TV Albuquerque, N. M., and KVOA-TV Tucson, Ariz.: Sold by Clinton D. McKinnon (40%), Bernard Weinberg, Arthur A. Desser and Harold B. Garfield (each 20%) to WGAL Inc., primarily owned by Steinman family, for $3,250,000. WGAL owns WGAL-AM-FM-TV Lancaster, Pa., and Steinman family has interest in WDEL-AM-FM Wilmington, Del., and WEST-AM-FM Easton, WORK York, WKDO Harrisburg and WLEV-TV Bethlehem, all Pennsylvania. KOAT-TV (ch. 7) is affiliated with ABC-TV, KVOA-TV (ch. 4) with NBC-TV.

Three major ball clubs note radio-tv plans

Radio-tv plans for the 1963 baseball season were announced last week by the Milwaukee Braves, Pittsburgh Pirates and Kansas City Athletics.

In the case of the Braves, it was a further relaxation of the club's ban against tv. Former owner Lou Perini had maintained a strict tv black-out for nine years, fearing an adverse effect on the gate. Mr. Perini did permit 15 road telecasts in 1962 when the Braves' attendance dropped.

William C. Bartholomay, board chairman of the new syndicate which purchased the Braves this winter, said 25 games will be telecast by WTMJ-TV Milwaukee and relayed to a statewide network. As an experiment, five of the games will be home contests.

Radio rights to the Braves' baseball have been acquired by WEMP Milwaukee which will broadcast all games as well as establish a state radio network.

The Pirates' entire 162-game schedule plus eight pre-season exhibitions will be broadcast by KDKA Pittsburgh for Atlantic Refining Co., the Pittsburgh Brewing Co. and Mellon Bank, according to KDKA General Manager L. R. Rawlins. The same sponsors will present a minimum of 33 away games on KDKA-TV, General Manager Jerome R. Reeves said.

The Athletics will have 40 road games on WDAF-TV Kansas City and the R. J. Reynolds Tobacco Co., through William Esty Co., already has signed for quarter sponsorship. The 162-game regular season and 27-game exhibition schedule will be carried by WDAF Kansas City. That station last week announced that Guy's Food Inc., Kansas City, has bought one-sixth of the radio coverage through Winius Brandon Adv., that city.

MINOW REVIVES 12-YEAR-OLD PROPOSAL

Wants citizens advisory group to criticize radio-tv

A 12-year-old proposal was resurrected last week when FCC Chairman Newton N. Minow suggested that a citizens advisory board be created to appraise and report on the state of broadcasting every year. William Benton, publisher of the Encyclopaedia Britannica echoed Mr. Minow's view.

Mr. Benton, while a U. S. Senator from Connecticut in 1951, had urged that this step be taken, and last week he shared Commissioner Minow's belief that a citizen's commission is still appropriate in 1963. Messrs. Minow and Benton embodied these remarks in speeches made before the tenth anniversary convention, Center for the Study of Democratic Institutions, in New York on Jan. 22.

Mr. Minow, who opened a panel session devoted to "The Responsibilities of the Mass Media," raised the subject of a citizen's commission when he pointed out that tv needs "outside criticism and independent review of our policies." He mentioned that in October 1951 Sen. William Benton proposed the establishment of a citizen's board for radio and tv, and added:

"The board then proposed by Sen. Benton would have issued an annual advisory to the Congress, to the FCC and the public, reviewing the year's progress, or lack of progress in the public service rendered by radio and television, and made suggestions as to how

APPRAISING INVOLVES

NO MAGIC!

The recipe is a liberal one of industry knowledge, a like portion of hard work, a fair share of common sense, and more than a smidgeon of honesty.

We provided these ingredients while evaluating almost $20,000.000.00 worth of broadcast property in 1962.

Our service is thorough and the price reasonable.

such public service could be developed.

"The board was never created. I think it should have been. It is not too late."

Long Try • Mr. Benton said that he had been urging the setting up of a public or private commission to review broadcasting for more than a decade. He claimed that the only highly organized pressure exerted on tv, the FCC and the Congress have been exercised by commercial interests. This, he said, has resulted in television being "abandoned almost exclusively to escapist entertainment."

"The existence of an advisory commission or board would give a powerful voice to those who view radio-tv as an instrument for 'the public interest, convenience and necessity,' the great phase of the early congressional act," Mr. Benton asserted.

He noted that the commission or board would have no other power than "the respect its finding could command." Mr. Benton said he believes in the creation of a privately constituted board, affiliated with a university.

In other portions of his speech, Chairman Minow declared that in the decade ahead, the television industry faces these problems:

• It must find a way to present political broadcasts on the air so that tv will not be limited only to wealthy candidates or those dependent on special interests.
• It must expand the scope of programming to meet more satisfactorily the needs of the local community and specialized viewing groups.
• It must find an adequate economic base of support for a national educational tv network.
• It must encourage the setting up of more local tv stations and hopefully this will be helped by the advent of all-channel tv receivers, which should stimulate the establishment of uhf outlets.

Another speaker at the convocation was Sylvester L. (Pat) Weaver, board chairman of McCann-Erickson (International), who claimed that an expansion in the number of tv channels will lead to an improvement in the cultural quality of tv programs. He said that tv can and will be a tool to be used as an educational force throughout the world and its potential in this area still has to be tapped.

FCC ON GRIDDLE AT ATHENS

Marks, Labunski swing on FCC at Georgia institute; broadcaster group condemns Omaha tv hearing

A record attendance at the 18th annual Georgia Radio & Tv Institute in Athens last week heard broadcasters and attorneys attack the current regulatory policies of the FCC and Commissioner E. William Henry discuss the future of fm.

The sponsoring Georgia Assn. of Broadcasters got into the act by adopting a resolution condemning the FCC's Omaha hearing (beginning today) on local tv programming (see page 38). Commissioner Henry will preside in Omaha.

Broadcasters 250 strong from three states attended the institute along with 300 college students from the co-sponsoring U. of Georgia Henry W. Grady School of Journalism. Georgia Gov. Carl E. Sanders closed the sessions with an address carried live on special network of 155 radio stations.

Washington attorney Leonard Marks sounded the keynote when he called for an end to the harrassment of broadcasters by the FCC. He said the average station owner spends more time worrying about a renewal of his license than he does operating his station. Mr. Marks recommended a drastic revision in the makeup of the FCC: an administrator to make all decisions and grants and thus free the commissioners for policy matters (see page 44).

Dangerous In-Laws • Stephen B. Labunski, vice president and general manager of WMCA New York, struck back at what he called "broadcasting's dangerous gang of in-laws"—groups and individuals who habitually nag at radio and tv.

Speaking from the same platform where Commissioner Henry addressed the institute, Mr. Labunski specifically included the FCC in this "dangerous gang."

"What broadcasters find unsettling," he said, "is that appointees to our favorite regulatory agency tend to have strong emotional views about radio and television and begin voicing opinions or casting maledictions about before they even get the seat warm. In this respect, FCC commissioners are just like everybody else."

After noting instances of what he called in-law pressures applied by sponsors and others, Mr. Labunski continued:

"Members of the FCC staff engaged in a letter-writing campaign designed to intimidate television stations facing license renewals into altering their program proposals (Broadcasting, Dec. 3, 1962). An alteration of such proposals in the designated areas usually brought a renewal by return mail—which says something about the efficiency of our sometimes beleagured Post Office Dept.

"But it says something else, something very disturbing indeed, about how a pernicious bureaucratic mind feeds on timidity and grows like a noxious weed if not restrained. It's meager comfort to be told subsequently that the commissioners themselves didn't know that members of their staff were playing Russian roulette with license renewal, but I am sure the commissioners would have to agree that, somewhat like licensees, they, too, are ultimately responsible for what goes out over their airwaves."

(For Mr. Labunski's comments at the Georgia Institute on the FCC hearing in Omaha on local tv programming, see page 38).

Saturday's Child • Commissioner Henry saw fm radio as Saturday's child grown up. The future of fm lies in (1) the single radio service in small markets, and (2) participation in multi-station markets, he said.

The currently existing freeze on new fm stations is necessary, Commissioner Henry stated, because the FCC found that fm service was developing the same "undesirable tendencies" which accompanied the growth of am radio. It now appears that an fm table of allocations, as proposed in FCC rule-making, is necessary for the continued orderly growth of fm and to assure the availability of frequencies for small markets, he said.

If nighttime fm service is to be equitably distributed, the locations of stations cannot be left to be determined solely by the desires of individual applicants, the commissioner said. "I would hope to see the day soon when the prospective broadcaster in the small community will automatically apply for an fm, rather for an am authorization," he said.

Bunker Offer • Edmund C. Bunker, president-elect of Radio Advertising Bureau, stated that the bureau is engaged in a drive to get the removal of radio sales practices "to make the job of media selling that much easier and more effective."

Mr. Bunker offered journalism students RAB's facilities as an unofficial—and unpaid—"employment service" to attract more college-trained young people into radio, a field he described as having "great promise and a great need for the right young people." He invited students to submit resumes to RAB for circulation among the bureau's 1,300 member stations.

Sander Vancour, NBC News White House correspondent, told the Georgia institute that tv soon will take the lead
in the coverage of news. He called for the extension of regular, daily newscasts to 30 minutes by both networks and local stations. "The 15-minute tv news program is a hand-me-down from the 15-minute radio report."

Answers Newspaper • Mr. Vanour also answered an editorial by the St. Louis Globe-Democrat which criticized a Dec. 17, 1962, interview with President Kennedy by the NBC newsmen and his counterparts for the other two networks. The Globe-Democrat charged the tv newsmen did not ask pointed questions of the President because their employers "operate under a public license." He pointed out that the networks are not licensed by the FCC and said he would match NBC's fearless reporting against that of any newspaper.

A special radio presentation by CBS Radio Spot Sales was featured at the institute. Maurice Webster, vice president and general manager, told a sales workshop that this is a time for radio sales people to take advantage of a new advertiser-agency in radio.

NAB members get nominating forms

Nominating forms for 13 upcoming vacancies on the NAB Radio Board have been sent to member stations; actual ballots will be mailed Feb. 13. Terms of the nine directors of odd-numbered districts, one fm and three at-large directors, expire with the close of the NAB convention April 3.

Four of the 13 radio directors are not eligible for re-election, having served the limit of two consecutive two-year terms. These are John S. Booth (District 3), WCHA Chambersburg, Pa.; Hugh O. Potter (District 7), WOMI Owensboro, Ky.; Odin S. Ramsland (District 11), KDAL Duluth, Minn., and A. Boyd Kelley (District 13), KRRV Sherman, Tex.

The nominating forms are due back in NAB headquarters next Monday (Feb. 4). After nominees have been contacted, the ballots will be sent to member stations. These forms must be returned to the NAB by Feb. 28; the results will be certified the next day.

Other radio directors whose terms expire include: Carleton D. Brown (District 1), WTVL Waterville, Me.; James L. Howe (District 5), WIRA Fort Pierce, Fla.; George T. Frechette (District 9), WFHR Wisconsin Rapids, Wis.; B. Floyd Farr (District 15), KEEN San Jose, Calif.; Ray Johnson (District 17), KMED Medford, Ore.; John S. Hayes (at-large), Post-Newsweek Stations; Willard Schroeder (board chairman and at-large director), WOOD Grand Rapids, Mich.; Ben Sanders (at-large), KICD Spencer, Iowa, and Ben Strouse (fm director), WWDC Washington.

The terms of four NAB Tv Board members also expire at the convention and successors will be both nominated and elected at that time. They include James D. Russell, KKTV (TV) Colorado Springs; Otto P. Brandt, KING-TV Seattle; Robert F. Wright, WTOK-TV Meridian, Miss., and Clair R. McCollough, Steinman Stations, chairman of the NAB combined boards. Mr. McCollough also has served two consecutive two-year terms and is not eligible for re-election.

Ratings attacked by religious broadcasters

**CALLED 'GOLDEN CALF' THAT RADIO-TV MEN WORSHIP**

Top government, industry and religious leaders highlighted the 20th Anniversary Convention of the National Religious Broadcasters in Washington last week. The convention was slanted heavily toward the forthcoming space age in communications and the promise it holds for religious broadcasters.

Two leaders of the NRB, President Eugene R. Bertermann and Dr. Peter Eldersveld, attacked the "tyranny" of rating services before the 160 delegates from all over the world.

The NRB approved a federation with the World Conference on Missionary Communications into a new group known as the International Christian Broadcasters. The two original organizations will continue to maintain their own identity. The international federation was formed to provide a common agency "to set appropriate standards and to provide liaison with governments, regulatory groups and the broadcasting industry."

One of the major addresses to NRB was made by FCC Commissioner Frederick W. Ford, who hit the FCC's policy of local tv program hearings and efforts to adopt NAB commercial codes into the commission's rules (see page 38 and 50).

Sen. Warren Magnuson (D-Wash.), chairman of the Senate Commerce Committee, told the NRB delegates that the amount of time devoted to religious programming does not adequately reflect the importance of religion in American life. "Our task is to increase the quantity of religious broadcasts and telecasts without diminution of the present high quality of so many fine religious programs," he said.

As chairman of the Commerce Committee, Sen. Magnuson asked NRB for "guidance" on how best to achieve this objective. He pointed out, however, that it is beyond the power of Congress or the FCC to determine program content.

Smoke and smog compete in Hollywood

Tobacco "smoke" continues to follow NAB President LeRoy Collins wherever he goes since his Portland, Ore., speech last fall asking broadcasters to take the lead in eliminating cigarette advertising designed to have a special impact on minors. (Broadcasting, Nov. 26, 1962.)

In Hollywood last Monday (Jan. 21) to attend a breakfast hosted by the Hollywood Museum Assoc., (see below), Gov. Collins was asked the inevitable question by a newsmen as to whether his views remained the same. The NAB president replied:

"I didn't know that this subject would be part of this news conference, but certainly the answer is no. I have not changed my mind. I have a rather deep conviction on this subject. I suggested that the [NAB] codes be amended in order to encourage more restraints against broadcast advertising which has a special impact on minors. Our code board has that under advisement (Broadcasting, Jan. 21).

"[The board] felt that it was not in a position to recommend specific action by our general board . . . but it did recommend that we continue the studies in this area and especially that it wait and obtain from the Public Health Service of the U.S. the results of an investigation and study which it now has underway and which it expects to be concluded in about five months. After the results of that study becomes known, then it may well make more specific recommendations. Our board will meet next June and I am personally hopeful that there will be a more specific recommendation available from our boards at that time."

Communications, said that NRB must "force itself to new types of programs, built by daring creative writing and production."

A special NRB study showed that its members spent $13.7 million for air time on commercial stations in 1961. Of the total, religious radio programs in the U.S. account for $8.7 million and tv $1.88 million. NRB was organized in 1944 to improve and advance religious broadcasting. Included in its membership are 75 U.S. radio stations.

NAB endorses museum

A planned $14 million Hollywood Museum to perpetuate the history and foster the interests of motion pictures, television, radio and the arts was officially endorsed last week by the NAB.

Announcement of NAB support and a pledge by the association of full cooperation in the project was made jointly by NAB President LeRoy Collins and Sol Lesser, president of Hollywood Museum Assoc.

Nominations sought

by Broadcast Pioneers

The Broadcast Pioneers opened nominations last week for awards to be made at that organization's banquet meeting April 2 in Chicago.

Paul W. Morency, chairman of the group's Hall of Fame and awards committee, outlining nominating procedures, noted that anyone in broadcasting or an allied field could submit nominations. The purpose of the Hall of Fame awards is to acknowledge "achievement and service in building and advancing the art of broadcasting." To qualify for election a candidate must have been deceased two years prior to election at the annual pioneers meeting.

All nominations must be accompanied by a brief biography of the candidate and should be sent to Mr. Morency, president, Travelers Broadcasting Service, 3 Constitution Plaza, Hartford, Conn.

EQUIPMENT & ENGINEERING

MANUFACTURERS PLAN FOR COLOR

National Video, Philco, others to start soon

National Video Corp., Chicago, said last week it has a production line up and is ready to make color tv picture tubes as soon as its suppliers bring in necessary components. The company plans to make the 23-inch rectangular design of Motorola Inc., which it expects to sell to Motorola, as well as the industry's standard 21-inch round color tube pioneered by RCA.

National Video's pilot run is set for about March 1. How many of which style tube it will make will depend on orders, the company said. Motorola, long a hold-out in the color set manufacturing field, plans to be in the market with its new color line this coming fall and will disclose its line probably in June.

Another Chicago tube maker, Rauland Corp., a subsidiary of Zenith Radio Corp., also is putting final touches on its own design of a new color tv picture tube and is expected to start a pilot run about April. Design details of the Rauland tube have not been disclosed but it is expected that it will be sold to both Zenith and to the trade.

In other color developments around the country, Sylvania Electric Products Inc., now expects its new color picture tube will be ready for the market in the final quarter of the year.

Philco Corp., Philadelphia, which has been marketing color television receivers manufactured by RCA since last year, will start production of the sets in its own facilities this spring.

The Ford Motor Co. subsidiary, expects to increase its sales of color sets by 300 to 400% above 1962.

GE announces new transistorized tv camera

A transistorized vidicon studio camera described as capable of handling four out of five of today's studio productions at operating cost reductions...
up to 90% is being announced today (Jan. 28) by General Electric in Syracuse.

GE called the camera, Type PE-23, the first such "truly professional" transistorized vidicon studio camera and said it was designed specifically for news, panel and quiz shows, which, the company noted, constitute up to 80% of today's studio shows.

H. E. Smith, manager of marketing for GE's technical products operation in Syracuse, thought the new camera also would be used extensively for educational TV studio productions. Type PE-23's initial cost is around 50% less than a comparable image orthicon unit, said Mr. Smith. The difference is in the vidicon tube's price—25% less than a comparable image orthicon unit—and the vidicon's greater life expectancy of three to five times more than an image orthicon, Mr. Smith said. Another economy is in the reduced power requirements—only 155 watts, less monitoring required.

The semiconductor circuits are several times more reliable than comparable tube circuits, according to user reports on other transistorized equipment, Mr. Smith said. Operating temperature is lower for the transistorized circuits and a blower is needed only for the vidicon area, assuring more stable operation of the pickup tube, it's claimed.

GE says the camera head includes the transistorized power supply and video power channel, saving up to 14 cubic feet of rack space. Its performance, the maker claims, meets or exceeds Electronic Industries Assn. standards.

**Technical topics...**

New mike • Shure Brothers Inc., Evansville, Ind., has announced a new dual impedance microphone, specifically designed for lavaliere use. Also useful as a hand mike, the model 560 unit weighs 5 ounces and is listed at $42.50, including lavaliere cord and clip assembly.

**Pencil tube** • Electronic Tube Div. of Sylvania Electric Products, Emporium, Pa., is manufacturing a new fixed tuned uhf oscillator module pencil tube, designated 5794. The tube uses a six volt, 160 ma heater and features low frequency drift.

---

**INTERNATIONAL**

**TV RATINGS BATTLE IN BRITAIN**

**BBC-TV's audience claims challenged by commercial tv**

A BBC claim that its television audience in the last quarter of 1962 was bigger than the commercial network's has been challenged by Television Audience Measurement Ltd., the TV rating firm which is partly owned by the A. C. Nielsen Co.

The latest BBC audience research department report states that for the first time since the end of 1955, BBC-TV's viewing audience over a full quarter was greater than that of commercial television. In the October-December 1962 period those able to choose between the two networks gave 52% of their viewing time to BBC-TV and 48% to commercial television, BBC claimed. In October-December 1961 the ratio was BBC-TV 45% and commercial network 55%. Two years ago BBC-TV's share was 39% and commercial tv had 61%.

TAM said that according to its calculations for the same three months at last year's end the commercial network had 57% of the viewers' time and BBC-TV only 43%.

A spokesman for the Independent Television Companies Assn. said "The BBC's claim to have won a majority in the last quarter of the year is not concealed... though it is true that there has been a swing towards BBC."

A BBC spokesman commented, "We stand by our audience research department."

**Other Info** • The BBC report also shows that the proportion of the population which can now receive television is approaching 90%. During the past year the number of people with tv sets which can tune in to both BBC and commercial programs increased by 2.3 million. There was a decrease of 800,000 in the number who could receive only BBC-TV, leaving only 1.8 million so equipped. The net increase of 1.5 million brought the total number of people with television sets at home to 42.6 million.

There was an increase from 33.9 million to 34.8 million in the number of people who viewed television at all on the average day. But the number of people who confined their day's viewing to BBC-TV rose from 9.8 million to 11.5 million, while the number who watched only the commercial network fell from 10 million to 8.5 million, according to the BBC study. The number who viewed both networks on the same day rose from 14.1 million to 14.8 million.

Despite the decline in the number of sets which can only pick up BBC-TV, the audiences for BBC-TV programs were much higher in October-December 1962 (average 7.7 million) than in the same months of 1961 (average 6.7 million). The average commercial network audience was smaller, with 6.7 million in October-December 1962 as against 7.1 million the year before, the BBC study claims.

The amount of time spent in viewing was between 15 and 16 hours per week.
British tv restrictions on tobacco ads

The restrictive wall of "don'ts" erected against cigarette advertisers on tv in Great Britain is bound to increase the cost of producing tv commercials for telecast in that country and "without, in view of the restrictive rules, increasing their advertising effectiveness."

This warning was contained in a talk on U. S. advertising and marketing overseas (particularly in common market countries) delivered by Alfred W. de Jonge last week before the American Marketing Assn., in New York. Mr. de Jonge is vice president, international operations, at Benton & Bowles, New York.

Mr. de Jonge referred to "notes of guidance" issued by the Independent Television Companies Assn. Ltd. for tv advertisements for cigarettes and "hand rolling" tobacco.

The association contains broad principle in this statement: "Advertising should not encourage people, and young people in particular, to believe that they will have any advantage romantically, physically, socially or in their jobs if they smoke."

Danger Areas - There are then contained a number of applications suggested as "areas of dangers" to be avoided in the production of cigarette commercials. Copy that has "hero appeal" and appeal to "manliness"; appeal to social success, or suggestion that smoking is part of the modern, smart, sophisticated or fashionable way of life, and that one should smoke to be "in the swim."

Romantic appeal is to be avoided as is the creation of a romantic atmosphere in which it is implied that cigarettes are an essential ingredient, and also any impression of "exaggerated satisfaction" (deep inhaling or expressions of intense enjoyment associated with smoking).

There are still other avoidance areas suggested in Great Britain. They include "implicit encouragement" of habitual or excessive smoking, or impressions of dependence on cigarettes, the use of advertisements of young people unmistakably under the age of 21, and the suggestion that cigarettes overcome "nerves" or strain, or direct offers of cigarettes as an aid to relaxation or concentration.

Asked Mr. de Jonge: "how would you like to write tv commercials—or develop a marketing plan—under such limitations?"

He said: "Restrictions of this kind, unfortunately, are exceptional. It could well be that on the two-way street of international trade, such restrictive rulings will find their way into U. S. tv codes."

"LeRoy Collins had a few words to say about this not too long ago."

Ford Foundation sends specialists to India

The Ford Foundation has sent a group of four communications specialists to India to advise that country on developing its communications.

The consulting team, which will spend a month in New Delhi working with the communication research and study center of the Indian Ministry of Information, includes Robert B. Hudson, programming vice president of the National Educational Television & Radio Center; Wilbur Schramm, director of the Institute for Communication Research at Stanford U.; C. R. Carpenter of Penn State U.; and Lloyd Sonnerlad, Australian journalist.

They will examine India's whole communications system, recommend future lines of development and give advice on the development of an institute for communications training.

British commercial tv starts etv programs

The first adult education programs on Britain's commercial tv network began Jan. 20 after government authorization of broadcast time for adult etv in its second White Paper.

For one hour, 10-11 a.m. on Sundays, three 20-minute programs are running for an initial three months. Two teach written and spoken English and the third gives instruction in French.

Bernard Sendall, deputy director-general of the Independent Television Authority, has emphasized that the programs are essentially experimental. The experience gained will be used to develop plans for adult etv which the ITA and some of the tv companies hope to present in the 1963-64 academic year. To guide the network in this new programming the authority is appointing an advisory committee of people in the fields of liberal adult education and further and technical education.

GE of South Africa buys equipment firms

Selectomatic Radio Corp. is a manufacturer of domestic radio equipment. B. H. Electric Co. makes semiconductor equipment, electrical controls and allied products.

H. Silberman has been appointed managing director of the newly purchased companies, as well as consultant to South African General Electric Co.

South African General Electric, which reorganized, its board of directors with purchase of the two companies, reportedly will broaden the present activities of the organization in the industrial electronics, radio and home entertainment fields.

David E. Wallin elected vp for marketing services of Hill, Rogers, Mason & Scott, Chicago advertising agency. He has been director of marketing services for firm since June 1962. Before joining HRM&S, Mr. Wallin was new products manager and director of marketing research services for Simoniz Co., Chicago, account research manager in Chicago office of J. Walter Thompson Co., and member of finance planning group of U.S. Gypsum Co.

Robert Belden, James Cameron and Robert Leonhard, members of contact department of Young & Rubicam, New York, elected vps. Mr. Belden joined Y&R in 1950 and was appointed account executive in 1956. Mr. Cameron joined agency in 1951, while Mr. Leonhard came to Y&R last year from Detroit office of Leo Burnett Co. where he served as vp and manager.

Henry Billsten, art supervisor at Earle Ludgin & Co., Chicago, elected vp. Mr. Billsten has been with agency for 26 years and supervised its art department for past two years.

Worthing H. Stone, former vp and general manager of Detroit office of Meldrum & Fewsmith where he worked for Ford Motor Co.'s trailer account for past 15 years, joins Foote, Cone & Belding, Chicago, as vp and supervisor of agency's newly acquired International Harvester Corp., farm equipment division account.

Jerome L. Simmons, general manager of Enyart & Rose, and George Burtt, active in client service, elected vps of Los Angeles-based advertising agency.

Myra E. Janco, vp of Roche, Rickerd, Henri, Hurst, Chicago, since last summer, promoted to executive vp. She formerly headed her own agency, Wahash Adv., in Terre Haute, Ind., and Cincinnati.

Robert A. Hilton, vp in charge of marketing for Libenfield & Co., Chicago, named to newly created post of executive vice president.

Norman R. Anderson, senior vp of John W. Shaw Adv., Chicago, named director of client services and chairman of plans board. George E. Filippetti, vp, named director of creative services. Dr. Jaye S. Niefeld, vp, appointed director of marketing and media. All three, along with J. C. Allen, executive vp, also have been elected to agency's board of directors.

Other officers elected: board chairman, Alfred Beckman, ABC vp in Washington; vice president, Robert Kennedy of Kear & Kennedy, consulting engineers; secretary, Maury Long, vp and general manager, Broadcast; treasurer, Lawrence Richardson, WTOP-AM-FM-TV Washington; assistant treasurer, Howard Frazier, management consultant.

D.C. Broadcasters Club elects officers

Frank Snell, vp and account supervisor at Compton Adv., New York, joins Lennen & Newell, that city, as senior vp and management supervisor on Warner-Lambert account.

Margaret R. Samuel, advertising supervisor of Colgate-Palmolive (Jamaica) Ltd., named advertising manager. Sheridan, others get reassignments at FCC

James B. Sheridan, special assistant to FCC Chairman Newton N. Minow and a 22-year veteran with the commission, was named Broadcast Bureau chief succeeding Kenneth Cox, who has been nominated to be a member of the commission.

The appointment is one of four decided on but not yet announced by the commission.

Two appointments that were announced last week are: Richard F. Sloan, former assistant executive officer, to chief of FCC’s Budget & Fiscal Div.; and Pauline M. Foster, assistant personnel officer, to assistant chief of the Manpower Utilization & Survey Div.

The other unannounced appointments are:

- Sylvia Kessler, acting chief of Renewal & Transfer, to be chief of Opinions & Review.
- Robert Rawson, chief of the Hearing Division, to chief of Renewal & Transfer Division.
- James Barr, assistant chief of the Broadcast Bureau, to chief of Safety & Special Services Bureau.

Mr. Sheridan, who was brought into the chairman’s office in 1960 by then Chairman Frederick W. Ford, is an economist who joined the commission in 1941 as a research consultant in the old office of chief accountant. Six years later he became chief of the Broadcast Bureau’s Business Economics Branch and in 1950 was named assistant chief of the Bureau’s Economic’s Div. He was acting chief of that division from 1956 to 1959.

Mr. Sheridan, a native of Newark, N.J., graduated from Rutgers U. in 1936 and completed a course in communications research at Columbia U. in 1941.

Miss Kessler was named acting chief of Renewal & Transfer last summer when Joseph Nelson, who had headed that division, was appointed to the Review Board. Miss Kessler, who graduated from Southeastern Law School in Washington, D.C., in 1936, joined the commission as an attorney in 1942. She left the post of chief of Office of Opinions & Review in 1953 to enter private communications law practice, but returned to the FCC in 1961.

Mr. Rawson, an attorney, has been in government service since 1935, including four years during World War II when he was an officer in Naval Intelligence and in a PT Boat squadron in the South Pacific. Mr. Rawson earned his law degree from Columbus (now Catholic) U. and worked for the Agriculture and Justice Depts. before joining the commission in 1946. He was named assistant chief of the Hearing Division in 1953, acting chief in 1954 and chief in 1958.

Mr. Barr started with the commission in 1938 as an engineer with the New York field office. He was assigned to the Broadcast Bureau in 1952 and was named its chief in 1956. Mr. Barr, who studied electrical engineering at Georgia Institute of Technology and Southern Methodist University, spent five years with the Southwestern Bell Telephone Co., and a like period as an engineer with the Southwest Broadcasting Co. (KTAT Fort Worth; KTSA San Antonio; KOMA Oklahoma City; WACO Waco, and KNOW Austin).

and vp of General Public Relations division, effective Feb. 4. Mr. Whipple served as account supervisor for BBDO, New York, for six years prior to joining Curtis Publishing.

Fred Zeller, formerly senior copy writer at Benton & Bowles, New York, joins Harmon-Kardon, Plainview, N.Y., as advertising-promotion manager.

Nancy F. Stephenson, vp and member of operations committee of J. Walter Thompson, New York, elected to board of directors, Mrs. Stephenson joined agency in 1935 as secretary, later became copywriter, and in 1947 was promoted to copy group head. She was elected vp in 1955.

Robert L. Phillips, vp and account executive at Phillips-Ramsey Inc., San Diego, Calif., advertising agency, named director of firm’s newly created special account division. Vivien B. Kern has been appointed Mr. Phillips’ assistant.

William M. Walker, former account executive with Young & Rubicam, New York, joins De Garmo Inc., that city, as account supervisor.

Robert H. Homan, assistant account executive at Morse International, New York, named account executive. Mr. Homan joined Morse in 1959 as copywriter. He will be responsible for Vicks VapoRub and VapoSteam group.

Jay Veever, former partner of Boston pr firm of Cloud & Co., joins advertising and marketing group of Richard Montgomery Mason Inc., that city.
Mr. Geyer, account for Knodel 150 R.

Mr. Gleason, Mr. Lawler, joins L. & William joins Squibb, formerly group. was Sudler Houston came that Chicago, project Eli States Media, that summer 1962 Joseph Sudler was served that he was served as copywriter. He was with Sudler & Hennessey, New York, as group-copy chief. Mr. Schneider formerly was copy supervisor. Mr. Sollish joined Y&R in 1962 from Chirurg & Cairns, Boston, where he was copy chief. Mrs. Francis came to agency in 1956 from Bryan Houston Co., where she served as account executive. Mr. Kramer formerly was with Benton & Bowles.

Mike Schneider and John Wirtz join Sudler & Hennessey, New York, as group-copy chiefs. Mr. Schneider formerly served in copy department of William McAdams, New York, while Mr. Wirtz was copywriter with Robert E. Wilson, that city. Other additions to Sudler & Hennessey's copywriting staff are Steve Abruscato from Young & Rubicam; Harry Sweeney from E. R. Squibb, and Edith Rosoff from Dean L. Burdick.

George E. Burgess Jr., formerly with advertising and sales promotion department of Rust Craft Greeting Cards, appointed radio-tv director of Horton, Church & Goff, Providence, R.I., advertising agency.

George Gale, former creative director for Rutledge Advertising Co., St. Louis, joins creative department of Winius-Brandon Co., that city.

Hearing cases

INITIAL DECISIONS

• Hearing Examiner H. Gifford Irion issued initial decision looking toward granting application of Torrington Bestg. Inc. to change facilities of WTOP Torrington, Conn., from 1590 kc. 200 w. untl. to 110 kc. 500 w.-N. 1 kw-LS. DA-2, Action Jan. 23.

• Hearing Examiner Jay A. Kyle issued initial decision looking toward granting application of Austin Bestg. Inc. for new tv on ch. 24 in Austin, Tex. Action Jan 22.

• Hearing Examiner Elizabeth C. Smith issued initial decision looking toward granting application of Potomac Bestg. Inc. for new am station in 1590 kc. 1 kw, in Keyser, W.Va.: condition and pre-dismissal operation with daytime facilities precluded pending final decision in Doc. 14419, Action Jan. 22.

DESIGNATED FOR HEARING

• By memorandum opinion & order, commission designated for hearing applications of Central Wisconsin Tv Inc. for additional time to construct WCWT (TV) (ch. 9) Wausau, Wis., and for assignment of ep to Midocontinent Bestg. Co. for $34,439. On its own motion, commission made Wisconsin Citizens’ Committee for Educational T.V. Inc., which filed opposing petitions, and Wisconsin Valley T.V. Corp. (WSBA-TV, etc., T. Wauaus), parties to proceedings. Hearing

issues will determine (1) whether Central Wisconsin has been diligent in proceeding with construction of station, whether traffic is involved and whether it has been candid in its representations to commission; (2) whether there were, under what circumstances, Citizens’ Committee learned of pro- posed sale of WCWT, sought to acquire its construction permit, from whom it obtained necessary funds, and amount obtained and terms and conditions thereof; and (3) full facts surrounding Wisconsin Valley, agreement to donate funds to Citizens’ Commit- tee, whether latter had agreement or understanding with Wisconsin Valley to file in inst- ant matters, and whether Wisconsin Valley has engaged in course of action which constitutes abuse of commission’s processes. Chinn, Minnow dissented, further inquiry, Action Jan. 25.

OTHER ACTIONS

• By order, granted motion by KWK Radio Inc. and extended time to Jan. 21 to file reply to exceptions and supporting brief of Broadcast Bureau to initial decision in proceeding on revocation of license of KWK St. Louis, Mo. Action Jan. 18.

• By notice of inquiry, commission instituted investigatory proceeding to determine whether The McLendon Corp. was candid in representations made, or failed to disclose certain intentions, in connection with its acquisition and operation of WQXR Chicago and whether it complied with con- struction permit in Chicago to reconsideration and provide programming to satisfy local tastes, needs and desires. Action Jan. 29.

Routine roundup

ACTIONS BY REVIEW BOARD

• By memorandum opinion & order in proceeding on applications of Mineola Bestg. Co. and Center Bestg. Inc. for new am stations in Mineola, and Pittsburg, respectively, both Texas, directed Center to comply with Sec. 14835-6, (1) of rules concerning publication of intended withdrawal of its application, so that other persons may be afforded further opportuni- ty to apply for facilities specified in Center application. Applicants have joined in which. Motion to dismiss the proceeding would be dismissed and Mineola would not be granted more than $2,000 as partial reimbursement of costs incurred in connection with latter’s application. Ac- tion Jan. 18.

• By memorandum opinion & order, granted petition by Harry Newby for waive- ning Sec. 1387 (b) of rules concerning late file- ment late public of local notice of hearing in action filed by New am in Cambridge, Minn. Action Jan. 21.

• By memorandum opinion & order, dismissed request for Examiners’ opinion in proceeding on applications of Laramie Radio & Television Co., and Albany Elec- tronics Inc. for new vhf tv translator sta- tions in Laramie and Tie Siding, both Wyoming. Proceedings were proposed for station, but does not fall within scheme established by particularity. Of Board has not been delegated authority to deviate therefrom. Board Chinn, Berkemeyer is- sued concurring statement, Action Jan. 21.

• By memorandum opinion & order in proceeding on applications of Reliable Bestg. Co. and Blue Ridge Mountain Bestg. Inc. for new am stations in Mineola, and Pittsburg, respectively, both Texas, directed Center to comply with Sec. 14750-7, (1) in part late filed peti- tion by Reliable, to extent of granting, Inter- est New York, N. Y., to extent of granting it leave to intervene as party to proceeding; (2) granted petition by Radio Elizabeth for late acceptance of its opposition to WQXR’s part granting to Reliable; (3) on other matters made no determination with respect to issues to determine whether Radio Eliza- beth’s proposal was not in any way contrary to provisions of Sec. 3.37 of rules, and if so, whether circumstances exist which would warrant waiver; and (4) directed Radio Elizabeth to take field intensity measurement on its proposed site, WQXR’s current arc towards WQXR, and from WQXR site toward site proposed by Radio Elizabeth, to establish presence or absence of such overlap. Action Jan. 18.

• Scheduled oral argument for Feb. 19 in proceeding on application of Wilkes Bestg. Co. for new am in Mocksville, N. C. Ac- tion Jan. 18.

• By memorandum opinion & order in consolidated proceeding on am applications of Charles County Bestg. Inc. for new stations in La Plata and Waldorf, respectively, both Maryland, in Docs. 14748-8, denied Charles County’s appeal from Examiner’s Op. 5, 1962, ruling which denied its petition for reconsideration and to amend its application, subsequent to design- ating site of hearing stations and submitting its of original non-directional proposal. Ac- tion Jan. 17.

• By memorandum opinion & order in consolidated proceeding on am application of New York City, Bestg. and Broadcasting, Shelby County Bestg. Inc. (WHEY), Millington, and Huntington, West Virginia, in Docs. 14738-30, all Tennesseans, in Docs. 14318 et al., denied late filed petition by Broadcast Bureau to enlarge issues; and on own motion, enlarged hearing issues to determine areas and population which would receive primary service from Huntington’s proposal, and availability of other primary and secondary areas at such stations. Action Jan. 16.

• Granted petition by KPNF Bestg. Corp. (KPNF), Shafter, California, and extended

Return to  
Elegance  
WITH

*Includes 3 stations operating on unreserved channels.

CPS 103 closed for TOTAL and 64 were Greenwich 93 Please 114 in hearing, TOTAL 513 CPS. proceeding and hearing to By Applications Commercial includes in specified following motions respectively. My issues Fla. 1735 for WLBW-TV in proposed new license, Inc., by申请人 of WLBW-TV, Inc. and People's Community TV Assn, Inc. for new vhf translator stations in Smackover, Ark. and LaVale, Md. Action Jan. 15.

By Hearing Examiner Millard F. French
- Upon request by Broadcast Bureau and with consent of party, extended from Jan. 21 to Feb. 19 time to file proposed findings of fact and conclusions in proceeding on applications of Kent-Ravenna Best Co., Joseph P. Wardlaw Jr. and Portage County Best Corp. for new fm stations in Kent, Canton and Kent-Ravenna, all Ohio, respectively. Action Jan. 21.

In consolidated am proceeding on applications of Greenwich Best Corp., Greenwich Conn., and others, 21, respectively. (2) accepted sworn statement attached to petition as testimony of Blair A. Walliser, d/b/a Milford Best Co., Milford, Conn., and, as such, incorporates the same as if it were given orally in hearing, and (3) closed record. Dismissed as mooted Milford's motion to fix hearing dates and extend time for filing proposed findings and replies. Action Jan. 14.

By Hearing Examiner Walther W. Guenther
- In proceeding on application of Triangulation Publications Inc. (WNIC-TV), New Haven, Conn., denied requests of respondents Connecticut TV Inc. and Springfield TV Best Corp. for issuance of subpoenas tecum to presidents of Travelers Service Corp., WVT-VC, Inc., and WCT-VC, Inc., General Phonevision Co. (WHCT), both Springfield, Connecticut, and American Captain Ship Corp. (WHYN-TV), Springfield, Mass., concerning financial and business affairs of those licensees. (2) and by separate memorandum opinion & order formalized ruling made at Jan. 10 further hearing and denied respondents' joint motion for ruling (a) that applicant has failed to sustain its burden of proof under issues (2, 5, and 6), that its application must therefore be denied and that no further proceedings are necessary, and (b) that until disposition of motion respondents have no obligation to prepare or present rebuttal findings or to consider the hearing examiner's motion to dismiss joint motion. Action Jan. 11.

Pursuant to agreement reached at Jan. 11 further prehearing conference in proceeding on application of Hudson & Richardson of Hudson, Va. and Valley Best Corp. (WEOK), Poughkeepsie, N. Y., established certain procedural dates, superseding, to extent applicable, dates set forth in Hearing Examiner's Dec. 10 order, and continued Jan. 14 hearing to Jan. 21, Action Jan. 11.

By Hearing Examiner H. Gilford Iiron

By Hearing Examiner David I. Kraushaar
- In proceeding on application of Paul Donahue for preem in WLBW-TV on ch. 10 in Chicago, Ill., continued Feb. 6 hearing to Feb. 25, ordered that applicant will circulate two copies of his exhibits to other parties and one to Hearing Examiner by Feb. 4, and incorporated by reference herein transcript of Jan. 18 prehearing conference and approved understandings, agreements, and procedural ground rules established at prehearing conference, Action Jan. 18.

After further prehearing conference on Jan. 21 in proceeding on applications of

Help Wanted—(Cont’d)

Technical

Chief engineer wanted by leading station in booming central California coast market. Must have 1st class, and be able assume responsibility. Salary and benefits, plus shift work. Sales available with good list of accounts. No engineers under 25. If you are on the air, if man can handle sales, too. Contact Mr. Richard V. KNEZ, Box 960, Lompoc, California.

New York—young 1st class engineer to work under supervision in all areas of broadcasting. Immediate position. Station Manager, WVOX, New Rochelle.

Negro Engineer capable of transmitter and receiver maintenance, and being on night watch. Must be able to carry a few hours daily on the air of R & B. Air special tape and resume to WOKE Radio, P. O. Box 1986, Columbus, Georgia.

Production—Programming, Others

News Director for radio-television operation in Midwest. Must be able to write and deliver news plus ability to head full news staff. Established opportunities with chain ownership operation. Send resume, picture, and tape to Box 101A, BROADCASTING.

Accountant. Radio chain seeks accountant experienced in assisting with chain's accounting system. Must be 33-45, married, 2 years college or equivalent. Especially interested in P. R. Practical, able to direct daily operation with intelligent and efficient management. Adequate salary, working conditions, fringe benefits. Write Box 172A, BROADCASTING.

Somewhere there is a competent radio newsman who is looking for us as well as we are looking for him. This man is good. He has been at the post only to check how much time he had before the next local newscast. He can capably supervise the entire newscast department including present activities of a number two man who ticks the same way he does. They both like working for a management which is local-news-minded and which doesn't hesitate to supply them with what it takes: mobile units, good self-powered portable tape recorders, sufficient money to feed two dozen stringers and, last but not least, adequate salaries. This man is a real pro with pride in his work, and he is smart enough to work hard and grow with a growing management which presently owns two east-coast stations and hopes to own more in the future. Salary, working conditions, write now immediately! Box 154A, BROADCASTING.

North Georgia daytimer seeking top quality newsman who is looking for us as well as we are looking for him. Has college background and previous experience. Good paid position, excellent working conditions. Will resume, tape, photo, and salary requirements first letter. Box 264A, BROADCASTING.

News Director for radio-television operation in Midwest. Must be able to write and deliver news plus ability to head full news staff. Established opportunities with chain ownership operation. Send resume, picture, and tape to Box 101A, BROADCASTING.

Little Rock’s newest radio station—KALO—l is looking for a top notch production program director. Must understand formula radio along with good up-tempo, fast-paced music. If you think you have the man, fill the bill, then contact the manager immediately. He is an old citizen, honest, dependable type, don’t waste my time and yours. No screeners, please.

Wanted, Gal Friday. Perhaps you are working in a small station now in the Southwest and ready to make a move to metropolitan market. If you are coping with traffic logs, reception, continuity, then we have an opening at KALO in Little Rock for you. We offer you a minimum of forty-five hours a week, $15 an hour to start, and other fringe benefits. You application will be kept in confidence and no one will be contacted without your permission. Job is available now.

Help Wanted—(Cont’d)

Production—Programming, Others

What compact can do everything a console recorder can?

The Ampex PR-10 gives you all the features, all the performance of a console recorder. Even remote control. And it's all wrapped up in a suitcase-sized package. That means you can take a complete recording studio out into the field, into the school, the church, industry—anywhere you need it. The PR-10 features positive push-button controls; record-safe switch; and separate erase, record and playback heads. And there's room for an optional 4-track stereo or additional playback head. There's also a new electro-dynamic clutch system to give you fast, gentle starts and lower braking tension. If you want to monitor on-the-spot, the PR-10 has A-B switches, VU meters, phone jacks, output circuits. Moreover, electrical alignment controls are accessible through the front panel. You get all this plus a new Ampex "Four Star" one year warranty. For data write the only company with recorders, tape & memory devices for every application: Ampex Corp., 934 Charter St., Redwood City, Calif. Worldwide sales, service.
OUR RESPECTS to Marion Stephenson

She's NBC's first woman vice president

Marion Stephenson is the first woman vice president in the history of NBC and its parent RCA. She was elevated to that position last October, and received a personal letter of congratulations from Elmer W. Engstrom, RCA president, recording the corporate milestone.

As an administrative head of NBC Radio, Miss Stephenson is in what she calls the "jump seat" of the division. From her financial and corporate position, she is able to "see what is going on" in the areas of sales and programming.

From her vantage point, Miss Stephenson sees radio as "mediocre's biggest buy, and it's very underpriced."

She thinks network radio's most pressing problem in 1963 is accurate ratings analyses. Of an estimated 183 million operating radio sets, at least two-thirds are non-plug-ins, and, she notes, a way must be found to measure usage of auto and portable sets.

"We have talked with Nielsen and Sindlinger about devising more accurate ways to count radios. We're hammering on the subject to get some way of measuring audience we aren't getting credit for," she says.

Work-Study Program • NBC's first female vice president was born in Green Bay, Wis., and studied business at Antioch College, Yellow Springs, Ohio. Before she graduated, Miss Stephenson had taken six years of academic courses, in addition to participating in a work-study program.

She was required to take full-semester courses in 10 weeks, working the alternate 10-week period.

"My first job through the Antioch program," recalls Miss Stephenson, "was as a research ana for the McCall Corp. in Dayton, Ohio. I was paid $15 a week. She added that her room and board expenses in Dayton had to come out of the $15. She held secretarial jobs in Chicago and New York later in her school career.

In her fourth year at Antioch, Miss Stephenson was community government business manager on campus. After graduation in June, 1943, she went to New York and joined the accounting department of Standard Oil (New Jersey).

Miss Stephenson started working for NBC the following year quite by accident:

Having decided to go into the research writing field, she applied for a job with Time Inc., whose offices at that time were located in Rockefeller Center across the street from NBC.

An NBC Friend • After her inter-

view, Miss Stephenson decided to drop in and say "hello" to a friend who worked at NBC. "The girl," she notes, "just happened to work in the personnel department." At her friend's insistence, Miss Stephenson filled an application with NBC—noting she would like to combine advertising and accounting in her work.

"I never dreamed there would be such an opening, but the company had just gotten approval for a new job in the advertising department for someone who would watch expenses."

So, in November 1944, Miss Stephenson joined NBC as a budget clerk in the advertising and promotion department.

During her early years with NBC, Miss Stephenson attended New York U.'s Graduate School of Business at night, majoring in banking and finance. She was awarded the first Marcus Nadler Key for "excellence in finance." She received her Masters degree in Business Administration in 1948, the same year she was named business manager of NBC's advertising and promotion department.

Three years later, in 1951, she was made general ledger accountant in NBC Radio's controller department, a position she held for six months before being named budget supervisor of the department. In 1952, when the radio and tv financial departments were reorganized after a separation of several years, Miss Stephenson became budget supervisor of the joint controller's area.

The following year she was made chief budget assistant, and after holding that position for one month, became assistant to the divisional controller. Three months passed before she got her next promotion, this time as radio network budget manager. (This was in 1953, when the radio and tv networks were permanently split into separate financial units.)

Long Title • Miss Stephenson was given her longest title in February 1956: senior operations analyst in the staff administrative budget and financial evaluation area. In 1959 she was named director of business affairs of NBC Radio.

Going on trips pays off for Miss Stephenson. She recalls the job of business affairs director waited one month for her, while she was on a trip around the world and couldn't be reached to be told of the promotion. She was told promptly on her return.

Going away brought Miss Stephenson her subsequent promotion in October 1962, when she was made vice president-administration. She was told of her election the day after returning from a trip to Yugoslavia and Greece.

As vice president of administration for NBC Radio, Miss Stephenson is responsible for business affairs, sales, service and traffic and some areas of the engineering department.

"She has a somewhat unorthodox approach to the business field. Most business people," she thinks, "are involved in costs and profits mainly. They don't know that the financial side is the focal point of a whole company."

She said the NBC financial staff believes in working with the sales and programming people at the network to help them solve their problems by explaining how the financial end of the business ties in with their efforts.

Miss Stephenson is extremely confident about network radio's future. One week ago she proudly announced, "Every business day since the beginning of the year we have made at least one sale. In 1960, we moved from a seven-year loss to a profit, and we're doing better and better every year."

On the subject of audience data, Miss Stephenson feels agencies and advertisers are becoming "more and more aware that they're getting two-thirds more audience than they're paying for."

Once the ratings problem is " licked" the networks "will go farther, faster."

Miss Stephenson, a member of the International Radio-Tv Society and the Money Marketeers of New York U., lives in Bronxville, N.Y.

BROADCASTING, January 28, 1963 109
EDITORIALS

The ball is put in play

The first step in the long march toward modernization of the federal law that governs broadcasting was taken last week. We hope the first step will establish the momentum for the rest of the journey.

For it was a long first step indeed. As reported in detail elsewhere in this issue, the Federal Communications Bar Assn. has received a series of proposals for changes—some of them drastic—in the existing law. The proposals were made by some of the most respected members of the communications bar, and they merit the most thoughtful inspection by everyone connected with broadcasting.

With some of them we can agree at once. Certainly the anti-censorship section of the Communications Act ought to be strengthened to prohibit all kinds of meddling in broadcast content. Certainly Sec. 315, the political broadcasting law, ought to be repealed.

On the other hand and more complicated proposals we must reserve judgment pending a more thorough exploration of their possible consequences, although we must say the arguments advanced in their behalf are indeed attractive. The reorganization of the regulatory agency is the most sweeping of the proposals. It ought to be examined with special care.

But the need for thorough consideration does not provide an excuse for procrastination. These monographs ought to be turned into action as soon as action can be taken according to careful plan. At this point the documents must be given wide circulation, and dialogue about them must be encouraged so that the bar and, hopefully, the broadcasters who support the bar may work up definite proposals to present to Congress.

It is altogether possible to work up these proposals in time for congressional consideration this year. We would hope the work would be given tangible support by the NAB. Two weeks ago the NAB directors approved a $2 million budget for the next fiscal year. A budget of that size—the largest in the association's history—is big enough to accommodate disbursements for the most important cause on broadcasting's agenda.

Overdue upbeat

We hope that calling attention to it will not cause it to go away, but we cannot resist the opportunity to observe that an unusually strong burst of national spot radio activity has been evident lately. The first of the year being a season when spot salesmen ordinarily find it necessary to run fast in order to stand still, this January's sales spurt becomes even more satisfying by comparison.

The extent of the speed-up is reported in some detail elsewhere in this issue. Although it certainly is not applicable to all markets and involves only a few of all the advertisers who ought to be involved, the increased tempo nevertheless seems general enough and sufficiently solidly based to reflect a genuine re-kindling of interest in radio as a national advertising medium.

The reasons undoubtedly are numerous, varying in detail from one advertiser to another. One general explanation being offered last week was that the bed-rock salesmanship that radio has done over the last several years, stressing the variety and reach and economy of the medium and trying to dispel the myths about its being unglamorous and too hard to buy and administer, are at last beginning to pay off.

We like that explanation, but explanations at this point are not too important. Even if an advertiser gets into radio on a bet, he can do well if he buys enough and takes pains to use it properly.

So let's not ask too many questions. Let's just keep on selling—and occasionally knock wood. If that sounds superstitious, remember that radio has been the victim of a lot of superstitions over the years. It's entitled now to become the beneficiary of one.

Let it lie

FCC Chairman Newton Minow may have been merely buddy ing up to a former client last week when he revived William Benton's old pitch for a citizens' advisory board on broadcasting. Mr. Minow was sharing a platform with Mr. Benton, who, as owner of the Encyclopaedia Brittanica, retained Mr. Minow as a lawyer before the latter joined the FCC and reportedly has offered Mr. Minow an executive job if he leaves government service.

But on the chance that Mr. Minow has serious thoughts of breathing life into Mr. Benton's old plan, a revival of opposition to it is also appropriate.

In 1951 when Mr. Benton was a U. S. senator he failed (but not for want of trying) to get the Congress to authorize the President to appoint an 11-member advisory committee that would "advise" the FCC on broadcast matters ranging from the assignment of television channels to the establishment of program standards. As sensible people realized at the time, the kind of committee that Mr. Benton advocated would inevitably become a high-level board of presidentially-appointed censors whose every suggestion would be accorded an immediate "yes, sir" by the presidentially-appointed members of the FCC. That condition is still implied in last week's proposal.

Mr. Minow would be wise to put the pitch back where it has lain—and then hang up his shovel.

It's about time

The NAB board of directors conceded a fortnight ago that entertainment has played a part in the development of broadcasting. It voted to give the association's Distinguished Service Award for 1963 to Bob Hope.

No one can quarrel with the selection. The only question to be raised about it is why it came so late. Distinguished Service Awards had been given annually for 10 years without a nod in the direction of the performers who have caused people to buy and use all those radio and tv sets.

Mr. Hope has been cheering radio and television audiences for 25 years. It is gratifying that the NAB has at last confirmed the judgment that the American people have been exercising for a quarter of a century.

Armed with WJAC AM/FM
The Johnstown Tribune-Democrat Stations
St. Louis has developed an active “See what’s on KTVI” attitude.

We encourage it with:

**Total Information News**
6-6:30 p.m. Mon.-Fri.,
and
The Steve Allen Show
10:15 p.m. Mon.-Fri.

“Total Information News” offers residents of the greater St. Louis area a full half hour of information starting with network news that is fifteen minutes ahead of the other stations. At 6:15, they see local news in action; ten minutes of filmed reports in motion on “City Camera”. A local sports personality captures the final five with a personal “Sports Comment”.

Steve Allen simply keeps the market awake to see what will happen next.

Programming like this balanced with the ABC lineup fosters the curiosity attitude we welcome. See what’s on KTVI; it creates a buying attitude, daily!

BROADCASTING, February 4, 1963
Mobile meters

That long-demanded metered measurement of the total radio audience may not be far off. It's understood NBC Radio thinks it'll be able to announce in a few weeks that it plans to subscribe to service of that kind. Since William K. McDaniell, executive vice president in charge of NBC Radio, has been dickering with A. C. Nielsen Co. along these lines, it's assumed Nielsen has now perfected gadget that would attach to portable radio sets to record non-plug-in set usage which NBC and radio broadcasters generally have been calling for (Broadcasting, Jan. 21).

Under a new gun

Advertising acceptance standards of radio and television will be given long, hard look in Senate investigation of land deals and health-aid products that are offered to the elderly and aged. Print media have already been criticized (Broadcasting, Jan. 21). Investigation by Special Committee on Aging (or perhaps by new special subcommittee on frauds) will turn to broadcast advertising. There's conjecture that Sen. George A. Smathers (D-Fla.) may become chairman of Committee on Aging and new fraud subcommittee. Hearings in mid-January have provoked "unparalleled flood" of complaints of bilking and misrepresentations, committee sources say.

End of the line?

Some folks in high places are now saying that FCC's Omaha hearing on TV programming (story page 21) may be blessing in disguise. They predict it will be second and last one (first was in Chicago) largely because of congressional reaction. It was clear at last Thursday's hearing on confirmation of FCC Broadcast Bureau Chief Ken Cox for membership on commission that both Republican and Democratic senators looked with disfavor on such fishing expeditions. And it was apparent, too, that Mr. Cox got message.

Both Republican and Democratic senators also inquired into delays in license renewals. In inquiring of Mr. Cox about renewal backlog, Senator Thurmond (D-S.C.) observed that in broadcast cases it often happens that "justice delayed is justice denied."

Mattel winds up a new one

Big toymaker, Mattel Inc., which has been heavy user of television but critic of most children's programming now available, has come up with novel plan to get its advertising on what it thinks will be better shows. Toy company proposes to finance 260 five-minute kid shows (The Funny Company) and sell them "at low cost" to TV stations. As part of deal Mattel would buy spot positions in its programs. Mattel plans to merchandise toy reproductions of characters in its shows.

Mattel proposal was tried out on some 30 station representatives in New York meeting last week, will be explained to other reps in Los Angeles this week. Word given New York reps was that Mattel will commit at least $7.5 million over two years to its project if stations accept it. Carson/Roberts, Los Angeles, is Mattel agency.

Sweet charity

Those 10 commercial radio stations that turned over their facilities to Voice of America during Cuban crisis will get small thanks from government. VOA has already said it can't reimburse them for their service because government is not a party to its funds. Now Internal Revenue Service reportedly has indicated that stations cannot take tax deductions for lost advertising revenue—and what's more, operating expenses they incurred while carrying government propaganda to Cuba cannot be charged off in tax returns. IRS may be following precedent that contribution of broadcast time or newspaper space is not deductible as charitable contributions. Unmentioned so far but possible: act of Congress for special relief.

The Pacifica case

Strange case surrounding non-commercial FM stations operated by Pacifica Foundation in California and New York, currently being investigated by Senate Internal Security Subcommittee, shortly will be considered by FCC. License renewals of three non-commercial stations have been held up for three years, originally because questions had been raised about allegedly obscene poetry on station, but Senate committee, in closed session, is inquiring into purported "Communist infiltration" (Broadcasting, Jan. 14, 28). Stations involved are KPDK Los Angeles, KPFA Berkeley and WBAI New York.

FCC staff, it's understood, now is preparing petition for commission consideration. Question of free speech may be involved since stations carry all shades of opinion, ranging from John Birch Society to California Communist Party. But there may be other questions too, involving possibility of ownership qualifications and whether substantial amount of contributed support is derived from objectionable sources.

A look at media control

Mid-March is target date for beginning of Rep. Celler's House Antitrust Subcommittee inquiry into concentration of ownership in newspaper field, with definite radio-TV ownership overtones. For some six months (Broadcasting, Oct. 1, 1962) Celler committee staff of seven has been preparing for public hearings with several field investigations made, particularly in Los Angeles, where two newspapers folded last year, and in New Orleans, where S. I. Newhouse interests acquired ownership of Times-Picayune.

Crimp in correspondence

FCC is shortening reins on staff members who've been trying to force changes in TV station schedules by questioning local program proposals at license renewal time, WKY-TV Oklahoma City was warned last week after commission put stop to flow of staff hints that station refused to heed (story page 52). Staff also tried to clear second letter to WFAA-TV Dallas on grounds station's reply to its first had been unsatisfactory, but was told by FCC to start renewal machinery. Action on WFAA-TV renewal is expected this week.

Among those favoring immediate renewal of WFAA-TV license was Chairman Newton Minow. Last summer Mr. Minow appeared in special interview show on WFAA-TV.

The auction bloc

FCC is still considering legislative proposal to eliminate 1952 "anti-Avco" amendment to Communications Act which prohibits commission from ordering competitive bidding in station sales. Commission had stopped practice on own motion before 1952 amendment was adopted. But some members now would like amendment scrapped and commission given discretion in deciding how to proceed in station transfers.

One proposal being offered would require that proposed purchaser be able to demonstrate he could do better job of broadcasting station. Proposal, offered by Commissioner Robert T. Bartley, hasn't picked up much support. One critic says it would put premium on being a lousy broadcaster.

Shows how you get more flexibility and freedom in planning with a custom-tailored Blair Group Plan — matching the impact of the Blair stations with the marketing needs of your product. Send for your free copy today! Write Arthur H. McCoy, President, BLAIR RADIO, 717 Fifth Avenue, New York 22, New York.
ABA group opposes change in Canon 35

Canon 35 should remain as is, with slight revision, special committee of American Bar Assn. reported Friday.

Committee, which has been investigating possibility of changing prohibition against tv and radio and news photographic coverage of court trials since 1958, submitted recommendations to ABA board. ABA House of Delegates will vote on report today or tomorrow. American Bar Assn. is meeting in New Orleans.

In bow to sensitivities of broadcast industry, committee suggested that reference to radio and tv coverage as instruments that "degrade the court" be eliminated.

Report drew scathing comment from LeRoy Collins, NAB president, who called it "shocking lack of confidence in the integrity and objectivity of the judiciary."

This was pointed at references in report which hold that many judges who are elected would find it difficult to preserve proper decorum during televised trials.

Gov. Collins also said recommendation "reflects both a lack of knowledge and of understanding. . . . and is reactionary. . . ." News Directors • "Insulting" is how Bill Small, CBS News, chairman of Freedom of Information Committee of Radio-Television News Directors Assn., termed report.

Bar Assn. committee cavalierly dismissed test series proposal. Mr. Small commented, with no good reason for refusing to judge broadcast coverage on pragmatic basis.

ABA committee said tv and radio reporters may attend trials and report via their medium outside courtroom. It also emphasized that right of fair trial is protection to defendant, not requirement that trial be publicized.

Agreeing that mechanics of covering court by tv and radio has improved since 1937 when Canon 35 was adopted following Lindbergh kidnapping trial, committee said recent examples of tv coverage continue "serious doubt" that decorum of court can be maintained.

Test series suggested by RTNDA would not be "fruitful," committee said.

FCC grants WDKD stay

FCC has granted stay of its order for WDKD Kingstree, S. C., to leave the air by Feb. 8 (Broadcasting, Jan. 14). Commission said order will be stayed until 30 days after decision by appeals court on station's appeal from FCC order.

White now specialist

Frank K. White, retired network and agency executive, is embarking at 63 upon government career. Along with three other "specialists," he left Feb. 1 on two-month assignment in Europe for Dept. of Agriculture in its program to help expand overseas markets for U. S. farm products. Mr. White, now residing in Leesburg, Va., is on board of Advertising Council. He was former chairman of McCann-Erickson (International); president of NBC (1952-53); president of Mutual (1949-52); vice president and treasurer of CBS (1937-47) and treasurer and business manager of Newsweek Inc. (1936-37).

Fogarty criticizes program regulation

Testifying Friday at FCC's hearing on local programming in Omaha (see story page 30), Frank P. Fogarty, vice president of Meredith Broadcasting Co. and general manager of WOW-AM-FM-TV Omaha, expressed concern over FCC efforts to regulate programming.

During renewal period, Mr. Fogarty said, Omaha stations were required to give extensive public notices. Any complaints should have been made by public then, he said.

During afternoon FCC cross-examination, Commissioner Henry asked witness if antitrust waiver were provided, would it be feasible for three Omaha stations to get together on children's programming?

"I think it would be feasible but not desirable," Mr. Fogarty replied.

C. Alfred Larson, WOW-TV station manager, and William McBride, program director, took witness stand late Friday.

CBS-TV giving choice of 30-minute news

CBS-TV has revised its plan for half-hour evening newscasts next fall (Broadcasting, Dec. 10, 1962) to give affiliates a choice of time periods. Originally scheduled at 7-7:30 p.m. EST, weekend program will be fed at both 6:30 to 7 and 7 to 7:30. This move is intended to accommodate stations unable or unwilling to move local programming out of high-volume 7-7:30 station time.

On theory that value will be diluted by inability to deliver entire lineup at one time, network is also reducing corollary plan to return late-afternoon half-hour to affiliates for local use. Original plan contemplated return of 4:30 to 5 p.m. period; new plan is to return only 4:45 to 5 p.m. Some re-programming by network will be necessary; authorities indicated Edge of Night, now seen 4:30 to 5, will move to new period as yet undetermined.

Fm group approves rate standards

QXR Network, which has 43 fm station affiliates, has approved recommended standards that stations could adopt for their rate cards. Action is not binding on stations. Roughly, standardization would include half-hour at 60% of hour rate, quarter-hour at 40%, five minutes at 30%, all on one-time basis. Double "a" would include 5-11 p.m., Mon.-Sat., and Noon-11 p.m., Sunday, and "a" time would be all other periods. Rate for class a would be 60% of hour rate in double a. Maximum discounts in programming time: 5% for 13 weeks, 10% for 26 weeks, 15% for 39 weeks, and 20% for 52 weeks. Discount on spots depends on frequency with maximum of 15% for over 1,040 one-minute announcements per year. One-minute spot generally would be priced at 20% of hourly rate.

In other affiliate actions taken in recent meeting, it was disclosed Friday (Feb. 1), plan was put into motion to expand sustaining programming on network from average now of less than 5 hours per week to 7-10 hours weekly, and new study being prepared showing demographic profile on fm audience in QXR markets.

Joseph McDonald dies; was former NBC vp

Joseph A. McDonald, 59, partner in Washington communications law firm of Hennessey & McDonald, plunged to his death Friday (Feb. 1) from bridge near his suburban Bethesda, Md., home. His associates reported he had been despondent recently.

Mr. McDonald, former NBC vice president, was with network 20 years and was expert on labor and copyrights in broadcasting. He had been in private practice in Washington since 1958. Mr. McDonald is survived by his wife, one son and two daughters.
WEEK’S HEADLINERS

Carl R. (Cal) Giegerich, former senior vp and director of Cunningham & Walsh, New York, elected president of The Jack Wyatt Co., Dallas-New York advertising and pr firm. He succeeds founder Jack Wyatt, who moves up to board chairmanship. Following graduation from Lehigh U., Mr. Giegerich joined Newell-Emmett Co., predecessor of Cunningham & Walsh, and was responsible for creative work on Chesterfield Cigarette account. He joined Cecil & Presbrey agency in New York in 1946, and resigned as vp three years later to return to Newell-Emmett. Among accounts Mr. Giegerich has been responsible for campaigns include E. R. Squibb & Sons, Liggett & Myers, Colgate, Italian Line, American Export Lines, Eversharp and Folger Coffee. His most current project is “Let Your Fingers Do the Walking” Yellow Pages campaign for AT&T.

Henry V. (Hank) Greene Jr., sales manager of KDKA-TV Pittsburgh, appointed national tv sales manager for Westinghouse Broadcasting Co., New York, effective Feb. 15. He succeeds John Sias, who resigned recently to join Metro Broadcast TV Sales as vp and director (week’s headliners, Jan. 21). Mr. Greene joined WBC as assistant sales manager of WBZ-TV Boston, and was named to his current post in May 1959. Previously, he served as assistant to president of Mutual Broadcasting System and as manager of Boston office of Weed & Co. Westinghouse Broadcasting tv stations are WBZ-TV Boston; WIZ-TV Baltimore; KDKA-TV Pittsburgh; KYW-TV Cleveland; and KPIX (TV) San Francisco.

Charles H. Crutchfield, 34-year veteran of broadcasting, elected president of Jefferson Standard Broadcasting Co., succeeding Joseph M. Bryan, who becomes board chairman, newly created position. Mr. Bryan is retired senior vp of Jefferson Standard Life Insurance Co., board chairman of Pilot Life Insurance Co., and member of executive committee of North Carolina National Bank. Mr. Crutchfield, who joined company as announcer in 1930, was promoted to program director in 1935. He was appointed general manager when Jefferson Standard Life Insurance purchased WBT Charlotte in 1945 from CBS, was elected to board of directors following year, and named executive vp in 1952. Mr. Crutchfield is currently on board of directors of CBS affiliate research committee of National Assn. of Broadcasters; member of Radio & Television Executives Society, and board member of Charlotte Downtown Assn. Jefferson Standard Broadcasting Stations are WBT-AM-FM and WBTV (TV) Charlotte, N. C., and WBTW (TV) Florence, S. C.

Dr. George R. Town, dean of engineering at Iowa State U., Ames, was named by NAB last week as recipient of its 1963 Engineering Achievement Award (see story, page 60). Dr. Town, who directed 1957 TASO study of tv allocations, was chosen because of “his valuable contributions to technical knowledge and literature, his development of new engineering techniques and his leadership in broadcast engineering activities,” the NAB said. The award will be presented to Dr. Town on April 3 at annual broadcast engineering conference during NAB convention in Chicago.

Richard J. Farricker, executive vp of Geyer, Morey, Ballard, New York, elected president, succeeding late Sam M. Ballard. Mr. Farricker becomes third president in GMB’s 52-year history. He had been associated with Cunningham & Walsh, Kudner Agency and McCann-Erickson before joining GMB in December 1959 as executive vp. Mr. Ballard died Jan. 25 (at deadline, Jan. 28).

For other personnel changes of the week see FATES & FORTUNES

Trigg-Vaughn buys Tyler catv system

Major sale of catv system to broadcast interests was reported Friday.

Trigg-Vaughn group is acquiring Tyler, Tex., system serving 10,000 subscribers in Tyler-Jacksonville-Palestine area, plus microwave system used to bring Dallas-Fort Worth tv station to area.

Price for system, owned by Glenn Flinn and Raymond Hedge, is understood to be over $1.5 million. Mr. Flinn is chairman of National Community Tv Assn., catv trade group. Broker was Bill Daniels & Co.

Also reported Friday was acquisition of Lock Haven and Tyrone, Pa., catv systems by James M. Cox interests for undisclosed price. Purchase is subject to approval of stockholders in owning corporation. Two systems have 7,000-8,000 subscribers. Cox group already owns catv systems.

CBS Radio signs Smucker

J. M. Smucker Co., Orrville, Ohio (jellies, preserves), in launching first national ad campaign in any medium, will co-sponsor Garry Moore Radio Show on CBS Radio. Contract is for minimum of 26 weeks, beginning March 18. Agency is Wyse Adv., Cleveland.

WCBS-TV’s ‘Late Show’ marks 12th anniversary

WCBS-TV New York will celebrate 12th anniversary of its Late Show (oldest feature film program in metropolitan New York) next month by beginning all-night programming on station (closed circuit, Jan. 28). Additional programming, starting Feb. 26, will consist of motion pictures titled “Late Late Show,” Parts 2, 3 and 4. Length of films and period station starts following morning’s schedule will determine number of movies to be shown. (WCBS-TV goes on air at 5:45 a.m. weekdays; 7:15 a.m. Saturdays and Sundays.)

*Indicates first or revised listing

**FEBRUARY**

Feb. 4—Hollywood Ad Club luncheon meeting, Hollywood Roosevelt Hotel. Lucille Ball, comedienne and president of Desilu Productions, will be presented the club's "Red Carpet Award" for outstanding achievement in the field of entertainment. Miss Ball and Elliott Lewis, producer of The Lucy Show, will speak.

Feb. 4—Reply comments due on FCC proposed rulemaking to require all applicants, permittees and licensees to keep file for public inspection of all broadcast applications.

Feb. 5-6—Fifth annual midwinter conference sponsored by Advertising Federation of America and Advertising Assn. of the West, Statler-Hilton, Washington. Legislative roundup will include speakers from government and business. Speakers include: Peter G. Peterson, president of Bell & Howell, Chicago; Donald H. McGinnis, president of the Bert Margrave Broadcast Co.; Andrew Heiskell, chairman of Time Inc.; Palmer Hoye, publisher of Denver Post; Paul Rand Dixon, chairman of FTC; Newton N. Minow, chairman of FCC; and Ralston H. Coffin, vp of RCA.

Feb. 6—Stockholders meeting, Warner Bros. Pictures Inc., Wilmington, Del.

Feb. 6-7—Seventh annual legislative dinner and mid-winter convention, Michigan Assn. of Broadcasters, Jack Tar Hotel, Lansing.

Feb. 7-8—Public Service Institute sponsored by NAB in cooperation with American U., American U. Communications Center, Washington, D. C.

Feb. 9—Annual awards dinners of the Directors Guild of America will be held simultaneously in Hollywood and New York. West Coast affair will take place at the International Ballroom of the Beverly Hilton Hotel; Eastern function at the Starlight Roof of the Waldorf Astoria Hotel. Highlights of the evening will be outstanding directorial achievement for motion pictures to be announced at the Hollywood dinner with similar awards for television at the eastern function.

Feb. 9-10—Texas Assn. of Broadcasters spring convention in Austin at Commodore Perry Hotel.

Feb. 11—FCC continues NBC-Philo hearings.

Feb. 11-13 — Electronic Sales-Marketing Assn., first annual convention, Americana Hotel, New York City, A. D. Adams, vice president and general manager of New York office of Burton Brown Adv., will be convention chairman. For convention applications and more details, industry members are asked to contact Alex White, ESMA executive director, P. O. Box 1, Bellerose, L. I., N. Y.

Feb. 14-15—British Columbia Assn. of Broadcasters annual convention, Empress Hotel, Victoria, B.C.

**MARCH**

March 6—Assn. of National Advertisers workshop on tv advertising, Waldorf-Astoria Hotel, New York.

*March 7—California Assn. of Broadcasters, Mark Hopkins Hotel, San Francisco.

*March 11—Florida Assn. of Broadcasters, U. of Florida broadcasting day, Gainesville.

*March 12—Puerto Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.

March 13-15—Audio Engineering Society’s West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. FM stereo
NOW YOURS... ACTION, SUSPENSE AND DRAMA AT ITS EXCITING BEST!

JOINING "THE DETECTIVES" ARE SOME OF HOLLYWOOD'S MOST DISTINGUISHED NAMES. GUEST STARS LIKE EDWARD G. ROBINSON, JAMES WHITMORE, EVA GABOR, SPRING BYINGTON, URSULA THEISS, LOLA AUBRIGHT, PETER WHITNET, JEAN HAGEN, ROBERT MIDDLETON, MARSHA HUNT, ROBERT CULP, MARI BLANCHARD, DARRYL HICKMAN, INGER STEVENS, JACK OAKIE, SCOTT MARLOWE, VERA MILES, HAROLD J. STONE AND MANY OTHERS LEND ADDED BRILLIANCE TO THIS ACTION-FILLED SERIES.

THE DETECTIVES
STARRING ROBERT TAYLOR

CO-STARS: MARK GODDARD • TIGE ANDREWS • ADAM WEST • RUSSELL THORSON • LEE FARR

Here is one of the finest law-enforcement series available for television today. Excitement and suspense are brought to each episode as Robert Taylor and his squad of detectives bring about the solution of crimes and the apprehension of criminals. Added to the thrilling action of every episode is a blend of heart and warmth as the personal dramas that surround each of the detectives are unfolded.

Rich in production values with strong, colorful roles portrayed by outstanding guest stars; these are pluses that help assure continuing audience response to THE DETECTIVES.

ON-CAMERA BRIDGES BY ROBERT TAYLOR OFFER COMPLETE FLEXIBILITY IN PROGRAMMING. TWO HALF-HOURS BECOME ONE FULL HOUR OR ONE FULL HOUR BECOMES TWO HALF-HOURS.

The television formula for Colgate's surging sales

The accent is on tomorrow at Colgate-Palmolive, one of the nation's oldest soap makers now finding a new way of life in developing and marketing new products. Colgate doubled the number of products advertised on TV in one year, and added $165 million to its sales in the process. The company is now TV's No. 2 customer.

New applause for old TV in cultural retrospective

The Museum of Modern Art in New York will unveil this month its first "retrospective" devoted to television, giving the medium a cultural recognition heretofore reserved for such visual arts as the motion picture, architecture and painting. It's a 54-episode re-collection of the better moments from 13 seasons of television.

What's right, what's wrong with TV—and who says so

Eight men, representing nearly all shades of opinion about the television industry, were brought together on one stage to tell what's right and wrong about the medium. Among their texts, condensed in this issue, the reader can find just about all the positions you can take, and about all there is to say, on the subject.

Networks at midseason: special 3-page pullout

As usual, no TV network found the hand it drew at the first of the season good enough to stand pat on all the way through, but one almost did, CBS, running up a string of rating victories the likes of which haven't been seen ever, proved that what the people want in 1963 is (1) comedy and (2) stars. A special 3-page pullout puts it in focus.

broadcasting, disc recording and reproduction, microphones and earphones and audio applications in the space age are among topics to be dealt with in technical papers.

*March 15—Louisiana Assn. of Broadcasters, Opelousas Inn, Opelousas.

March 15—Deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.

March 15—Institute of Electrical & Electronic Engineers, Pacific computer conference, California Institute of Technology.

March 19—Extended deadline for comments in FCC inquiry into the objectionable loudness of commercial announcements and commercial continuity over am, fm and tv stations.

March 18—Reply comments to FCC's proposed fm allocations table.

March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock.

*March 26—Final date for the filing of applications for ch. 5 in Boston. Applications will compete comparatively with present occupant WHDH-TV.

*March 31-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

APRIL

*April 1—Stockholders meeting, Wometco Enterprises Inc., Miami, Fla.

*April 1-5—Canadian Assn. of Broadcasters annual convention, Royal York Hotel, Toronto, Ont.

*April 3-5—Assn. of National Advertisers West Coast meeting, Santa Barbara Hilton Hotel, Santa Barbara, Calif.

April 8—Oscar awards ceremonies, to be broadcast on ABC's radio and tv networks.

*April 18—Assn. of National Advertisers, workshop on international advertising, Hotel Plaza, New York.

April 19—Michigan AP Broadcasters Assn. meeting, Lansing.

*April 21-25—Ninety-third convention of Society of Motion Picture & Television Engineers, Tracymore Hotel, Atlantic City, N. J.

*April 26—Pennsylvania AP Broadcasters meeting in Pittsburgh.

*April 26-27—Virginia AP Broadcasters meeting, Executive Motor Hotel, Richmond. Awards in the VAPB newscasting and broadcasting contests and for public service will be presented on first night at the banquet.

April 29-May 4—"Rose d'Or" Contest; May 29-30, 1963—Television Symposium and TV Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Mon-treux, Switzerland. For further information write to Box 55, Montreux.

The Nashville story

EDITOR: HEARTY CONGRATULATIONS ON THE FINE COUNTRY MUSIC FEATURE AND ITS RELATION TO BROADCASTING [SPE-CIAL REPORT, JAN. 28], WE KNOW ALL OTHERS CONNECTED WITH THIS SPECIALIZED FORM OF RADIO JOIN US IN EXTEND-ING COMPLIMENTS FOR BOTH THE EXCEL-LENT AND CONSTRUCTIVE DEPTH REPORTING AND ALSO YOUR DEPARTURE FROM THE USUAL "LOOK HOW MUCH MONEY THE HICKS ARE MAKING" AP-PROACH. WE'RE MOST PROUD TO BE SERVING ONE OF AMERICA'S MOST CON-CENTRATED COUNTRY-FOLK MARKETS AND ARE EQUALLY PROUD TO BE WORK-ING WITH THOUSANDS OF RESPONSIBLE BUSINESS MEN AND ENTERTAINERS THAT COMprise C&W RADIO AMERICANA.—GEORGE A. CRUMP, PRESIDENT, WCMS RADIO TIDEWATER, NORFOLK, VA.

Hix admirer

EDITOR: What a delightful surprise it was to open Broadcasting and find myself in a Sid Hix cartoon [EDITORIALS, Jan. 14]. I am honored and pleased.

I have a superb spot in the middle of the wall of my office-at-home, and the

original of the cartoon would fill it beautifully. Could I have it, do you think? I would be so grateful to you and to Mr. Hix.—Joyce D. Brothers, Ph. D., National Broadcasting Co. New York.

[Dr. Brothers' psychological approach is irresistible. The cartoon original is on its way to her.]

Close agreement

EDITOR: Your editorials in broadcast-ING express my opinion almost 100%.—Joe Speidel III, president, Speidel Broadcasting Corp., South Miami, Fla.

Sales success secrets

EDITOR: . . . Since you ran the book note [BOOK NOTES, Dec. 10, 1962] on Suc cess Secrets: the Anatomy of Local Ra dio-TV Copy, I have experienced more unexpected sales. More than 10% of all radio and tv stations in the country

have bought at least one copy and many have re-ordered up to five additional books. Many of these sales are traceable directly to your magazine.

So, congratulations on the pulling power of Broadcasting. . . .—William A. Peck, San Antonio, Tex.

Good write-up

EDITOR: I thought that was a good write-up of the week's event affecting the All-Industry Committee and ASCAP [PROGRAMMING, Jan. 21]. Facts, quota-tions and plans were all accurate and well written. Good work.—Hamilton Shea, chairman, All-Industry Television Station Music License Committee, New York.

No scorekeeping

EDITOR: Broadcasting carried a letter from Joe Klaas, KYA San Francisco [OPEN MIKE, Jan. 14], in which the following sentence appeared: "And, since California Welfare Department statistics show that more teen-age unwed mothers conceive in automobiles at drive-in movies than anywhere else, perhaps we should eliminate movie advertising."

. . . Our Hollywood people advise me that the California Welfare Department does not compile such statistics and never made a report on the subject. They learned, however, that a former employee of the department had made such a statement in a report. It has been used as a basis for quotation on numerous occasions but without any basis or foundation and no formal re-port of this nature has ever been issued.

I have no doubt that drive-in movies have contributed to the population explosion but so have haystacks, barn-loads, and beds. I hope that this will not result in reducing advertising of these items.—Edward Cooper, Motion Picture Assn. of America Inc., Washington.

Bravos for Daly

EDITOR: Bravo! to Harry J. Daly for the sharp and pertinent opinions he expressed in the article, “Engineered births for radio” [LEAD STORY, Jan. 14].

If I were in the position to choose a spokesman for this radio industry, Mr. Daly would head my list of candidates for the job. . . .

The industry could use more men who would not be afraid to open fire on those of us who discredit it by engaging in unethical practices and other ne-farious forms of activities simply to gain purely selfish ends. However, at the rate things are developing, it might not be too long before a general clean-up will be forced upon us.—R. J. Ben-nett, general manager, WAYE Balti-more.
Washington, D.C. announces the appointment of McGavren-Guild company, inc. as exclusive national representative effective 4 February 1963.
Radio’s golden touch can help rebuild employe morale, too

At 6 a.m. every weekday for over two years, the main plant whistle at the Buick Motor Division of General Motors has signaled the start of a full hour of communications on WKMF, Flint, Mich., to some 16,000 Buick employees.

Our program, Factory Whistle, began as a radio experiment on WKMF but its phenomenal success as a “house organ of the air” still gets inquiries from other companies. It has even been adapted to other industrial centers. How did we pick radio to put across our employe-relations program?

Buick in mid-1960 was completing a broad program of self-appraisal and reorganization. Manufacturing standards had been overhauled. A new policy required that more quality be built into every Buick and imposed rigid reliability tests.

Early signs showed the Buick sales curve had turned upward. That was the start of the resurgence we know today has put new zip in Buick sales.

New Challenge = All of this had been brought about by a new general manager, a vice president of General Motors, Edward D. Rollert, during his first year at Buick. He then turned to employ morale in his program of reorganization.

It was apparent that the plant’s new reliability engineer and the thousand men at his command could define quality, but only the men in the shops—scattered over a two-mile complex that makes up the Buick plant—could build it into the product. The formal employe-relations program lagged. Morale certainly needed to be improved, yet the in-plant climate was not the best for reconstituting an employe-relations program. It was little better in the surrounding community.

Buick’s public relations staff knew there was a basic communication problem. There was too little contact between management and employs as people to people; too little explanation by management of what it had set out to do that would benefit the workman, his job and his family, the economy of Flint, the people of the area and, of course, Buick.

But how to communicate? There could be nothing haphazard here, no impulsive move. Existing channels were evaluated and rejected. Even direct mail was considered.

The Choice: Radio = Conventional thinking directed some attention to print, a company newspaper or magazine. For about $5,000 a month, Buick could have had a once-a-month paper, constricted to 20 tabloid columns. But the frequency seemed inadequate and the prospect of two-way communications was obscured.

That’s when radio entered the picture. At the time we could find no comparable use of the medium anywhere. But Factory Whistle, which began on WKMF Oct. 31, 1960, was soon to reach our multiple audiences five days weekly. Since the Buick day shift starts at 7 a.m., our 6-7 program would catch Buick folks dressing, eating and driving to work. It would talk to the community, too.

Factory Whistle is a competitive program and strives to hold its listeners. The show uses only a little written script, and that helps to keep the tone warm and conversational. Willard F. Lamb is producer, editor, musical director and “voice” for the program. He’s “Bill” to everyone in the plant and area. The show has music, time and weather, plus lots of news and the previous night’s sports news, provided by WKMF. Buick insists that the station cut in with all the objectivity it gives to its day-long news programming.

The Human Touch = Buick runs no commercials as such on the program, but it is loaded with unending “commercials” which sell 16,000 men and women on their jobs and their community. Bill Lamb tapes interviews with workers, tells about their promotions, weddings and births, awards and production successes. He asks for blood for the Red Cross or a helping hand for some one in the community. During the first year, over 500 workers “talked” on the air and 10,000 wrote letters to the show.

Factory Whistle helped promote Buick’s car pool plan to lend new cars to workers for testing and comment. The show boosts work safety. It has made something special out of family visiting days and factory open houses.

There has been a regeneration of the craftsman’s pride in Buick as a product and of the company as a place to work. You can see signs that this pride is spreading. Flint is prouder that Buicks are made there and prouder of Buicks as good cars.

Four human things about Factory Whistle give greater satisfaction than all others.

First, the warm acceptance of the program when Bill Lamb visits the individual factories. He is there every day in search of the human interest that leavens all people-to-people relationships, even management and workers.

Second, the solid prestige enjoyed by Factory Whistle which permitted Bill Lamb to speak out soberly about individual responsibility. For instance, when the Community Chest drive faltered.

Third, the results of a formal questionnaire survey in the Buick plant establishing that daily listenership to Buick’s WKMF program includes 85% of those on the factory day shift who drive to work.

Fourth, this vignette from life: A union committee man drove off in one of Factory Whistle’s loaner cars, a brand new one. He hadn’t gone far when he was brought to a stop by a clanking in the drive train. Under a nearby garage hoist, a mechanic worked for a minute, said it wasn’t serious—only a loose nut on the transmission housing—and then commented that “some other new Buicks are that way.”

It was the committee man’s day off, but he drove straight to the plant. He went out on the assembly line and read a purple riot act that put Buick quality and reliability up two full notches.

What better measurement of results would you want?

Gerald H. Rideout, director of public relations for Buick Motor Division of General Motors, Flint, Mich., joined GM in 1950. After graduating from Central Michigan College in 1939, he worked on newspapers in Michigan, Pennsylvania and Kentucky. He joined the United Press in Detroit in 1943 after a disability discharge from the Army. UP later assigned him to Chicago and then to New York. He has been active in Flint community affairs.

The voices that influence Indiana’s most dynamic market

The hustling, thriving Mid-Indiana market—Indianapolis and its 55 surrounding counties—has all the ingredients of a self-contained empire. Highly diversified industries, progressive business and financial talents, energetic civic and cultural leadership all combine to make this a super-market of giant potentials. Best of all, it’s a “reachable” market, for its customers and its suppliers. The three famous WFBM Stations help Mid-Indiana’s “planners” and “do-ers” keep the public informed; help excite them to productive action. To get your share of this market’s ever-increasing sales volume, use the dynamic voices of The WFBM Stations to broadcast your selling messages in Mid-Indiana.
The FCC's own word on program control

NOW IT'S OFFICIAL: THE AUDIENCE DOESN'T KNOW WHAT'S GOOD FOR IT

A candid explanation of the FCC's New Frontier policy on program regulation was given by a Kennedy-appointed commissioner last week. The policy was outlined by Commissioner E. William Henry, who presided over hearings on local television programming in Omaha. As described by Mr. Henry, the policy boils down to this:

- Public approval is not the ultimate test of broadcast performance.
- The FCC's own "standards" or "policies" are measurements by which a broadcaster's performance is judged.
- The FCC is more "aware" of what is expected of a broadcaster than the general public is.

Mr. Henry made several statements on FCC policy during the Omaha hearings that lasted all week (see story beginning page 30).

On Tuesday evening, after two days of testimony that had been overwhelm-
ingly favorable to the Omaha stations, Mr. Henry told a news conference that "most of the representative citizens of Omaha seem to be satisfied with the performance of all the stations in the area that we are investigating, namely local live programming."

Asked if the Omaha findings would serve as a measure the FCC could use to judge stations in other communities, Mr. Henry said yes, and he added: "I think it is a measure of two things: one, of the feeling of the local citizenry about it and, secondly, the measure-

ment of their [the stations'] perform-
ance by whatever standards the com-
mission has, based on its statistics with regard to stations throughout the coun-
try."

What Standards? • Did he feel that the Omaha stations measured up to FCC standards? "That," said Mr. Henry, "is something that we really can't tell too much about until we hear the presentation of the stations themselves and we interrogate them about our own statistics that we have on them."

Mr. Henry then added: "I don't think necessarily that the standard that the community might have is necessarily the one we would have. I think perhaps we are a little bit more aware of an affirmative duty on the part of local stations to broadcast local live programming whereas the general sentiment in this community—and I imagine it's typical—is that the stations are fulfilling their complete responsibility if they simply respond to inquiries or to sug-
gestions from citizens that they put on some sort of local programming. But there again this is something we can't tell as to how close the two come until after we have gone into it with the stations."

Educational Campaign • At the same news conference Mr. Henry observed that although Omaha citizens "still have their doubts why we are investigat-
ing the stations, my hope is that there will seep down some understanding of why we are here and that it simply is really in their interest.

"They may not like the fact that we are established to regulate their interest, but nevertheless we are, and hopefully most of them will realize that we are trying to do it in the best manner that we can."

A day later, in another news confer-
ence, Mr. Henry said a lawyer had questioned his phrase "FCC standards" in his conference the day before, and he said he had used the term poorly. A better word would be "policies," he said, because "there are not specific standards of the FCC. This is a gray area."

To avoid further misunderstanding, he said he was offering this clarifica-
tion: "That the FCC, I think, is aware of the responsibilities of broadcast stations to be a community outlet, which is simply another way of saying that they have a responsibility to broadcast local live programming. This is a re-

ponsibility that I think the general public is not as aware of as the FCC which establishes the policy. Another aspect of this same question is the broadcaster's responsibility to lead and influence local public opinion as well as to reflect it. Therefore, I have con-
ceived that their overall duty may possibly be greater than that demanded by the local public."

In a talk before the Omaha Rotary Club Wednesday Mr. Henry said the local hearing was beneficial because it was educating the people "about rights they did not know they had."

The first group of witnesses lines up before FCC Commissioner E. William Henry (right foreground) at last week's hearing on local television programming in Omaha. The testimony of Omaha citizens added up to an over-
whelming endorsement of the local stations and a re-
pudiation of FCC program meddling. Full story page 30.
Spot and local television business in the U. S. is currently moving at a rate of 352,000 commercials per week and will total approximately 18,304,000 announcements in 1963. Network commercials will add a minimum of 90,116 to bring the grand total for the year to at least 18,394,116.

Those estimates are being projected today (Feb. 4) by Broadcast Advertisers Reports (BAR) on the basis of tabulations from BAR’s first full week of daily around-the-clock monitoring of the 42 commercial TV stations in 10 key markets.

The monitoring showed that in the 10 markets alone a total of 29,572 non-network commercials, or an average of 704 per station, were carried during the week ending Jan. 11. In addition the network affiliates in this group carried 1,733 commercials, which BAR projected to a full-year minimum of 90,116.

Los Angeles led by a substantial margin in the number of spot and local commercials. Its seven stations carried 6,377 or 21% of the 10-market total. New York was second, with 4,448 or 15% distributed among six commercial stations, while Chicago was third, with the four stations there sharing 3,118 or about 10%.

Washington Fourth • Behind these came, in order, Washington with 2,558 announcements; Detroit, 2,429; San Francisco, 2,352; Minneapolis, 2,205; Baltimore, 2,103; Philadelphia, 2,082, and Pittsburgh, 1,900.

Pain and cold relievers were the No. 1 spot users during the week, with 48 brands contributing 3,262 commercials or 11% of the 10-city total. Bufferin was far and away the No. 1 user in this field, spreading 396 messages over the 10 markets. Contac was second with 295 and Alka-Seltzer third with 201.

Tobacco products—a category of special interest because of NAB President LeRoy Collins’ efforts to have cigarette advertising controlled by special TV code amendments—were represented by 24 brands which placed 826 commercials or about 2.8% of the 10-city total.

Parliament Tops • Parliament cigarettes dominated this category with 310 commercials—38% of the tobacco-products total. L & M’s placed second with 84 (including three programs sponsored on a spot basis) and Newport was third with 73.

Laundry soaps and detergents, third category whose spot activity had been tabulated by BAR last week, accounted for 19 brands and 603 commercials, or about 2% of the week’s measured total. Fels Naptha products placed more than any other, a total of 97 representing 16% of the laundry spots, with Lever’s Vim second (77) and Colgate-Palmolive’s Dynamo third (60).

An examination of the commercials and their placement showed varying patterns among the leading spot users.

Parliament cigarettes, for instance, divided its 310 commercials among 38 of the 42 stations in the 10 markets, with the largest number (63) in Los Angeles. Generally, Parliament placed 60-second messages in late-afternoon, early-evening and late-evening movies and occasionally in sports and syndicated or local programs, with 10-second announcements and some 10's—and in Philadelphia a few 30’s—in and between sports and news programs, movies and syndicated shows from late afternoon on.

L & M, whose 84 announcements ranked second among tobacco products, used 26 stations in the 10 markets and appeared to favor minutes, along with some 20's and 10's, in and around news, sports and movies, especially in early and late evening. Where Parliament concentrated its greatest weight in Los Angeles, however, L & M put more of its spots in New York (17) than anywhere else. But its Los Angeles budget included three newscast sponsorships and seven golf participations.

Newport cigarettes, third heaviest spot user, ignored Los Angeles completely during this week. It scattered 73 commercials across 25 stations in the nine other markets, dominantly using 20-second and one-minute announcements in early and late evening time.

Its heaviest weight, but not by much, was in San Francisco, which carried 11 Newport messages.

Top 10 Tobaccos • Here are the top 10 tobacco-product users of spot television in the 10 markets as measured by BAR during the week:

Kent cigarettes, 53 messages in nine markets (heaviest in Philadelphia).

Chesterfield cigarettes, 48 messages in five markets (heaviest in Los Angeles, Chicago and Philadelphia).

Winston cigarettes, 41 messages in six markets (heaviest in Los Angeles and New York).

Kool cigarettes, 39 messages in six...
Pintoff's tv commercials enter west coast ad market

The first new animated commercials produced by Pintoff Productions Inc., New York, for west coast clients are off the drawing board and on the screen.

At right: A scene from a commercial made for Ralston Rice Chex (and Wheat Chex) cereal. Ernest Pintoff was director, designer and creator of the music. Guild, Bascom & Bonfigli, San Francisco agency, wrote the commercial.

At left: A still from Folger's coffee commercial. Mr. Pintoff also handled the directing and designing for this production. Fletcher Richards, Calkins & Holden, San Francisco, wrote the script and music.

The two commercials represent Pintoff's "entry" into the west coast tv commercial area.

markets (heaviest in Detroit).
York cigarettes, 36 messages in eight markets (heaviest in Los Angeles, Chicago and New York).
Mondair cigarettes, 28 messages (all in San Francisco, Baltimore and Washington).
Santa Fe cigars, 26 messages (all but one in Los Angeles).
Other tobacco brands monitored in the 10 markets, using from one to 18 spots during the week, were (in order) Spring cigarettes, R. C. Dun cigars, Raleigh, Lucky Strike, Bel Air, Camel and Salem cigarettes; La Palina, White Owl and Harvester cigars, and Dumaurier, Flair, Marlboro and Pall Mall cigarettes.

Pain-Cold Remedies • In the pain and cold remedy category, the top 10 were:
Bufferin, 396 messages in 10 markets (heaviest in New York, Los Angeles and Baltimore).
Contac, 295 messages in 10 markets (heaviest in New York, Los Angeles and Chicago).
Alka-Seltzer, 201 messages in 10 markets (heaviest in New York, Los Angeles and Chicago).
Anacin, 165 messages in 10 markets (heaviest in New York, Los Angeles and San Francisco).
Compak, 156 messages in 5 markets (heaviest in Los Angeles).
Bromo-Seltzer, 148 messages in 10 markets (heaviest in New York, Chicago and Los Angeles).

Excedrin, 139 messages in 10 markets (heaviest in Los Angeles, New York and Chicago).
Vicks products, 137 messages in 10 markets (heaviest in New York, Pittsburgh and San Francisco).
Four-Way products, 127 messages in 10 markets (heaviest in Los Angeles, Chicago and Detroit).

Other advertisers in this category during the week, with from one to 121 commercials apiece, were (in order) Dristan, Congestaid, Romilar CF cough syrup, Thorex, Duractin, Sucrabs, Super Analist, Coldene, Isonettes, Rem cough medicine, Pertussin, Bromo Quinine, Actin, Isodine, Sleep-eze, Sinex, Doans Pills, BC Remedy, Pepto Bismol, Rollaids, Narbain cough tablets, Nervine remedy, Liquecap cough capsules, Primatene remedy, Aspergum, Dri Con cold remedy, Bayer products, Heet liniment, Smith Bros. products, Buffer children's aspirin, Ben Gay rub, Briocchi antacid, Eno antacid, Medic Men remedy, Musterole, Pinex cough remedy, Sleep Caps, and Tums.

Soaps-Detergents • In the soaps and detergents category, the top ten found by BAR were:
Fekh Naphta products, 97 messages in eight markets (heaviest in New York, Detroit and Pittsburgh).
Vim tablet detergent, 77 messages in 10 markets (heaviest in Los Angeles and New York).
Dynamo liquid detergent, 60 messages in five markets (heaviest in Philadelphia and New York).
Salvo tablet detergent, 56 messages in 10 markets (heaviest in New York).
Dash powder detergent, 47 messages in nine markets (most in Los Angeles).
Cheer powder detergent, 43 messages in 10 markets (equally distributed).
Tide products, 39 messages in nine markets (heaviest in Baltimore and Pittsburgh).
Oxidal products, 37 messages in 10 markets (heaviest in Minneapolis).
Ivory Flakes, 27 messages in eight markets (heaviest in New York).
Wisk liquid detergent, 22 messages in five markets (heaviest in New York and San Francisco).

Other laundry soaps and detergents monitored with from one to 20 commercials apiece, were (in order) Ad detergent, Swan products, American family laundry products, All products, Duz products, Fab powder detergent, Ivory Snow, Woolite soap, and OMO laundry detergent.

In all, BAR plans to break down the results of its monitoring into some 80 product class reports. Later this year it expects to start matching its message unit findings with station rate cards to produce dollar estimates of brand spending for commercial time (Broadcasting Jan 7).

BAR started monitoring the current 10 markets on a full time basis Jan. 1. The 20 commercial stations in Atlanta, Boston, Cincinnati, Cleveland, Dallas and St. Louis are due to be added to the

* October 1962 figures revised as of January 22, 1963.

fulltime monitor list by the end of March, with additional markets then being added at the rate of about six a month until the 236 stations in the top 75 markets are on a continuous monitoring basis the first of 1964. Meanwhile BAR is also continuing its periodic monitoring of these markets.

The monitoring company’s projections of commercial totals anticipated for 1963 were based on its 10-market findings. The average of 704 commercials per station in the week of Jan. 5-11 was applied to an estimated 500 commercial stations to get a weekly national estimate of 352,000, then projected to the 52-week total of 18,304,000.

BAR officials noted that during most of the year commercial traffic is heavier than in early January and said this fact should counterbalance any drop-off in the per-station average in smaller markets. Actually, they said, BAR’s experience indicates that on the average there is no wide discrepancy between the number of commercials carried by large and small stations, although the rates charged differ widely.

Ideal Toy, Kenner buy King Features series

Two toy manufacturers, Ideal Toy Corp., New York, and Kenner Products, Cincinnati, have bought participations in more than 70 markets on King Features Syndicates’ cartoon package of 150 5½-minute programs, starting this fall.

In announcing details of this transaction, a King Features spokesman said that Ideal, through Grey Adv., has purchased participations in more than 50 markets and Kenner has bought directly into more than 20 markets. The cartoons also have been bought by WPIX (TV) New York, KTAL (TV) Los Angeles, WTAE (TV) Pittsburgh, WEWS (TV) Cleveland, WTCN-TV Minneapolis and CKLW-TV Windsor-Detroit.

The series consists of Beetle Bailey, Barney Google and Snuffy Smith, and Krazy Kat.

Norsworthy-Mercer is agency’s new name

Taylor-Norsworthy Inc., Dallas advertising agency, has changed its name to Norsworthy-Mercer Inc. The change, according to T. W. Norsworthy, president, reflects the increased responsibility of Melville M. Mercer, who has been named executive vice president.

Mr. Mercer was an advertising executive with a large food chain before entering the agency field in 1950. He joined Taylor-Norsworthy as account supervisor in 1954 and was made vice president in 1960.

Mr. Norsworthy was co-founder of the agency in 1946 with J. B. Taylor, who recently resigned to open a new Dallas advertising operation. Mr. Norsworthy is also president of the Southwestern Assn. of Advertising Agencies.

Norsworthy-Mercer serves some 30 national, regional and local accounts.

USS joins Armstrong to sponsor Kaye series

U. S. Steel Corp. reportedly has joined Armstrong Cork Co. on the new Danny Kaye Show on CBS-TV for the 1963-64 season.

The Kaye series will be in the

Wednesday, 10-11 p.m. EST period now filled by U. S. Steel-Armstrong’s drama hours. The two advertisers, both handled by BBDO, New York, are now in alternate week positions. They each will sponsor an alternate-week hour next season.

Armstrong signed for the series a little over a week ago (CLOSED CIRCUIT, Jan. 28). CBS-TV announced the signing of Danny Kaye to a contract for his first regular television series some three months earlier (BROADCASTING, Oct. 29, 1962).

AFA-AAW CONFERENCE

Advertising and government to be theme in Washington

Advertising and government will be the theme of the fifth annual Advertising Federation of America/Advertising Assn. of the West conference in Washington beginning tomorrow (Tuesday). Several advertising, broadcasting, and government leaders will address the two-day conference.

Approximately 700 media executives are expected for the sessions on "Advertising Speaks to Government—Government Speaks to Advertising" Ivan A. Nestingen, under secretary of the Department of Health, Education & Welfare, will speak at the Wednesday luncheon. A morning panel presenting advertising’s message to government will feature Donald McGann, president of Westinghouse Broadcasting Co.; Peter G. Peterson, president of Bell & Howell Co.; Paul S. Willis, president, Grocery Manufacturers of America; Andrew Heiskell, board chairman of Time Inc.; and Palmer Hoyt, publisher of the Denver Post.

Speaking for the government Wednesday afternoon will be FCC Chairman Newton N. Minow, Federal Trade Commission Chairman Paul Rand Dixon, and Dr. Persia Campbell, member of the President’s Council of Economic Advisers and head of the economic department of Queens College, City U, of New York.

At the opening session Tuesday afternoon, Rep. Bob Wilson (R-Calif.) will tell advertisers “How to Be Effective in Dealing With Your Congressman.” Rep. Wilson is an inactive partner in the San Diego agency of Champ, Wilson & Slocom. John J. Ryan, AFA general counsel of Sawyer, Sullivan & Ryan, will forecast the fate of important media matters that are coming before the new 88th Congress.

All sessions of the conference will be held in the Statler-Hilton Hotel, Washington. It will close with a reception for members of Congress and the executive branch of government.
Al Pettus is our "go team" specialist

He knows football inside out. He should. He's one of our highly skilled remote crew which covered more than 50 AFL, NCAA, Southwest Conference, and high school games during the past three years alone. These men operate as precisioned as a pro offensive unit. Practically all of them, directors, cameramen, specialists, have worked as a team for more than 12 years.

In constant demand for network "specials" and advertisers' commercials, they traveled nearly 15,000 miles last year in our quarter of a million dollar cruiser. It's equipped, by the way, with six Marconi's and two Ampex VTR units. This type of equipment requires seasoned performers, and the men of our remote crew are just that. They are typical of WFAA TV's high degree of professionalism — another reason why we deliver such a steadfast, selective audience.

Radio ‘63: bigger, more influential medium

BLAIR RADIO REPORT STRESSES LOCAL SALES POTENTIAL

A new brochure portraying today’s radio as “a bigger, more influential and successful sales medium than ever” was issued last week by Blair Radio and will be distributed personally by Blair representatives to advertising and agency executives across the U.S.

Titled “Radio ‘63,” it stresses the local sales potential of the 52 radio stations represented by Blair Radio and of the Blair Group Plan in particular. The Blair Group Plan, initiated five years ago, is a one-order, one-bill plan by which advertisers may tailor their use of Blair-represented stations according to their individual needs.

The brochure treats the 52 Blair-represented stations as the equivalent of a network, and offers a check-list comparing their “influence” (based on average listening) with that of each of the four national radio networks. It shows the Blair stations as covering 75.4% of the U.S. population with 79.2% of the total consumer disposable income.

Success Stories • The presentation also divides the 52 stations into 38 “concentration” or big-city stations and 14 “extension” or far-reaching multimarket stations, and shows the managers and significant details for each station in each group. Leading success stories among Blair Group Plan users also are pointed up.

Arthur H. McCoy, president of Blair Radio, reported in presenting the brochure to trade newsmen that the success of the Blair Group Plan this year already has been “so phenomenal that I can’t even quote the figures for you.”

He ventured that Blair Radio handles as much volume in time sales—disregarding talent payments and line charges—as all four national networks combined (four-network total for 1961, latest year, for which FCC figures are available, was $35.8 million).

Ward Dorrell, research vice president of the parent John Blair & Co., reported that Blair Radio and its stations are currently conducting a national radio measurement which will be the biggest of its kind, based on 2,000 personal interviews and showing “the kind of people that listen to radio.” Results of this study may be available in about two months, Mr. Dorrell said.

In discussing “Radio ’63,” Mr. Dorrell also reported that Blair-represented stations spend $283,633 a year for audience research alone. For these stations, he said, Pulse Inc. makes more than 995,000 personal interviews a year.

Airlines plan joint advertising program

A committee of top airline executives has been formed to evaluate a proposed industry advertising campaign to expand air travel.

Stuart G. Tipton, president of the Air Transport Assn. of America, announced last week that the group will serve in an advisory capacity to the ATA board of directors. The plan for a jointly financed advertising program was outlined to the ATA board last December.

Decision on an advertising agency pending a report by the special committee to the board. Appointed last week to the committee: G. Marion Sadler, vice president and general manager, American Airlines; Rex Brack, senior vice president, Braniff International Airways; Harding L. Lawrence, executive vice president, Continental Air Lines; Thomas M. Miller, vice president, traffic and sales, Delta Air Lines; Frank Sharpe, executive vice president, sales and services, Eastern Air Lines; Casey M. Britt, vice president, sales and service, Frontier Airlines; Thomas B. McdFadden, vice president, marketing, Trans World Airlines; and Robert E. Johnson, senior vice president, sales and advertising, United Air Lines. Jack M. Slichter, ATA vice president—traffic, will serve as secretary. ATA headquarters is at 1000 Connecticut Ave., Washington 6, D.C.

Business briefly...

Lincoln-Mercury, through Kenyon & Eckhardt, has set a major spot radio campaign to start Feb. 7 and to run four weeks to March 6 in the 70 top Mercury car sales areas. Campaign calls for 500 spots to be placed in the largest sales markets, and up to 200 spots in the smaller Mercury markets.

Roma Wine Co., New York, has begun a spot tv campaign in eight markets including New York, Baltimore, Miami,
Even come what did, a lot of WSOC-TV viewers went to bed warm and satisfied.

It happened this way:

Tiny Davidson (N.C.) College, a thousand students thereabouts, and a love of nearby Charlotte, had knocked off nationally ranked big Duke U. Next on schedule, giant No. 1 Cincinnati in Ohio. And the faithful dreamed.

Alas, the vision did not come true. Davidson lost. But the fans won, for in a special telecast direct from the Bearcat fieldhouse, WSOC-TV had brought the game to thousands of Carolina supporters.

Good public service programing in every area of public interest is a forte of Charlotte’s WSOC-TV. Wins fans for the station—and its advertisers, too.

Public utility media spending up 10% in '61

Public utility companies increased their advertising expenditures in 1961 about 10% in four media (tv, radio, newspapers and outdoor), according to a survey conducted by the Public Utilities Advertising Assn. The study shows that television expenditures increased more than those of other media, but not enough to change the "media mix" of 59.7% of total budgets in newspaper advertising; 22.5% in television; 10.5% in radio and 7.3% in outdoor advertising.

Of the 156 gas and electric companies reported, 100% used newspapers, 96% were on radio, 77% purchased television time and 73% used outdoor advertising.

Gas companies increased their advertising 14.3%, electric companies increased 5.2% and combination gas and electric firms were up 12.2%.

Average annual per meter expenditures for the four media were up 2 cents from 64 cents to 66 cents.

To announce the March introduction of its special offer of a 64-page American Space Digest free with the $1 purchase of a Schick razor and its magazine of Krona Edge razor blades, Schick Safety Razor Co., through Compton Adv., Los Angeles, will use tv spots, in 37 top markets, featuring actual flight footage of the X-15 and an interview with Scott Crossfield, X-15 pilot. The spots will also be used on the company's ABC-TV shows, Combat and Stoney Burke, and radio spots, adapted from the tv spots, will run in top markets.

The California Credit Union League has started a $45,000, 13-week radio-newspaper campaign to tell Californians the advantages of credit union membership. KGBS Los Angeles, KGK San Francisco, KFRE Fresno, KPMC Bakersfield, KFMB San Diego and KFBK Sacramento, are broadcasting the credit union jingle twice a day.

Mennen Co., Morristown, N. J., (toilettries) has purchased NBC Radio's new Monday-Friday five-minute sports program, starting Feb. 11. The show, featuring sportscaster Joe Garagiola, will be scheduled at early morning times in most cities, Agency: Warwick & Legler, New York.

Agency appointments...

- Louisiana State Rice Milling Co., Abbeville, La. (Mahatma and Water Maid brand rice products), has appointed Tracy-Locke Co., Dallas.
- E. E. Mucke & Sons Inc., Hartford, Conn. (Circle M meat products), has appointed R. W. Bacon Co., Bloomfield, Conn. Radio and tv announcements schedules are being prepared.
- The Flavour Candy Co., Chicago, has appointed M. M. Fisher Assoc., that city. First assignment will be campaign to introduce Fan-Tastix, a new candy product.
- Bekins Van & Storage Co. has appointed Doyle Dane Bernbach. DDB will take over the national mover's account beginning July 1.
- O'Keefe & Merritt has named Anderson-McConnell Adv., Los Angeles, as advertising agency for the company's line of ranges, dishwashers and other kitchen appliances. Merv Oakner is account supervisor. Company has been without an agency since breaking with Cunningham & Walsh in June 1961.
- Van Camp Sea Food Co., Long Beach, Calif.: Smoak, Debnan & Waddell, Los Angeles, for Capt. KITT Tuna Red Meat for Cats.

National Cotton Council buys network tv schedule

The National Cotton Council, Memphis, Tenn., will begin its first television campaign in March. The drive, which is budgeted at an estimated $800,000, will include participations on daytime CBS-TV and nighttime ABC-TV and NBC-TV from March through June. Another network flight begins in August. In addition, the council bought a tv spot schedule in 31 markets, mainly in the Southwest, to back up its network advertising.

According to a spokesman at Fuller & Smith & Ross Inc., New York, the council's agency, the tv campaign's purpose is to show viewers the values of cotton fabric as opposed to the properties of synthetic fibers.

Rep appointments...

- KICU-TV Fresno, Calif.: Avery-Knodel Inc., New York, as exclusive national representative, effective immediately.
- WJON St. Cloud, Minn.: The Deveny Organization Inc., New York, as national representative.
- WJET Erie, Pa.: Ohio Stations Representatives Inc., Cleveland, as Ohio representative.

Aniforms process used by Best Foods

A new continuous-movement animation process developed by Aniforms Inc. and employed by Videotape Productions of New York (BROADCASTING, Nov. 19) is being used commercially for the first time by Best Foods, New York, in a series of taped commercials for H-O Cereals.

The commercials will run every week through March on The Story Of... (Thursdays, 7-7:30 p.m.), a Best Foods program on WNBC-TV New York. They first appeared on Jan. 24. A spot campaign in New York will also feature the commercials.

The Aniforms process employs dummy forms which are articulated and tape recorded or filmed while in motion, giving the appearance of animation. Videotape's exclusive arrangement with Aniforms is for use of the process on tape.

Production time for the commercials was trimmed by at least six weeks by use of the process, according to Warren Bryan, production supervisor, Sullivan, Stauffer, Colwell & Bayles, New York, agency for Best Foods.

"In standard film-cell animation the time lapse from approved storyboards to air-date would have been from eight to ten weeks," he said.

Dick Uhl, creative supervisor and vice president, SSS&CB, conceived the campaign concept, which is a humorous dialogue between "Mr. H. O.," chairman of the board and a fellow executive.

Eli Bauer, chief Aniform designer, created the characters in collaboration with Julian Dowell, agency art director. Goeffrey Kelly was agency producer.

NAAN plans Memphis meeting

The eastern regional and midwest regional conferences of the National Advertising Agency Network will be consolidated in one meeting at Memphis, Feb. 8-9.

The host agency will be Merrill Kremer Inc., Memphis, and conference chairman will be William B. Houck of Houck & Co., Roanoke, Va. The agenda will emphasize creativity, new business and market research. Individual sessions will be held by principals and staff members of 14 NAAN agencies. A directors meeting will precede the conference on Feb. 7.

BROADCASTING, February 4, 1963
FCC MUST DECIDE WHAT PROGRAMS ARE BEST, HENRY IMPLIES AT HEARING

Folks out in Omaha may love their local television programs, but the stations still may not stack up to what the federal men at the FCC back in Washington figure is good enough.

What's more, Omahans may be typical of neighbors in towns all up and down the road. They just don't know about stations' "affirmative duty" to put on local live shows, so they're satisfied with getting just what they've asked for.

This sums up the regulatory philosophy which the FCC's freshman member, Commissioner E. William Henry, explained to newsmen last week during the agency's probe of local live television in Omaha. Commissioner Henry presided at the five-day proceeding which heard more than 130 public witnesses and continues there this week to hear more evidence offered by the three local tv stations involved, KETV (TV), KMTV (TV) and WOW-TV.

On The Report • Commissioner Henry's comments about FCC's role also included some expressed on the record to assure several concerned citizens, including Nebraska's governor, that the commission may not by law and does not wish of itself to dictate concerning local programs. Combined they constituted an insight into FCC thinking seldom before expressed so candidly on a subject that has been controversial for years (see separate story on page 21).

Unlike the commission's tv probe in Chicago last year where dissident voices of certain groups rang out a bit louder and more frequently, the Omaha inquiry last week was marked by only a sprinkling of complaint, part of which was directed not at the stations but at the government for intruding there.

The great weight of the public testimony displayed considerable pride in the home town television efforts. And the parade of witnesses—many of whom represented organizations solicited in advance by the FCC through invitations mailed to a list based on Omaha's telephone directory—indicated no reluctance to express it.

Among other highlights of the hearing:
- The testimony of many witnesses showed that from their experience or knowledge all three Omaha tv stations not only have been generous in granting requests for support or coverage of local activities but the stations also have sought out opportunities to do special shows or render aid.
- Spokesmen for some community groups said they could have had or were offered more television opportunities than they could take advantage of because of staff or financial limitations. Others noted that if anyone with a valid tv message didn't get time it must have been his own fault for not asking. Several testified that without the tv support their fund drives never could have been successful.
- Educational and religious leaders generally spoke highly of the three stations' efforts in their fields, particularly commending pioneering education series in connection with such institutions as Creighton U. and the universities of Omaha and Nebraska FCC's interrogation showed some of these were completely school "packaged" however.

Educator-cleric criticisms, including some self-directed analysis, ranged hopes for better planning, timing and experimentation and better shows for children, educational-television spokesmen lauded the financial and technical help given them by all three stations for non-commercial KUON-TV Lincoln, which plans expansion.

- Citizens especially praised the ob- jectivity and scope of local news programming by all three stations, a few citing its beneficial impact on the city's only daily newspaper, the Omaha World-Herald, whose parent firm also owns KETV. Agricultural program service got its mention too.
- Payson Hall, president of Meredith Broadcasting Co. on Thursday afternoon became the leadoff station executive to testify in the proceeding. He explained the broad corporate policies of the Meredith radio-tv and publishing complex, of which WOW-TV is part and to questions put by FCC counsel said local Meredith station managers are not given "profit quotas" which they must meet.

Other WOW-TV officials were to testify last Friday and executives of KETV and KMTV, in that order, are slated to testify at further hearing in Omaha this week.
- The FCC Thursday introduced de-
tered analysis of October 1962 logs for all three stations, plus other statistical data. FCC figures for total local live as percents of total hours on air: WOW-TV, 11.6%; KMTV, 14.7%; KETV, 9.8%.

Total regularly scheduled local live (excluding special programs, adjusted to weekly basis): sign-on to 6 p.m.: WOW-TV, 8.9%; KMTV, 14.5%; KETV, 15.5%. For 6 p.m. to midnight: WOW-TV, 16.7%; KMTV, 14.3%; KETV, 7.7%. News shows accounted for about half of day percentages, and a major portion of night percentages.

Financial data entered by the FCC showed the three TV stations in 1961 had combined revenues of $4.8 million, and profits before federal taxes totaling over $1.23 million. They spent nearly $3.6 million for expenses of which almost $1.6 million was for programming expenses (37.2% film expenses, 1.7% talent). Combined costs of news services (other than salaries) was $66,400.

Other developments concerning the FCC’s probe of Omaha television came out of Washington last week. Sen. Carl T. Curtis (R-Neb.) said if a study of the record shows him the proceeding was only a “three-ring circus staged to satisfy a lot of power-hungry Washington do-gooders” he may propose a Senate investigation of the FCC. Sen. Thruston B. Morton (R-Ky.) discussed the Omaha probe in connection with the confirmation hearing on FCC appointee Kenneth A. Cox (story page 38).

**Surprise Witness** — Nebraska’s Governor Frank B. Morrison, a Democrat now serving his second term, appeared as a surprise witness Monday. He warned that citizens of his state would oppose any attempts by Washington to dictate what local programs they could see. The previous week the Nebraska

---

**Gov. Morrison**

“I don’t think that supervision from the outside is necessary.”

state legislature unanimously adopted a resolution charging that the Omaha hearing was an unwarranted intrusion by the federal government into the freedom of broadcasting and the affairs of a sovereign state (Broadcasting, Jan. 28).

Praising the programming initiative of the three Omaha TV stations, Governor Morrison said it appeared that “this hearing is aimed at determining whether or not in the opinion of the commission there is sufficient time given to local talent. My problem has been to keep off these local television stations rather than get on them.” He said he believes that no one who had “something worthwhile to say or any talent for which there was any public demand” would be denied access to the air in Omaha, nor could he recall ever hearing any person or organization complain they were denied access.

“There no doubt may be some crackpots that exaggerate the demand for their talent,” the governor said, “but I would say from my experience that would be without foundation because I haven’t heard of any criticism.”

Governor Morrison continued: “I would hate to see the FCC inaugurate or open the door to anything that would be construed as federal censorship. We in Nebraska would resist that very strongly because it would indicate that somebody in Washington or elsewhere knew more about what was good for us than we knew ourselves.”

**Paternalistic Interference** — He felt such a course would impugn “our own judgment to regulate programs within our own borders and to improve our own tastes and accept the responsibility for listening to the kind of entertainment or programs that we want to listen to without paternalistic interference in them.”

The harm that could come from this approach “would far exceed any possible benefit from it,” he said.

“I have listened to radio and heard television in several parts of the world and I know of nowhere that the broadcasting industry has done a better job of accepting their responsibility for community betterment than they have here in the city of Omaha,” Governor Morrison said. Affirming his confidence in the local stations, he concluded, “I don’t think that supervision from the outside is necessary. It would be a step that we would think would be very harmful in laying the foundation for regulation of the type of programs that we should listen to.”

Commissioner Henry explained that the FCC is prevented by law from censoring programs. He assured the governor that “we loath to get into that area and I know I speak for the entire commission when I say we have no intention to do so.” However, the FCC is required by the law “to exercise some
LIKING TV NOT ENOUGH, OMAHA LEARNS

overall control over the stations' program service.

Local Expression • Commissioner Henry indicated he understood that the wording of the 1934 law, more particularly "enunciated in '46" (FCC's Blue Book) "is that the stations in each community must not only be a transmission facility, they must be a source of local expression." For this reason, he explained, "our sole interest here is to find out from the people whether they are so acting—that is, as outlets for local expression of all kinds—and if the people of Omaha are satisfied with it, we will be very happy to find that out. We in no way seek to impose our own opinions on the people of Omaha."

The governor did not stand alone Monday in his concern about the hearing. Omaha Mayor James J. Dworak and Donald R. Ross, Republican National Committeeman for Nebraska, both spiced their praises for the three local tv outlets with interjections of protest over the proceeding. Another outspoken witness was Helen Moeller, president of the Omaha Advertising Club and part owner-vice president, Allen & Reynolds Adv.

"I can see no reason whatsoever for a hearing of this type," Mayor Dworak said. He detailed the cooperation of the tv stations in explaining the issues in special elections and in supporting vital civic projects. "The stations cover the news "in a fair and objective manner," he said, a tribute he declined to give to the city's only daily newspaper. The competition of television news has had a salutary effect on the paper however, the mayor said, forcing it to carry rather than omit "any important issue."

Mr. Ross felt that one good thing about the hearing was that it made "the people realize what a good thing we have" in the outstanding services of the local tv stations. The Republican committeeman, however, thought that the commission "is inquiring into a subject you have no moral right to inquire." He termed the proceeding "extremely wasteful" of time, effort and the taxpayers' money.

Minow's FCC Wasteland • "The wasteland which your Mr. Minow (FCC Chairman Newton Minow) talks about is the free-spending policies of his own department," Mr. Ross charged. He noted there has been "a lot more cooperation" from the tv stations than political candidates themselves to debate on the air.

Miss Moeller testified that "there was a rather overwhelming amount of indignation" on the part of the members of the advertising club "at what was felt to be federal interference in, implied censorship of and an attempt to exert influence on Omaha tv programming—especially since the hearing is not based on any pending applications, complaints, petitions or suggestions of violations." She said the members felt this way even though they understood the FCC is "empowered to do this job."

Miss Moeller explained that her fellow members "feel quite strongly that Omaha residents do not require FCC help to determine whether what they see on tv is what they need." She said they were presented commissioners "who saw no need or excuse for an Omaha hearing."

How well are Omaha's tv stations serving local public service needs? "Very well," Miss Moeller asserted.

City Council Views • The thoroughness with which the tv stations regularly cover the weekly meetings of the Oma-

ha City Council was pointed out by two council members in their commendation of the stations' overall service there. Council President Harry Trustin also singled out WOW-TV's vice president-general manager, Frank Fogarty, as an example of local broadcaster leadership, while Councilman Warren R. Swartz volunteered that "we wouldn't want any more regulation from Washington than what is absolutely necessary."

Wynn Blair Ward, a Presbyterian minister and tv-radio chairman for the Omaha Area Council of Churches, said many churchmen "fail to make full use of the broadcasting facilities offered to them" while others even seem "hostile" to the idea. He hoped for greater cooperation and planning for tv among clerics. Both Rev. Ward and Walter Daniels, executive secretary of the they seem to agree with the three directors of operation of the tv stations although they said they might like better times and children's religious shows. Mr. Daniels would prefer fewer but better shows and opportunity to experiment.

Rev. Joseph Peters, Mt. Michael Monastery and St. John's Seminary, also has had his problem of surplus opportunities. Relating various tv program participations which he appreciated, Father Peters said the stations "came to me" and he could have put on more programs but his time is limited for such activities because of his many other duties.

Salvation Army Lt. Col. Raymond Johnson praised spot announcement support, news coverage and documentaries. He said he was always given the coverage requested "and I believe if I asked for more we would have been given more."

Henry V. Straka, Father Flanagan's Boys Home, related instances of both local coverage and fees to national network programs. Asked by Commissioner Henry if he was satisfied with it, Mr. Straka replied, "Very much so."

Rev. Jerry Dunn attributed much of the successful progress of his young Open Door Mission, a rescue-rehabilitation center for alcoholics, solely to the support of the local tv stations.

Dr. Robert F. Naylor, First Methodist Church, testified that his Tell Me, Mr. Preacher telephone question-answer program now in its third year on KETV continues to light up the station's switchboard every week and sometimes he has to stay an hour or more after he returns to answer viewers' inquiries. He was joined by other church leaders in citing local tv cooperation.

Creative Follow-Up • Mrs. Warren Buffett, YWCA public relations committee volunteer, emphasized that the tv stations there "follow through to an amazing extent" whenever a creative idea is presented to them. Sgt. Esther

Two of Omaha's tv stations are represented at this table showing (l to r) KETV attorney Percy Russell, vice president and general manager Owen Sadler with his assistant Doris Graham and Gene Thomas and KMTV executive vice president and general manager Warren B. Watts.

LIKING TV NOT ENOUGH, OMAHA LEARNS continued

R. Bader, local WAC recruiting chief, cited the "highest cooperation" of KMTV, while Army Capt. Harold L. Shellabarger and Marine Capt. J. M. Dean praised all three stations for help in recruiting coverage.

Omaha Fire Chief Martin J. Dineen felt the public image of a fireman has improved since television expanded the mass media available there. Other city officials volunteering commendation to local tv for specific support of their respective fields included Douglas County Election Commissioner Jerry Hassett, Acting Postmaster John P. Munnely, Juvenile Court Judge Seward L. Hart, Douglas County Treasurer Sam J. Howell and Internal Revenue Service District Director Richard P. Vinal.

Mr. Hassett said tv helped register 30,000 new voters last year, a local rec-

ord for an off-year election when reg-

istrations usually fall.

Karl Joens, Omaha Power District, recounted many years of successful sponsorship by his firm of local public service-type special programs and doc-

umentaries in prime time on the three local tv stations as well as regular news, weather and sports. Charles W. O'Rourke, Union Stock Yards Co., not-

ing that Omaha is the world's largest livestock market, praised the farm and livestock coverage on local tv.

John A. Johnson, Bellevue Area Chamber of Commerce, said local tv shows helped put his suburban Omaha community on the map.

Dr. Thomas J. Gurnett, Omaha-Douglas County Med-

ical Society, reported that the outstanding cooperation of all three stations in last year's Sabin oral vaccine innoculation project set a national record, innocu-

ating 85% of the population on several Sundays designated for the series of shots.

Praise for extensive tv support came on Tuesday from other medical organ-

ization representatives too. These included James Canady, Omaha Area Hospital Council; R. D. Ferguson, Leu-

kemia Society; Mrs. Mary Elaine Hall, Meyer Children's Therapy Center; Congdon E. Paulson, National Founda-

tion; Dorothy S. Beal, Omaha Hearing School, and George H. Thompson, Ne-

braska State School for the Deaf.

During testimony Tuesday by Prof.

Jack McBride, U. of Nebraska, con-

cerning the extensive financial, techni-

cal and program assistance to educators by the three commercial tv stations of Omaha, Commissioner Henry disclosed deep concern over the amount of tv viewing by children. Mr. Henry cited the responsibility of parents to super-

vise their children's tv, but he felt this

general manager Frank Fogarty, attor-

ney Andrew Haley and Meredith pres-

dent Payson Hall.

is a joint responsibility which must be shared by the stations, particularly as to provision and timing of suitable educa-

tional fare. Mr. McBride also report-

ed new legislative consideration of plans to expand the coverage of educa-

tional KUON-TV Lincoln of which he is manager.

Other pioneer and current education-

al program accomplishments of the local tv stations were detailed Tuesday in testimony submitted by Rev. H. W. Linn, president, and Rev. R. C. Wil-

liams of Creighton U., which claims a number of broadcast professionals among its graduates; William E. Ram-

sey, Duchesne College; Rev. James W. Olson, Doane College; Steven N. Wat-

kins, Nebraska Council for Educational Television, and Dr. Milo Bail, presi-

dent, Municipal U. of Omaha, who re-

called his school's role in pioneering a college credit series on KMTV, Tv Class-

room, over the past decade.

'Our Fault, Not Theirs' = Dr. Paul A. Miller, Omaha's new superintendent of schools, said he is on local tv for more time than he is able to spend viewing it. If more effective use of the medium is not made, he said, "it is our fault and not theirs" because of insuffi-

cient funds and staff facilities. Pointing out that the knowledge explosion is far outstripping the population explosion, Dr. Miller pointed to special needs for both child and adult education which tv could help meet.

Tuesday was farm spokesmen day too and they spoke out generously in behalf of local tv farm programming, some making particular mention of WOW-AM-TV's pioneering in this field as well as KMTV and KETV. The list included H. L. Tinley, Farmers Na-

tional Co., a farm management com-

pany; Barney Kamp, Nebraska Farm Bureau Federation; Elton Berck, Farm-

ers' Educational and Cooperative State Union of Nebraska; R. E. Cunningham, Omaha Livestock Exchange; Robert W. Koehler, Nebraska-Iowa Non-Stock Co-

operative Milk Assn., and livestock farmer Robert Goos who after praising WOW-TV's farm shows pointed out a favorite on KMTV "that's in color too."

Dr. E. L. MacQuiddy, Greater Oma-

ha Historical Society, praised local tv documentaries of great historical inter-

est in recent years while Alfred G. Ellick, Omaha Bar Assn., said the stations would do even more shows in his interest field if his group were prepared to supply the proper materials.

Asked how may of the more than 130 public witness scheduled to appear were there last week as a result of the FCC's pre-hearing invitations, Com-

missioner Henry said he could not tell. "We wrote a great many organizations" he said, because the commission did not know individuals. The list used came from the Omaha telephone book, he said.

Will the FCC hold other similar hearings? Commissioner Henry felt anything is possible but did not think it would be decided immediately since it was too early for him to predict his own recommendations. "I, as a new commissioner," he said, "of course relied to some extent on Commissioner (Robert E.) Lee's feelings about the Chicago inquiry and my own discus-

sions with the staff who worked there."

Commissioner Henry said he certain-

ly will consider the views of responsi-

ble witnesses like Governor Morrison in making his decision about future hearings but as of that moment he said the "still is of the opinion that they are proper or certainly within discr-

etion."

Follows Pattern = In the pattern of the first two days, Wednesday saw an-

other three dozen witnesses, many from civic and charitable organizations with commendations for local tv cooperation. For the first time, however, there were

BROADCASTING, February 4, 1963
Why WMAR-TV bought Seven Arts’ “Films of the 50’s”

Says Jack Jett:
Vice President and Director of Television WMAR-TV Baltimore, Md.

“WMAR-TV was the first commercial station in Maryland and the 2nd station in the entire nation to join the CBS Television Network. Since its inception WMAR-TV has been a community leader in public service, television ‘firsts’—and audience. WMAR-TV has always been the leader in this market with its feature film programming, that’s why we bought Seven Arts’ ‘Films of the 50’s’ . . . to continue our dominance in feature film programming. Before we purchase films we analyze them very carefully paying special attention to three important prerequisites of top quality features:

1—We look for star value in the films.
2—Their impact on the public at the time of its original presentation. This includes the critics’ reviews, and the attention given the films.
3—The length of the film . . . this is generally a tip off as to whether it’s a class A picture or not.

Seven Arts’ ‘Films of the 50’s’ met our requirements on all points, insuring a loyal, happy audience and contented sponsors.

Our success with feature films, incorporating all the Seven Arts’ releases thus far, may be attested to by our ‘Big Movie Of The Week’ on Saturday nights starting at 11 P.M. This is a showcase for first-run features. Our latest audience report, ARB November-December, shows a 61% Metro Share on Saturdays from 11:45 P.M. to midnight . . . an audience of 113,100 homes for WMAR-TV at this late hour!”

“TO CONTINUE OUR DOMINANCE IN FEATURE FILM PROGRAMMING”

For list of TV stations programming Seven Arts’ “Films of the 50’s” see Third Cover SRDS (Spot TV Rates and Data) Individual feature prices upon request.
LIKING TV NOT ENOUGH, OMAHA LEARNS continued

a few strong dissenters among them.

Donald Conway, national executive secretary of AFTRA, New York, charged that "the amount of local live programming here is insignificant." He said a study of all three stations' schedule for the week of Oct. 21, 1962, by his local membership found an average of only 11 percent local in the period sign-on to 6 p.m. and of this almost one-half was news. In the after-6 p.m. period he said they found only an "untouched string" of network, syndicated and "old" music shows. Whether or not KMTV counsel observed that the week of Oct. 21 was during the Cuban crisis.

Mr. Conway said AFTRA represents experience.

This view was challenged by another witness, Kendrick Wilson, director of the Omaha Playhouse, who presented a detailed analysis from his experience of the many practical obstacles which preclude anything but negligible use of amateur performers.

Lawrence W. M. McVoy, National Assn. for the Advancement of Colored People, charged "station management has not done enough" for his race, although support for NAACP activities was apparent.

Harlow Brown, KMTV employee and head of NABET Local 45, described the extensive technical facilities of his station and showed how they are put to use for local programming, including color. He said NABET also represents KETV while WOW-TV is IBEW, but he was not familiar with their facilities.

Thomas S. Nurnberger, volunteer head of the 1962 fund drive for United Community Services, said it would have been impossible for the Red Feather drive to have reached its $4.1 million goal, double the amount normally sought, had it not been for the support of the stations and the help of their staffs.

The Red Cross and other groups appearing Wednesday echoed Mr. Nurnberger's views.

Bob Danze, Omaha Central Labor Union AFL-CIO, commended all three stations for objective news reporting even during strikes. He also appreciated the fact that commercials on television stimulate business and thereby "create jobs."

Thursday Session • Another two-dozen witnesses Thursday morning followed the established pattern of testimony generally highly complimentary to the local outlets. State Senator George Sys said the stations generally show what the public wants and personally he would rather have programs that are not the best than government-regulated programming.

Adam Reinemund, retired midwestern advertising and station representative who still handles a few advertising accounts, said that from his experience and based on the amount of local programming activities in Omaha it is evident that "nowhere" are stations "more attuned to the needs of the community. He considered the hearing, "costly to the taxpayers, is not necessary to establish" local needs.

John Tate, midwest employees counsel, took up his entire allotment of time chastising federal bureaucracy, the New Frontier and FCC Chairman Newton Minow for attempting to substitute its opinions as to what the public should have for the traditional public right of free choice in a free market place. "What qualifies you men to determine for me what we should see?" he challenged the FCC.

Mr. Tate noted that Congress created the "FCC monster" through the 1934 law but that like other law of that era now overruled, Congress could also destroy it. "Perhaps it should," he concluded, "before the monster destroys its creator."

On Thursday afternoon, S. Payson Hall, president of Meredith Broadcasting Co. and vice president-treasurer of Meredith WOW Inc., the WOW-TV licensee, was the beginning witness for the station portion of the FCC inquiry. He described the corporate complex of parent Meredith Publishing Co., which is diversified in publishing and other communications — WOW-AM-FM as well as KCMO-AM-FM-TV Kansas City, KPHO-AM-TV Phoenix and WHEN-AM-TV Syracuse.

Mr. Hall said the principal responsibility of day-to-day operation rests with each Meredith station general manager although the Meredith central office provides broad policy, guidance, services and facilities to all of its stations. For example, he said, a company-wide policy to editorialize on the air was set after study during regular management conferences last year, but each station manager is vested with responsibility to carry it out in choosing subjects, point of view, program times and other details.

An outline of the extensive experiences and achievements of the company's station executives also was presented by Mr. Hall. He said it is Meredith policy that all of its people take active roles in the civic and charitable work of their communities.

PROBE GIVEN EXTENSIVE RADIO-TV COVERAGE

The FCC's Omaha tv probe received extensive broadcast coverage by the three tv outlets and area radio stations. The tv stations pooled technical facilities for both live and tape pickups in the hearing room. NAB joined them in sharing costs for a working newsroom at the Sheraton-Fontenelle Hotel.

WOW-TV aired considerable portions of the daily video tape of the inquiry plus news coverage. KMTV (TV) aired nightly hunks of re-cup, plus some live. KETV (TV) treated the probe as straight news.

KTVH (TV) Wichita-Hutchinson assigned a newsman and aired portions. WOW-TV and KMTV reported heavy listener calls Monday night complaining about preemption of normal fare or inquiring about the probe. Calls dwindled as the week continued.

The spectator portion of the hearing room usually was crowded but virtually all were witnesses waiting to testify. A sprinkling of broadcasters including Television Information Office's Carl Burkland and NBC's Tom Knade observed.

The city's only newspaper, Omaha World-Herald, carried front-page stories daily, but no banner headlines as daily press did in Chicago. The evening paper, Wednesday, editorialized: "The current inquiry into Omaha television gives rise to grave misgivings about the growing authority exercised, even if gently, by Big Brother in Washington."

talent at WOW-TV. Commissioner Henry noted that based on the testimony, it was hard for him to imagine that there isn't too much talent around Omaha and the stations seem to have used it in the best way that they could.

However, Mr. Henry said it is his conviction "talent is there if you look for it."

AFM Complains • Lad V. Tesar, AFM local 70, complained that local talent has to go to Lincoln to get on the air because there is so little local opportunity except for the Eddy Haddad Show on KETV. WOW-TV's Breakfast with Tommy uses one musician, he said. "A hearing of this type is needed," he felt.

Rena Murtagh, music teacher and performer, charged that television programs generally are "not conducive to the refinement of tastes." There is enormous talent reservoir untapped in Omaha, she said, and asked where else but locally could young artists gain experience. This view was challenged by another witness, Kendrick Wilson, director of the Omaha Playhouse, who presented a detailed analysis from his experience of the many practical obstacles which preclude anything but negligible use of amateur performers.

Lawrence W. M. McVoy, National Assn. for the Advancement of Colored People, charged "station management has not done enough" for his race, although support for NAACP activities was apparent.

Harlow Brown, KMTV employee and head of NABET Local 45, described the extensive technical facilities of his station and showed how they are put to use for local programming, including color. He said NABET also represents KETV while WOW-TV is IBEW, but he was not familiar with their facilities.

Thomas S. Nurnberger, volunteer head of the 1962 fund drive for United Community Services, said it would have been impossible for the Red Feather drive to have reached its $4.1 million goal, double the amount normally sought, had it not been for the support of the stations and the help of their staffs.

The Red Cross and other groups appearing Wednesday echoed Mr. Nurnberger's views.

Bob Danze, Omaha Central Labor Union AFL-CIO, commended all three stations for objective news reporting even during strikes. He also appreciated the fact that commercials on television stimulate business and thereby "create jobs."

Cox fields senators' queries on Omaha

COMMITTEE FAVORS NOMINEE, BUT ACTION AWAITS ORGANIZATION

A leading advocate of the FCC's controversial hearings on local tv programming in Omaha found that subject the only real conflict during a Senate committee proceeding last week on its own qualifications to be an FCC commissioner.

Kenneth A. Cox, chief of the Broadcast Bureau, which laid the groundwork for the Omaha hearing (see page 30), ran into stern criticism for the FCC's action from two Republican members of the Senate Commerce Committee, which questioned Mr. Cox Thursday (Jan. 31).

Mr. Cox, who served intermittently as special counsel on the committee's Communications Subcommittee before joining the FCC in 1961, defended the Omaha proceeding, but said he will have to study the hearing record before attempting an evaluation.

The 46-year-old lawyer was led over less sensitive ground in questioning by other committee members, including Sen. Warren G. Magnuson (D-Wash.), chairman of the committee, who has sponsored Mr. Cox since the latter's early work as special counsel.

Replaces Craven • Mr. Cox was nominated to complete the unexpired term (ending June 30) of Commissioner T.A.M. Craven, who reached the retirement age of 70 on the day of Mr. Cox's hearing. Mr. Cox also was nominated for a full seven-year term to begin July 1. Commissioner Craven will continue to serve until Mr. Cox is confirmed by the Senate.

The nominee was introduced to the committee by a fellow Washingtonian, Sen. Henry M. Jackson (D-Wash.), who said he thinks Mr. Cox will serve the commission "fairly, justly and impartially." The nominee also won warm support from Chairman Magnuson, who said he would have presented the nominee in Sen. Jackson's place were he not presiding.

Although each committee member endorsed Mr. Cox after the questioning, no vote of approval was possible because a filibuster on rules has put a damper on all Senate business.

Omaha on the Carpet • Sen. Norris Cotton (R-N.H.), ranking GOP committee member, started to lead questioning around to Omaha when he asked the nominee for his views on the FCC's duties and authority in the programming area. "I think the FCC has no authority in, nor has it ever sought to control programming," Mr. Cox replied.

In the case of Omaha, it was certainly not the agency's purpose to dictate to tv stations there what they should broadcast, he said. The FCC wants to know what the stations have done in local programming, and what the community thinks about the service, Mr. Cox said.

Asked by Sen. Cotton if he believes the agency should try to censor programs in any way, the nominee said the most the agency can do is to advise the industry of criticisms from the public about programs or advertising but leave the "ultimate decision" to the stations.

'Better Method' • Sen. Thurston B. Morton (R-Ky.) told Mr. Cox he agrees with the contentions of NAB President LeRoy Collins and Sen. Roman L. Hruska (R-Neb.) that the hearings impose hardship on the Omaha stations (Broadcasting, Jan. 28). "It seems to me a better method [than the hearings] can be devised," the senator said.

The proceedings have been "rather upsetting" to the stations, whose licenses were renewed without challenge in August 1962, said Sen. Morton. The agency's actions in Omaha have created suspicion in the community, he added.

"I hope the FCC will think long and hard before continuing this practice," admonished the senator. The FCC should not endanger public confidence in stations nor should it "scare" stations into great expense to defend themselves against unknown charges, he said.

Mr. Cox answered that the agency has tried to make it clear that the FCC is not "challenging" the Omaha stations. To ease their preparations for the proceedings the FCC had met with the stations' attorneys in Washington, Mr. Cox said.

Sen. Strom Thurmond (D-S.C.) said he had a few questions but thought they ought to be asked in executive (closed) session. He would not explain the nature of his planned inquiry.

An FCC Building? • Chairman Magnuson raised the subject of obtaining a new building for the agency, and Mr. Cox agreed the FCC needs new housing. Sen. Magnuson said he thinks the FCC is "Exhibit A" when Congress considers inadequacies of government agencies. Mr. Cox's vivid description of the FCC's cramped, over-heated quarters in the Post Office Department Building compelled the senator to remark, "You keep testifying like this and we'll transfer you to the slum clearance section."

The nominee, well aware that Sen. Magnuson is also chairman of the appropriations subcommittee which handles the FCC's budget requests, said, "I hope we can do better here."

When Sen. Magnuson asked Mr. Cox

What makes the listener turn the dial to your FM station? Superior programming and superior quality rendition. Programming at such levels virtually demands highest fidelity transmission. To achieve such standards, the unquestioned choice of knowledgeable FM stations is RCA's unmatched Direct FM Transmitter. RCA had "Direct FM" in its first FM transmitter, built in 1941—and in all the FM transmitters built since then (over 500).

With their time-proven Direct FM exciter, RCA FM transmitters supply the widest frequency response, with minimum distortion. Such a system is simpler, requires fewer tubes, and needs less adjusting. Consequently, RCA FM transmitters have the finest sound, and are easily tuned and maintained. Such performance is the happy result of RCA's long background of pioneering and achievement in the world of radio.
RCA designs and builds its complete line of FM transmitters to accommodate stereophonic signals and an SCA multiplex sub-channel. For complete technical details on any of RCA's Direct FM transmitters, see your RCA Broadcast Representative. Or write: RCA Broadcast and Television Equipment, Dept. S-22, Building 15-5, Camden, N. J.

**For STEREO the Easy Way...**

With an RCA FM transmitter (any post-war model) all you need to do is add the relatively simple RCA BTS-1A Stereo Generator. No need to buy a new exciter—the RCA BTE-10B Exciter, incorporated in all RCA FM transmitters since 1957, provides for SCA, too. (Those with earlier type exciters need change to 10B only if they want SCA.)
about the FCC's role in the regulation of a communications satellite corporation (whose incorporators were nominated by President Kennedy last week [see page 54], the nominee said he thinks the space communications program merits the FCC's "highest possible priority."

Sen. Ralph W. Yarborough (D-Tex.), chairman of a watchdog subcommittee on political broadcasting, won Mr. Cox's promise that the FCC will give increased attention to enforcing Sec. 315 of the Communications Act.

Maker, agency deny Geritol ads false

The FTC complaint charged that contrary to TV and newspaper advertisements, Geritol does not correct tiredness, loss of strength, run-down feeling, nervousness or irritability.

During the 13 years Geritol has been on the market, the company averred, it "has made a substantial contribution to the cause of good nutrition in the United States." The company further claimed that "in all the years in which Geritol has been available to the public, the company has received no complaint or report from a consumer, a doctor, or any other person which lends support to the proposed medical warning statement which the commission would require in its advertising."

This was a reference to the FTC charge that in many instances anemia is caused by disorders or diseases requiring medical treatment and that the use of Geritol might cause a person to forego seeing a physician.

Other FTC actions in the geriatric field:

- An FTC hearing examiner recommended that a 1958 FTC complaint against Drug Research Corp. and its advertising agency, Farrell, Chelsey & Clifford, both New York, be dismissed.
- Drug Research was charged with making false claims for its weight reducing preparation, Regimen Tablets. Dismissal of the complaint was opposed by the respondents, according to the FTC. The FTC counsel moved to dismiss the complaint on the ground that the company is on trial in New York State and that boxes of Regimen Tablets were seized under the federal Food, Drug and Cosmetic Act.
- The commission ordered Hadacol Inc., Chicago, to discontinue alleged false claims that "New Super Hadacol" will ease nervousness and exhaustion. The FTC adopted a decision filed last November by a hearing examiner [BROADCASTING, Dec. 3, 1962].

Philco: FCC lacks power to veto plan

Philco Broadcasting told the FCC last week it lacked the authority to disapprove the plan under which Philco would pull out of the ch. 3 Philadelphia fight and be reimbursed its expenses by NBC, the present occupant of that channel [BROADCASTING, Jan. 7, et seq.].

Philco said the Communications Act provides authority for such review only in cases where two or more permits for construction are pending. In the Philadelphia contest, only Philco is seeking a construction permit; NBC has a license it wants renewed.

But Philco added that if the commission interprets the Act as giving it authority, it should approve the agreement to withdraw, as being in the public in-

![Image of multiple honorees on retirement]

Craven gleans multiple honors on retirement

Last week was farewell week for retiring FCC Commissioner T.A.M. Craven who will become the commission's consultant on space communications activities.

Commissioner Craven was toasted by commission engineers Tuesday (Jan. 29) at a luncheon in his honor. Here he was presented a globe, for use in his space work, and a scroll signed by all commission engineers. The engineers tried guessing by ear the frequency that sound from an oscillator nearby. The prize was of a liquid nature.

On Thursday, Commissioner Craven was again honored, by his fellow commissioners and the agency's staff. Well-wishers presented him an overnight executive case. The other six commissioners honored him with a plaque signed by all.

Commissioner Craven will continue at his old post until Commissioner-designate Kenneth Cox is confirmed by the Senate (see story page 38) and is sworn in.

Pictured above is the head table at the luncheon, l to r are: Frank Kratokvil, assistant chief of field engineering bureau; Lew North, chief engineering assistant; Ralph Renton, Assoc. chief engineer; Commissioner Craven; Fred Heister, engineering assistant; Curtis Plummer, executive director of FCC; James Barr, chief of Safety & Special Bureau; M. H. Woodward, chief of International & Common Carrier Services.
LIONEL NEWMAN has produced themes, incidental music and scores for such popular TV series as "Hong Kong," "Bus Stop," "Adventures in Paradise," and "Margie," to name a few. As a musical director with 20th Century-Fox, he has a long list of enviable screen credits, and has been nominated for the Academy Award four times. He's been affiliated with BMI since 1951.

and there are 104 other regular network programs which use BMI music.

A new dodge in town—and the FCC's after it

The FCC warned all stations last week to avoid entering agreements to set combination advertising rates. The commission said such activities are illegal and clearly violate commission policy.

The arrangements concerning the commission, one official explained, are usually engineered by an advertising salesman who organizes several stations in a town into a "network." He then offers combination rates to an advertiser for spot time on all the "network" stations.

The commission notice didn't indicate how many stations are involved in such arrangements. But one source said at least 12 stations—"all am—are known to have participated in them.

The problem is a fairly new one for the commission. It reached the commission level several months ago through the Renewal and Transfer Division which had received complaints about stations entering into combination agreements.

One official said stations participating in them apparently don't realize they are violating the law. He said there's nothing "covert" about the arrangements. Much of the commission information about them comes from promotion brochures.

terest, and the proposed payment of $523,000.

The company made its comments in reply to a Broadcast Bureau recommendation that the withdrawal be approved but the payment denied (At DEADLINE, Jan. 21). The bureau, questioning Philco's good faith in filing its application, said there was "a serious question" as to whether the application was merely a device to improve the bargaining position of the parent Philco Corp. in its court fight with NBC's parent, RCA, over patent rights.

Court Settlement • A settlement, under which RCA paid Philco $9 million, ended that court fight at the same time agreement was reached on Philco's withdrawal from the ch. 3 contest (BROADCASTING, Jan. 7).

In contesting the Communications Act doesn't apply to the NBC-Philco case, in which one applicant is seeking renewal, the other a construction permit. Philco presented an analysis of Sec. 311 (c). This is the section cited the Broadcast Bureau as the basis for the commission's jurisdiction.

Philco noted the section, added in 1960 to outlaw "pay-offs," speaks of situations in which "there are pending before the commission two or more applications for a permit for construction...!"

"Technical words and phrases," Philco said, "are assumed to have been used by a legislative body in a technical sense. Terms of art in a statute are to be taken in their technical meaning which is presumed to have been understood by those responsible for the passage of the law."

Turning to the bureau's main argument against approving reimbursement, Philco said there is no evidence to support a contention of bad faith. It notes the bureau concedes there is no evidence for concluding that there was "a lack of bona fides," only a doubt.

The company said the agreements settling the various court suits have already been executed and cannot be affected by the fate of the ch. 3 issue. Attached to its filing are affidavits by Joseph H. Gillies, president of Philco Broadcasting, and David B. Smith, vice president, stating that the application was filed only because Philco wanted to operate a Philadelphia TV station, not because of the litigation between Philco and RCA.

Riding on the FCC decision is NBC's hope of early renewal and its transfer of its Philadelphia properties—WRCV-AM-TV for RKO General's Boston stations, WNAC-AM-TV and WRKO (FM). NBC is required to dispose of its Philadelphia stations by a 1959 Justice Dept. consent decree.

Rep. Bennett proposes administrative court

An administrative court proposed by a Florida congressman resembles in some ways the communications court suggested in a monograph prepared for the consideration of the Federal Communications Bar Assn. (BROADCASTING, Jan. 28).

In H.R. 43, Rep. Charles E. Bennett (D-Fla.) would provide a United States Administrative Court to be composed of nine justices appointed by the President for 11-year terms. With powers equivalent to a U. S. district court, the administrative tribunal would appoint hearing commissioners and "establish such divisions or panels as it may deem appropriate for the conduct of its proceedings."

A communications court patterned after the tax court would assume the adjudicatory functions now exercised by the FCC, according to the bar association's proposal.

Rep. Bennett's court would consider matters of all agencies, unlike the specialized court proposed by the bar association.

Station owner complains about wire-service terms

Complaints of a radio broadcaster that five-year contracts required by suppliers of radio news wire services are too long have been reported turned over to the FCC and the Department of Justice.

Ranulf Compton, president of South Jersey Broadcasting Co., Camden, N. J., claimed such contracts are arbitrary and non-cancellable. His company, licensee of WKDN-AM-FM Camden and WARN-AM-FM Ft. Pierce, Fla., cannot foretell whether for such an extended period of time, he contended. Two-year contracts would be fairer, he added.

Mr. Compton argued that network affiliation contracts were for two-year periods, and FCC licenses for only three years.

The New Jersey broadcaster filed complaints with two federal agencies and commerce committees of Congress. Both committees referred the matter to the FCC for study.

The FCC last week...

- By its Review Board granted John A. Egle a construction permit for a new am station on 1600 kc (1 kw) in Golden Meadow, La. At the same time, the board denied a joint request by Mr. Egle and competing applicant KLFT Radio Inc. for reimbursement of expenses incurred by the later in processing its application (BROADCASTING, Dec. 24, 1963).

- Granted, by Chief Hearing Examiner James D. Cunningham, a petition by the Broadcast Bureau to hold a field hearing on the application of Geoffrey A. Lapping for a new am station in Blythe, Calif. Mr. Cunningham last November denied a request by Mr. Lapping for the field hearing (BROADCASTING, Dec. 3) but stated that matters set forth in the bureau's petition and disclosures at the pre-hearing conference now warrant a field hearing.

- Hearing Examiner James D. Cunningham was designated, by himself, as chief hearing examiner, to preside at the commission's investigatory proceeding concerning the alleged misrepresentations made by the McLendon Corp. concerning its intended programming for WYNR Chicago (BROADCASTING, Jan. 28). Hearing will be held in Chicago beginning March 5.
THIS...IS A JURY?

It is indeed! Every day WFGA-TV is on trial before it. The jury is fair. It is open-minded. It knows what it wants. It seldom listens to alibis from those who fail to deliver. Decisions are quick: it simply turns to another channel.

Because WFGA-TV is constantly on trial, we work unceasingly towards determining the public's wants and needs. We try to provide the best entertainment and the most satisfactory community service during the year. From what we've learned, the jury likes it.

WHAT GOALS FOR THE FCC IN '63?
Renewal procedures; radio overpopulation, network regulation are just a few of the increasing issues facing the commission.

The FCC is moving toward important changes in its license renewal procedures aimed at reducing the possibility of interference by its staff in local programming and, hopefully, opening up better communications between licensees and the commission. A key proposal calls for the "clarification" and, for the first time, publication of the criteria used to determine whether licensees merit automatic renewal.

The commission is also expected to take steps to curb the proliferation of AM stations but at the same time allow some daytime-only stations to broadcast before sunrise. A continuation of the FCC's effort to secure regulatory authority over the nation's networks (though not to the extent recommended by the network study staff) and CATV systems (though not with much hope of success) is also forecast.

These and other conclusions emerge from comments by the FCC members in discussing the problems of the commission for the year ahead. "We're not coming up with panaceas," Chairman Newton N. Minow noted. "These problems don't lend themselves to easy solutions."

The proposed adoption of the NAB commercial codes as an FCC rule, the freeze on FM grants, final implementation of the decision to duplicate 13 of the 25 clear channel stations (and the possibility of higher power for one or more of the remaining clear channel stations), station filing fees, the continuing question of what to do about the equal-time section of the Communications Act—these issues, too, confront the commission.

Letterwriting Campaign • But cutting across all of these issues is the fundamental one of how far the commission can go in regulating broadcasting without interfering in stations' programming. The revelation of the scope and nature of the staff letters to renewal applicants—with their implication of program dictation—came as a shock to some commissioners (Broadcasting, Dec. 3, 1962). Even Chairman Minow, who maintains the staff acted within the authority delegated by the commission, feels changes in procedure are required.

These are being made. Procedures are being drafted by which the commission membership would be brought into any renewal case in which an applicant's first letter of explanation fails to satisfy the staff that he has met the requirements of the 1960 statement on programming policy and that he wants renewal (Closed Circuit, Jan. 14). Essentially, that policy requires broadcasters to make a continuing survey of

the licensee's."

Commissioner E. William Henry said the aim of the proposed revisions is to "permit better understanding between the commission and the licensee so that the commission can act more quickly."

What Criteria? • Just what kind of criteria will eventually emerge, however, is uncertain. The staff now uses percentages of various types of programming as "a rule of thumb" in determining whether licensees should be automatically renewed. Some commissioners, notably Commissioner Ford, oppose this approach. But since this question is closely tied in with the program reporting form, it is assumed no final decision will be made until the commission completes its long-awaited revision of that document.

Commissioner Ford, who heads a committee of three commissioners working on the form, hopes to have it completed "in a couple of weeks." But the form has been so drastically revised since it was put out for com-

ments in July 1961 that most members feel that further comments are desirable.

The program form, or rather the final shape it takes, is seen as "the big issue" of 1963 by Commissioner T. A. M. Craven, who is due to be succeeded by Kenneth Cox, now head of the Broadcast Bureau. He said the form is "supposed to reflect" the commission's 1960 program policy statement. But the commissioner, who has long opposed any action he regards as an intrusion into programming, fears the form might become a device for "questioning the judgment of broad-

Comr. Lee
Chmn. Minow
Comr. Hyde
Comr. Ford
casters as to whether they are giving enough time to certain types of programming." He said "there's a difference between the FCC substituting its judgment for that of the broadcasters and finding out whether the broadcaster has collected the data on which to make a judgment."

Commissioner Rosel H. Hyde is also concerned about this issue—and in a speech before the Utah Broadcasters Assn. in Ogden last October, he lashed out at broadcasters for not being more concerned themselves. He accused broadcasters of acquiescing in the commission's action in passing judgment on their over-all program performance "while at the same time disavowing any interest in particulars." He called on the industry to oppose what he considered the government's growing power over programming (Broadcasting, Oct. 15, 1962).

But if the commissioners can't yet agree on the final shape the program form is to take, most seem to be of one mind with regard to the am population growth. They feel it should be slowed down. But they also agreed unanimously with the NAB view, expressed at the commission's am over-population hearing (Broadcasting, Jan. 14), that the government shouldn't extend economic protection to existing stations. Most favor a "tightening up" of engineering rules. Some advocate tougher financial qualifications.

Minow Dissent - Dissenting from this last view is Chairman Minow. He cited the case of two young men, Gary Gielow and James Gabbert, who established an fm station in San Francisco with $11,000 in 1957 and made a success of it (Broadcasting, Jan. 14).

"How could enterprise like that be accommodated within tightened financial rules?" he asked. But he feels the commission should be careful about the financial qualifications of prospective buyers in the case of station transfers.

How long will the current am freeze last? Most commissioners think it will be lifted within six months. Chairman Minow said a proposed rulemaking could be ready in a month.

Although the commission seems headed toward tighter engineering rules for new am stations, the agency appears ready to relax these rules to permit daytime-only stations to go on the air an hour or so sooner on dark winter mornings. The question of whether daytimers in single-station markets should be permitted to broadcast before sunrise is the subject of a proposed rulemaking on which comments are due March 15. But most commissioners have already predicted that "something" will be done for the daytimers.

Chairman Minow expressed sympathy for daytimers, saying they have had "a shoving around." Some commissioners admitted their sympathy was inspired largely by pressure from Capitol Hill, where the House last year made its wishes known by passing a bill to permit pre-sunrise operation by daytimers (Broadcasting, July 9, 1962). The Senate, however, didn't act on the measure.

Network Regulation - The commission is sure to send Congress another request for regulatory power over the networks. But although the proposal will be drafted in light of the report submitted by the commission's network study staff (Broadcasting, Dec. 3), it's doubtful that many of the staff recommendations will be incorporated. Certainly the staff's most controversial proposal—that all broadcasters be required to join a government-supervised trade association—doesn't command anything like majority commission support. Commissioner Robert T. Bartley is the only member who has spoken kindly of the report, at least in public (Broadcasting, Dec. 17).

Commissioner Robert E. Lee's proposal that the commission adopt the NAB radio and tv commercial codes as part of its rules, however, is very likely to be issued as a proposed rulemaking. This plan was voted down by the commission, 4-3, two months ago (Closed Circuit, Nov. 26, 1962). But this result could be reversed after Mr. Cox, who is believed to endorse the idea, replaces Commissioner Craven, who opposed it. This doesn't mean the rule will eventually be adopted, however. Although he has pushed hard for the proposal, Commissioner Lee now says he's "not sure" he would vote for it. He said recently he wants to see the industry's comments first. Commissioner Henry, who also voted for the rulemaking proposal, said the same thing.

The commission will also make another plea to Congress for authority to regulate catv systems. The commissioners feel they need this power, considering the potential threat catv poses to television stations. But they realize the chances of congressional action are slim, in view of the adamant stand against such legislation by Rep. Oren Harris (D-Ark.), chairman of the House Commerce Committee (Broadcasting, June 25, 1962).

Fm Freeze - The freeze on fm grants, imposed last month when the commission proposed its nationwide table of allocations for the 80 U. S. fm commercial channels (Broadcasting, Dec. 24, 1962), will probably last well into the summer. In the meantime, the commission will give a great deal of attention to the protests of those who have asked the commission to return to its protected contour concept of station assignments. Several commissioners indicated some compromise is likely between the two proposals.

Still hanging over broadcasters' heads, and all others doing business with the commission, is a proposal to charge fees for applications. The commission was swamped with protests when it put this idea out for comments last spring (Broadcasting, May 21, 1962), but

Broadcasting, February 4, 1963
Kennedy, advisory group meet in White House

President Kennedy conferred with the U. S. Advisory Commission on Information at the White House, following a meeting of the group in Washington (AT DEADLINE, Jan. 28).

Chairman Minow, prime mover behind the proposal, still thinks it's sound. Other commissioners, even some who voted for the rulemaking, doubt that the proposal will be adopted, at least for the foreseeable future. They say there are too many practical problems involved in arriving at a "reasonable" fee for each applicant.

Waiting on Congress - The next move in the clear-channel case, all commissioners agree, is up to Congress. After the commission voted to duplicate 13 of the 25 clear channels, the House adopted a resolution last July asking the commission to delay action for a year and also to authorize power higher than the present 50 kw limit. This second proposal runs counter to a 1938 Senate resolution asking the commission to limit radio stations' power to 50 kw.

The commissioners say if Congress takes no further action by July, they will proceed to assign second fulltime stations to the 13 channels. But several commissioners, including Chairman Minow and Commissioners Ford and Lee, said they would be willing to take a fresh look at the question of lifting the 50 kw limit on power. They said the commission would move very cautiously, however, to make sure granting of higher power wouldn't have an adverse economic impact on other stations.

The equal-time section of the Communications Act, Sec. 315, remains as much of a headache for the commission, which must administer it, as for Congress, which is constantly besieged with requests from broadcasters to liberalize if not repeal it. But it will do Congress no good to ask the commission's advice. The commission will probably support as a minimum, suspension of the law in 1964, as in 1960, to exempt candidates for president and vice president. But beyond that, only Commissioner Ford has a solution—to repeal the section and give the FCC responsibility for assuring broadcasters' fair play under a fairness doctrine (BROADCASTING, Nov. 12, 1962). The other commissioners agree Sec. 315 is difficult to live with. But they say any substantial change would probably make it worse.

The FCC, however, will ask Congress to resolve the conflict between the Sec. 315 provision prohibiting censorship of candidates and another section of the Communications Act prohibiting re-broadcast of material without the originating station's permission. This conflict resulted in a complaint on which the commission divided 3-2 during last

It's what camera says, not how, FTC told

Does a tv advertiser have the responsibility to make sure no substitute is used in his commercials even though the product will perform exactly as shown?

This was the question argued last week before the Federal Trade Commission in the Libby-Owens-Ford and General Motors safety plate glass commercials in 1957-58. GM counsel William Symonds argued that the method by which a film is made is irrelevant so long as there is no misrepresentation of the product.

Joseph Smith, for L-O-F, said there was no fraud on the public in commercials shot through an open window and represented as having been taken through an L-O-F safety plate glass window because the view is exactly the same.

An initial decision by FTC Examiner Harry R. Hinckes found the respondents guilty of trickery and false demonstrations (BROADCASTING, Aug. 6, 1962). The examiner ruled that L-O-F commercials had misrepresented the alleged distortion of a competitor's safety sheet glass and had represented to the public that pictures taken through an open automobile window had been shot through L-O-F safety plate glass. A GM commercial, the examiner found, had filmed sheet glass through Vaseline to cause distortion.

FTC counsel Edward F. Downs and Anthony Kennedy Jr. told the Trade Commission that GM and L-O-F should be held jointly responsible for the alleged false representations. The examiner ruled that the advertising campaigns were separate. Mr. Kennedy charged that GM gave advance approval to the L-O-F commercials promoting safety plate glass.

Mr. Downs said the commercials were an unfair method of competition and that the consumer has a right "to see what he thinks he sees." Both L-O-F and GM claimed that they didn't know, until the FTC filed a complaint, that camera tricks had been used in filming the commercials. "L-O-F not for one minute approved of that shenanigan," Mr. Smith said. "These films were shown by L-O-F in the best of good faith."
fall's campaign. The complaint was filed by a candidate for the U. S. Senate who had incorporated taped segments of his opponents' broadcasts into a program of his own. Stations in the state refused to carry it because of the prohibition against rebroadcasting material without approval.

This list of problems facing the commission in 1963 isn't complete, of course. There remain such thorny problems as loud commercials, vhf drop-ins, option time—to mention a few on which commission thinking is far from crystallized. And, as Chairman Minow said, "these problems don't lend themselves to easy solutions"—which is another way of saying that, whatever the solution, somebody's going to holler.

**Moss subcommittee given broader range**

A powerful new House subcommittee has been given new tools for a broad investigation of government information policies—including a deep, detailed examination of the "news management" revealed by the Cuban crisis.

Rep. John E. Moss (D-Calif.), who has headed the highly-active but limited-in-power Special Subcommittee on Government Information for eight years, was named chairman Thursday (Jan. 31) of the Subcommittee on Foreign Operations and Government Information of the Government Operations Committee.

Already squarely on the record in favor of pushing back unnecessary and unwise curbs on access to information—not on the Congress alone but on the general public as well—Rep. Moss also has expressed great concern about administration policies which seek to manage news (Broadcasting, Jan. 14).

His new subcommittee is the result of a major overhaul of the Government Operations Committee organization by Chairman William L. Dawson (D-Ill.), who has supported Rep. Moss throughout the latter's special subcommittee's activities in the informational field. The committee chairman augmented the old freedom of information unit with a subcommittee on foreign operations.

**Overseas Looksees, Too** • Rep. Moss' new subcommittee will have authority to investigate overseas for the first time. Although subcommittee plans have not been formally announced, the chairman is known to be especially interested in getting into problems of news management by the government. It is likely panels of newsmen will be formed to describe information problems met during the Cuban crisis.

Another area into which the subcommittee can be expected to probe is lobbying activities of government information arms, as well as their general efficiency and economics.
Along with letter that almost wasn't sent, WKY-TV gets license renewal, despite defiance on programs

WKY-TV Oklahoma City, which had refused to bend to FCC staff pressure to revise its programming policy, received a three-year renewal of its license last week.

The commission's action, on a 6-0 vote, was announced along with the release of a copy of a letter to the station which stressed the importance the commission attaches to the station's efforts to determine community needs and to its broadcasts of 21 local live programs in prime time.

But the letter—coming after the commission's staff had raised serious questions about WKY-TV's proposed programming—was regarded by some observers as a "face-saving" device. At least two commissioners voted against sending it, it was learned.

The letter said the renewal was being granted "on the basis of information submitted in the amendments to your application." Actually, the station didn't amend its application. The commission apparently was referring to a detailed explanation of how the station had determined community needs.

WKY-TV had been one of dozens of stations across the country whose programming proposals had been questioned by the commission's broadcast bureau during its review of their applications for renewal (Broadcasting, Dec. 3). The letter-writing campaign was seen by some as an effort to induce stations to carry local live talk shows.

Received Two Letters * WKY-TV, whose license expired last June, received two letters inquiring into its lack of proposed local live programming in prime time and asking whether the schedule had the "flexibility" to meet the needs of minority groups.

But the station refused to amend its application to eliminate the questions raised by the Broadcast Bureau. To the first letter, the station replied with a description of its effort to determine community needs. It also asserted it had a policy of pre-sunrise regularly scheduled programs for local live shows in prime time when such preemptions were warranted. This policy resulted in 21 local live programs in prime time in 1961.

To the second letter, the station said that although it doesn't consider its judgment infallible, its "program schedule is the result of its considered opinion based upon its knowledge of the area and its evaluation of the various factors which must be considered in any determination of what program best serves the public interest."

The bureau, it was understood, had a third letter of inquiry ready to send to the station. But the commission, at a meeting two weeks ago, told the bureau to cancel it and prepare another one announcing the station's license would be renewed. The commission has been disturbed by the extent of the station's letter writing campaign, and is taking steps to curb it (see story page 48).

Survey Cited * In its letter to the station, the commission said that in granting renewal, it "considered carefully the fact that you conducted a comprehensive survey of community organizations in November 1960, and that based thereon the application of your pre-emption policy in 1961 resulted in your carrying 21 local live programs during prime time."

The commission noted this was a "substantial increase in such local live programming in these hours" in comparison with 1959, when six such programs were carried, and 1960, when there was only one program of that type.

"We have assumed," the commission said, "that the results of your 1961 pre-emption policy, which were based on a community survey, are a better measure of your plans for the ensuing period, and have renewed your license in reliance of such an understanding."

"The commission also noted the decision in the KORD Pasco, Wash., case, in which it said that programming "proposals are not 'binding' to the last decimal point" and that "a programming format in a particular community is not a fixed, immutable concept."

The commission set its "promise vs. performance" policy in the KORD decision (Broadcasting, July 17, 1961).

There was considerable speculation—one of it contradictory—as to what effect the WKY-TV decision would have on future renewal cases. Some commission officials said no dramatic changes should be expected until the commission finally decides what it will include in its revised program reporting form.

But there was considerable agreement that the decision was, at least, a "clarification" of the authority the commission has delegated to the staff. From now on, according to one official, the commission will probably not "insist" on regularly scheduled local live shows. "If a station has a policy of preemitting programs for local live shows, and implements it effectively, this will probably be acceptable," he said.

Daytimers oppose FCC proposal

CONTEND IT WILL DO MORE HARM THAN GOOD

"Six to six or flight," the motto of the Daytime Broadcasters Assn., was reinforced by the group's board of directors in Washington last week. Their board decided to (1) oppose the FCC's current pre-sunrise rulemaking and (2) open an office in Washington to continue the crusade for daytime stations.

In its current rulemaking, the FCC has proposed to permit daytimers operating on Class III regional channels to operate pre-sunrise only in communities not served by a local fulltime station. Such pre-sunrise operation would be limited to non-directional antennas and 500 watts. All operation by daytimers after sunset would be prohibited under the proposal. Comments are due March 15.

DBA maintained that the proposed rules are even more restrictive than present provisions, under which many daytime stations are permitted to operate pre-sunrise. The FCC plan will not help those communities served only by daytime stations operating on clear channels, DBA said.

In a January bulletin to member stations, DBA said that a study in Illinois showed that 24 communities in that state would benefit with pre-sunrise service from the FCC proposal while 37 cities with daytime only stations would not. Of the 37 Illinois cities, 28 do not have a fulltime station. "This places the local public interest in an engineering strait jacket," DBA said.

The association urged its member stations to "fully acquaint" the members of Congress with the daytime problem and to push for legislation during the present session. "It takes grass roots support to get action in Washington, D. C.," DBA stressed.

A Washington office will be opened by the daytime broadcasters at 1001 Connecticut Ave., N.W., the DBA board announced. The commission also voted to be announced later. A membership meeting of the association will be held in Chicago during the March 31-April 3 NAB convention. Board members present for the DBA meeting in Washington last week included Ray Livesay, WLBH Mattoon, Ill., chairman; Richard Adams, WKXO Framingham, Mass., president; Ike Cohen, WCAP Lowell, Mass.; R. W. Olson, KWOA Worthington, Minn., and Thomas Rogers, WCLT Newark, Ohio.
BUT... With WKZO Radio, Ride
The Crest in Kalamazoo
and Greater Western Michigan!

WKZO Radio is the station with the biggest splash in Greater Western Michigan: NCS '61 credits WKZO Radio with more circulation than any radio rival—with 40.4% more than all other Kalamazoo stations combined.

And it's high tide at all hours, too: the 6-county Pulse of Sept., '62 shows WKZO Radio outrating all competitors in 358 of 360 quarter-hours surveyed—dominating all hours surveyed in both total listening and adult listening.

And rising fast! Sales Management has predicted that Kalamazoo will outgrow all other U.S. cities in personal income and retail sales between 1960 and 1965.

Let your Avery-Knodel man give you the complete log!

*A wave 112 feet from trough to crest was computed from U.S.S. Ramapo in 1933.
WLOV (FM) has its license revoked

The death penalty was dealt to WLOV (FM) Cranston, R. I., by the FCC last week on grounds the station made misrepresentations to the commission, committed numerous technical violations and had been financially irresponsible.

WLOV was warned in November 1961 that it was liable to have its license revoked. But the station waived the right to a hearing (Broadcasting, March 19, 1962). WLOV, in an explanatory letter to the commission, admitted some of the transgressions, claimed that some of the technical violations had been corrected and said that revocation was too severe a punishment "in view of failings due primarily to human frailties rather than to pernicious design to reap huge profits by making deceptive representations."

The commission, however, decided that WLOV had a record of "total disregard" for its rules and that it could not depend upon the word of the station.

FCC gets court support in interference order

A federal appeals court in Washington last week upheld the FCC's right to deny an applicant whose proposed operation would receive more than 10% interference.

In an opinion by the court as a whole, the U. S. Court of Appeals rejected an appeal by WBRD Bradenton, Fla., a daytimer, to overrule the FCC's denial of the station's application for nighttime operation. WBRD operates with 1 kw on 1,420 kc.

In denying the WBRD application for nighttime service the FCC found that 50% of the people in the proposed service area would receive interference from existing stations. The court agreed that this is a judgment within the "expertise" of the commission.

Initial decision favors Miller in Kennett case

FCC Hearing Examiner Basil P. Cooper issued an initial decision last week favoring a grant of a new am station on 1,440 kc with 1 kw daytime in Kennett, Mo., to William L. Miller.

In April 1962 the commission ordered a hearing held on Mr. Miller's application following a petition by KBOA Kennett that charged him with "willful misrepresentations" to the commission (Broadcasting, April 16, 1962). Mr. Miller and Luther Pilrow had applied to the commission for permission to sell KHSH Hemet, Calif., because Mr. Miller wished to devote his full time to real estate interests. Mr. Miller, KBOA claimed, applied for the Kennett frequency on May 23, 1960, one day after the sale of KHSH.

Examiner Cooper, for several years a member of the transfer and assignment section of the FCC, said he was not aware that the commission had ever asked if a licensee planned to re-enter broadcasting after selling a station.

There is no logical reason for anyone to conceal from the commission that they might re-enter the broadcasting field, Mr. Cooper concluded.

Comsat incorporators submitted to Senate

President Kennedy last week submitted the names of 12 incorporators for the Communications Satellite Corp. to the Senate, where they were referred to the Senate Commerce Committee.

No date has been set for a hearing.

The incorporators nominated by the President are the same as those named under a recess appointment last October (Broadcasting, Oct. 15, 8, 1962), except for Philip L. Graham, president of the Washington Post Co. (Post-Newsweek stations), chairman of the board of incorporators, who resigned last week. Sam Harris, New York attorney and director in two mining companies, who was vice chairman of the board, succeeded Mr. Graham. Mr. Graham told the President in his letter of resignation that he had promised to serve until the corporation was established. He also indicated reasons of health for resigning.

Besides Mr. Harris, the roster of incorporators includes:

Edgar F. Kaiser, Kaiser Industries (with broadcast interests in Hawaii and California); Leonard H. Marks, partner in Washington communication law firm of Cohn & Marks; George L. Killion, president of American President Lines and chairman of Loew's Inc., former owner of WHN (then WMGM) New York; Bruce G. Sundlun, Washington attorney who is secretary and general counsel of The Outlet Co. (Wjar-AM-FM-TV Providence, R. I.); and David M. Kennedy, Chicago banker; Sidney J. Weinberg, New York investment banker; A. Byrne Litschgi, Florida attorney; Basil P. Cooper, Kenney research company president; Leonard Woodcock, Detroit union official; George Feldman, New York attorney and businessman, and John T. Connor, New Jersey drug company official.

WHDH-TV contests order on ch. 5

WHDH-TV (ch. 5) Boston, renewing its efforts to retain the Boston channel, has charged that the commission's Dec. 19 order, making ch. 5 available until March 26 for comparative applications, is not in accord with the Communications Act.

WHDH-TV, owned by the Boston Herald-Traveler, received a four-month license to operate ch. 5 last fall (Broadcasting, Oct. 1, 1962). It originally received the ch. 5 grant in 1957 but a rehearing was ordered because of off the record contacts with commissioners.

The FCC's failure to act on WHDH-TV's renewal application—required when the four-month license was granted—is "illegal and invalid," since the law requires action on uncontested renewals within three months, the station said.

Opposition by Charles River Civic TV Inc. is not relevant because, the station said, Charles River is not actually an applicant.

WHDH-TV said Boston Broadcasting Co. is not an applicant because it has formed no corporation andMassachusetts Bay Telecasters Inc. because it is not legally qualified to be an applicant.

WLWB-TV completes testimony on ch. 10

L. B. Wilson Inc. completed its direct testimony last week in the comparative hearing being held to determine which of four applicants will operate on ch. 10 in Miami.

L. B. Wilson, owner of WLWB-TV, which is now on the channel, has based its case largely on the qualifications of its management, the station's programming record and the plant investment it has already made.

But as the hearing ground into its second week, Charles H. Topmiller, president, and Mrs. Jeanette Heinz, vice president and treasurer, were cross examined at length on changes in the capital structure of L. B. Wilson. Opposing counsel indicated they thought the changes—of an outstanding stock reduced from 1,466 shares to 458—should have been reflected in the company's license application.

Sol Taishoff, president of Broadcasting Publications and owner, through Jolar Inc., of a minority interest in L. B. Wilson, testified Tuesday under subpoena by Civic Television Inc.

Civic's counsel, Quin O'Connell, sought to determine Mr. Taishoff's relationship with L. B. Wilson in light of his background as a newsman and the news sources he has established over the years, and whether he has an important voice in the station's management.

Mr. Taishoff, however, said he leaves all decisions to management. He also said he never offers any advice unless asked and added that his contacts with the management group are limited to about one or two a month.

Jolar Inc. owns 11.3% of L. B. Wil-

SAN FRANCISCO • OAKLAND

Represented nationally by H-R Television, Inc.

SAN FRANCISCO’s cable cars are a permanent part of the city’s landscape. Moving at 12 miles per hour, the cable cars climb lines on three of the city’s routes, carrying passengers from the Bay to downtown San Francisco.
son. Most of this was inherited by Mr. Taishoff from the estate of L. B. Wilson and was turned over to Jolar, a family-owned corporation.

South Florida Television Corp. will begin presenting its case today (Monday), to be followed by Civic and Miami Television Corp.

In view: new squeeze on public utility ads

Advertising by public utility companies for the purpose of "influencing public opinion with respect to public policy" is the target of proposed new rules by the Federal Power Commission. The new rules would require such companies to give a detailed accounting of non-operating expenditures of this type as justification for their deduction for tax purposes.

About one third of public utilities' budgets is devoted to radio or television. Comments are due next Tuesday (Feb. 12) on the proposal which would require utilities to make a detailed accounting for the following: "Expenditures for the purpose of influencing public opinion as to the election of public officers, referenda, proposed legislation, proposed ordinances, repeal of existing law or ordinances, approval of or revocation of franchises, for the purpose of influencing decision of public officers, or having any direct relationship to public matters, including the influencing of public opinion with respect to public policy."

An earlier FPC decision, which the U. S. Supreme Court refused to review, held that power companies could not deduct expenditures for advertising discrediting the question of private vs. public power. The proposed new rules are based on this decision and would make the restriction apply to all types of public utilities under the power commission's jurisdiction.

Report on Red propaganda

The USIA has released Communist Propaganda Around the World, a compilation of data on communist activities. Subtitled "Apparatus and Activities—1961," the study covers Red bloc efforts for 1961, although the USIA notes that 90% of the general information may be considered currently valid.

Sections of the book are devoted to both radio and television activities of communist propagandists, and charts are included which compare broadcast growths of free-world and communist countries.

Top committee post goes to Grinstein

Gerald B. Grinstein, former counsel on the Senate Surface Transportation Subcommittee, was named chief counsel of the Senate Commerce Committee last week by Chairman Warren G. Magnuson (D-Wash.).

Mr. Grinstein is a resident of Seattle. He replaces Harold I. Baynton who had been acting chief counsel since the death of Frank Pellegrini in 1955. Mr. Baynton indicated he would stay with the committee.

Mr. Grinstein, 30, is a graduate of Yale U. and the Harvard U. Law School.

THE MEDIA

NEW UHFS AIM FOR NEGRO AUDIENCES

D.C.'s WOOK-TV starts Feb, 11; L.A.'s KIIX in March

Los Angeles and Washington, D.C., are about to get second uhf television stations. And both will aim their programming at the Negro audience.

WOOK-TV, ch. 14, Washington is scheduled to begin operations next Mon. (Feb. 11) according to John Panagos, vice president of United Broadcasting Co. KIIX (TV), ch. 22, Los Angeles, expects to start sometime in March, according to H. Calvin Young Jr., president of Central Broadcasting of California Inc., which just acquired the station, formerly KBIC-TV from John Poole for $180,000 (Broadcasting, Jan. 28).

(KMEX [TV], ch. 34, Los Angeles, specializes in Spanish-language programming, and WETA [TV], ch. 26, Washington, is an etv station.)

For its Feb. 11 opening, WOOK-TV plans a five-hour "musical extravangza" which will be produced by the station's music director, jazzman Lionel Hampton.

WOOK-TV plans to be on the air on weekdays from 5-11 p.m. and from 3-11 p.m. on Saturdays and Sundays. Live programs will include two daily half-hour news programs, a daily Teen Dance Party and a variety show, using local talent three times weekly.

Film programs, which will make up over half of WOOK-TV's schedule, include Oscar Brown Jazz Time, U.S.A., Mahalia Jackson's spiritual programs, Broadway Goes Latin, and a 90-minute weekly series One Night Stand.

KIIX will start with a daily schedule of "of or 4:30 p.m. to 11 p.m. or midnight" according to Mr. Young. The station will program in two-hour segments "each conducted by its own personality, who will play records, introduce guest entertainers, interview newsworthy individuals and in general keep things moving rapidly, pretty much like a deejay on an independent radio station, or, to use a tv simile, like the Today program on NBC-TV." KIIX also plans a 30-minute children's program each afternoon and a half-hour of news in the early evening.

The KIIX studios and offices will be housed at 2330 W. Washington Blvd., in a Negro residential area. The building formerly housed an automobile showroom which is being converted into a main studio, which will be open to the observation of sidewalk passersby as well as to studio audiences.

WOOK-TV is owned by United Broadcasting Co., Richard Eaton, president. Other UBC stations are: WOOK-AM and WFUN (FM) Washington; WSB1-AM-FM Baltimore; WINX Rockville, Md.; WJMO and WCUY (FM) Cleveland; WANT Richmond, Va.; WMUR-TV Manchester, N. H.; WFSB South Miami, Fla.; and WBNX New York. United also holds a construction permit for WFTL (TV), ch. 18, Baltimore. (WOOK, WSID, WJMO and WANT specialize in Negro radio programming.)

Mr. Young has been engaged in Negro-programmed radio station operation for more than a decade. He is currently president of WENO Madison (Nashville), Tenn., and a stockholder in WGN North S. C. (Augusta, Ga.) and WYAM Bessemer (Birmingham), Ala.

WOOK-TV will have 275 kw effective radiated power and KIIX will have 540 kw.

ASSN. VIPS MEET

8th meeting will review and study regulation of radio-tv

Government regulation of broadcasting will dominate discussions at the NAB's 8th annual Conference of State Association Presidents in Washington Feb. 26-27. A detailed review and analysis of regulatory issues and problems facing radio and television by NAB executives, including President LeRoy Collins, will open the conference.

Joseph W. Goodfellow, vice president-general manager of WRC-AM-FM-TV and president of the Maryland-D.C. Broadcasters Assn., will serve as conference chairman and also will preside.
Ampex offers the widest selection of professional broadcast recorders today. Each providing superior performance. Each providing maximum reliability. There's the Ampex 351, standard of the broadcast industry. The Ampex 352, reproducer for monophonic or stereophonic sound. The Ampex 354, recorder/reproducer designed for stereophonic sound. The Ampex 601, professional quality portable recorder/reproducer. The Ampex PR-10, suitcase-size recorder/reproducer with capabilities of a studio console. And the Ampex 3200 duplicator, master/slave combination for high-quality tape duplicating at low cost. Most Ampex recorders have stereophonic versions. The 350 and PR-10 Series offer 4-track playback. All are dependable, flexible, easy to operate. And all carry the Ampex "Four Star" one-year warranty. Ampex also makes 600 series professional tape noted for long life and constant performance. For more details write the only company providing recorders, tapes and memory devices for every application: Ampex Corporation, 934 Charter St., Redwood City, California. Sales and service engineers throughout the world.
Sindlinger finds radio's popularity rising

Radio since 1960 has been growing in popularity. Statistics drawn from Sindlinger National Media Activity Reports and put in bar graph form (above) indicate the trend.

In the January-December period for each of the past three years, the move has been upward. Last year's period showed radio activity—measured in terms of total daily time spent by the public listening to radio—to be 6.1% ahead of 1961.

Radio also scores at a faster rate than other media in the report of total time spent by the public with the four major media. While radio went up 6.1%, tv dropped 5.2%, according to this analysis, and newspapers and magazines rose 1.7% and 2.5%, respectively.

The graphic analysis was released last week by Maurie Webster, CBS vice president and general manager of CBS Radio Spot Sales. He said the climb reflects "new trends in imaginative and informative programming" but warned that the popularity factor would appear to point up a need for more accurate measurement of radio's dimension.

at the opening session on "The Washington Outlook," Participants, in addition to Gov. Collins, will include Vincent T. Wasilewski, NAB executive vice president, as moderator; Paul Comstock, vice president for government affairs, discussing the congressional scene; General Counsel Douglas Anello on the FCC, and Howard Bell, vice president for planning and development, will brief delegates on government news policies.

Robert R. Williams, general manager of WHLM Bloomsburg, Pa., and president of the Pennsylvania Assn. of Broadcasters, will preside at the Feb. 26 afternoon session. It will feature reports on five outstanding projects of state associations and a roundtable discussion.

Glenn B. Sanberg, executive vice president of the American Society of Association Executives, and Charles M. Stone, manager of the NAB Radio Code, will speak at the Feb. 27 morning session. The second afternoon will be devoted to a conference for the executive secretaries of state broadcaster associations with Jack Williams, executive secretary of the Georgia Assn. of Broadcasters, presiding.

A major luncheon address, with the speaker not yet named, will be given the first day, according to Mr. Bell. A reception and buffet in honor of state presidents will be held that evening. No members of the FCC have been invited to appear on the program, although they will be issued invitations to attend.

New deal in Denver

Option held by Bill Daniels, Denver, to buy control of KTVR (TV that city from Elroy McCaw, present owner, has been allowed to lapse. Instead a new corporation, Channel 2 Corp., is being formed with Mr. McCaw as board chairman and Mr. Daniels as president. KTVR will open pay tv services later in year, probably May, using Macadden-Bartell Teleglobe system in which subscriber pays to get sound via telephone line (Broadcasting, Jan. 28).

Wired community tv set for Austin, Tex.

A community tv system using wire lines to carry tv programs to subscribers is due to be inaugurated in Austin, Tex.

Last week the city council signed a non-exclusive contract with Capital Cable Co., one of four applicants seeking a franchise to serve Austin with catv. Capital Cable Co. is a subsidiary of Midwest Video Inc., a group operator of catv systems with headquarters in Little Rock, Ark. Hamilton Moses, retired president of Arkansas Power & Light Co., is president of Midwest and also of Capital Cable. Mrs. Lyndon B. Johnson, wife of the Vice President, is principal stockholder in LBJ.

LBJ Co., licensee of Austin's only tv station, KTBC-TV, holds an option to acquire up to 50% of Capital Cable.

The contract with the city provides that Capital Cable will pay the city 2% of its annual gross receipts. It also agrees not to charge an installation fee for connecting a subscriber to the system, that the monthly service charge will be no higher than $4.95, and that the operating firm will pay the city $3 per year for each of the city-owned poles used to run lines throughout the area.

The other applicants were Vumore Inc. (RKO General), Miero Corp. of Dallas and Independent Co. of Austin. The last is composed of Glenn Finn, catv owner in Tyler, Tex., and the Austin Daily Statesman.

56 to attend NAB's Public Service Institute

Registration has closed for the NAB's Public Service Institute with 56 representatives from 51 nonprofit organizations and the government planning to attend. The Feb. 7-8 seminar will be held in Washington's Mayflower Hotel in conjunction with American U.

During the two-day meeting, delegates will be guided on the best possible use of public-service time made available by commercial broadcasters. To help them on techniques and problems in using broadcasting, 12 industry experts will give advice during the conference. Classroom instruction on the American U. campus on such subjects as program preparation, studio equipment, news writing, creation of spot announcements and communications law will be given.

William Ruder, president of Ruder & Finn public relations firm, will address the delegates at a Feb. 7 banquet while NAB President LeRoy Collins will speak at luncheon the next day. Field trips to WRC-AM-FM-TV Washington and WAVY-AM-FM-TV Arlington, Va. will be highlights of the seminar.
"ONLY SIXTY-FIVE CENTS..."

Compared to most of the things you have to buy these days, food prices are still low. They are up, of course, over what they used to be—but not nearly so much as most items in your budget.

A big part of the reason is more efficient farming. Farmers are producing more food with less work. They've replaced expensive manpower with cheap machine power—especially electric power, which costs less per kilowatt-hour today than 30 years ago.

Most of the electricity used on farms—two thirds of it—is produced by the investor-owned electric light and power companies. Most of this electricity goes to farms the companies serve directly. The rest is sold to rural electric cooperatives at wholesale rates. This electricity is then distributed by the co-ops to their customers.

If your food prices are to be kept down, farmers will be using even more electric power in the future—several times as much as they are using today. And the more than 300 investor-owned electric companies are planning and building now to make sure there will always be plenty—for rural and city areas alike. They can supply all the electric power all of the people of America will ever need.

Investor-Owned Electric Light and Power Companies... serving more than 140,000,000 people across the nation

NAB engineering advisory group reactivated
WILNER TO HEAD 12-MAN UNIT; TOWN TO BE HONORED

A permanent engineering committee again will be available to advise the NAB on technical broadcast matters.

NAB President LeRoy Collins last week announced reactivation of the Engineering Advisory Committee, disbanded in 1961; John T. Wilner, vice president and director of engineering for the Hearst Stations, will be chairman of the 12-man group. Mr. Wilner was the recipient of the NAB's first Engineering Achievement Award in 1959.

Dr. George R. Town, dean of engineering at Iowa State U. and director of the 1957 TV Allocations Study Organization, was named last week to receive the 1963 Engineering Achievement Award (see Week's Headliners, page 10).

Mr. Wilner said that he will be pleased to serve as chairman of "this most important committee." There had been considerable agitation within the industry for reactivation of the Engineering Advisory Committee, abolished two years ago in a general reorganization of the NAB (Closed Circuit, Dec. 31, 1962).

"With the fast-moving technological developments in broadcasting, the work of this committee should be most beneficial to the entire industry," Mr. Wilner said. Citing the "ever-increasing speed of technological developments," the NAB said the committee was reformed (1) to bring to the attention of the association's engineering department important technical problems and (2) to study and recommend courses of action to solve them. George L. Bartlett is NAB manager of engineering.

Serving with Mr. Wilner on the committee will be Max H. Bice, general manager of KTNT-AM-FM-TV Tacoma, Wash.; Richard K. Blackburn, technical director of the Gannett Stations; Glenn G. Boundy, vice president for engineering, Storer Broadcasting Co.; William S. Dutten, director of allocations engineering, NBC; George Hixenbaugh, chief engineer, WMT-AM-TV Cedar Rapids, Iowa; Thomas E. Howard, vice president for engineering, Jefferson Standard Stations.

Also, Leslie S. Learned, director of engineering, Mutual Broadcasting System; Carl E. Lee, executive vice president, Fetzer Stations; Frank Marx, president of ABC engineers; James D. Parker, director, tv engineering, CBS-TV, and David L. Steel, president of the Assn. of Federal Communications Consulting Engineers.

Town Honored • Dr. Town will receive his award April 3 at the annual Broadcast Engineering Conference in Chicago, held as part of the NAB convention. He was chosen, the NAB said, because of his valuable contributions to technical knowledge and literature, his development of new engineering techniques and his leadership in broadcast engineering activities.

Statewide West Virginia news network started

The formation of the Broughton West Virginia Centennial News Network to be sponsored by Broughton's Farm Dairy Inc., Marietta, Ohio, is announced by Carl L. Broughton, president of the dairy, and Paul J. Miller, general manager of WWVA Wheeling, W. Va.

The program will be on seven West Virginia stations at 7:30 a.m. Monday through Friday: WWVA Wheeling, originating station; WPAR Parkersburg; WMOV Ravenswood; WKEE Huntington; WTIP Charleston; WILS Beckley; and WPDX Clarksburg. It starts today (Feb. 4) and will include world and national news and West Virginia news, with emphasis on progressive happenings in West Virginia and the state's centennial observance.

It is claimed to be the first statewide news network. The news commentator, Bob Terry, news director of WWVA, and his staff will cooperate with Carl Sullivan, executive director of the West Virginia Centennial Commission, in providing centennial news.

Changing hands

APPROVED • The following transfer of station interests was among those approved by the FCC last week (for other commission activities see For The Record, page 78).

- KCHU (TV) San Bernardino, Calif.: Sold by Norman H. Rogers to Sun Co. of San Bernardino for $180,109. Sun Co., with James A. Guthrie, president, publishes San Bernardino Daily Sun, Evening Telegram & Index and Sunday Sun-Telegram. KCHU, which began operating year ago, is on ch. 18.

Salant wants radio-tv in Congress, Supreme Court

Richard S. Salant, president of CBS News, has proposed that Congress and the U. S. Supreme Court adopt rules permitting microphone-camera coverage of their proceedings.

Mr. Salant's analysis of rights of access by tv news is contained in material prepared for publication Feb. 2 in the American Society of Newspaper Editors' The Bulletin.

The CBS News executive makes his case for electronic journalistic coverage of the legislative and judicial bodies on the public's "right to know" rather than on a constitutional interpretation of rights only.

Mr. Salant said he thought the "most flagrant derogation of public interest and public policy" is the U. S. House of Representatives' prohibition on microphones and cameras at all House proceedings, except for the opening session and State of the Union message.

He said he would not place coverage of jury trials in the same category because this area was not as clear-cut. He emphasized tv and radio access to congressional and Supreme Court proceedings could bring to the people the great issues of the day in the philosophy that the public has a "right to know" and to understand these issues.

Access fight brews in California

TV CAMERAS REFUSED ENTRY TO TWO STATE HEARINGS

Official action to deny tv cameras access to the hearings of California state agencies as well as to courtrooms, in effect extending the prohibition of Canon 35 of the American Bar Assn. to cover administrative as well as judicial hearings, occurred twice in Los Angeles during the last month. Public hearings of the California Division of Corporations and of the state's Public Utilities Commission were halted because of the presence of tv cameras, although no objection was made to pad-and-pencil newspaper reporters.

The first denial occurred on Jan. 9. The State Division of Corporations had scheduled a hearing on a stock option agreement made by Westgates Petroleum Co. in connection with a controversial harbor oil lease. Camera crews from KABC-TV, KTTV (TV) and KTLA (TV), all Los Angeles, were there at the appointed place and time. Corporations Commissioner John G. Sobieski, who was conducting the hearing, ruled that the presence of the tv equipment would disrupt orderly proceedings and ordered them to leave. When the tv crews stood their ground the hearing was adjourned. When it reconvened the cameras were still there. After three futile postponements, Commissioner Sobieski went to court, seeking an injunction barring the cameras. Judge Kenneth N. Chantry of the Los Angeles Superior Court did not immediately grant the petition, but set a hearing for Jan. 30 at which the tv stations will have a chance to show cause why the injunction should not be granted.

The hearing has been postponed, first to Feb. 4 and then to Feb. 25. The second postponement came at the request of the California Bar Assn., which has asked the right to appear as amicus curiae and is reportedly retaining special counsel to argue that tv cameras should not be allowed to cover the so-called "public hearings" of the Division of Corporations and other state agencies.

The second refusal to allow a hearing to go on in the presence of tv cameras occurred last Wednesday, when William Dunlop, examiner for the California Public Utilities Commission, ordered the camera crews of KABC-TV,

ATTRACTION STATION BUYS!

**MIDWEST—** Daytimer serving area of 50,000-plus population. Priced at $90,000.00 with $25,000.00 down.

BROADCASTING, February 4, 1963
See-saw audience shown in radio-tv study

A new study of the complementary nature of radio and tv indicates:

- Light tv-viewing homes are heavy radio-listening homes.
- Light tv-viewing women are heavy radio listeners.
- Light radio-listening homes are heavy tv-viewing homes.

These are the points made by a radio report now being circulated to advertisers by the national sales division of RKO General Inc. The report is titled "7/11 Study" and presents results of a special audience survey prepared by The Pulse Inc. based on the San Francisco market where data was gathered last October. The "7/11" title comes from the comparison in the report of nighttime tv viewing habits (7-11 p.m.), with daytime (7-11 a.m.).

RKO General instituted a series of "Target: The Consumer" research studies in May 1962, when it reported on tv program popularity among various consumer groups. The "7/11 Study" surveys the audience relationship of radio and tv.

KNXT (TV) and KTLA, all Los Angeles, to leave the hearing room, in which a Pacific Telephone & Telegraph rate hearing was to be held. They refused and he recessed the hearing until the following morning. At the time the hearing was to reopen, the original three stations were back, joined by others from KTTV and KCOP (TV), also Los Angeles. At this time public utilities Commissioner Frederick Holo-boff appeared and read a lengthy statement to the effect that the PUC has had a long standing policy of refusing pictorial coverage of any of its hearings. Perhaps the time has come for a re-examination of this policy, he said, so, instead of citing the tv crews for contempt, he delayed the hearing until Feb. 13.

WDNT gets 'grant' from Philip Morris

WDNT (TV) New York, the ch. 13 educational tv station for the New York metropolitan area, has finally won a sponsor—but it's not called that in evn.

Rogers returns

W. D. (Dub) Rogers Jr. formally returned to broadcasting last week as he took over operation of KASE Austin, Tex., a 1-kw daytimer on 970 kc. Mr. Rogers has been out of the media since he sold KDUB-AM-TV Lubbock and

KEDY (TV) Big Spring, both Texas, to Grayson Enterprises Inc. in 1961.

Mr. Rogers, majority owner of Rogers Broadcasting Co., new licensee of KASE (see CHANGING HANDS, Jan. 21), is president of the Society of Television Pioneers, a former president of Television Bureau of Advertising and at one time was a board member of the NAB.

KASE was purchased from Dr. E. J. Lund for $225,000, circles. It's called a grant.

Beginning Feb. 11 and for a 13-week period, Philip Morris cigarettes has agreed to underwrite the production costs of The World at 13, a news and analysis program broadcast daily Monday-Friday, 10:10:30 p.m. Philip Morris receives mention at the beginning and at the end of the program.

The announcement was made last week by Dr. Samuel B. Gould, president of the station and former president of Antioch College, Yellow Springs, Ohio. Dr. Gould was in Washington to speak at the Institute of Contemporary Arts.

The Philip Morris grant, Dr. Gould hopes, is the first of many to help the New York tv station build up its local news programming.

Just how much Philip Morris is making available was not made public. "It about covers production costs," Dr. Gould said.

Although WDNT now has a substantial audience (number unknown) its major problem is finances. What Dr. Gould would like to see, he said, is 200,000-250,000 people paying $10 a year as a subscription fee for the WDNT monthly program guide.

Up to now contributions have been averaging about $1,000 a day, Dr. Gould acknowledged. Most of these are in $1 to $10 sums he said.

WDNT's operating budget this year, Dr. Gould stated, is $3,191,000. This includes, however, amortization and interest payments on indebtedness, including mortgages. One of the major items in the tv station's budget, Dr. Gould explained, is $90,000 a year rental for its transmitter atop the Empire State Bldg.

Bunker says broadcasters undersell radio medium

"Broadcasters are underselling radio as a medium. Moreover, they are making the mistake of selling the station instead of the medium." Edmund C. Bunker, president-elect of Radio Advertising Bureau put these points foremost in a talk to the Assn. of Broadcasting Executives of Texas last week.

Stressing the need for increased professionalism in radio selling, Mr. Bunker said that in spite of the 200 million working radio sets in the U.S. and increased radio listening, "our share of the total national advertising budget has dropped."

Mr. Bunker said that the answer to the dilemma was a more positive approach to selling to convince potential customers of the efficacy of radio advertising.

NBC-TV edits 'libelous' remarks from Griffin show

NBC-TV had some fast editing to do last week to eliminate remarks its lawyers regarded as libelous in an appearance by lawyer Morris Ernst on the taped Merv Griffin Show.

In the taping of the Wednesday show, Mr. Ernst, appearing as a guest, construed the Federal Trade Commission consent orders signed by three rating services (BROADCASTING, Jan. 7) in a way that NBC attorneys considered inaccurate and actionable. These brief passages were edited out of the tape version before it went on the air less than an hour later.

Left untouched were criticisms directed by Mr. Ernst at the networks for what he considered over-emphasis on ratings and an attitude of abdication rather than dedication to principles of public enlightenment and advancement.

KTVH tower nearly ready

KTVH (TV) Wichita-Hutchinson, Kan., expects to begin using its new 1,304-foot transmitting tower about Feb. 15. Final sections of the new tower have been erected, according to Dale Larsen, vice president and general manager of KTVH (ch. 12). The tower was constructed by Kline Iron & Steel Co., Columbia, S.C. A new RCA transmitter is being installed.
Replacement for Conelrad in planning stage
NEW SYSTEM WILL PROBABLY USE AM, FM AND TV

A special industry-wide committee has begun working to draw up plans for a new alerting system for the American public through the use of both radio and tv.

The committee, formed last week from members of the National Industry Advisory Committee, is headed by John F. Meagher, radio vice president of NAB.

The outcome of the committee's deliberations, if accepted, will result in the establishment of a new system of warning to the public for use in a war emergency. It will use am, fm and tv, and may very well supersede the air raid sirens now relied on to alert the public.

One major problem in using radio and tv as an alert system is how to reach the people who do not have their radios or tv receivers turned on at the time. Various possibilities have been suggested, including a system called Sigalert, developed by Loyd Sigmon of KMPC Los Angeles, and a special portable, battery-operated receiver developed by Philco Corp.

The committee is under instructions from the Dept. of Defense's civil defense office to investigate the feasibility of a broadcast warning system which will provide an instantaneous alarm on a 24-hour-a-day basis and with a capability of covering 98% of the population.

Replace Conelrad • If accepted by the Dept. of Defense, the new system will take the place of Conelrad which was inaugurated in 1951 at the request of the Air Force. Conelrad was established to serve a dual purpose: (1) deny navigational aid to enemy bombers, and (2) furnish the public with civil defense information by using just two frequencies in the standard radio band (640 kc and 1240 kc). Under Conelrad, both fm and tv stations are required to go off the air. Conelrad is still in effect and will remain so until a new warning system is established.

Last April the Dept. of Defense told the FCC there was no longer a need for Conelrad as a means of denying navigational aid to enemy aircraft (BROADCASTING, April 30, 1962). This decision came after a re-evaluation of Conelrad by the Joint Chiefs of Staff, undertaken at the request of the NIAC. During Conelrad's 10-year life, broadcasters spent an estimated $20 million in equipment, time and manpower to perform their functions. There are at present about 2,000 am radio stations in the Conelrad network, of which 480 are "key" stations.

At a recent meeting of NIAC, the fourth annual Defense Communications Seminar was tentatively scheduled for Feb. 28-March 1 in Washington.

Triangle un-cancels

The Triangle Stations were reported last week to have given cancellation notice on their A. C. Nielsen Co. audience measurement service subscription — and then to have cancelled the cancellation. The original cancellation notice was said to have been issued shortly after the Federal Trade Commission announced that Nielsen, The Pulse Inc. and American Research Bureau had signed FTC consent orders (BROADCASTING Jan. 7). The un-cancellation reportedly came after authorities of John Blair & Co., national sales representative for the Triangle stations, and others interceded on grounds that ratings information is needed for sales and programming purposes.

Bruce Curtis, of Leo Burnett, joins the Tricorn Club

Membership in the Tricorn Club stands for professional savvy about North Carolina's Golden Triangle Market. Bruce got tapped by correctly answering these two profound questions: (1) What is the Golden Triangle Market? (2) What is North Carolina's No. 1 metropolitan market in population, households and retail sales? In case you're pining to make this elite fraternity, the answer to both questions is the combined three-city "golden triangle": Winston-Salem, Greensboro, High Point. You'll pass if you also know North Carolina is our 12th state in population. So — what does knowing the No. 1 market in the No. 12 state add up to? A sure sales scoop for clients. Maybe a raise from the boss. At least, an official hat from the Tricorn Club.

Broadcast newsmen saves innocent man

A well-publicized case telling how an airman was exonerated from murder charges after another man confessed to the crime failed to emphasize one of the most important facts—how the second man's confession came about.

Rick Raphael, assistant news director of KBOI-AM-FM-TV Boise, Idaho, was at the Ada County jail in that city last Nov. 19 making a station documentary film about escapes from the jail after a prisoner, Theodore T. Dickie, 22, escaped the night of Nov. 9 and voluntarily returned Nov. 10 after several hours. The prisoner was charged with raping and murdering a 10-year-old girl during his absence from the jail.

When the suspect learned Mr. Raphael was in the jail he requested that he be allowed to talk to the newsmen in private. During this conversation, the prisoner told Mr. Raphael he had committed another crime six months earlier, on April 10—the murder of Mrs. Nancy Joy Johnson, the wife of an airman, and her two-year-old son—at Mountain Home, Idaho, near Mountain Home Air Force Base. The prisoner said an innocent man was being held for the crime, airman Gerald M. Anderson, who lived next door to the victim and who had been the last person to report seeing her alive.

Mr. Raphael reported his talk with the prisoner to law enforcement authorities, who followed up with an investigation and released Mr. Anderson Nov. 25. But the airman was rearrested by Air Force authorities and was held in a series of hearings until last week when the Air Force ordered his release. Mr. Anderson originally had been arrested last April by the Air Force and there have been reports that a "confession" was extracted from him through the use of intimidation over a period of about a week in April before he was turned over to civil authorities.

FINANCIAL REPORTS

SEC REPORTS STOCK TRANSACTIONS

Latest summary of radio-television dealings

The following individuals in radio-television or allied fields traded in securities of companies in which they are officers or directors or both. The summary was announced last week by the Securities & Exchange Commission and covers the month of December, although some were concluded in November:

Simon B. Siegel, sold 2,500 shares of American Broadcasting-Paramount Theatres Inc., retains 6,626 shares; George L. Coleman, bought 200 shares, Chris Craft Industries, holds total of 23,050; Armand G. Ehrpf and J. Patrick Lanman acquired 1,000 shares each of Crowell-Collier Publishing Co., giving them total of 41,945 and 12,702 respectively; Dan A. Kimball bought 1,000 shares and E. Willard Luiz, 489 shares of General Tire & Rubber Co. (RKO General), giving them total of 38,335 shares and 1,338 shares respectively.

Also T. B. Schrieker, gift and sale of 5,000 shares of MCA, retaining 241,230 share; David B., Gerald A., Lee B. and Melvin Bartell, by private purchase acquired 6,250 shares each, and Gerald A. Bartell acquired 1,108 shares of Macfadden-Bartell, giving each the following totals: David B., 325,907; Gerald A., 326,629; Lee B., 324,611; Melvin M., 118,567; Marcus J. Austad (Mark Evans), bought 200 shares of Metromedia Inc., giving him total of 9,950 shares.

Also D. C. Halford acquired 200 shares and Harry B. Solmon, 600 shares as custodian, of Plough Inc., giving Mr. Halford a total of 2,200 and Mr. Solmon, 3,666 personally and 1,334 as custodian. Douglas C. Lynch, acquired 2,653, Theodore A. Smith, 2,000, Walter Watts, 8,701, and Robert L. Werner, 637 by option of RCA, giving following totals: Mr. Lynch, 2,742; Mr. Smith, 6,086; Mr. Watts, 11,866, and Mr. Werner, 4,969; Morris Schechter bought 200 Reeves Broadcast Group & Development Corp., for total of 300; Harry L. Petersen acquired $3,000 worth of Reeves 6% convertible subsidiary debentures for total of $9,000.

Also O. Wayne Rollins, as guardian, bought 100 common and sold 1,000 Class B common of Rollins Broadcasting Co. in private sale, giving him 7,780 common as guardian and 609,400 Class B common; Roy R. Coffin bought 300 shares of TelePrompTer Corp. for total of 1,300; Rainbow Corp. bought 1,800 shares of TelePrompTer Corp., for total of 3,000 shares.

National General sets annual meeting Feb. 19

National General Corp., diversified theatre and industrial company, will hold its annual stockholders meeting Feb. 19 in Hollywood.

National General holds 38% of National Telefilm Assoc., and is the largest single stockholder of that tv program production and distribution firm. The company also owns five cation systems— in Williamsport, Pa.; Hattiesburg, Miss.; Alpena, Mich.; Logan-Man and Bluefield, both West Virginia, and has substantial investments in real estate and vending machine companies. It is in the process of acquiring Mobile Rentals Corp. National General President and Chairman Eugene V. Klein received $69,808 in aggregate remuneration for the fiscal year ended Sept. 25, 1962, according to a proxy statement which announced the meeting. Other payments to officers: Irving H. Levin, executive vice president, $38,030; Alan May, vice president-treasurer, $46,800, and Robert W. Selig, vice president in charge of theatre operations, $41,600.
Taft Broadcasting net up 36% for quarter

Taft Broadcasting Co. reported net earnings after federal income taxes for the third fiscal quarter, ended Dec. 31, 1962, up $635,624 (40 cents a share) compared to $635,624 (40 cents a share) for the same period last year.

Total revenues for the quarter rose to $3,600,444 from $3,079,328 for the same three months in 1961.

Taft directors declared a quarterly dividend of 15 cents a share, payable March 14 to stockholders of record Feb. 15. This is a 50% increase over the regular quarterly dividend of 10 cents a share declared in the past.

The board also declared a 2½% stock dividend, with the same payment and record dates as announced for the cash dividend.

Fund's assets up $40 million

The assets of Television-Electronics Fund Inc. have increased to more than $373 million as of Jan. 15, up over $40 million since the end of the company's fiscal year on Oct. 31, 1962 when values reached $331,875,000, shareholders were told at their annual meeting in Chicago.

The stockholders reaffirmed an advisory and management contract with Television Shares Management Corp., clearing the way for the acquisition of approximately 40% of the management corporation by Kansas City Southern Industries Inc. The price for the 40% is over $4 million.

Shareholders elected John Hawkinson, president of the management corporation, as a vice president and a director of Television-Electronics Fund.

IRS clarifies new rules on deductible expenses

Commissioner of Internal Revenue Mortimer M. Caplin announced last week that new taxpayer's record keeping procedures for deductible expenses have been clarified and liberalized (Broadcasting, Jan. 28). Employees traveling under per diem allowances not exceeding $25 per day and mileage allowances not in excess of 15 cents a mile will not have to retain receipts to substantiate claims, he said.

He pointed out, however, that to obtain a deduction for travel expenses in the above cases it is always necessary that the time, place and business purpose of the travel be established. The per diem and travel allowance exemptions are not available to employees who are related to their employers or who are stockholders owning more than 10%, IRS announced. Clarifying an earlier misunderstanding, Mr. Caplin said that taxpayers should not send travel receipts, meal vouchers, etc., with the tax return but should retain such records in case of an audit by IRS.

Storer declares dividend

Storer Broadcasting Co. has declared quarterly dividend of 45 cents a share on common and 12½ cents a share on Class B common, payable March 8 to stockholders of record Feb. 22.

The "three band system" makes it much easier to tune in adjacent shortwave stations on the Mitsubishi Electric 9X-900S. The "band spread" of the smart-looking 9X-900S is twice that of ordinary models since shortwave frequencies have been divided into upper and lower bands (Band 1: 4MC-9MC, Band 2: 9MC-18.5 MC) so that "clustered" stations are much further apart on the dial. The fine-tuning adjustment, 9-transistor circuit and "three band system of the 9X-900S make its receptivity something spectacular. Ask your nearest dealer for a demonstration.

Room for one more at Desilu's studios?

LUCY REPORTS COMPANY OPERATING AT 94% OF CAPACITY

With five pilots scheduled for completion by mid-February, Desilu is now operating at a production peak of 94% of capacity, with 1,700 employees on the payroll, President Lucille Ball said last week.

Filming the pilot of "Trader Brown" in color marks the studio's entry into color tv, Miss Ball announced. This series, starring Ethel Merman, was created by Cy Howard and Arthur Julian. Mark Goddard is featured in the half-hour pilot, written by Bill Manhoff, which is to go before the cameras today (Feb. 1).

Also scheduled to start filming on Feb. 4 is "I Married a Martian," half-hour comedy which Phil Rapp will produce with Lee Karson as associate producer. Robert Cummings will co-star with Julie Newmar. Another half-hour series, "Careful, My Love," a comedy-mystery, had its pilot put into production last week, with Sherman Marks as director and Glynn Johns starred for Jess Oppenheimer, producer-writer. Next week will mark the start of filming for "A-OK O'Shea," half-hour comedy to be produced by Lee Karson with Gale Storm starred. An hour-long series, "The Greatest Show on Earth," being produced in color in association with ABC-TV, was to wind up production last week in Hollywood after a week's filming on location at Ringling Bros. winter quarters in Venice, Fla. Stanley Colbert produces this series, with Robert Butler directing.

Jerry Thorpe, program vice president of Desilu, is supervising all pilot production at the studio and General Artists Corp. is sales agent for the new projects.

In addition to the pilots, "The Lucy Show" and "The Untouchables" continue in production. A third Desilu-owned series, "The Fair Exchange," resumes production Feb. 11 as a half-hour series scheduled to return to CBS-TV March 28 in its new Thursday, 7:30-8 p.m. time period.

Lawrence signs co-op deal with four producers

Four film production firms have entered into an agreement with Robert Lawrence Productions Inc., New York, whereby the four will use Lawrence's studio facilities and office personnel for their own accounts. The four are Robert Bendick Assoc., Illustra Films, Mckean Assoc., and Rose-Maggwood Productions.

Two of the producers, Rose-Maggwood and Illustra, which now operate their own studios, will supplement them with the Lawrence facilities.

Jack Cron, who joined Lawrence recently as executive vice president for new projects, organized the five-firm arrangement.

Desilu acquires Langford

Desilu Productions has acquired Langford Productions, owner of 25% of "The Untouchables," in a stock-for-stock exchange between Desilu and Robert Stack, owner of Langford.

Mr. Stack, who portrays Elliott Ness in the gangster tv series, received 77,691 shares of Desilu stock in exchange for all shares in Langford, which will continue to produce the series for Desilu for the remainder of the current season and possibly for a fifth year. If the series is not renewed for another year, it will be put into syndication in this country by Desilu Sales. In foreign syndication, "The Untouchables" has grossed nearly $1 million.

Robert Taylor adds Four Star holdings

Robert Taylor has become the fifth largest stockholder in Four Star Productions through exchange of his interest in his former network series, "The Detectives," for Four Star stock. Four Star currently is syndicating 31 one-hour and 67 half-hour shows of "The Detectives" series which were originally seen on ABC-TV and NBC-TV. It has been sold in 25 markets.

The other four stockholders—Mr. Taylor—are David Niven, Charles Boyer, Tom McDermott and the Dick Powell estate.

Mr. Taylor will be the star of a new NBC-TV series next season. He owns a share of that program, which will be produced by Four Star.

Daly to keep m.c. post on CBS-TV's 'Line'

John Daly will continue as host and moderator of "What's My Line?" on CBS-TV, Sunday, 10:30-11 p.m. EST. Mr. Daly last week signed a new contract with the network.

Differences had developed between Mr. Daly, who has had the m.c. role on the show for the 13 years it's been on the air, and the network over a new contract starting with the 1963-64 tv season (Broadcasting, Jan. 28). A meeting on Jan. 25 between James T. Aubrey Jr., president of CBS-TV, and Mr. Daly paved the way for new negotiations and the final signing.

NBC-TV sets changes in daytime programs

NBC-TV last week announced three additions to its Monday-Friday daytime programming, to become effective April 1, following the demise of "The Merv Griffin Show" and "Young Doctor Malone."

The new programs and their time periods are:

- Ben Jerrod (color, 2-2:25 p.m. EST): a dramatic series based on cases of a criminal lawyer.
- A medical dramatic series presenting...

| Directors Co. sets seven | The Directors Co., New York, will produce seven original one-hour dramas for NBC-TV’s Du Pont Show of the Week for the 1963-64 season. Directors have a contract for seven dramas on this season’s Du Pont show as well—four of which have already been telecast. |

**Adventists to expand use of radio and tv**

Expansion of the Seventh-Day Adventist Church's radio-tv plans was disclosed last week at a conference of 80 church radio-tv directors in Dallas. The weekly Adventist radio program, The Voice of Prophecy, will be presented on a daily basis and the church's tv offering, Faith for Today, will be presented in color.

William A. Fagal, director of Faith for Today, said some of the 200 stations currently involved in afternoon programs is NBC News Early Afternoon Report, currently broadcast 2:55-3 p.m., which moves to 2:25-2:30 p.m., also effective April 1.

*FOR TOWERS of all kinds*  
**CALL ROHN**

For a complete line of towers ideally suited for radio, television and microwave use of all kinds, rely on ROHN.
airing the weekly tv program already are presenting it in color and others
will begin using the color prints soon. Voice of Prophecy now is on 500 U. S.
and Canadian radio stations, according to Dr. Harold M. S. Richards, director.
He said the program will be expanded to a daily basis because of requests by
the stations.

Elmer R. Walde, radio-tv director, stressed that "intelligent and profes-
sionally-oriented programming" is de-
manded in the church's use of radio
and television.

**WLIB plans salute to Negroes' achievements**

A music and drama festival, broad-
cast annually by WLNB New York, in
conjunction with Negro History Week, will also be presented as a three-hour
concert from Carnegie Hall this year, on Saturday (Feb. 9) from 3 to 6 p.m.
WLNB will not carry any commercial
announcements during the broadcast,
which has been titled *Special Salute to the
Artistic Achievements of Negro Performers.*

The performers will include Ella
Fitzgerald; Tyrone Phillips, 10-year-old
pianist; singer Irma Franklin, and
football star Roosevelt Grier.

**Program notes...**

Mchale re-enlists - ABC-TV has ex-
tended McHale's Navy (Thursday, 9:30-10 p.m.) for an additional 10 ep-
isodes. Extension of Revue Studio's
comic series brings season's total to
36 segments, of which 23 already are
filmed.

'Phantom' to tv - New tv series, *The
Phantom,* based on the King Features
cartoon strip, will be produced in color
by Tele-Screen Productions, with Rog-
ger Creely and Madalyn Trabey as co-
stars. A pilot with Pauline Goddard as
guest star has been completed.

**INTERNATIONAL**

**CANADA'S RADIO-TV ADVERTISING UP**

**Rise in both radio, tv noted for 1962 by Elliott-Haynes**

Radio and television national adver-
tising in Canada for the first ten months
of 1962 was up over the similar 1961
period, according to reports made by
Elliott-Haynes Ltd., Toronto market
research firm, and published in the Tor-
onto *Marketing* weekly.

Radio advertising was $16,685,229
for the January-October 1962 period,
as against $14,813,927 in the similar 1961 period. Television advertising
totaled $43,664,177 in the 1962 period
as against $35,697,790 in the 1961 sur-
vey period.

The largest advertising group was
food and food products in both media
with $4,639,613 on radio ($4,559,527
in 1961), and $11,069,973 on television
($8,838,594 in 1961). Second in both
media was drugs and toilet goods with
$2,282,282 on radio ($2,065,181 in
1961), and $9,272,398 on television
($7,802,657 in 1961).

National and network Canadian radio
advertising dropped in 1961 from the
1960 totals, according to a report just
released by the Dominion Bureau of
Statistics, Ottawa, Ont. In 1961 na-
tional and network radio totaled $21,-
266,000 as compared with $23,667,000
in 1960. But local radio advertising in-
creased, the report points out, from
$26,687,000 to $28,045,000 in 1961.

All Canadian television advertising
was up in 1961 over 1960, the Domini-
on Bureau of Statistics reported. Na-
tional and network advertising was up
from $41,227,000 in 1960 to $43,950,-
000, while local tv advertising amounted
to $10,135,000 in 1961 as compared with
$8,636,000 in 1960.

Total radio and television advertising
for 1961, according to these figures, was
$103,396,000 as against $100,217,000
in 1960.

**CAPAC wins action in suit against KVOS**

The Composers, Authors and Pub-
lishers Assn. of Canada Ltd., (CAPAC)
Toronto, the equivalent of ASCAP, was
successful on Jan. 22 in the Supreme
Court of Canada in an action associated
with $250,000 damage suit against
KVOS-AM-TV Bellingham, Wash., and
its affiliate KVOS (Canada) Ltd., Van-
couver, B.C.

CAPAC placed its claim on produc-
tion of scripts, tape, film and record-
ings in Canada for airing on the radio
and television stations directed to Can-
adian audiences in the Vancouver area.
CAPAC claimed that KVOS-AM-TV
had no license from CAPAC and has
not paid royalties on the use of its
music. CAPAC started the case in 1959
and was granted an order of claim by
Justice Jacques Dumoulin of the Ex-
chequer Court of Canada in December
1959. In February 1961 Justice J. T.
Thorson, president of the Exchequer
Court reversed the ruling, and CAPAC
took its claim to the Supreme Court of
Canada.

**Government hurting tv abroad, says McCarthy**

It's the U. S. government that's hurt-
ing the image of American television
abroad, not tv, John McCarthy, presi-
dent of the Television Program Export
Assn., told a meeting of film producers
in Hollywood on Thursday (Jan. 31).
'The repeated attacks by Washington
on the U. S. television industry in the
form of congressional hearings, FCC
hearings and the blanket indictment of
the industry by the FCC has had wide-
spread repercussions in foreign markets
everywhere," he declared. "If Wash-
ington continues on its present course
vis-a-vis the tv industry, we shall see
increasingly in foreign markets the at-
titude that the programs of our indus-
try carry some kind of stigma and that
the audiences and populations of those
markets must be protected from such
tainted merchandise."

---

**Two tv networks plan half-hour news shows**

Weeknight news in the half hour pre-
ceding prime-time evening schedules
now appears certain on two tv net-
works next fall.

CBS-TV in December announced
plans to televise a half-hour five-
week-night weekly news program next
season. The network is expected to
predict the show at 7-7:30 p.m., the
half hour preceding the traditional start
of the network's nighttime schedule.

NBC News sources indicated last
week that it is quite certain that NBC-
TV will follow suit by programming a
news show in the 7-7:30 p.m. slot using
Chet Huntley, Dave Brinkley and other
news correspondents.

NBC, however, would not confirm
that a decision had been made, and in
fact meetings of news and other execu-
tives were continuing last Thursday.
American techniques must be modified for overseas campaigns

It's not enough simply to assume that because a product has a degree of acceptance in the American market, it will also suit the foreign consumer. I refer not only to formulation, in the case of packaged foods, but also to the price level at which the product must be sold. The old principle that success in the market place depends on giving the consumer what he wants at a price he can afford to pay is just as true overseas as it is here at home. And overseas, both standards are often unlike the American.

General Milk Co., processes and sells packaged foods through eleven major subsidiary overseas operations. We sell in the countries where our plants are located and we export from various places to over 100 markets around the world. Principal products are evaporated and sweetened condensed milk and powdered milk. As an affiliate of Carnation Co., we are responsible for all Carnation operations outside the United States, Canada and U.S. territorial possessions.

We are in a very competitive business and we believe in advertising—including radio and television. Fundamentally, our advertising philosophy leads to the application of American principles and techniques. But in foreign lands this concept is restricted severely by such things as legal considerations, media availability and sometimes even the literacy level of the consumer.

What's In a Name • A brand name, even though it means nothing in the foreign language under consideration, must be easy to pronounce in the foreign tongue. Even the sound should be checked to be sure there can be no unfortunate connotation.

For us, American audio and video commercials generally won't work well even after modifications for language and local consumption habits. For this reason our advertising is, for the most part, conceived and produced by the individual General Milk affiliate. Each works with its own advertising agency. Talent with a native "feel" for each separate market can, we think, best cope with our problems of variable brands, language, and product usage in the different countries. Where we can, we generally concentrate in three major media—radio, television and print—although we also sometimes use cinema and outdoor postings.

The quality of production we can get—particularly in Europe—is generally good to excellent. We do, however, occasionally use American photography and dubbed and edited American tv film. Then, too, once in a while one of our subsidiaries can contribute to the production of layouts and commercials of another. For example, a British tv commercial, or some variation of it, might be used in Australia.

Mostly Spots Abroad • In most countries we use spots on both tv and radio—primarily because this is the only way commercial time is sold. A notable exception is the Philippines where we sponsor programs, both tv and radio, and where they "simulcast" audience participation programs on tv in Manila and on radio in Manila and the provinces. If the show is good, results are highly satisfactory.

Our use of tv depends, primarily, on availability. In most places, we have gotten in quite early and audience growth in recent years has justified our earlier decisions. The future of tv, particularly in the more sophisticated markets, is certainly assured. Like other advertisers, we are moving in it substantially where visual product demonstration and pictorial brand identification are particularly important.

Beyond the availability factor, the relative importance to us of tv is quite variable between markets. Coupled with radio, it is the backbone of our advertising programs in Brazil and Mexico—but for different reasons. In Brazil we do not consider newspapers suitable and we cannot use national magazines because our selling, at the moment, is restricted to the Rio and Sao Paulo markets. In Mexico, tv is a good bet because we consider most print media available inadequate for our purpose and because there is a high concentration of sales potential in the Federal District.

Different Places, Different Media • In the United Kingdom, we spend about 50% of our budget in tv. In France, there is no commercial tv available, so we use commercial film in the cinema instead. Australia responds very well to tv, primarily because of the concentration of population in the Sydney and Melbourne areas. Germany, too, probably because the national coverage is good and there are so few commercials broadcast (only one commercial channel airs sales messages once a day during a half-hour news program).

We use radio extensively. It will deliver good coverage in many areas, but there are important exceptions like England and France where governments still prohibit its commercial use. You can get radio commercials into France from Luxembourg and Monte Carlo, but nothing like national coverage is possible. Of course, we are most interested in radio where pictorial representation of the brand is not too important, where the message can be brief and simple and, most of all, where we want broad and deep audience penetration.

An Effective Team • We like to use tv and radio together. We think the combination can be very effective, for example, in the Philippines where tv delivers "A" class homes only in the Manila area but where radio goes much deeper into Manila and at the same time covers the provinces too.

It's evident that all of these factors represent a widely variable advertising opportunity as the marketing problems are studied country by country. To these variables must be added another—the changing development patterns of each individual medium. In this respect, it behooves us to constantly keep abreast of developments because both television and radio will surely have an even more profound effect in the years ahead on the free world's constantly rising standard of living.

G. H. Matthew, vice president in charge of sales and advertising of General Milk Company, started in the food business—after a few post-college years in sales engineering—as a retail salesman for American Home Foods. Associated with Carnation Company since 1949, he was transferred in 1955 to General Milk, which handles Carnation's overseas operations, after having served the parent company as regional sales manager, assistant general sales manager and product manager.
SYNCOM SATELLITE READY TO GO

22,300-miles-high orbit to match earth rotation speed

Sometime in the next 10 days, the first 24-hour communications satellite will be launched from Cape Canaveral and it promises to open a new era in space communications.

The Syncom (synchronous communications) satellite is expected to be placed in orbit 22,300 miles above the earth. The satellite will rotate around the earth once every 24 hours, exactly in time with the earth’s daily revolution. This means that Syncom will hover virtually over the same part of earth.

Since a single Syncom is expected to cover about one-third of the earth’s surface, only three are needed to blanket the earth. Earlier communications satellites, like Telstar and Relay, are in relatively low orbit (500-3,500 miles high) and require 30-40 flying switchboards to give 100% coverage.

Syncom was built for the National Aeronautics & Space Agency by Hughes Aircraft Co. It weighs 86 pounds and will be used only for two-way telephone, teletype and facsimile communications between Lakehurst, N. J., and a U. S. Navy communications ship anchored at Lagos, Nigeria, on the west coast of Africa. Both stations are part of the Army Satellite Communications Agency. The Dept. of Defense is operating with NASA in the Syncom program. An advanced Syncom, under construction by Hughes, will be capable of transmitting tv programs.

If things go well, the satellite will reach the desired longitude within two weeks after launch. It is expected to be in position for testing about five days after launch, however.

The satellite carries a duplicate set of transponders and other gear. Transmission from the satellite, via a coaxial slot array and travelling wave tube transmitters, radiating 2 w, is at 1815 mc. Ground station transmitters, delivering 20 kw, will transmit at 7360 mc. and will be frequency modulated with a bandwidth of 80 kc. Ground stations will use 30-foot parabolic antennas and cooled parametric amplifier receivers.

Among advantages of the synchronous communications satellite is that it does not require large tracking antennas necessary to follow the low-flying satellites.

Syncom will remain in sunlight almost 99% of the time, feeding electrical energy from 3,840 silicon solar cells to nickel cadmium batteries.

Under development is a two-year program for bigger and more elaborate Syncom which will be able to relay tv programs as well as telephone and teletype messages. The President has asked for $40 million for this project in the NASA budget submitted to Congress Jan. 17 (Broadcasting, Jan. 21).

Technical topics...

New tuner • Altec Lansing Corp., Anaheim, Calif., a subsidiary of Ling-Temco-Vought Inc., in that city, has announced the production of a new stereo fm tuner designed for both professional and home use. The new 314A "Emperor Royale" tuner can function as both a monitor and a network relay for an fm station. It is identical in circuitry and performance to Altec's "Astro," introduced last April. The "Emperor" sells for $359.

Film symposium • A semester-long symposium covering the operation of film processing labs is being offered as a non-credit course open to anyone who is interested by the U. of Southern California starting Feb. 13 and continuing each Wednesday evening through June 5. Tuition is $45.

New tiny tv set • Sharp Electronics Corp., New York, added its contribution to the growing tiny tv set market. It's an all-transistor portable set with eight and one-half inch picture tube that will sell for $229.95, made by Hava-kawa Electric Co., Osaka, Japan. The set weighs 10 lbs., excluding rechargeable battery unit which is an optional accessory.
CHANGING TIMES
Record replaces newspaper at National Press Club

The traditional mock newspaper at the inauguration of a new president for Washington's National Press Club was replaced this year by a long-playing phonograph record.

The record, which honored Bryson Rash, NBC News Washington correspondent who became NPC president on Feb. 2, features NBC News correspondents David Brinkley, Robert McCormick and Richard Harkness as well as former press club officers and other Washington journalists.

The record, titled “Is Bryson Rash?”, presents a humorous account of Mr. Rash's career with Messrs. Brinkley, McCormick and Harkness assisted by Patty Cavin, former woman's editor of WRC Washington and president of the Women's Press Club; May Craig, Portland (Me.) Press-Herald, and Sarah McClendon, El Paso Times. WRC staff announcers Willard Scott and Ed Walker are heard imitating Mr. Rash as a boy and portraying his school teacher and others who affected his career.

The record was distributed at the inaugural dinner. Members not attending will receive it by mail.

ANA plans clinic on tie-ins

The Assn. of National Advertisers will sponsor a clinic on tie-in promotions to be held in New York, Feb. 14. The meeting will cover joint advertising and promotions programs involving two or more advertisers.

A committee headed by Edward L. Slater, director of advertising, Sylvania Electric Products, has scheduled these topics for formal discussion: How to avoid pitfalls and capitalize fully on your tie-in promotions; planning, executing and evaluating tie-in promotions; merits and problems of tie-ins from the standpoint of creativity and coordination; gaining the support of the sales force and trade for tie-in promotions, and the place of tie-in promotions in the marketing program.

'Lights for Life' promotes traffic safety

A trend of a rising traffic death toll throughout 1962 was reversed in the last half of December in the state of Virginia, according to WXEX-TV Richmond. In the Dec. 17-Jan. 2 period there were five fewer traffic deaths in the state than in the same period a year ago, though for the year there were 100 more traffic deaths than in 1961.

During the Dec. 17-Jan. 2 period, WXEX-TV conducted a “Lights for Life” safety campaign that urged motorists to keep their headlights on during daylight hours as a reminder to other motorists to drive with care. WXEX-TV promoted the campaign with 500 spot announcements, 10,000 bumper stickers and several hundred thousand leaflets. Local police officials, state patrolmen and accident victims were interviewed on local programs.

BBDO: a big agency with big and small accounts

Yes, we are not big, says BBDO. In a new promotional booklet, the agency in reciting "some of our vital statistics" assures the advertising industry that (a) BBDO is a big agency, and (b) BBDO is not a "big-account" agency.

The booklet points out that more than half of BBDO's clients (59%) bill under $1 million annually. The breakdown: 41% bill $1 million or over; 21%, $500,000 to $1 million; 11%, $250,000-$500,000; and 27%, under $250,000.

Other vital statistics: the agency claims its regional-office setup is the "largest in the agency business" with half of BBDO's business originating in U.S. and Canadian regional offices; BBDO International is one of the "fastest-growing international agencies in the world" (four BBDO offices in Europe, 97 associated agencies in 54 countries), and about half of the business is in packaged goods, such as soap and soup, seeds and cigarettes, coffee, wine, beer and soft drinks.

BBDO also notes that two-thirds of its billing comes from clients who have been with the agency for 10 years or longer and that its accounts remain with the agency an average of 14 years.
WPAT takes agency people to theatre

More than 70 Philadelphia agency and client executives were guests of WPAT-AM-FM Paterson, N. J., at a dinner and theatre party last week. Highlight of the evening was attendance at a Philadelphia performance of the pre-Broadway tryout of the play “Tovarich” with Janet Leigh and Jean Pierre Aumont. Among those attending were (sitting, l to r) Murray Firestone, president, Firestone-Rosen (formerly W. B. Doner); Max Brown, executive vice president, Fels & Co.; Caral Firestone, Firestone-Rosen; Shelly Roseman, Firestone-Rosen; Eileen Moore, Al Paul Lefton; (standing) Billie Farren, N. W. Ayer; Norm Flynn, WPAT account executive; Bette Kaufmann, N. W. Ayer, and Jim Egan, N. W. Ayer.

WPAT hosts were Dan Weinig, vice president and general manager; Buck Johnson, sales manager, and Mr. Flynn, account executive for the Philadelphia area.

Drumbeats...

If I had a hammer • WFAB-TV Dallas asked its viewers to write letters telling why they liked the ABC-TV show, I’m Dickens, He’s Fenster. The best letter won for its writer the services of two carpenters for one day.

Down to the sea • WMAM-AM-FM Westport, Conn., will send a reporter to sea in a “weather-boat” to broadcast 32 remote marine reports each weekend next summer. The station is outfitting a yacht for the job with weather equipment, broadcasting units and call letters painted on the hull. The reports will be supplemented by broadcasts of flying conditions from the Bridgeport, Conn., airport in addition to normal coastal weather reports.

Pittsburgh station gives orchestra to listener

The Pittsburgh Symphony Orchestra’s Symphonette was given to a listener of WRYT, that city, for her own personal concert in a contest conducted by the radio station.

WRYT listeners wrote the station with reasons why they would like to have the orchestra’s musicians play for them. Each letter included a contribution for the orchestra’s maintenance fund campaign.

A young nurse at Presbyterian-University Hospital was declared the winner for her letter which asked that the Symphonette play a concert in the hospital’s auditorium for shut-ins and hospital personnel who could not hear regular concerts.

A second letter, declared runner-up, won a quartet of symphony musicians performing for students at the Western Pennsylvania School for Blind Children.

 Freedoms Foundation plans Roll-Call campaign

Radio and television stations are being asked to support the annual Roll-Call campaign of the Freedoms Foundation, Valley Forge, Pa.

The campaign will be conducted Feb. 15-28 with the theme “Plant the Seeds of Freedom.” Special radio and television kits containing taped and filmed spots on various aspects of the “American Credo” will be sent to network affiliates in the first week of February. Other stations desiring the kits should address their requests to Admiral Arthur W. Radford, Freedoms Foundation, Valley Forge, Pa.

Appearing in the radio-tv announcements will be Admiral Radford, John Wayne, Frankie Laine, Jack Benny, Raymond Burr, Johnny Carson, Claudette Colbert, Frank Fontaine, Andy Griffith, Diana Lynn, E. G. Marshall, Mitch Miller, Peter Nero and Ed Sullivan.

KTRH turns to listeners to pick music schedule

KTRH Houston is going to its listeners to determine what kind of music they want to hear.

The station is preparing a “Music-Selector” ballot listing 1,000 music selections, compiled from a list of million sellers, standards, current popular tunes and best selling albums. Listeners are asked to check off their 100 personal favorites and mail the lists to KTRH for tabulation and evaluation. The station will then program its music from the personal preferences of its listeners.
BROADCAST ADVERTISING

Fred Frost, Mark Stroock and Robert Hussey elected vps of Young & Rubicam Inc., New York. Mr. Frost is supervisor of TV films; Mr. Stroock, contact supervisor, and Mr. Hussey, of agency’s Hollywood office, is associate director of programming in that city. Locke Turner, former account supervisor with Charles Bowes Adv., joins Young & Rubicam, Los Angeles, as executive on Southern California Edison account. He replaces Fred Gordon, who resigned to join Home Buyers’ Guide.

Stanley T. Peterson, account supervisor at Guild, Bascom & Bonfigli, San Francisco, elected vp.

Frank Scopps, Frank Droesch and Howard Smith elected vps of Donahue & Coe, New York. Mr. Scopps, who joined D&C in 1956, is executive art director. Mr. Droesch, administrative art director, came to agency 28 years ago. Mr. Smith, who has been controller of agency since 1945, is now vp-assistant secretary-treasurer. Reuben Siegal, who worked with controller and treasurer, succeeds Mr. Smith.

Jerome Rotblatt elected vp in charge of sales for Sealy Mattress Co., Chicago. He will direct Sealy-Chicago advertising and marketing programs, in addition to his responsibility for sales in company’s four-state area. Mr. Rotblatt, associated with furniture industry for 16 years, joined Sealy-Chicago as merchandise manager in 1958, and was appointed sales manager in June 1959.

John E. Carter, for past four years vp for client services of Fuller & Smith & Ross, Fort Worth, Tex., joins Dallas advertising agency of Norsworthy-Mercer (formerly Taylor-Norsworthy) as vp.

Russell S. Jones, senior account executive, promoted to supervisor on Adolph’s Ltd. account at McCann-Erickson, Los Angeles. Mr. Jones joined M-E in 1955 in Cleveland office.

Bain heads AWRT group

Elizabeth Bain, assistant to director of program services at CBS-TV, elected board chairman of Educational Foundation of American Women in Radio & Television, New York. Elected to Foundation’s executive committee were Miss Bain, chairman; Lilian Lee, WABE Atlanta, secretary, and Peggy Ware, Dudley-Anderson-Yutz, New York, treasurer. Foundation was formed in 1960 to disseminate knowledge of broadcasting field.

Edward Baczewski, vp and director of media planning at Cunningham & Walsh, New York, appointed account supervisor. Mr. Baczewski will be responsible for Johns-Manville account. He joined C&W in 1950 as media buyer.

Arthur Wright, senior producer, promoted to executive producer in charge of commercial production.

Jon Werolin, former media director of J. Walter Thompson Co., San Francisco, joins Honig-Cooper & Harrington, that city, as assistant media director. Colleen Mattice has succeeded Mr. Werolin as media director of Thompson’s San Francisco office.

George H. Gribbin, chairman of Young & Rubicam, New York, appointed public information chairman for 1963 Greater New York Red Cross campaign. Mr. Gribbin will help direct program to secure members and funds.

Frank Bruguier, from 1959 until 1961 editor of Western Advertising and more recently its senior editor, joins

Hal Stebbins Inc., Los Angeles advertising and pr firm, as copy group head.

Stuart P. Erwin Jr., former tv program director of Benton & Bowles, New York, joins Ralston Purina Co., St. Louis, as advertising manager in Ralston division.

Dale Anderson, former vp and account supervisor at Compton Adv., New York, joins Needham, Louis & Brobray, Chicago, in similar capacity. Prior to joining Compton, Mr. Anderson was with Lennen & Newell, New York, also as vp-account supervisor.

Richie Ashburn, former New York Mets ballplayer, appointed sportscaster for Philadelphia Phillies games on Atlantic Refining Co.’s baseball network of 25 radio and four tv stations.

Marjorie B. Williams, former senior copywriter with Chirurg & Cairns, New York, joins creative staff of Hill, Rogers, Mason & Scott, Chicago.

Janet Marie Carlson, copywriter at Kenyon & Eckhardt and writer-account executive at Malcolm Steinlauf Agency, both Los Angeles, joins creative staff of Fletcher Richards, Calkins & Holden, that city.

Patricia E. Rheame, director of membership department of Radio Advertising Bureau, New York, elected executive vp of Teen America Assoc., producers of annual Miss Teenage America pageant.

Ben Margolis, administrative assistant of Television Advertising Representatives, New York, elected vp. Prior to joining TVAR in August 1961, Mr. Margolis served with CBS since 1927.

Richard Swenson, member of Young & Rubicam’s film department in Hollywood, promoted to production staff.

Robert Heyn, former account executive at D’Arcy Adv., Los Angeles, appointed assistant advertising manager of Bekins Van & Storage Co., that city.

Glee A. Duff named radio-tv director of Gray & Rogers, Philadelphia.
South Carolina's past presidents honored

Past presidents of the South Carolina Broadcasters Assn. were honored at a special reception during the annual winter meeting of SCBA late last month. With the plaques they received were (1 to r. seated) G. Richard Shafto, the first president of the association in 1947 and executive vice president of WIS-AM-TV Columbia and WSFA-TV Montgomery, Ala.; Mrs. Mildred Whitmire, widow of the late B. T. (Bevo) Whitmire of WFBC Greenville; Walter J. Brown, WSPA-AM-FM-TV Spartanburg, and C. Wallace Martin, now director of development at the U. of South Carolina.

Standing (1 to r.) are past presidents Lou Neale, WBEU Beaufort; James F. Coggins, WKDK Newberry; Edward Osborne, WBCU Union; Randy Davidson, WLOW Aiken; Charles A. Batson, WIS-TV; Frank Best, WDIX Orangeburg, and H. Moody McElveen Jr., WNOK-AM-TV Columbia. Past SCBA presidents not at the reception are Dan Crosland, WCRS Greenwood, and John M. Rivers, WCSC-AM-TV Charleston, both South Carolina.

Richard M. Dunn, former director of broadcasting at Wad Adv., Chicago, joins ABC-TV in newly created post of director of daytime tv program development. Prior to joining Wade, Mr. Dunn was with Compton Adv., serving as tv program department director. Irw Wilson, former general sales manager of WGN-TV Chicago, joins network as sports and special programs sales supervisor, also newly created position.

Dick James, station manager of WBBW-AM-FM Youngstown, Ohio, elected vp of Mahoning Valley Broadcasting Corp., licensee of stations. Mr. James was appointed station manager in February 1961.

L. L. (Sonny) Stewart, manager of KOPY Alice, Tex., elected vp and general manager of station. Mr. Stewart, who joined KOPY in September 1962, formerly operated his own radio station engineering-consulting service with headquarters in Corpus Christi, Tex.

Benjamin A. Hubley appointed assistant general manager for radio of Maine Broadcasting System (WSCB Portland, WLJB Bangor, and WRSO Augusta). He continues as WSCB's station manager. Herbert W. Crosby, WSCB sales manager, assumes added duties of assistant manager and as New England sales manager for Maine Broadcasting System.

Richard Lewis Venturino, director of programming and production for American Freedom Network, Bonita, Calif., assumes additional duties as San Diego manager of XEMO Tijuana, Mexico.

Bob Kirby, salesman, promoted to assistant sales manager of WOOD-TV Grand Rapids, Mich.

Jack Lenz, in sales and production at WHN Atlanta, joins local sales staff of WSB-AM-FM, that city, as account executive. Mr. Lenz is former vp and general manager of WBBT Lyons, Ga.

Norman Ginsburg, assistant director of sales promotion for CBS Radio Spot Sales, New York, promoted to director of sales promotion. Mr. Ginsburg joined CBS in 1959 from NBC, where he was director of advertising and promotion of film division.

Richard E. Jungers, midwest national sales manager of WGN-TV Chicago for past 10 months, promoted to general sales manager, succeeding Irv Wilson, who resigned to join ABC-TV (see story this page). Mr. Jungers began his broadcast career with WGN Inc. as radio salesman. Other sales experience includes service with WMAQ Chicago and NBC Radio Spot Sales. Before entering broadcast field, Mr. Jungers was divisional manager of Storecraft Corp., of America and district manager of Aluminum Co. of America.

Richard Freeman appointed Detroit office manager of Adam Young Inc., succeeding William Morgan, who resigns to become general manager of WPOJ Pontiac, Mich. Mr. Morgan had been with Young organization since 1960. Lewis S. Krone named radio account executive in Young's New York headquarters. Mr. Freeman for past three years has been salesman with WCAR Detroit. Mr. Krone has been account executive with Long Island Network (WGSM Huntington and WGBB Freeport, N. Y.).

Hugh J. MacPherson, former station manager of KNEW Spokane, joins sales of KLIV San Jose, Calif.

Robin Adrian, assistant traffic manager in sales department of KNXT (TV) Los Angeles, moves to station's sales research staff, replacing Gary Litaker, who is on leave of absence.

David Green, who just completed special project study for Metromedia's Illinois tv group—WTVP (TV) Decatur and WTVH (TV) Peoria—joins KMBC-TV Kansas City as director of advertising and promotion. Mr. Green held similar promotion post with KMBC radio in August 1961 when Metromedia purchased station. Walt Lockman Jr. joins KMBC-AM-FM's sales staff.

Edward M. Korry, former UPI newsman and presently manager of special projects and assistant to president of Cowles Magazines and Broadcasting Inc., was selected by President Kennedy to run new West Coast division of Cowles publications.
last week as United States Ambassador to Ethiopia.

**Willis Grant** appointed coordinator of corporate information, NBC, New York. Mr. Grant, formerly with Young & Rubicam and Ted Bates agencies, joined NBC in 1956 as research associate and was most recently research surveys manager.

**Jack Metrie**, former operations manager of WESH-TV Orlando, Fla., joins WFGA-TV Jacksonville as sales development and promotion assistant.

**Harold E. Reigert**, production supervisor of WFRV (TV) Green Bay, Wis., promoted to program director, succeeding J. W. Vickery, who resigned to accept post with University of Wisconsin, that city.

**Joel Cohen**, formerly with WJOL Joliet, Ill., joins WBBM-AM-FM Chicago as creative writer.

**David Hart**, promotion manager and night director of WLBZ-TV Bangor, Me., appointed promotion manager of WNBQ (TV) Chicago. He had been with WLBZ-TV for past six years.

**Lynn Gibson**, announcer at WDOW Dowagiac, Mich., assumes added duties of chief engineer, replacing Don Stuursma, who joins WKJR Muskegon, Mich., in similar capacity.

**Jack Hewett** appointed program director of Northeast Radio Network. Mr. Hewett joined Ivy Broadcasting Co., Northeast’s parent organization, in April 1962 as program director of WTKO Ithaca, N. Y., which post he retains under his new assignment, NRN serves 33 am and fm affiliates in upstate New York and Pennsylvania.

**Kendall Smith**, assistant program manager of WTIC-TV Hartford, Conn., promoted to program manager.

Mr. Owen is fourth member to rejoin Mr. Wright, who was former owner and president of WPAT (FATES & FORTUNES, Jan. 21).

**Thomas J. O'Dea** and **Thomas V. Toye** join sales division of Mutual Broadcasting System, New York, as account executives.

**Charles A. King**, MBS’s station relations director, named director of news. Mr. O'Dea, most recently associated with Edward Petry & Co., had been national sales manager of WXYZ-TV Detroit before transferring to ABC-TV Spot Sales division in New York. Mr. Toye has had 11 years sales and advertising experience with Crosley Broadcasting Corp., ABC Radio and CBS Radio. Mr. King, who joined Mutual’s station relations department in 1954, became eastern representative in April of that year and was promoted to division director in July 1956. He will be responsible for all news, special events, and sports programs emanating from network’s New York headquarters.

**Bea Agnetti** has been named director at WMAG Chicago. Miss Agnetti has been with station since 1953 and is graduate of WMAG’s radio workshop.

**Richard A. Orkin**, news and special events director of WALN Lancaster, Pa., and **George Hart**, program director of WBCB Levittown, Pa., join staff of KYW-AM-FM Cleveland as production director and traffic director, respectively.

**Ed Sheppard** joins WSIX-TV Nashville, Tenn., as production coordinator.

**Alan J. Shalleck**, formerly with CBS-TV, New York, joins production staff of WCAU-TV Philadelphia.

**Joe Epley**, news reporter with WLOS-TV Asheville, N. C., joins WBTN (TV) Charlotte, N. C., as broadcast journalist.

**Phyllis Lung**, former woman’s director of KYNO Fresno, Calif., has joined KABC-AM-FM Los Angeles as assistant to Jack Meyers, program director.

**Victor Allan**, associate producer with CBS-TV, New York, resigns after 16 years with network.

**Donald Barnhouse**, for two years producer and news writer for WCAU-TV Philadelphia, joins station’s two nightly news broadcasts, Seven and Eleven O’clock Report, with analysis of headline events.

**Deloney Hull**, member of sales staff of WSB-TV Atlanta, Ga., promoted to assistant sales manager. **Dorothy Kirby** appointed sales development manager, and **Don Hicks**, formerly with McGraw-Hill Publications, joins WSB-TV as account executive. Mr. Hull and Miss Kirby both joined station in 1948.

**Edwin Weintraub**, film editor, promoted to film director of WOKR (TV) Rochester, N. Y.

**Ray H. Honaker Jr.** joins WTAR-AM-FM Norfolk, Va., as announcer.

**Arnold C. Johnson**, former manager of WGEE Indianapolis when station began operating in 1956, returns as general manager.

**Howard (Pat) Weaver**, producer-director at WBBM Chicago since 1946,
appointed director of public affairs. He succeeds Paul Lazzaro, who has resigned to join Chicago pr firm of Don Young & Assoc.

John Hlavacek, NBC News' Havana correspondent, named to similar post in Miami. Hilda Watson, coordinator of NBC's public service announcements, retired Jan. 31 after 33 years with network.

Bernie Cosnoski joins WTTM-AM-FM Trenton, N. J., as host of Polka Make Believe Ballroom program.

Jimm Seaney, promotion manager of KLZ-TV Denver, Colo., assumes similar duties for KLZ-AM-FM.

EQUIPMENT & ENGINEERING

Harry E. Houghton, former president, director and chairman of executive committee of Encyclopaedia Britannica, elected to board of directors of Reeves Soundcraft Corp. (Soundcraft magnetic tape and magnetic recording film), New York. Prior to his association with Encyclopaedia Britannica, Mr. Houghton served as president and director of Muzak Corp. for number of years.

Lionel H. Wheeler, vp in charge of technical operations of Colorvision Inc., promoted to vp and general manager of Glendale, Calif., firm. He is succeeded by Walter J. Washick, manager of Colorvision's engineering department. Mr. Wheeler is co-inventor of Colorvision Additive System of color photography.

Milt Parlen, former sales manager of Columbia Pictures' 8 mm division, New York, joins United Film Labs and Sherman Ginsberg Film Libraries, Hollywood, as executive vp. He succeeds Beatrice Dennis, who retires to semi-active position.

SCBA officers for 1963

Cleatus O. Brazzell, president-general manager of WELP Easley, was elected president of South Carolina Broadcasters Assn. at 16th annual convention fortnight ago. He succeeded Frank Hardin of WIS Columbia. Other newly elected SCBA officers: John Davenport of WESC Greenville, vp for radio; R. A. Jolly of WFBC-AM-FM-TV Greenville, vp for tv; Doug Youngblood of WFIG Sumter, re-elected secretary-treasurer. New board members include Redd Reynolds, WBLR Batesburg; Wayne Sawyer, WGCD Chester, and A. P. Skinner, WOLS Florence.

Frank P. Barnes, special assignments director for telecommunications at ITT, New York, elected vp-director of telecommunications marketing. Mr. Barnes joined ITT in January 1962 as special staff assistant in executive department from RCA's communications products department where he was general manager.

R. Kenyon Kilbon, editor of research and engineering information at RCA, New York, appointed manager of editorial and publication services. Mr. Kilbon joined RCA in 1953 as staff writer in department of information.

Robert Beck Jr. appointed manager of manufacturing for Lynchburg (Va.) operation of General Electric Co.'s rectifier components department.

INTERNATIONAL

R. A. Pitt named executive assistant of Transcanada Communications Ltd., Toronto, Ont., owners and operators of CKOC Hamilton, Ont.; CKRC Winnipeg, Man., and CKCK-AM-TV Regina, Sask.

John R. Gorman named account executive at Needham, Louis & Brorby of Canada Ltd., Toronto.

David Coleman appointed chairman of BBC-TV magazine program Points North. He joined BBC staff as news assistant in 1954.

W. John Holden named promotion director of CHCH-TV Hamilton, Ont.

PROGRAMMING

Steve Broidy, president of Allied Artists Pictures Corp.; James Cantlen, vp of Pacific Telephone & Telegraph Co., and Elden Smith, vice chairman of Security First National Bank, elected to board of Community Television of Southern California, organization whose goal is establishment of tv station in Los Angeles.

James N. Manilla, producer-director at Filmex Inc., New York, elected vp. Prior to joining Filmex, Mr. Manilla was senior producer with McCann - Erickson, New York, from 1954-62.

Darryl Hickman was elected president of Los Angeles AFTRA Federal Credit Union board of directors. Other board members are: Joe Yocum, Don Hiatt, Lynne Allen and Bert Ziff, AFTRA Credit Union, organized last December, is said to be first of its kind in entertainment business.

Michael Rye, representing actors; Paul Fly, singers, and Beth Carter, dancers, have been appointed to board of directors of Los Angeles local of American Federation of Television & Radio Artists.

Harvey Bernhard, business administrator of Wolper Productions, Hollywood, elected vp-treasurer and member of board of directors.

Al Rush, legal and business affairs, network tv sales, MCA Tv, New York, elected vp. Mr. Rush served in legal department of NBC before joining MCA Tv.

Jack Stuart, representing Desilu Sales in Denver area, transferred to Atlanta, Ga., to head company's office there.

Ivan Genit, sales representative for Latin America based in Mexico City, moves to Dallas, Tex., to replace Vernon Christian, who resigned. Desilu Sales is syndication subsidiary of Desilu Productions.

Hearing cases

INITIAL DECISION

• Hearing Examiner Basil P. Cooper issued initial decision looking toward granting application of William L. Miller, tr/as Bootheel Besta, Co. for new am on 1540 kc, 1 kw (250 w-CH), D. in Kennett, Mo., conditioned that the station’s failure to meet daytime facilities is precluded pending final decision in Dec. 1419. Action Jan. 30.

DESIGNATED FOR HEARING

• By memorandum opinion & order, commission designated that application of Radio Ashland Inc. to increase daytime power of WNOCiked, Okla. on 1340 kc from 250 w to 1 kw, continued nighttime operation with existing license and WFIN Findlay parties to proceeding. Action Jan. 30.

• WESR Tasley, Va., WASA Havre de Grace, Md.—Designated for consolidated hearing applications to increase power on 1350 kc, from 1 kw to 5 kw, from 250 w to 1 kw, continued nighttime operation with existing license and WFUN parties to proceeding. Action Jan. 30.

• Jasper County Best, Corp., Renseler, Ind., Mel Wheeler, Plymouth, Ind.—Designated for consolidated hearing applications for new-daytime stations on 1560 kc, 250 w; made WJWA South Bend party to proceeding. Action Jan. 30.

OTHER ACTIONS

• By memorandum opinion & order, commission denied the application of Kinston Best Corp. for reconsideration of Oct. 17, 1962, action which returned its tendered application to increase nighttime power of KSON San Diego, Calif., from 250 w to 1 kw, continued nighttime operation with existing license and WBNM parties to proceeding. Action Jan. 30.

• By order, commission waived Sec. 1.334 of rules and accepted for filing application of McConnell-Clarkson Co. for new station operation of WOVE Welch, W. Va., from Sun. to unl. time, with its present facilities 1340 kc, 250 w—N, with license to operation of KNEI Brady, Tex., from unl. time to 1 AM, with appropriate facilities 150 kc, 250 w. Action Jan. 30.

• Millers River Translators Inc., Athol, Mass.—Waived Sec. 4.702 (c) of rules and granted applications for cp’s for four new vhf tv translator stations on chs. 13, 12, 11 and 10 to translate programs of Boston, Mass., television stations. Action Jan. 30.

• Commission granted renewal of license of WKY TV System Inc. for WKY-TV Oklahoma City, Okla., and addressed letter to licensee regarding granting application in grant of application but dissented to letter). Action Jan. 30.

• By order, granted petition by Broadcast Council and extended time to Jan. 28 to file replies to exceptions to initial decision in proceeding on applications of Coastal Best Corp., and W, to operate stations W, and WGBH-TV (ch. *2), and on ch. 30 to translate programs of WMUR, Manchester, N. H., conditions. Action Jan. 30.

• Commission granted renewal of license of WKY TV System Inc. for WKY-TV Oklahoma City, Okla., and addressed letter to licensee regarding granting application in grant of application but dissented to letter). Action Jan. 30.

Routine roundup

• By memorandum opinion & order, commission in consolidated proceeding on applications of Coastal Best Corp., and W, to operate stations W, and WGBH-TV (ch. *2), and on ch. 30 to translate programs of WMUR, Manchester, N. H., conditions. Action Jan. 30.

• By memorandum opinion & order, commission in consolidated proceeding on application of John A. Egle and KLPT Radio Inc. for new daytime am
stations in Golden Meadow, La., (1) denied
joint request for approval of agreement be-

dismissed with prejudice KLFT application; and (3) granted
Egle's application to operate on 1600 kc, 1
kw; conditioned to pre-sunrise operation
with daytime facilities precluded pending
final decision in Doc. 14419. Board member
Nelson issued concurring statement. Action

WZP Cottsville, Pa. — Granted cp to install new trans. and transmission line; condition: delete remote control.

License revoked

By memorandum opinion & order, commission revoked license for WLOV (FM) Cranston, R. I., and deleted call letters. Station has been silent since July 1961. Action Jan. 30.

Rulemakings

By report & order, commission terminated rulemakings in Doc. 14667 and as-signed to supra-commission. D. Original proposal to shift commercial ch. 7 from Jamestown to Bismarck for educational use was opposed by City Council, Chamber of Commerce and Board of Education of Jamestown, and Cheyenne Reiten, North Dakota businesswoman, who pointed out that ch. 3 assignment to Jamestown would meet mileage requirements and leave undisturbed ch. 7 assignment to Jamestown. Jamestown is presently re- served (and unapplied for) in Bismarck. However, in petition for rulemaking by Department of Public Instruction and Bismarck's public and parochial school systems and junior college indicated that funds would be available for constructing educational use of ch. 7 assigned vhf channel is as-signed. Action Jan. 30.

By report & order, commission finalized rulemaking in regard to noncommercial use ch. 52 (now commercial) licensed to National Best, Inc. for WLOV (FM) Cranston, R. I., and deleted call letters. Station has been silent since July 1961. Action Jan. 30.

PETITIONS FOR RULEMAKING FILLED

By National Educational TV & Radio Center, Litonia, Mich.—Requests amendment of Sec. 3,606 of rules so as to assign ch. 68 to Livonia and reserve it for non-commercial educational use. Received Jan. 22.

By Power TV Inc., Phoenix, Ariz.—Requests institution of rulemaking proceeding so as to assign uhf ch. 26 to Phoenix. Received Jan. 23.
Not until this moment has such a small price tag appeared on a full-size, full-featured electric office typewriter: NEW ROYAL ELECTRESS

Yes, this is a full-size, fully equipped machine, not a light-weight. It can withstand all the rigors of heavy office duty.

How is it possible to introduce such a machine for $95 under the price of any other true office electric? Basically, by simplification of the mechanism. Not by giving up any of the features.

An ingenious new cam, for example, did away with 645 parts in type-bar linkages. That means 645 fewer parts to pay for in the first place. And the fewer the moving parts, the sturdier the machine.

The motor is simplified and yet more powerful than motors half again its size.

Throughout, simplification not only saves you money but results in a strong, trustworthy machine. Quiet. Rugged.

But you do not merely save money. You get all the features you want—and a few found nowhere else. The new Magic Monitor,* for example, automatically adjusts to the thickness of the carbon pack. The result: print work as neat and uniform as a business card—with remarkably clear, crisp, carbon copies.

For full-featured ability with a small price tag, isn’t the new Royal Electress™ the logical choice? A Royal representative will be proud to show you the Electress. He is in the Yellow Pages. Or write Royal McBee Corporation, Dept. 89 BE, 850 Third Ave., N.Y., N.Y.
OUR RESPECTS to John Thomas Murphy

Television is a way of life for ex-page boy

Last spring an energetic historian undertook a basic research job—the stories of network page boys who have made good in broadcast management (Television, May 1962).

An important member of this group is John Murphy, executive vice president of Crosley Broadcasting Corp., a rank attained since he joined Crosley’s WLWD (TV) Dayton, Ohio, in January 1949. He assumed his new role last Sept. 27.

This tallish executive, with a bit of wave in his dark hair, mixes an easy smile with his businesslike demeanor. His blue eyes often twinkle when the situation is suitable; and again they can blaze with unhappiness at the way things are going.

John Thomas Murphy was born Jan. 23, 1913 in Bronx, New York. Early loss of both parents forced him to go from Fordham Prep into his first job, NBC page boy at Radio City, during the early days of the depression when he was just 17. That started an 18-year NBC career. At NBC he met many top broadcasting and advertising figures, including Robert E. Dunville, now president of Crosley but serving as sales manager at that time. Also he met James D. Shouse, now Crosley board chairman, who advised the young man to take advantage of every chance to learn all he could about the broadcasting industry. Taking this advice seriously, he soon was advanced to NBC’s station relations department as liaison with individual affiliates around the country.

This led to a liaison post between stations and the NBC sales department, another chance to learn the sales problems of stations and networks at close range. One of his assignments was negotiation of the first WLWT (TV) Cincinnati contract with the NBC-TV network.

In his last year at NBC he concentrated on television, coordinating and answering inquiries from affiliated radio stations with tv intentions. He attended opening day festivities when WLWT went on the air officially in February 1948.

Joined Crosley In ’49  •  When Crosley formulated plans to start WLWD in Dayton, Mr. Murphy was offered the managership. On Jan. 1, 1949 he became manager of a tv station that wasn’t yet on the air. All went well however, and before the first year had passed John Murphy had been called to Cincinnati to take charge of all three Crosley tv stations—WLWT, WLWD and WLWC (TV) Columbus. Later WLWA (TV) Atlanta and WLWI (TV) Indianapolis were added. (WLWA was sold in 1962.)

In 1951 he was named vice president in charge of television for Crosley as well as general manager of WLWT. When WLTA took the air in 1953 he was named a vice president of that station.

At Crosley he is credited with many developments, including the success of the whole tv structure. He was responsible for network appearances of many Crosley-originated programs, including 50-50 Club and Midwestern Hayride. He had a major role in bringing color baseball and basketball to tv and in making Cincinnati famous as “Colortown, U.S.A.”

Hot Licks  •  Once in a while he indulges himself by sitting down at a set of drums and showing a local orchestra a few tricks he learned while a page boy, when he came to know B. A. Rolfe, Benny Goodman, the Dorsey brothers and others. He had run a small orchestra while a page boy, financing three years at Fordham U.

One of John Murphy’s friends gives his impressions in this vein: “He personifies television. His belief in the industry, his sheer love of it and its potential, is legendary around Cincinnati’s Crosley Square. A man of intense drive, he uses every situation to gain more knowledge of tv. Actually, he lives tv. One Monday morning he is said to have written a memo to his sales manager that went like this, ‘While I was relaxing at home with my family last night, I decided how we will attack the problem we’re having with—.’”

Way of Life  •  Television really is a way of life as well as a career with Mr. Murphy. With an extensive knowledge of the industry, he believes good, old-fashioned hard sell must be applied to tv advertising, coupled with creativity. “If an advertiser’s message has both,” he likes to say, “the product will move.”

A decade ago, in prophetic words, he said in a talk to the Louisville Ad Club: “The time is coming when television will worry less about Faye Emerson’s neckline (a topic of that era) and more about illiteracy; less about assaults on what tv is doing to education and more about the thoroughly apparent fact that it is the greatest educator of all.” He actively aided in establishment of WCET (TV) Cincinnati, one of the first tv stations, for which Crosley provides transmitting facilities at a nominal fee of $1 a year.

Best People  •  As an executive Mr. Murphy believes first in finding the best people available and then delegating responsibility. He’s also a firm believer in promotion from within, compensating an employee for diligence, effort and company loyalty.

He takes a dim view of order-taking salesmen but admires those who know how to fight the battle of adverse numbers. He considers them the most important people in television.

As to tv programming, he’s an advocate of creativity and originality with showmanship and flair and often talks of responsibility for the tremendous impact of tv programs on viewers. He likes special events and programs with local live personalities.

And of course his faith in color is unbounded. He remarks that Cincinnati has more color sets proportionately than any other city, with 10% of the nation’s color homes located in the four Crosley tv markets.

Mr. Murphy has had numerous industry activities, including director of Television Bureau of Advertising, NBC affiliates committee, Broadcast Pioneers and International Radio & Television Society plus a yard-long list of local roles. He’s an active member of St. Gertrude Catholic Church. He married Winifred M. Meehan, Brooklyn, an NBC traffic employee, in 1940. The Murphys have a daughter, Patricia Ann, 16. John’s hobbies are golf, baseball and gardening.
EDITORIALS

What's behind the noses

They're rewriting the rule book for the numbers game. Big numbers are still important, but the trend among buyers is to wonder more about the composition of the numbers. More and more buyers are thinking like Armstrong Cork's advertising director, Max Banzhaf, who recently said that he was less interested in gross figures on cost per thousand than he was in "cost per thousand what?"

Mr. Banzhaf explains that he wants impact. This he describes as "finding the people who represent the prime target for a product" and presenting advertising that has real appeal for them.

A long step toward answering such needs was taken by CBS-TV (Broadcasting, Jan. 28, 1963) when it found a way to solve that heretofore unanswered puzzle—comparison of apples, or magazines, with oranges, or television.

Under the direction of Jay Eliasberg the research began with the concept of studying "total advertising effectiveness" rather than "audiences." This shift in target overcame the difficulty which had made such comparisons impossible.

By concentrating on the end result of effectiveness CBS-TV found TV had high marks in "awareness" of the product, "certainty" of its values and "eagerness" to buy. In cost efficiency the study determined television not only made twice as many people increase their evaluation of advertised brands as did magazines but, more important, made double the number eager to buy.

That is the kind of information high-spending broadcast buyers can use. It is a must if broadcasting is to continue to increase its share of the advertiser's dollar in face of the concentrated fire of the competition.

Both radio and television tend to fare extremely well when compared with other media by competent research. The problem is to have more of this research ready on national, regional and local levels.

If television and radio don't provide the right answers, other media will try. Their way.

Oh, Henry

The nice words, the high-sounding statements of principle, the cultivated appearances of devotion to the "public interest"—all the attractive arguments that have been used to justify government intrusions into broadcast programming—blew up last week in the FCC majority's face. By inadvertence a member of the inner circle admitted just what has been going on.

We are indebted to E. William Henry, a dedicated New Frontierman, for confirmation of the warnings that this publication has been shouting—to an audience with an astonishing incidence of deafness—for several years. Mr. Henry made the following observations in a news conference held last week while he was conducting hearings into the local programming of television stations in Omaha. The conference was held at the end of the second day of testimony.

Mr. Henry said that at that point the hearings were going "about as we had expected" and that they had shown that "most of the representative citizens of Omaha seem to be satisfied with the performance of all of the stations."

But, he said, in almost the next breath, it would have to be decided later, after the presentation of the testimony of the stations themselves, whether local programs in Omaha "are measuring up" to FCC "standards."

Here, for the first time, the semantic cover-up was removed from New Frontier thinking. To put it in still clearer words, the present majority of the FCC does not care whether the public is satisfied with television programming; what matters is whether programming conforms to the specifications of the FCC.

What the FCC majority is really doing is reserving the authority to decide whether the public knows what is good for the public. By Commissioner Henry's own description of the process, the FCC has assumed the considerable job of regulating not only television but also the television audience's tastes.

No matter the guise under which this process is conducted—to protect the public against "harmful" things, to expose the public to things that are "good," to move the public ahead in cultural and educational experience at a rate faster than the public is naturally disposed to go—the process is in fatal conflict with the fundamental traditions of American society. A government is no longer subject to the consent of the governed if it succeeds in arrogating the power to prescribe what the governed see and hear—if it is allowed to second-guess the TV audience of Omaha.

The dangers to an open society in the recent operations of the FCC are beginning to become apparent to many thoughtful people, including the architect of the FCC program policy that the regime of Newton Minow inherited and has put to censorial use. As reported here last issue, FCC Commissioner Fred Ford, who was the Republican chairman when the program policy of July 1960 was adopted, has disavowed the Omaha-type hearing on the grounds that the government is usurping the broadcaster's decision-making function. Mr. Ford has not, however, disavowed his program policy itself although it has become the instrument for all kinds of pressures on programming.

Yet the 1960 program policy must be disavowed, indeed must be eliminated, if the trend toward government intrusion in programming is to be reversed. Omaha is only the latest example of the mischief that can be worked under a policy of federal surveillance over programming. There will be more examples, and perhaps they will be more destructive, for the commission majority will act more cleverly now that it has been unmasked in Omaha.

As we have said repeatedly, the Congress must be persuaded to step in. Only by revisions in the law under which the FCC functions can the rush toward federal censorship be stopped.

BROADCASTING, February 11, 1963
Drop-ins next week

Unless current views change, FCC at its meeting on Wed. Feb. 20 will approve vhf drop-ins at sub-standard separations for eight two-station cities: Baton Rouge, Birmingham, Charlotte, Dayton, Jacksonville, Johnstown-Altoona, Knoxville and Oklahoma City (shift of ch. 5 from Enid). Controversial proposal is slated for discussion this Wednesday (Feb. 13) with vote committed for following week.

Drop-ins are opposed by Assn. of Maximum Service Telecasters on grounds they are in conflict with FCC's own engineering standards and aren't needed anyway now that vhf has been given added promise by passage of all-channel set legislation at last session of Congress. But indications were FCC might well be unanimous in approving eight-city drop-ins to provide third vhf network outlet.

Deal for KLAC?

As sequel to its $10 million purchase of KTTV (TV) Los Angeles, Metromedia is in negotiation with Mort Hall to buy KLAC-AM-FM in same city. John Kluge, Metromedia president, refused to comment, but other sources acknowledge there is basis for report. Price under consideration was not certain, but two years ago Westinghouse proposed to buy KLAC stations for $4.25 million in cash. Westinghouse dropped negotiations when its antitrust troubles began and FCC held up renewal of WBC licenses for period (but subsequently renewed them).

Proliferating pitches

CBS-TV network is losing no time in spreading word of its new research technique that permits comparison of "apples" (magazines) and "oranges" (tv)—and finds "oranges" much richer in advertising sales juices (BROADCASTING, Jan. 28). President James T. Aubrey Jr. was host at presentation luncheon for chairman, presidents and tv-radio heads of 30 top agencies in New York last week, is giving continental breakfast for 1,500 agency and advertiser executives at Waldorf-Astoria Thursday. Then presentation will go on road with group including sales vp Tom Dawson, research director Jay Eliasberg and sales promotion & advertising operations director George Bishop in Chicago Feb. 20, Detroit Feb. 21, other cities later. In addition, prints of presentation film will be made available to all CBS-TV affiliates March 1 for local use.

Catv compromise?

New approach to community antenna legislative and regulatory problems is seen in conversations under-
taken with FCC staff seeking common ground that would assure well-being of catv operations and possibly introduce modicum of regulatory controls, through legislation if need be, to protect live tv stations in smaller markets by requiring non-duplicated service on catv systems. FCC wants authority to regulate catv systems because of threat to small tv stations, but Rep. Oren Harris (D-Ark.) has taken opposed view. NAB board recently reaffirmed its determination to seek restrictive legislation.

Quest is for compromise between positions taken by FCC and NAB on one hand, and by Chairman Harris and catv operators on other. Minimal legislation that would pre-empt catv field as interstate commerce, thus removing state public utility commissions from primary control, presumably would be acceptable to catv groups as well as to FCC.

McCullough won't run

NAB joint board chairmanship—biggest job next to paid presidency—will be wide open next June. Clair R. McCullough, president, Steinman Stations, who has served two consecutive terms, has advised 43-man board that he will not be candidate and that he would "have to refuse" draft if one developed. And tv board Chairman William B. Quarton, WMT-TV Cedar Rapids, Iowa, has written board that he isn't candidate either but would, if elected, serve an additional year as tv board chairman.

Although any member of either radio or tv board would be eligible for election to joint board chairmanship in June, choice ordinarily would be between chairman of respective boards. Chairman of radio board is Willard Schroeder, vice president and general manager, WOOD-AM-FM-TV Grand Rapids, Mich. Mr. Schroeder is known to be interested in joint board chairmanship and, all things equal, he's regarded as most logical successor.

Hour of 'True'

It's now near-certain that General Electric will sponsor new hour version of True on NBC-TV next season (also see story, page 24). GE still holds option on time period where CBS-TV has scheduled new Judy Garland Show (Sunday, 9-10 p.m.), but odds now are that advertiser will relinquish it, though a buy into Garland series is still possibility. True, featuring Jack Webb, is on CBS-TV this season in Sunday, 9:30-10 p.m. slot, under sponsorship of GE. BBDO is GE's agency on show. On NBC-TV, True will fill as yet unspecified number of weeks in period where du Pont's Show of the Week appears. Early thinking had been 32 du Pont programs and 16 True episodes.

All-around writers

BBDO, New York, in continuing its "streamlining" of major functions has completed revamp of agency's copy-writing department. Agency now generally does not distinguish between writers of copy for broadcast and for print. They now write for both media on account group basis. Previously, copywriters worked on media "specialist" basis.

Albany shifts

Physical moves of transmitters of WTEN-TV (ch. 10) and WAST-TV (ch. 13) (at sub-standard separations) to enable them to improve coverage of Albany-Schenectady-Troy area, possibly with use of translators, currently is being considered by FCC with prospect or early approval. FCC previously had denied WTEN-TV move from nearby Vail Mills, by one vote margin, but WAST-TV shift hadn't been considered. WRGB (TV) (ch. 6) is NBC affiliate in area while WAST-TV is ABC and WTEN-TV is CBS.

Quick raise

Mark F. Cooper, new president of Advertising Federation of America (Week's Headliners, page 10), will be paid $25,000 annually at start, but drive already is underway to increase AFA revenues to give Mr. Cooper substantial raise. AFA realizes $25,000 is well below average stipend for similar posts in New York and wants to raise its president up to par.

News management

NAB-instigated conference with White House officials on news policies of administration (BROADCASTING, Jan. 28) will include spokesmen from all news media. Newspapers at first were reluctant to join talks promoted by broadcasting, but publishers, wire service officials and working reporters now are participating in planning for session. Actual talks with White House News Secretary Pierre Salinger and other government officials will be held outside Washington in as yet unscheduled city. Howard Bell, NAB vice president for planning and development, is taking lead in early negotiations with Mr. Salinger.

Published every Monday, 53rd issue (Yearbook Number) published in November, by BROADCASTING PUBLICATIONS INC., 1735 DeSales St., N. W., Washington 6, D. C. Second-class postage paid at Washington, D. C., and additional offices.

Hyde sounds alarm on program control trend

FCC MEMBER ALSO RAKES GRANDSTANDING BY TV CRITICS

FCC Commissioner Rosel H. Hyde has hit out against at what he considers trend toward “authoritarian” control by government over programming. He warned that such control stifles development of broadcasting and poses danger of electronic press being “subservient” to government.

Commissioner, in remarks prepared for delivery yesterday (Sunday) at Texas Assn. of Broadcasters convention in Austin, said “basic question ... is whether the programs should be subject of authoritarian regulation or democratic choice.”

Without naming them, Commissioner Hyde also took jab at FCC Chairman Newton N. Minow and other officials of broadcasting. He said FCC concern with programming is “in the direction of the exercise of authoritarian power,” then added: “Efforts in that direction are encouraged by the fact that an administrator attains a good public image by condemning what he deems unsuitable and demanding excellence according to his views and interests. It puts him [the administrator] on the side of the angels.”

Open Challenge – Commissioner Hyde said public interest can’t be defined in advance but “must remain as an open challenge and as a cause.” He said government effort to promote public interest by direction is likely to “limit the vision.” He warned that “sophisticated and ... subtle” method of applying direction is through commission’s policy of requiring broadcasters to adhere to programming promises.

“I do not think we should undertake to set official guidelines or establish presumptions as to programming elements usually necessary to serve the public interest,” he said “I think we should rather encourage originality.”

Commissioner said presumption that local live programming in prime time serves public interest “could be gross error.”

Discussing need for aggressive, objective reporting by broadcast newsmen, Commissioner Hyde asked, “How can a service provide objective, critical, free press type of examination of government and yet be subservient to the direction of that government?”

Commissioner Hyde was optimistic, however, that ultimately, government will fail in effort to control programming. Public, he said, “will still accept what it wants, and refuse to hear or look at matters which are not of interest.” This, not government regulation, Commissioner Hyde said, will be controlling factor.

You can’t control catv, NCAA tells FCC agency

FCC proposed rulemaking to restrict catv systems from obtaining microwave licenses is “unsubstantiated” and unconstitutional, National Community Antenna Assn. told commission last Friday (Feb. 8).

NCAA said that catv systems do not injure operations of regular tv service or impede commission assignment program and policies. Association told FCC that if threat existed there would be no problem in getting Congress to take action on problem.

FC&B bills $135 million; Cone sees shows’ key

Favorable scheduling as “vital key to winning” top tv audience was discussed in annual report to clients by Fairfax Cone, executive committee chairman, Foote, Cone & Belding, Chicago. Released by the agency Friday (Feb. 8), report shows FC&B had “most successful year” in its history in 1962 with total volume of $135 million and domestic volume of $111.5 million of which 52.6% was spent in tv and 4.5% in radio.

Mr. Cone observed tv programming “continues to be the consideration up-permost in the minds of most advertisers who use this medium.” He indicated also that networks might acquire much better audiences for documentary type shows if they would give them same best-schedule treatment as ordinary entertainment shows which have been able to beat out long-time favorites.

Mr. Cone said “changes in network programs and schedules, designed to further the networks’ own best competitive interests, caused a considerable change in viewing habits during 1962. In the struggle, long-time favorites have lost audience to rather ordinary newcomers and shows with little or no pretense through several years suddenly have emerged with huge audiences, largely by virtue of favorable scheduling.”

Agency size no criterion to corporate planning

Importance of corporate planning by small and medium-sized as well as large agencies was emphasized by Marion Harper Jr., chairman of Interpublic Inc. and of American Assn. of Advertising Agencies, in speech Friday at annual meeting of AAAA’s Southeast Council in Atlanta.

“There are more and more small agencies today to benefit from planning,” he said. “The number of agencies with billings of $5 million and over showed a 5% increase from 1957 to 1961; at the same time there was a 27% increase in the number of agencies with billings under $5 million. During the same period, there was a 12% gain in the number of agencies with billings of $10 million and over, compared to a 21% gain in those with billings of less than $10 million.”

Phillip W. Wenig, president of SRDS-Data Inc., told council automation’s most valuable contribution to advertising—helping media men reach decisions—will have to wait until computers are taught to think like humans. “The computer’s own needs are so modest,” Mr. Wenig said, that “they can be summed up in two words: information and data. But, to date, “the computer has not been getting either,” Mr. Wenig concluded.

More time on fm table

FCC has postponed deadline for comments on proposed fm allocations table from Feb. 15 to March 18. New date for reply comments is April 17. Commission announced postponement in order issued Friday.

Germany travels

Prompt overseas sales and exposure of CBS Reports program on “Germany Since Hitler: Andernauer Sums Up” was reported Friday (Feb. 8) by CBS Films Inc. Program was teletaced in U.S. on Wednesday (Feb. 6). Anticipating overseas interest, program was produced with both German and English translations. German version was carried in Holland on Thursday and in Germany Friday and has been bought in Sweden, Denmark and Austria. English version has been bought in Japan, Australia and England, CBS Films spokesman said.
James G. Cominos, executive vp and member of board of directors of Needham, Louis & Brohr, Chicago-based advertising agency, appointed managing director of NL&B-New York. Continuing as manager of NL&B’s New York office is Robert F. Steinhoff, reporting to Mr. Cominos. For past nine years Mr. Cominos has been in charge of TV-radio programs for agency and will continue to represent this activity on board of directors. Assuming additional broadcast programming duties will be John Scott Keck, vp and director of TV-radio program department.

Charles R. Denny, RCA vp and an RCA-NBC executive for more than 15 years, elected vp and managing director of RCA International Div., succeeding Douglas C. Lynch, who resigned. Mr. Denny also is a member of RCA Communications board and of RCA Great Britain Ltd. Mr. Denny was Washington lawyer and served with Justice Dept. until appointment to FCC in February 1942 as assistant general counsel, and later, general counsel. He was appointed FCC commissioner on March 30, 1945, became acting chairman on Feb. 26, 1946, and chairman on Dec. 4, 1946. He joined NBC on Nov. 1, 1947 as vp and general counsel, subsequently was elected executive vp. As latter, Mr. Denny was in charge of operations (starting in September 1956) and was responsible for owned and operated stations, spot sales, NBC Radio, facilities’ operations, California National Productions (film and merchandising subsidiary) and NBC International. He joined RCA as vp on April 1, 1958.

Herbert R. Banquer, continental sales manager for United Artists Television, elected vp in charge of foreign operations for UA-TV and United Artists Assoc., both of which are subsidiaries of United Artists Corp. He assumes duties relinquished by Manny Reiner, who joined Four Star Television as vp in charge of foreign operations (WEEK’S HEADLINERS, Jan. 21). Mr. Banquer has been with UA since 1957 in various overseas executive posts and earlier was with Motion Picture Export Assn. office in Paris. He will supervise overseas sales of 3,000 tv film series episodes for UA-TV and more than 3,500 features, cartoons and shorts handled by United Artists Assoc.

Edward A. Grey, senior vp in charge of media operations for Ted Bates & Co., New York, resigns effective April 1 in what’s described as disagreement over policy. Mr. Grey, who led last summer’s battle against station efforts to curtail product protection granted to competitive tv advertisers, has been with Bates last nine years. Earlier he was with Bow Co. for eight, served as media director of Albert Frank-Guenther Law and had been associated with other agencies. His successor at Bates not yet designated, authorities said.

Mark F. Cooper, for past five years pr director of General Telephone Co. of Southwest, San Angelo, Tex., elected president of Advertising Federation of America at meeting last week in Washington, D.C. (see story, page 34). Prior to joining General Telephone in February 1957, Mr. Cooper owned and operated direct mail advertising agency, managed KGKL San Angelo and served with San Francisco Chronicle. His many years of field and administrative AFA experience include governorship of AFA 10th District in 1961, membership on AFA board of directors for 1961-62 term and serve as vice chairman of National AFA Legislative Alertment Committee.

John J. Bresnahan, former supervisor of media schedules for Colgate-Palmolive Co., New York, joins advertising staff of Brown & Williamson Tobacco Corp., Louisville, Ky., as supervisor of broadcast media. Mr. Bresnahan will be primarily responsible for operation and administration of all B&W’s broadcast advertising, including radio and tv.

For other personnel changes of the week see FATES & FORTUNES

Public relations works in both directions

There’s a “feedback” facet to public relations that is just as important to clients as getting message across to people. This “two-way street” function was stressed by William Ruder, president of New York public relations firm of Ruder & Finn, in speech at public service institute in Washington sponsored by NAB (see page 48).

“Unless we have a system of receiving as well as sending, we will not be doing our job. Only half of our job involves sending,” he said.

He also warned that public relations can be “an enormously dangerous tool,” if improperly handled. It can, he added, be a potential for “anti-democratic forces by “steamrolling ideas.”

State briefing in S.F.

Representatives of radio, tv, press, and non-governmental organizations from northern California interested in foreign policy are invited to attend State Department briefing conference to be held in cooperation with World Affairs Council of Northern California in San Francisco Feb. 14. Sessions will be held at St. Francis Hotel. David Bell, Administrator of AID, is scheduled to give “an on-the-record” address.

CBS-TV sells Masters, PGA golf tournaments

CBS-TV reports sell out at this date for two golf tournament telecasts set in April and in July. Both scheduled for Sat.-Sun., each filling some 2 1/2 hours of late afternoon time.

Signed for Master Golf Tournament (April 6 and 7) are Travelers Insurance Co. and Chard-Peabody Inc., through Young & Rubicam; for PGA: Goodyear Tire & Rubber, via Y&R; Georgia Pacific, through McCann-Erickson; P. Lorillard, via Grey Adv., and Pabst Blue Ribbon, through Kenyon & Eckhardt, New York.

Now... another 73 great Columbia Post-48's are available for TV... great ones like these!
DATEBOOK

A calendar of important meetings and events in the field of communications

*Indicates first or revised listing

FEBRUARY

Feb. 11—Advertising Club of Metropolitan Washington luncheon, President's Arms Hotel, FCC Commissioner Robert E. Lee, and Richard Eaton, president of United Broadcasting Co., will be guest speakers.

Feb. 11—FCC continues NBC-Philco hearings.

Feb. 14—ESMA executive director, P. O. Box 1, Belleroese, L., I., N. Y.

Feb. 14-15—British Columbia Assn. of Broadcasters annual convention, Empress Hotel, Victoria, B.C.

Feb. 15—Western States Advertising Agencies Assn., "Advertising Citizen of the Year" award luncheon, Ambassador, Los Angeles.

Feb. 15—Comments are due on FCC's proposed fm allocations table.

Feb. 15—Entries due for fourth annual American TV Commercials Festival. Entries, accompanied by $20 entry fee, should be addressed Wallace A. Ross, American TV Commercials Festival, 40 E. 40th St., New York 17.

Feb. 15—Academy of Television Arts & Sciences annual ball, Coconut Grove, Hotel Ambassador, Los Angeles.

Feb. 16—Deadline for entries for 1963 Ohio State Awards of Ohio State U. They should be sent to Ray Stanley, acting director, Institute for Education by Radio-Television, Ohio State U., Columbus, Ohio. Awards are for best productions in field of educational broadcasting.

Feb. 16—Annual dinner meeting of Mid-Western Advertising Women in Chicago. Earl Holliman, star of Wide Country series, plans to attend meeting to accept award of "television man of the year" made by group.

Feb. 20—American Federation of Television & Radio Artists, Los Angeles chapter, annual meeting, 8 p.m. Hollywood Knickerbocker Hotel. New officers will be installed and a committee will report on wages and working conditions.

Feb. 21-23—Western Radio & Television Assn., 16th annual conference on the educational use of television, Ambassador Hotel, Los Angeles.

Feb. 25—Third annual Mike Award banquet of Broadcast Pioneers, Imperial Ballroom, Americana Hotel, New York City. Cocktails at 6:30 p.m. in the Versailles Ballroom; dinner at 7:30 p.m. in the Imperial Ballroom.

Feb. 26-27—NAB Conference of the state association presidents, Shoreham Hotel, Washington, D. C.

Feb. 27—March 1—Western Assn. of Broadcasters Engineers, division meeting, McDonald Hotel, Edmonton, Alta.

Feb. 28—Academy of Television Arts & Sciences, Hollywood chapter, 8 p.m. "Meet the Creative Team" session with the producers of The Eleventh Hour, U. of California, Los Angeles.

MARCH

March 6—Assn. of National Advertisers workshop on tv advertising to discuss new techniques for testing commercials, evaluation of media budgets, participation vs. spot announcements and predicting tv success. Speakers will be David Maloney, executive vice president of Colgate Palmolive; Herbert Zeltiner, vice president and media director of Lever's & Newsell; Henry Brenner, president of Home Testing Institute and Eric Marder, president of Eric Marder Associates, Hotel Plaza, New York.

March 7—California Assn. of Broadcasters, Mark Hopkins Hotel, San Francisco.

March 8-10—Annual Radio-TV Conference and Clinic, U. of Oklahoma, Norman. It will be combined with the FCC's 11th Annual Symposium on Station Operations, sponsored by the Oklahoma Broadcasters Assn.

March 9—American Women in Radio & Television, Project '63 workshop, 10 a.m.-12:30 p.m., tv wing, McCann-Erickson Adv., 485 Lexington Ave., New York.

March 11—Florida Assn. of Broadcasters, U. of Florida broadcasting day, Gainesville.

March 12—Puerto Assn. of Broadcasters, San Juan. Howard Bell, NAB vice president, will speak.

March 13-15—Audio Engineering Society's West Coast spring convention, Hollywood Roosevelt Hotel, Los Angeles. Fm stereo broadcasting, disc recording and reproduction, microphones and earphones and other applications in the space age are among topics to be dealt with in technical papers.

March 15—Louisiana Assn. of Broadcasters, Opelousas Inn, Opelousas.

March 15—Deadline for comments on FCC proposed rulemaking to allow daytime stations to go on the air at 6 a.m. or sunrise, whichever is earlier.

March 15—Institute of Electrical & Electronic Engineers, Pacific computer conference, California Institute of Technology.

March 18—Extended deadline for comments in FCC inquiry into the objection-ability of commercial announcements and commercial continuity over am, fm and tv stations.

March 18—Reply comments to FCC's proposed fm allocations table.

March 21-25—Annual management confer-
No other commercial television station in the Miami area devotes more time to scheduling, sound, responsible programs for its young viewers than Channel 10. As with its complete schedule, Channel 10's youth programs are varied to cover many needs and are completely live and vital.

MUSIC FROM MIAMI each week spotlights choral groups, soloists and orchestras from South Florida's high schools.

PROJECT SCOUTS is the only weekly half hour television show in the Miami area produced for and by Boy Scouts.

DISCOVERIES IN SCIENCE — a panel of teens who compete by recognizing objects of science.

ANSWERS PLEASE — High School students question governmental officials and celebrities of renown.

There are many other programs serving youth from 4 to 19 — over 15 hours a week.

A complete youth program service to better serve young Floridians from the Palm Beaches to the Florida Keys.

March 22-23—Spring convention of Arkansas Broadcasters Assn., Sam Peck Hotel, Little Rock.

*March 22-23—Arkansas AP Broadcasters Assn. meeting, Little Rock.

March 26—Final date for the filing of applications for ch. 5 in Boston. Applications will compete comparatively with present occupant WHDH-TV.

March 21-April 3—Annual NAB convention, Conrad Hilton Hotel, Chicago.

APRIL

April 1—Stockholders meeting, Wometco Enterprises Inc., Miami, Fla.

April 1-5—Canadian Assn. of Broadcasters annual convention, Royal York Hotel, Toronto, Ont.

April 3-5—Assn. of National Advertisers West Coast meeting, Santa Barbara Biltmore Hotel, Santa Barbara, Calif.

*April 6—American Women in Radio & Television, Projection '63 workshop, 10 a.m.-12:30 p.m., tv wing, MacCann-Erickson Ave., 485 Lexington Ave., New York.

*April 6—Georgia AP Broadcasters Assn. meeting, Atlanta.

April 8—Oscar awards ceremonies, to be broadcast on ABC's radio and tv networks.

April 18—Assn. of National Advertisers, workshop on international advertising, Hotel Plaza, New York.

April 19—Michigan AP Broadcasters Assn. meeting, Lansing.

April 21-25—Ninety-third convention of Society of Motion Picture & Television Engineers, Traymore Hotel, Atlantic City, N. J.

April 26—Pennsylvania AP Broadcasters meeting in Pittsburgh.

April 26-27—Virginia AP Broadcasters meeting, Executive Motor Hotel, Richmond. Awards in the VAPB newscasting and telecasting contests and for public service will be presented on first night at the banquet.

April 29-May 4—"Rose d'Or" Contest; May 20-25, 1963—Television Symposium and TV Equipment Exhibition. The two events are part of the Third International Television Festival announced by The City of Montreux, Switzerland. For further Information write to Box 97, Montreux.

MAY

*May 3—Indiana U. Radio and Television Department banquet. Bloomington, Ind. Julian Goodman, vice president for news, NBC, will be guest speaker.

*May 9-11—Seminars in editorial, advertising and circulation, U. of Wisconsin School of Journalism, Madison.

*May 11—California AP Radio-TV Assn. meeting, Anaheim, Calif.

May 16-18—Western States Advertising Agencies Assn. annual conference, Riviera Hotel, Palm Springs, Calif.

*May 18—Florida AP Broadcasters annual convention. Cape Colony Inn, Cocoa Beach, Fla. News panels in the morning, a luncheon, afternoon tour of Cape Canaveral and an awards dinner at night.

May 20—Georgia Radio Day, Atlanta Advertising Club, Atlanta.

**OPEN MIKE**

Radio forecast on target

EDITOR: Your lead article Jan. 28 on radio business prospects was one of the most comprehensive and helpful I have read in a trade publication. Your entire staff is to be commended.—Robert Hyland, vice president & general manager, KMOX St. Louis.

Music for ivory towers

EDITOR: Your Jan. 28 article on country and western music stations gave us a much-needed lift. Hope the agencies in their ivory towers read it. I intend to give it good circulation.—John O'Brien, manager KTON Belton, Tex.

EDITOR: Please mail 1,000 reprints of "A big new sound blows out of Nashville."—Wesley Rose, Acuff-Rose Publishers, Nashville.

EDITOR: We are pleased and delighted with the story on country music and Nashville. You did a tremendous job. We would like to reprint portions in our radio kit.—Jo Walker, executive di-
What cuts the cutting out of video tape editing? **AMPEX Electronic Editor.**

Don't cut your tape. Cut your cost. How? Simply turn the knob on an Ampex Electronic Editor. The old scene is erased, the new one added—all electronically. And both old and new sections of the tape can be viewed during actual production. The Ampex Electronic Editor inserts new scenes, new commercials, production changes, or corrects goofs—without splicing. You save time, save tape!

The Electronic Editor also lets you do stop-and-go recording, multi-camera effects with a single camera, and squeeze action—all without cutting the tape. Best news of all: no special training is needed. For more details write the only company providing tape and recorders for every application: Ampex Corp., 934 Charter St., Redwood City, Calif. Worldwide sales and service.
Plan now to attend

IEEE's special TV Symposium

Wednesday, March 27, 2:30-5:30 p.m.
Morse Hall, at the Coliseum, New York

Hear these 5 technical papers:

The South Carolina ETV Story
Part I: R. Lynn Kalnaback, General Manager, South Carolina ETV Center
Part II: W. R. Knight, Jr., Chief Engineer, Bell Telephone & Telegraph Co.

You will view Educational TV on a wide screen via closed-circuit direct from Columbia, S.C. Both studio and class room will be seen in actual operation.

Compensation for Dropouts in TV Magnetic Tape Recording
I. Moskovitz, Mincon Division, Minnesota Mining & Manufacturing Co.

New York City's UHF TV Project Reports
Mobile Field Strength Measurements: Daniel Hutton, FCC, Washington, D. C.
Analysis of Measurements & Observations: George Waldo, FCC, Washington, D. C.
Chairman: Arnold B. Coven, AT&T, New York
Organizer: Clure Owen, American Broadcasting Company, New York

EDITOR: Your special report on country music... should stimulate the imagination of sponsors throughout the country. We have been attempting to stir interest in this type of TV programming for the past two years in the Los Angeles area. Please mail us 50 reprints.—Richard Holst, president, H&S Productions, Studio City, Calif.

The judge's contributions

EDITOR: Let those who speak of country music uncover when they mention the name George Dewey (The Sollemn Ole Judge) Hay.

The judge [mentioned on page 70 of the special report, Broadcasting, Jan. 28] was standing by to give the station break following the first NBC broadcast of the Metropolitan Opera. At his side were Uncle Dave Mcvon and his son, The Fruit Jar Drinkers, The Gully Jumpers and other distinguished forebearers of today's cast of characters.

When the break came, the judge said "Ladies and gentlemen, you have just heard an historic broadcast: the first network presentation of the Metropolitan Opera. Here at WSM we don't have the Metropolitan but we do have our own Grand Ole Opry! Let 'er go. Uncle Dave!" And Uncle Dave did, and it has been going ever since.

Every hillbilly (before they knew they were "folk singers") came to see The Sollemn Ole Judge. He became their unpaid agent, confidant and friend. George Hay put his hand into no man's pocket. All he insisted on was "Keep her close to the ground boys." Almost single-handedly he developed the Grand Ole Opry into the institution it has become.

The last time I saw the judge he was living in dignified though modest retirement. Here was the man who could have been the country music czar.—Edwin M. Kirby, director of public relations, United Service Organizations, New York City.

Lauds proposed revisions

[Mr. Diehn refers to our coverage of Federal Communications Bar Assn. monographs on new Communications Act.]

A question from Georgia

EDITOR: If the claim of a first statewide news network [THE MEDIA, Feb. 4] is for West Virginia, then the article is correct. But if it goes beyond that, the Georgia News Network [started in July 1962] beat them long ago.—Bernard Brown, news director, WGST Atlanta.

[Story was in reference to West Virginia only.]

BROADCASTING THE BUSINESSWEEKLY OF TELEVISION AND RADIO

How spot radio turns the spotlight on the man who sells

Our advertising goals are no different than those of other mutual life insurance companies. Equitable wants to make its name and products so well known to the public that its agents can serve present and prospective policyholders with the greatest degree of effectiveness.

But fulfilling these goals is something else again. Life insurance companies like ours can’t flood the market with samples; they can’t sell at bargain-basement prices; and point of purchase sales are all but impossible. Ballyhoo and stunt promotions are also out. Nor can we claim superiority over competing ‘brand X’—an advertising director in conjunction with an advertising agency would seem to have a tough nut to crack in planning a broad-based ad campaign for a life insurance company.

We brought our objective to the attention of Foote, Cone & Belding, our agency. By we, I include our home office agency department which represents our 6,000-plus sales force in the field, and company committees and officers charged with the responsibility of advertising. We discussed problems and possible solutions: Did FC&B have any recommendations?

‘We Listened’ • They did. We listed—After much hard-headed analysis a campaign was developed and put into operation. Three months later, we received this response from the field:

“Of all the media used over the past few years I have had more public and agent reaction to the radio spot ad programs than anything we have done in the past,” wrote the Equitable agency manager in Boston.

“Agents reported the public heard the broadcasts,” wrote another agency head from Saginaw, Mich., “providing a better working climate for their interviews.”

From tough-to-sell New York City: “These spot announcements have done a great deal to break the ice for our salesmen.”

These are only a few of the comments plucked from a flood of responses from our agency managers, who, I should explain, have no reticence in telling the ad director which trolley to take when a sales campaign doesn’t click. The chief criticism so far has come from those managers who felt we hadn’t chosen the right outlets in their particular areas. This situation was quickly corrected when further study bore out their complaints.

Dream to Reality • Reaction such as the excerpts quoted above is the dream of every officer charged with an advertising program. What made this dream a reality was simplicity.

The radio spot campaign as recommended by Foote, Cone & Belding utilized more than 100 selected markets in all parts of the country. The spots themselves are pleasantly low key, opening with the simple announcement: “These are the sounds of the living,” followed immediately by a montage of familiar sounds, such as children singing, a small-town parade, a political convention, etc.

After a quick fade, the service “pitch” is delivered, underlining the good life which may be had through life insurance protection. The whole thing is done simply, invitingly—presented, you might say, without mirrors and without echo chambers.

The response has been so gratifying that Equitable will continue the radio series through this spring with a new opening teaser:

“There’s no better place to live than America,” and segues into brief sounds of baseball, a practice piano, and the crash of a bowling alley, all of them easily recognizable. Each spot—there are four of them—carries its own combination of sounds, its own warm appeal in behalf of an up-to-date Equitable service, such as annuities, major medical coverage, college policies or a family policy called “planned security.”

Name and Number • In this series, as in the earlier one, the local announcer wraps up the recorded one-minute spot with live delivery of the name and telephone number of the Equitable agency in the area. The entire approach is that simple.

I don’t believe we could have dropped this approach had we wanted to. The agent in the field has a public image dating back to our tv series and print ads of former years (“The Man from Equitable”) and he apparently likes what he hears on radio.

And he likes what his friends, neighbors and prospective customers are saying about the spot ads.

“We feel the present plan is excellent and would like to see it on a year-round basis,” writes one Alabama agency head.

“Please continue the present program,” is the plea from a New Yorker.

From show-me Missouri: “Very fine. Have gotten more from the radio spot ads than anything else.” And so on.

Popularity • To fall back on a time-tested advertising slogan, such popularity must be deserved. We like to think it is.

It’s the kind of popularity that’s pulling in sales, guaranteeing commissions for our agents and making for a contented field force without which no company the size of Equitable can grow.

Ours is not a product that can be seen, felt, touched or tried on for size. Until you’ve actually tried to convince a prospect (usually as grossly underinsured as he is skeptical) of the value of this “no-see, no-touch” product, you really haven’t encountered sales resistance.

That’s why when a grizzled veteran of our field force writes to say that “a walk-in applicant bought a $10,000 single premium annuity because of the radio spot campaign,” we know we have something that is working for us as well as for the public.

Charles R. Corcoran, vice president in charge of Equitable’s advertising, publications and press relations department, joined the company in 1946. He was a vice president of a Providence, R. I., advertising agency and was in charge of Equitable’s sales promotion and sales development. He serves as chairman of the Public Relations Society of America’s workshop committee; is on the board of directors of Abilities, Inc. and the Human Resources Foundation.
puzzle:
Name, Rank and Secretarial Number

Three of the pillars of WMAL-TV's National Rep team (Harrington, Righter & Parsons, Inc.) are Jack Harrington, Turk Righter, and Jim Parsons. Their titles, not respectively, are Secretary, Treasurer and Vice-President. Their secretaries, also non-respectively, are Lillian, Joan and Madelon. The team is in adjoining offices 110, 112 and 114. The Vice-President is in 110.

Last Tuesday, Harrington took Lillian to lunch because she had helped him when his own secretary was ill for a few days. (This is typical of H.R.&P. team spirit. It works for clients, too.) Madelon went to a higher numbered office to eat with Parson's secretary. Later that afternoon, Righter sent his secretary to the Treasurer's office, which had a lower number than his, to get some sales figures for a client.  

What title does each man hold and what is his secretary's name? Correct answers will earn one of our fascinating awards.

Solidify your sales figures in the D. C. area with a spot program on WMAL-TV's popular late-afternoon Westerns—"The Lone Ranger" at 5 and "Maverick" at 5:30, Monday through Friday. Check Harrington, Righter & Parsons for availabilities.

BROADCASTING, February 11, 1963
End of the Minow era now in sight

HEADED FOR PRIVATE JOB, FCC BOSS PUSHES HENRY AS SUCCESSOR

Newton N. Minow has advised the President of his intention to leave the FCC and has recommended the appointment of Commissioner E. William Henry to succeed him as chairman.

Mr. Minow expects to leave the government at the end of May and to join Encyclopedia Britannica Inc. as a high officer and chief legal counsel. As Mr. Minow planned it, no announcement of his departure from government was to be made for some time—perhaps not until or after the early April convention of the National Assn. of Broadcasters, at which he will be a principal speaker.

It was at another NAB convention— in May 1961—that Mr. Minow was catapulted to national fame. It was his first major speech as chairman of the FCC, and he made headlines coast-to-coast when he called television a "vast wasteland."

According to a number of sources in a position to know, Mr. Minow told the President of his plans during a private conversation at the White House two weeks ago. The conversation was at first presumed to have concerned Mr. Minow's role in a forthcoming UN conference in Geneva on the use of science to benefit underdeveloped nations. Mr. Minow leaves for Geneva Feb. 14. He will be spokesman for the U.S. delegation at conference sessions dealing with communications. (Mrs. Minow will accompany him. They will return about Feb. 24, after stopping in London.)

The President was understood to have expressed regret at the prospects of Mr. Minow's resignation. The President's reaction to the chairman's recommendations of Mr. Henry as his successor was not known.

Henry's Chances • Mr. Henry, 33, is the junior member of the FCC in age and term of service. A commissioner for less than five months, he was the second Kennedy appointee to the FCC (Mr. Minow was the first). A third Kennedy appointee, Kenneth Cox, is awaiting confirmation by the Senate, a formality that has been delayed only by the Senate's preoccupation with the debate over filibustering.

When Mr. Minow resigns, the President will make his fourth appointment to the commission, and it will undoubtedly be a Democrat to replace the Democratic Mr. Minow. The President will also be able to choose a chairman—also undoubtedly to be a Democrat—from his own appointees, the new commissioner and Messrs. Henry and Cox, or the fourth Democrat, Robert Bartley, who became a commissioner in 1952—long before the Kennedy era in national Democratic politics. (Under the law no more than four members of the seven-member FCC may be of the same political party.)

Mr. Henry, a Memphis lawyer, was an active worker in John F. Kennedy's presidential campaign in 1960. He took his undergraduate work at Yale and his law degree at Vanderbilt in Nashville. He is said to have strong political connections with influential Kennedy supporters in Tennessee.

As the junior member of the FCC, Mr. Henry in the past two weeks has been given unusual national exposure as the commissioner presiding over the hearings into local television programming in Omaha (see page 50). His views on broadcast regulation seem to coincide with Mr. Minow's.

Magnuson's Protege • Mr. Cox, now 46, is a Seattle lawyer who carries the endorsement of Sen. Warren G. Magnuson (D-Wash.), chairman of the Senate Commerce Committee. Sen. Magnuson recommended Mr. Cox for appointment to the FCC at the beginning of the Kennedy administration. It was not until the third vacancy occurred during the Kennedy tenure that Mr. Cox got the job. Meanwhile he had been appointed chief of the FCC's Broadcast Bureau.

Mr. Cox did not take an active role in the 1960 presidential campaign.

Minow's New Career • Before joining the FCC, Mr. Minow, as a lawyer in the Chicago firm headed by Adlai Stevenson, represented Encyclopaedia Britannica Films, then headed by Maurice B. Mitchell, onetime president of the Broadcast Advertising Bureau (predecessor to Radio Advertising Bureau).

Mr. Mitchell has since then become president of the parent Encyclopaedia Britannica Inc. The chairman of the company is former Sen. William Benton, co-founder of the advertising agency, Benton & Bowles.

It is known that Mr. Minow was offered an executive job with the company before he took the FCC chairman-ship, but he chose to join the government at the time. His interest in joining the company was reportedly reawakened in the past couple of months (CLOSED CIRCUIT, Dec. 31).

His new post will return him to Chicago where the Encyclopaedia Britannica has its headquarters.
'63-'64 TV PROGRAMS NEARLY SET

Juggle, juggle, toil and trouble at networks as more shows are fitted with sponsors and dropped into schedule for year

The television network drive for a quick lockup of next season’s nighttime schedule is at its peak this week.

CBS-TV, of the three networks, is closest to that objective. Nearly all of its major program components are installed, and the network reportedly expects this week to begin filling the openings which remain.

The customary companion campaign to sell a part or all of the schedules’ key programs to major advertisers has begun, and initial reports of commitments are trickling in.

The current status of next fall’s schedules comes to this: There are still many uncertainties, particularly about the exact time position of some shows, but the networks are making their preliminary schedule pitches to agencies. A composite boxscore of what the schedules appear to be on the basis of what’s being offered appears on page 25.

Despite all advance planning and slotting, a single move by one network could upend matters and change the stakes. Such a development appeared likely late Thursday of last week with a report that CBS-TV was negotiating for a switch of one of NBC-TV’s program underpinnings—the half-hour situation comedy, *Hazel*—to its nighttime schedule.

A compilation of next season program sales to advertisers would illustrate the situation at this time:

Colgate-Palmolive signed for *Harry’s Girls*, a show it owns through a production deal with MGM-TV. It is set for NBC-TV.

Armstrong Cork Co. and U.S. Steel are expected to remain in their usual Wednesday, 10-11 p.m. hour on CBS-TV and as alternate week advertisers, but on *The Danny Kaye Show*.

Alberto-Culver is said to be signed for an alternate-week half (15 minutes on a weekly basis) of the one-hour new *Jamie McPheeters* slated for 7:30 p.m. Sundays on ABC-TV.

Procter & Gamble is holding firm in its 8:30-9 p.m. slot on NBC-TV, may stick with *Car 54 Where Are You?* or come in with a new show.

Menley & James’s Contac is reported to be ready to sign with CBS-TV for an alternate half-hour of the new hour *Judy Garland* showcase on Sunday.

Renews are about in or on their way from such advertisers as General Foods and Procter & Gamble. GF, in particular, appears firm with its *Andy Griffith* and *Danny Thomas* shows on CBS-TV, to which it is adding a new half-hour comedy starring Phil Silvers. P&G has the NBC-TV half-hour on Sunday, is in on *Dick Van Dyke* and Ben Casey among others.

*Firestone will be back with its Voice of Firestone on ABC-TV Sunday*. Kraft is firm on NBC-TV Wednesdays, though there’s been talk about a “unseating” over Perry Como’s future frequency. Bell Telephone is set on NBC-TV for a show parcel to alternate with Huntley-Brinkley on Tuesday. Du Pont is set for the 10-11 period on Sunday on NBC-TV. Gillette is certain with fights on ABC-TV Fridays.

General Electric was reported negotiating with two networks—it had not released its option on the 9-9:30 period Sunday on NBC-TV over which the *Garland* vehicle will straddle, and was said to be interested in following *True* (in an hour version) to NBC-TV on Sunday.

Chrysler Corp. appeared to be in favor of saving the one-hour *Empire* on NBC-TV even to the extent of buying additional time if other advertisers fail to renew the show. Chrysler currently is an advertiser on the show.

Lever Bros. is expected to make one additional purchase—probably a network show—for its network lineup, the advertiser renewed for another season its CBS-TV vehicles (*Lucy Show, The Defenders, Red Skelton* and *Candid Camera*).

According to those executives involved in negotiating next season’s show properties, the current programming-sales period is characterized differently depending on the network involved.

For example, it’s said that CBS-TV, which has fewer holes to worry about than the other two networks, is programming from strength and freighting over exact time slots in which to fit shows. The network presumably tries to nail down the advertisers once the schedules are positioned.

*ABC-TV*, on the other hand, is on a slightly different tack, having sketched a near-complete nighttime schedule and then “peddled” this to potential advertisers. If enough interest and commitments are received, the network will continue along the lines indicated, otherwise a revised schedule will be blocked out. NBC-TV is programming and selling somewhere in between these two approaches.

**Usual Delays**  
*This pre-seasonal planning and selling is much the same as in other years. Once again networks have been held up by such unpredictable as key advertisers delaying decisions, name talent problems, and some late arrivals of new show pilots.*

In the area of name talent, Jackie Gleason perhaps is the most illustrative. For some time, the comedian vacillated over whether or not he would wish to continue with his show that appeared to have earned its niche this season on CBS-TV’s schedule. By the week’s end, it appeared Jackie Gleason was set for the next season and there was a report that the network may have agreed to schedule—adjacent to (before or after) the *Jackie Gleason Show*—a new half-hour comedy that would be produced next year by Mr. Gleason’s company.

Another question mark among the star ranks is Perry Como. Reports are recurrent that the popular singer may not return next season in a weekly series but in an infrequent, occasional appearance on NBC-TV.

Several film producers last week were said to have only then come in with their first pilots for network-advertiser showing. Only a few of these: *Patty Duke Show* and *Inside Danny Baker* by United Artists Television, and Ford &...
**Hines** by Four Star Television.

Though it's certain that many of the time spots for the programs now committed for network showing may be changed over the next few months, show titles are expected to resemble in general those listed in the table.

**Program Trends** - A look at the composite schedule presents at least some trends now clearly defined. For example:

- A move to schedule an individual program in a larger chunk of time continues. Next season already appears to indicate committal to the renewal of the 90-minute *Virginian* on NBC-TV, an expanded to 90-minute *Wagon Train* on ABC-TV, and a two part *Arrest and Trial* on ABC-TV (in which two 45-minute programs are placed back-to-back), all produced by Revue Productions.

In addition, there is at least one time block set aside for motion pictures—on NBC-TV Saturdays, and there is a possibility remaining that another motion picture run would be slotted by the same network on Mondays. Another large chunk of prime time will be occupied by Jerry Lewis on ABC-TV Saturdays, starting at 9:30.

- An acceleration of a trend to big-name personalities coupled often with variety (musical or comedy), and adherence to star names is noted. CBS-TV is leading the movement, and the other two networks also are adding top names in either film series or in variety showcases.

Other trends: continued color increase in programming—ABC-TV's *Wagon Train* (90 minutes) is expected

---

'63-'64 TV PROGRAMS NEARLY SET continued

Du Pont only remaining live original drama program for '63-'64

The present blueprint of the 1963-64 network season (story page 24) indicates that the only live-tape original drama set for next season will be provided on NBC-TV's Du Pont Show of the Week.

Both Armstrong Circle Theatre and the U. S. Steel Hour, which have been mainstays on tv for many years, appear destined for cancellation. The low stage of original drama for next season is underscored by the report that in 1963-64, seven of the Du Pont one-hour programs will be of that genre. The remainder of Du Pont shows will be actuality and special programs, whereas this season there were seven original dramas and a group of drama programs based on works previously published or exposed in the theater or motion pictures.

The original dramas presented on Show of the Week this season and projected for 1963-64 are produced by the Directors Co., which is headed by executive producers Franklin Schaffner and Fielder Cook. They were both active in the so-called "golden age" of television when as many as seven original drama series flourished up to 1955. They are convinced that even today there is a need for this type of programming for both audiences and advertisers.

Acceptance Possible * They told Broadcasting in an interview that their experience with Du Pont leads them to believe that quality drama shows can acquire a substantial audience and gain advertiser acceptance. They acknowledged that tv cannot sustain the large volume of original drama programs that were on the air in the mid-1950's but are convinced there is room for additional programming of this type.

Mr. Schaffner reported he is currently negotiating with CBS-TV for a group of dramatic specials to be carried on the network next fall. No decision has been made as yet on this project.

Though the outlook seems bleak at this time for quality original drama, both Messrs. Cook and Schaffner feel there will be some increase in the future, though it may be modest. They believe that "fear" is the main factor in the diminution of quality drama. As tv costs grew, both advertisers and networks became rating-conscious and looked to "sure-fire" entertainment, they assert.

The reason they believe that quality drama has a place in television, they point out, is that Du Pont drama programs have been achieving approximately 40% of the audience for the time period (Sunday, 10-11 p.m.). The Cook-Schaffner formula is to provide viewers with a range of dramatic forms—allegory, comedy, melodrama, realistic mood pieces—to satisfy Du Pont's requirements that its productions be provocative, contemporary and responsible.

Mr. Cook's capsule commentary: "I'm not saying that every tv show must be loaded with meaning. But for just a few hours a week, the medium should try—even if some of the tries are failures—to break away from mediocrity."

Du Pont Show (NBC-TV, Sun., 10-11 p.m.) aims for provocative, contemporary drama, as in "Two Faces of Treason," which starred Lloyd Nolan (I) and Larry Blyden. The program was telecast yesterday (Feb. 10).

BROADCASTING, February 11, 1963
that in which the chapter is located), Mr. Lewine said. The nine finalists will then be sent for final judging by a jury of outstanding citizens, which will determine the program that most merits the award.

Only commercial stations may make entries for this award, however, non-profit educational stations are supposedly programmed exclusively as a public service and their performance cannot be measured on the same basis as that of a commercial station.

**Wolper Productions buys Paramount News**

Wolper Productions has purchased Paramount News, including its complete news film library of more than 10 million feet of film covering news events of the past 36 years, from Paramount Pictures Co. on basis where price could exceed $500,000. David L. Wolper, president, Wolper Productions, said the company will be renamed Wolper Newslfilm Library. It will be closed for three weeks for reorganization and personnel changes.

**Dale Robertson heads new Hollywood firm**

Dale Robertson & Assoc., has been formed by the actor-producer to produce theatrical and tv films, animated commercials and film, tape and radio spots, plus personal management service. Headquarters for the new firm is 729 N. Seward St., Hollywood 38. Phone is HOLlywood 6-3279. The new company is a subsidiary of Juggernaut Inc., which is also the parent company of Eagle Animation.

Dale Robertson is president of Dale Robertson & Assoc. Vern Carstensen, who continues as secretary-treasurer of Juggernaut, is executive vice president. Harry Koplan, head of Harry Koplan Productions, will also serve the new company as vice president and producer of tv properties. H. Mike Gurney, formerly general manager of Mel Blanc Assoc., is vice president in charge of radio and tv commercials. Jack Easton, talent agent who discovered Robertson, will be vice president in charge of personal management in addition to serving his own clients.

**Official producing new war series**

Official Films Inc. will produce a new half-hour television actuality series, tentatively titled *Men at War*, based on the major battles of World War II, Seymour Reed, president of Official, announced last week.

The 26-episode series will have author-columnist Jim Bishop as host-narrator. Film footage for the programs will be obtained from sources throughout the world and each segment will present a survivor of a specific engagement.

The series will be produced in Hollywood for Official by Sherman Grinzberg, production supervisor on *Biography*, another OF presentation.

Production is nearing completion on the first episode of the new series, which will deal with Iwo Jima. Other segments will include the Battle of Stalingrad and Rommel's desert campaigns. Official is seeking a network sale on the series.

**WPIX documentaries to run in prime time**

WPIX (TV) New York will introduce next week a new monthly series of documentaries covering major events and personalities in recent history. Programs will be presented in prime time.

The series, titled *Special of the Month*, will be produced by Walter D. Engels and William L. Cooper, creators of WPIX's *The Secret Life of Adolph Hitler*, Castro and Communism and other documentaries.

Initial telecast to be presented Feb. 19 (8:30-9:30 p.m.), will be a profile of the late Eva Peron. Subsequent programs will examine the war in Viet Nam and the rise and fall of Mussolini.

WSB RADIO
Georgia's 50,000 watt clear channel station
A drop in foreign language programming

More foreign languages are being used in programs broadcast by U. S. radio stations than seven years ago, but the number of stations carrying foreign language programs and the number of hours of such programs are down considerably.

The changes in foreign language programming since 1956 were shown in tabulations from information furnished by U. S. radio stations for their listings in the 1963 Broadcast-
ing Yearbook.

The new 1963 Yearbook lists a total of 45 languages in which programs are being carried. The 1956 tabulation totaled 40 languages.

But the total number of foreign language hours carried weekly on U. S. radio stations was down from some 4,500 hours in 1956 to 3,420 hours in the 1963 Yearbook. The stations carrying such programs are down in number from 463 in 1956 to 397 outlets, the figures show. Total stations on the air were 2,935 am and 540 fm in 1956, and 3,795 am and 1,062 fm at the end of 1962.

50 States Now - The big reason for the increase in total languages was the admission of Hawaii and Alaska into the union. It added Eskimo and Athabaskan on Alaskan stations and Samoan, Filipino and Chinese on Hawaiian outlets.

The addition of Hawaii as a state also added 253 hours of Japanese to U. S. radio programming and placed that language in third place in total hours of foreign language programs aired weekly by U. S. broadcasters.

The Spanish language, though down from 2,800 to 1,885 hours, remained the dominant foreign tongue on U. S. radio. Italian retained second place with 277 hours (450 in 1956); Japanese was third with 264; Polish was displaced from third place to fourth with 250 hours (390 in 1956). Other languages with more than a hundred hours of programming weekly on U. S. radio stations; German 150 (115 in 1956); French 127 (135 in 1956). Yiddish dropped out of the hundred-plus group with 53 hours (102 in 1956).

Nine of the languages are, strictly speaking, not foreign, but North American Indian or Eskimo tribal tongues: Acoma, Athabaskan, Cher-

okee, Chippewa, Eskimo, Navajo, Pueblo, Seminole and Ute.

Other Languages - The other, non-Indian languages, and total hours; Albanian 0.5; Arabic 0.5; Armenian 6.5; Austrian 0.5; Basque 1; Chinese 23; Croatian 1.5; Czech 22; Dutch 6; Filipino 46; Finnish 12.75; French 126.75; Gaelic 6; German 149.75; Greek 39; Hungarian 22.5; Italian 277.25; Japanese 263.58; Latin 0.5; Lebanese 0.75; Lithuanian 12.25; Polish 250; Portuguese 82; Rumanian 1; Russian 2; Samoan 1; Scandinavian languages 13.25; Serbian 6.5; Slavic 7; Slovak 1.5; Slovenian 11; Spanish 1,885; Syrian 1.5; Ukranian 2.75; Yiddish 53; Yugoslav 45.

There were no foreign language programs reported by stations in ten states: Arkansas, Delaware, Georgia, Kentucky, Montana, Nevada, South Carolina, Tennessee, Vermont and Virginia.

The 1963 Broadcasting Yearbook lists foreign language programming under the regular radio station listings, which also include other pertinent information about each station.

The 1963 Broadcasting Yearbook, the largest compilation of broadcasting facts in the 28-year history of this basic reference encyclopedia, contains 632 pages with a total of nearly two-thirds of a million words. The Yearbook includes 50 separate directories of basic economic, technical and business facts indispensable to all working in or contacting the worlds of radio and television. Single copies of the Yearbook are available at $5 each so long as the supply lasts. The Yearbook issue plus the 52 weekly issues of Broadcasting are $12. Orders should be sent to Broadcasting Circula-
tion Dept., 1735 DeSales St. N. W., Washington 6, D. C.

State Dept. plans filming at WTTG (TV)

The third of a series of one-hour specials, entitled "State Department Briefing: Red China and the USSR," was filmed Feb. 2 in the studios of WTTG (TV) Washington.

The program featured a briefing team including Dean Rusk, Secretary of State, U. Alexis Johnson, Deputy Under Secretary for Political Affairs, W. Averell Harriman, Assistant Secretary of State for Far Eastern Affairs, as well as other department and non-government notables.

The briefing was followed by a ques-

ver. Now in 20 markets.

Stagecoach West (Four Star): Sold to KCOP-TV Salt Lake City. Now in 5 Markets.

Program notes . . .

Available: 'Michael Shayne' - NBC Films reports it is placing the hour Michael Shayne series into syndication. Local stations and advertisers will be offered 32 episodes which appeared on NBC-TV during 1960 and 1961.

New school show - The pilot of a new 60-minute TV program, produced by Red Skelton's and Jack Webb's production companies for CBS, has been started in Hollywood. The V.P.'s, starring Dennis Weaver and Jane Wyman as vice prin-
cipals of a small-town high school, will be directed by Mr. Webb.

Tv tee - Production has begun on The Golden Tree, a 90-minute tv special on golf produced by Jack Douglas Orga-
nizations. Mr. Dougals, who claims the show will be the most expensive ever made on golf, plans to sign several celebrities for the production, including golfer Byron Nelson.

26 instead of 12 - Trans-Lux Television Corp. reports it will distribute 26 episodes of the Frontiers of Knowledge half-hour science series instead of 12, as originally planned, because of growing audience and station interest. The series is produced by WFTI-TV Phila-
delphia in cooperation with the U. of Pennsylvania.

Now in color - Telesynd, New York, a division of the Wrather Corp., is offering for network sale 78 episodes of Sgt. Preston of the Yukon which were filmed in color.
Us hayseeds got a real OASIS!

Going back to fundamentals a little bit, we’d like to remind you that the Red River Valley is one of the most fertile areas in America—thousands of square miles of ancient lake-bed with deep, rich soil—so fabulous that even the Encyclopaedia Britannica comments on it. Look up “Red River Valley,” and see!

Fargo is the very heart and center of this enormous and prosperous Valley. People listen to WDAY Radio, all over the Valley—come in from miles and miles around for shopping, recreation, big-ticket spending.

Ask PGW for the whole story. We know you’ll be fascinated.

PETERS, GRIFFIN, WOODWARD, INC., Exclusive National Representatives
MATTEL EXPLAINS NEW PLAN

Station purchasing its 'Funny Company' show will get matching spot buys from toy maker

Plans of Mattel Inc., toy maker whose year-round use of network television revolutionized toy advertising, to finance the production of a spot tv program series and to become a participating sponsor of the program (CLOSED CIRCUIT, Feb. 4), were spelled out Tuesd.y at a meeting of more than 40 station salesmen and representatives in Los Angeles. Eddie Smardan, radio-tv director of Carson/Roberts, Mattel's agency, explained the scheme at a two-hour breakfast meeting, at which three five-minute episodes from the series, The Funny Company, were screened.

Key of the plan is an agreement by Mattel to buy one-minute participations or adjacencies in The Funny Company on a two-year non-cancellable contract at the same price the station pays for an unlimited run, three-year license period for each five-minute episode. In effect, the station sets its own price for the series and for the Mattel commercials, Mr. Smardan explained. Assume the price set is $100. The station would then pay the program producers $26,000 for three years' use of the programs. Mattel would contract to buy 260 minute spots a year for two years in A markets (at the assumed $100 rate, this would mean a total expenditure of $52,000). In B markets, Mattel would agree to buy 156 spots a year ($31,200 total for two years). Only in C markets, where the Mattel guarantee would be for 130 spots, would the toy company's expenditure for time be just equal to the station's expenditure for the program.

"Since the time rates are set in advance on a non-pre-emptible basis for the entire two-year period, the total of the two-year time contract for the first 130 minutes used by Mattel each year becomes the total amount of the film contract," a fact sheet explains. On participations in excess of 130, Mattel will pay "normal" rate increases, not to exceed 15%

Mattel has set Jan. 13, 1964, as the date it will start its use of The Funny Company as an advertising vehicle. By that time 90 of the five-minute episodes will be ready. However, if stations want to start broadcasting the program earlier, in September, say, when 60 episodes are scheduled to be completed, the company would have no objection. Similarly, while broadcasting the series as half-hour programs made up exclusively of Funny Company films is advocated, no restrictions are placed on stations which feel another schedule is better, such as including one or more of these films in an established children's program period.

It's a Cartoon • The program itself is a cartoon, available either in color or black-and-white prints, which the

plained. Assume the price set is $100. The station would then pay the program producers $26,000 for three years' use of the programs. Mattel would contract to buy 260 minute spots a year for two years in A markets (at the assumed $100 rate, this would mean a total expenditure of $52,000). In B markets, Mattel would agree to buy 156 spots a year ($31,200 total for two years). Only in C markets, where the Mattel guarantee would be for 130 spots, would the toy company's expenditure for time be just equal to the station's expenditure for the program.

"Since the time rates are set in advance on a non-pre-emptible basis for the entire two-year period, the total of the two-year time contract for the first 130 minutes used by Mattel each year becomes the total amount of the film contract," a fact sheet explains. On participations in excess of 130, Mattel will pay "normal" rate increases, not to exceed 15%

Mattel has set Jan. 13, 1964, as the date it will start its use of The Funny Company as an advertising vehicle. By that time 90 of the five-minute episodes will be ready. However, if stations want to start broadcasting the program earlier, in September, say, when 60 episodes are scheduled to be completed, the company would have no objection. Similarly, while broadcasting the series as half-hour programs made up exclusively of Funny Company films is advocated, no restrictions are placed on stations which feel another schedule is better, such as including one or more of these films in an established children's program period.

It's a Cartoon • The program itself is a cartoon, available either in color or black-and-white prints, which the

thing but prosaic), to the bizarre, like giving a guided tour through a haunted house, or selling toothpaste to a walrus.

While the programs are chiefly sequences of fast-moving comedy-dramatic action, each episode includes one-to-two minutes of education, so naturally introduced that it will be as acceptable to young viewers as it will be approved by their parents and teachers, or so Mattel and Carson/Roberts believe. They screened almost 200 children's tv shows in search for one that "would please kids, advertisers and Minow," as c/R's vice president explained in his MONDAY MEMO (Dec. 24, 1962). Not finding what they were after, a program that "would give the kids something to take away with them" and would avoid both the "stufiness of an old-fashioned schoolroom and the same-ness of more 'sillytoons,'" they encouraged the creation of The Funny Company and financed its production.

The programs are produced by The Funny Co., a group of Hollywood producers, writers, animators, voice talent and musicians, formed expressly to produce this series. The members work for minimum scale and will share in the profits of the production, if any, on a co-op basis. Head of the group as executive producer and script supervisor is Ken Snyder, senior vice president of Needham, Louis & Brorby, recognized lyricist and composer as well as a top-flight producer of tv and radio commercials. Sam Nicholson, for 10 years creative director for TV Spots, is animation producer. Leo Salkin, associate producer of The Alvin Show, has the same title with The Funny Co. Musical director is Jack Fascinato, who started in tv with Kutka, Fran & Ollie and today is one of the best known musical directors in the film business.

Wanted a Change • In addition to looking for a worth-while juvenile tv vehicle for its advertising, Mattel wanted to change its tv expenditures, which this year are made mostly in network television, in accordance with a belief that "the dynamics of local programming, local personalities, station selection, local promotion and merchandising can be utilized in such a way as to overcome the apparent advantages of network over spot." Despite its lack of any equity in the films it is financing, Mattel is willing to support them because of its ownership of product merchandising for The Funny Company characters. The producers will share in revenues derived from product merchandising. Without Mattel ID's in the films or restrictions on other toy firms taking adjacencies, Mattel may ask for adjacencies of its own beyond those in its basic contract.

1963 BROADCASTING YEARBOOK

50 directories indexing the business world of tv and radio

SIX reference works in ONE

"One book library of television and radio information"

Described for your specialized "must know" references, the 1963 BROADCASTING Yearbook issue is the largest (632 pages) and most complete encyclopedia-type book ever published for the business of radio-tv broadcasting and the associated arts and services. It includes 50 separate directories of basic economic technical and business facts indispensable to all working in or contacting the worlds of radio and television.

Compiled, written and edited by the same staff that produces BROADCASTING—The Businessweekly of Television and Radio—serving the business of broadcasting since 1931.

Advertising and government came face to face in Washington last week with the focus on federal efforts for additional controls over the medium.

Following two days of discussion at the 5th annual mid-winter conference of the Advertising Federation of America and the Advertising Assn. of the West, these developments captured the spotlight:

- A dispute between the AFA’s general counsel and a Republican congressman and former agency head over how friendly the Kennedy administration is to business and advertising.
- A strong counterattack by Peter G. Peterson, president of Bell & Howell Co., on the current popular pastime of attacking all forms of advertising.
- A pitch by Federal Trade Commission Chairman Paul Rand Dixon for AFA-AAW support of his agency’s request for legislation giving it the authority to order questioned advertising stopped while the wheels of litigation are turning. “The time is overdue for you who represents reputable elements in the advertising industry to realize that the FTC is not trying to run your business or even to tell you how,” Chairman Dixon said.
- Just as strong words by Mr. Peterson and others against the same “unprecedented” proposal advocated by Mr. Dixon.
- A telegram from President Kennedy praising the “dynamic role which advertising plays in improving our living standards and expanding our national economy. . . . It is through such conferences as yours, where representatives of advertising and government meet for frank and open discussion of the issues involved, that consumer interests will best be protected.”

At the start of the two day conference, Mark W. Cooper was announced as the new president of AFA (see WEEKS’ HEADLINERS, page 10). Mr. Cooper, director of public relations for the General Telephone Co., will take over his new duties in two weeks. His appointment was announced by George Head, AFA board chairman and advertising and sales promotion manager of the National Cash Register Co.

Some 700 delegates, representing the blue chip advertisers and agencies, attended the conference last Tuesday and Wednesday in Washington. It closed with a reception for members of Congress and other government officials.

Pennsylvania Ave. Dispute • Two speakers at the Tuesday night opening session took opposing views on just how friendly President Kennedy’s administration is toward advertising—with a member of Congress warning delegates not to believe the “high sounding statements” from the White House.

Rep. Bob Wilson (R-Calif.), a former agency executive in San Diego, disputed the contention of John J. Ryan, AFA general counsel, that advertising now is enjoying an “unaccustomed era of good rapport with a national Administration.” Mr. Ryan maintained the President is keenly aware of the importance of cultivating the assistance and cooperation of business and that there can be no doubt about the sincerity of his statements friendly to business and advertising.

Mr. Ryan, a Democratic member of America, huddles at last week’s conference in Washington with AFA Board Chairman George Head, National Cash Register Co.

Bell & Howell president Peter G. Peterson warns that no sin of advertising could compare with its regression under federal regulation.

Mark F. Cooper (l), public relations director of General Telephone Co. of the Southwest and newly elected president of the Advertising Federation of America, huddles at last week’s conference in Washington with AFA Board Chairman George Head, National Cash Register Co.
the New York State Legislature, said that it is evident the President has spurned the advice of his advisors who advocate "pump priming"—increased government spending and false aids for economy. The administration has not fallen for the theory, advocated by some of his advisors, that advertising is a totally unproductive industry "to be harassed in every fashion," he said.

Rep. Wilson, on the other hand, said "I don't see much to be happy about in the attitude of the administration" toward advertising. He said he is disturbed over the voices around the President which are anti-advertising. He charged the FCC and FTC are "running rampant over a lot of businesses and unduly influencing advertising, radio and tv."

Mr. Ryan, member of the New York firm of Sawyer, Sullivan & Ryan, also had harsh words for agencies seeking greater powers over the industry in citing apparent "contradictions" in the attitude of the administration. He said the FCC is trying to take a "larger and larger part in radio and tv programming" and that "bureaucratically-concealed inhibitions" are being placed by government against some forms of advertising.

Hitting the FTC request for cease-and-desist and injunctive powers as an "unprecedented" grab for power, Mr. Ryan warned: "We must be constantly alert to insure that misguided zealots in government do not foil upon us restrictions and regulations which we . . . know can only lead to chaos or destruction."

Concern Lessened • Arthur Fatt, board chairman of Grey Advertising Inc. and chairman of last week's conference, said the industry no longer looks with fear on the Kennedy administration but now has an opinion of "quiet confidence."

In a keynote address, he disclosed that 11 of 16 agency heads (representing billings of nearly $2 billion) feel that advertising's relations with government are much the same at the present time as during the Eisenhower years. Only 5 of the 16 said they thought the government-advertising relations had worsened since President Kennedy took office, Mr. Fatt said.

Government and advertising "can't afford the luxury of being antagonists," he said.

One criticism of the administration given in the survey, Mr. Fatt said, was "the method of FCC pronouncements in respect to its guardianship of public taste."

Peterson Hits Controls • Warning against government attempts to control the imponderables of advertising, Mr. Peterson said: "No sin that advertising could commit could be as great as its regression by government forces—for if advertising can be forced into a bureaucratic strait jacket, where does this end?"

For the last few years, he said, Madison Avenue has been America's most popular villain. "The Wolves of Wall Street, as they were vividly described in the twenties, are probably greatly relieved to give up their pre-eminent position," he said.

Attacks on advertising should be broadened to include the businessmen, who design and market the products and the consumers, who buy the products. If the consumer is to be protected against outside forces, Mr. Peterson said, it is well that he be confronted directly with what he is being protected against and what the methods and costs of protecting him are likely to involve. "If it is his tastes that are being criticized, then let us say so directly," the Bell & Howell president said to government.

The basic question is the freedom of the consumer to make a choice among the widest possible number of alternatives and whether he has the wisdom to make these choices which advertising gives him, Mr. Peterson said.

In the long run, he said, the only formula that will raise the standards of advertising is the raising of the level of American culture generally. If media continue their present rise in culture, the consuming public will in the future mold advertising patterns at least as much as the public is influenced by advertising, he said.

Government Talks Back • The chairman of the FCC, Newton N. Minow, and the Federal Trade Commission, Paul Rand Dixon, participated in a panel on "Government Speaks to Advertising." Mr. Minow had no prepared statement but Chairman Dixon made a ringing attack on the opponents of his agency's efforts to acquire authority to issue cease-and-desist orders.

Departing from his prepared text, the FTC chairman said that members of his agency are "experts" on advertising and that federal judges—to whom the FTC must now go for temporary injunctions to stop questioned advertising—are not. The FTC knows the law and how to enforce it, he said, and if advertisers do not like it "then get yourselves some new laws."

He predicted that if the trade commission is not given the authority to order a stop temporarily of advertising it has questioned during litigation there will be no small business 20 years from now. Because of present due process requirements and despite numerous speed-ups in work procedures, "any unprincipled advertiser can delay justice long enough to make a killing," Chairman Dixon charged.

If the FTC had the authority to issue temporary stop orders, it could put an end to the "pitifulness of belated final
Sen. Vance Hartke (D-Ind.) (r) listens as Wilbur G. Kurtz Jr., product pro-
orders," he said. A lot of "misinformation" has been spread concerning the
FTC's request for new powers, he said, in giving the government version of
safeguards written into the legislation to prevent abuses by future trade
commissions. The bills in dispute were introduced by Rep. Wright Patman (D-
Tex.) (HR 1105) and Rep. Tom Steed (D-Okl.) (HR 594).

Minow Theory • Chairman Minow said that the broadcasting industry does
not realize that most broadcasters come to him to request more regulation of
radio-tv, not less. They want their competitors regulated but not them-
selves, he said.

He said he is "very pleased" that the trade commission has taken steps to
control rating services but saw no need for a written definition of the term
"public interest." The FCC's theory, he said, is to let the broadcaster deter-
mine the needs of the public in his area and then "we hold him to his evalua-
tion."

Chairman Minow praised Bell & Howell for its "conspicuously courage-
ous job in tv advertising" in its sponsor-
ship of Close Up and urged more adver-
tisers to put some of their budgets in
such programming. "This is not just
good citizenship but good business," he
said.

Arthur Motley, publisher of Parade
Publications Inc. and moderator of the
panel, expressed concern over govern-
ment trends. As government has grown
big, it is not merely the law that causes
concern but also the agencies, he said.

The third panelist, Dr. Persia Camp-
bell, a member of the President's Con-
sumers Advisory Committee, said the
committee is designed to serve buyers
who want reliable information "so they
are not aware of the protections
have and the marketing services
offered by government.

Advertising's Role • "Advertising's
Role in American Communications" was
discussed by a panel consisting of
Donald McGannon, president of West-
inghouse Broadcasting Co.; Andrew
Heiskell, board chairman of Time Inc.,
and Denver Post publisher Palmer
Hoyt. RCA vice president Ralston H.
Collin, conference vice chairman, was
moderator.

Mr. McGannon stressed that "it is
the essence of the media of radio and
tv that they be mass in their application
and direction." He pointed out that the
Communications Act charges broadcast-
ing with providing a service to "all the
people of the U.S." The great role and
challenge to radio and tv is to maintain
the largest possible audiences by the
best and most creative forms of pro-
gramming oriented to the American
family and to afford them opportunities
for learning, for challenge, for inspira-
tion and for information, he said.

Mr. McGannon explained the "del-
cicate process" necessary in the effective
use of communications media—the level
and flow of audience. "We must exer-
cise ingenuity and courage in daring
to reach millions on the one hand but
collaterally certain specific thousands . . .
" he said, "We must contribute . . .
to the people's understanding of the
issues of the day."

Freedom a Must • Democratic gov-
ernment could not exist for long with-
out communications media free from
government control, according to Mr.
Heiskell. Radio-tv and the newspapers
could not exist without advertising, and
advertising could not exist without the
free enterprise system, he said. The only
alternative is subsidy by government,
Mr. Heiskell and other speakers stressed.

Advertising is the "financial warrant-
y of free electronic communication and
it is the guarantee of our free press,"
Mr. Hoyt told the AFA-AAW dele-
gates. "The much-maligned institution
of American advertising is really a solid
cornerstone of our freedom," he said.

Even if advertising did not have a
special economic role as the mover of
goods to the consumer, as the basic
guarantee of free communications me-
dia it is worthy of protection and pres-
servation, he said. Radio-tv and news-
papers can remain free from govern-
ment only with a continued source of
income from advertisers, Mr. Hoyt said.

Ad Pitch • A pitch for the President's
proposal to cut individual income taxes
was made in a luncheon address to the
conference by Ivan A. Nestingen, un-
der secretary of Health, Education &
Welfare. The proposed tax cut will
increase sales and "will generate a
larger gross national product in which
we all will share," he said in drawing a
parallel with advertising.

When a business runs into economic
trouble it would be tempted to trim
its advertising budget when it "might
be better advised to do just the oppo-
site—to borrow if need be—so that it
can step up advertising and raise sales
levels," Mr. Nestingen said. This may
make the balance sheet look temporar-
ily worse but in the long run the added
advertising expense can prove to be a
good investment if it halts the down-
ward spiral of sales, he maintained.

"The same result will come about
from a tax reduction—even though it
comes at a time when the federal gov-
ernment needs more, not fewer, dollars
to meet its obligations," he said.

Paul S. Willis, president of the Groc-
ery Manufacturers Assn., cited adver-
tising as one of the principal reasons
for the "fabulous and steady" growth of
the food industry. The advertising
industry has made great contributions
to the American people and to the
total economy, he said. "Promotion and
advertising are the lifeblood" of food
marketing, he said.

The latest listing of the top 100
advertisers shows that 30 of the first 50
are GMA members and 57 of the top
100. Advertising is necessary, he said,
because very few have been able to
build a successful and profitable na-
tional marketing food business without
the use of effective advertising. "The
record supports the facts that advertis-
ing is a great force that influences con-
sumer purchases," Mr. Willis said.

Feb. 15 entry deadline
for tv commercial contest

A Feb. 15 entry deadline has been set
for the fourth annual American Tv
Commercials Festival. All commercials
telecast in the U.S. and Canada between
March 1, 1962, and March 1, 1963, are
Judge it where tv viewers do... where today's best-selling pictures come from **Scotch**® BRAND Video Tape

Today's great American theatre is the living room—not the projection room. If you're viewing tv commercials or pilots on the conference room screen, remember: the only "screen" the tv audience sees is the face of the tube! When you view shows or commercials as you would a movie you're sitting in the dark all alone... no one you're trying to reach will see them that way! The tube is the test every time! Put your commercial or show on "**Scotch**" BRAND Video Tape and view it on a tv monitor. Then you'll be looking at it with the same eyes as the customer. There are no optical-to-electronic translation problems. Every image is an electronic original completely compatible with the tv set in the home. Picture-prove it! View a filmed and a video-taped production side by side on monitors. See the inimitable "here and now" quality that "**Scotch**" Video Tape offers agencies, advertisers, producers, syndicators. Extras are pushbutton ease in creating unlimited special effects, immediate playback, and no processing wait for either black-and-white or color. For a free brochure "Techniques of Editing Video Tape", write **3M** Magnetic Products Division, Dept. MBX-23, St. Paul 19, Minn.
eligible in the competition which is open to advertisers, their agencies, production companies and television stations.

Approximately 40 product categories are planned for the contest and special citations will be made for achievement in the areas of single market, Canadian market, children's market and premium offers.

John P. Cunningham, chairman of the executive committee of Cunningham & Walsh and past chairman of the Advertising Federation of America, is heading the council which plans and judges the festival competition.

Entries should be addressed to Wallace Ross, American TV Commercials Festival, 40 E. 49th St., New York 17. A $20 entry fee is charged "to help defray judging costs."

ANA offering course to management

A new course in advanced advertising management will be offered by the Assn. of National Advertisers as a recurring service for its member companies, with the first scheduled March 10-15, ANA announced last week. The course will be for "executives in middle or upper advertising management in ANA member companies who have had several years of responsible advertising experience."

It will be conducted in an academic atmosphere with practicing experts in advertising management as the faculty. Subjects will include the creative function, planning, media strategy, organization and agency relations, budgeting, appraisal of measurement opportunities and measurement of advertising effectiveness.

The March 10-15 session will be held at the Westchester Country Club, Rye, N. Y. Registrations will be limited, if necessary, to 60. Tuition is $250.

Another session is expected to be held later this year, and additional ones subsequently. Some may be held in Chicago and on the West Coast and possibly elsewhere. In addition, different courses may be held for management executives holding other responsibilities.

Prof. Albert W. Frey, director of executive management programs at the U. of Pittsburgh and co-author of ANA's so-called "Frey Report" on advertiser-agency relationships a few years ago, is serving as academic advisor for the project. Ernest P. Zobian of Vick Chemical Co. is chairman of the ANA advertising management development committee, which is presenting the course.

New filters, packs in PM market tests

Philip Morris Inc. last week introduced two new kingsize filter cigarettes, Paxton and Saratoga, with a test campaign in four U. S. cities.

Saratoga is being introduced in Hartford, Conn., and Sacramento, Calif.; the mentholated Paxton in Fresno, Calif., and Tulsa, Okla. Both brands will use television, radio and print for the test.

Both cigarettes offer a "team of filters, back to back" and patented waterproof "Humiflex" packaging, and sell at popular prices.

The theme being stressed in the brands' advertising, according to Roger M. Greene, PM's vice president and director of advertising, "is that both the product and the package represent true technological achievements within the industry. For that reason, the advertising presentation in all media is in a factual and journalistic style."

Television commercials will show the package submerged in water to demonstrate its water-proof qualities.

Benton & Bowles Inc., New York, is agency for the new Philip Morris brands.

'Cleopatra' budget includes network tv

"Cleopatra," 20th Century-Fox's much-publicized film extravaganza, will be promoted with a network television campaign in addition to heavy poster and print advertising.

Unusual use of network tv for movie promotion in lieu of spot advertising is based on the fact that 20th Century hopes to open the film in some 60 markets simultaneously. It also is claimed that "Cleopatra" will eventually reach virtually all markets, and that the time lag between tv promotion and showing of the picture will be compensated for by the large advance publicity it's already enjoyed.

The tv promotion will begin approximately three months before the picture's June 12 opening date and continue through the premiere. Still in the planning stage, the campaign is loosely described as a high frequency of 30-second announcements.

A 20th Century official suggested that probably more than one network will be used because it is planned to place announcements in or around "athletic events and public service shows."

The movie will premiere in New York and should the newspaper strike there still be in effect, 20th Century says that it will use a saturation radio campaign in that city around the premiere date. Agency for 20th Century-Fox is Schiffer & Co., New York.

Slash
office typing costs up to 67% with . . .
New Filetape™ Royaltyper®—

The advanced high-speed, low-cost automatic
typewriter using exclusive FILETAPE.

Now, you can dramatically increase the production and
slash the cost of every repetitive typing job in your of-

dice—without adding a single extra person to your staff.

Every form mailing that your company sends out can
be warm, individually typed, personalized. The kind
that looks important. That gets read and acted upon.

The bulk of your sales orders, invoice writing, envel-
lope addressing, legal documents, etc., can all be
typed at the astonishing speed of well over 100 words
a minute. Without errors or erasures.

New Filetape Royaltyper, made by Royal McBee, can
do all this for you—bringing high speed and low cost
to more of your repetitive typing jobs than any other
kind of automatic typewriter on the market today.

The reason is exclusive Royal McBee Filetape. File-
tape is the easiest automatic typewriting tape to file,
to retrieve from file—to use.

It can be cut to any length. For one word . . . or
pages of copy. Form paragraphs can be punched and
easily combined to make up dozens of different letters.
Think of the savings this one application can mean in
dictation costs alone!

It is a fact that in the average office, 75% of the
correspondence and typing of forms is repetitive. New
Filetape Royaltyper can cut these costs for you—to the
bone. Get the facts. Also look into our leasing plan.

Jingle singer appears with Cincinnati Symphony

It may seem like a far cry from a commercial jingles studio to a symphony hall, but Barbara Cameron was slated to make the transition glissando.

The first commercial jingles singer ever to perform as guest soloist with the Cincinnati Symphony Orchestra, Miss Cameron and The Satisfiers, a New York quartet in which she sings the female lead, appeared with the 100-piece orchestra in Cincinnati in a musical "Theatre Train" of Broadway show tunes. It was her third performance with the Cincinnati Symphony.

Miss Cameron and The Satisfiers have performed in commercials for many national advertisers including Newport, Winston and Kent cigarettes, Frosty root beer, Lee's carpets, Mohawk Airlines and McGregor's sportswear. They also have done commercials, as yet not released, for Sophia Loren's new motion picture, "Madame."

Before moving to New York Miss Cameron was a featured performer in Cincinnati television and radio. In private life she is the wife of Joseph Kotler, vice president of Warner Bros. television division.

Pennsylvania Grade Crude Oil Assn., Oil City, Pa., in its first radio campaign, is co-sponsoring ABC Radio's News and Comments by Alex Dreier (Mon.-Fri., 6:30-6:40 p.m. EST), for 39 weeks. Agency: Meldrum & Fewsmith Inc., Cleveland.

Agency appointments...
- Allied Old English Inc., Newark, N. J., has appointed Venet Adv. Inc., Union, N. J., as agency for two product lines of its Mother's Pantry brand of prepared foods and beverages, Polynesian Punch and Maple Butta. Venet will inaugurate a TV campaign in the New York City area this spring.
- KGFJ Los Angeles, all-Negro-programmed radio station, has appointed Enyart & Rose, Los Angeles, as its advertising agency. Jerome L. Simons is account supervisor.
- KTVP (TV) St. Louis, Mo., has appointed Winitus-Brandon Co., advertising agency, that city, to handle advertising and assist with promotion, merchandising and public relations.

Rep appointments...
- WJAR Providence, R. I.; The Katz Agency Inc., New York, as national representative.
- WFOX Milwaukee, Wis.; Spot Time Sales Inc., New York, as national representative.
- WSOQ Syracuse, N. Y.; Bolling Co., New York, as national representative.
- WCGM Biloxi-Gulfport, Miss.; WGOW Greenville, N. C.; WGTA Summerville, Ga., and WROY Carnill, Ill.; Hal Walton & Co., New York, as national representatives.
- WIXI Birmingham, Ala.; Elisabeth M. Beckjorden Inc., New York, as national representative.

FM Group Sales lists American Express buy

FM Group Sales, New York, representing fm station groups in major cities, has scored what is generally labeled as the biggest advertising contract in the rep firm's nine-month operation. American Express, through Ogilvy, Benson & Mather, has placed a campaign calling for 20 spots per week for each station on a 39 week basis on a total of 20 fm stations (6 in Los Angeles, 5 in Chicago, 5 in Washington-Baltimore and 4 in Boston). The advertiser also is running am and tv campaigns.

The new fm contract started Feb. 4, and adds to other FM Group Sales'

contracts, such as P. Lorillard (Newport cigarettes) in Los Angeles for 18 weeks starting Feb. 19 (through Len- nen & Newell), and Texaco, which through Benton & Bowles, had used stations in Chicago, Detroit and Cleve-

land and is expected back this spring. Two other advertiser contracts still on fm through this rep: Philip Morris and United Air Lines.

Hicks & Greist adds $1.5 million in billings

Hicks & Greist Inc., New York, last week announced the addition of $1.5 million in billings in two months, bringing its total annual billing-and-fees rate to "close to $18 million."

Agency changes made by Noxzema

Noxzema Chemical Co., Baltimore, last week announced a realignment of accounts, due to product conflicts, at three of its agencies. Sullivan, Stauffer, Colwell & Bayles, New York, continues to handle Noxzema Skin Cream and Cover Girl products, along with two new products, to be introduced in test markets within two months.

Dancer-Fitzgerald-Sample, New York, also gets two new products for test marketing, as well as Noxzema Shave Creams, currently at Doherty, Clifford, Steers & Shenfield, and Noxzema Skin Lotion, which was at SSC&B.

Admen get their own commercial kitchen

A new studio set up as a kitchen for advertisers and agencies producing food and healer commercials on video tape has been instituted by MGM Tele-

studios, New York.

The new studio includes complete kitchen work facilities, modular kitchen sets, an "invisible" oven for inside-the-

oven photography, appliance props and specialized lighting equipment. A transparent washing machine, enabling cam-

eras to photograph moving parts and washing action, is also part of the studio.

Known as studio 60, the kitchen con-

sists of 525 square feet of work space equipped with sinks, stoves, refrigerators, freezers, work tables, cabinets, mixers, blenders, toasters and griddles.

Helen MacArthur, home economist, is participating in commercial produc-

tion in the new studio as director of culinary arts.

BROADCASTING, February 11, 1963
Repeat!

An encore for a computer tape reel? Absolutely! Especially when it is packed with television audience data from an ARB survey. The premiere performance provided audience estimates by time period for that familiar industry standard, ARB’s local market report. But when clients ask for more, it gives more — an almost endless number of new and interesting encore performances for a variety of ‘special’ needs.

And here’s the secret. Every time ARB conducts a local market survey, special care is taken to organize and store the data that is collected so that on short notice it can give ‘an extra measure of audience’ whenever called upon. Special Tabulations offer clients the advantages of research to meet specific requirements without the expense of a new survey. Because data is available now and ready to perform, a special staff of researchers can compute the needed estimates and deliver them quickly. For an economical answer to some of your most critical audience problems, call for an ARB Special Tabulation.
THE MEDIA

Court access fight gets major setback

ABA VOTE ENDS 5-YEAR BROADCASTING EFFORT TO REPEAL CANON 35

A five-year campaign to persuade the American Bar Assn. to revoke or relax its ban against tv cameras and radio microphones in courtrooms ended last week in failure.

By an overwhelming vote, the House of Delegates of the ABA adopted a committee report which recommended retention of the controversial Canon 35. This prohibits the use of tv cameras, radio microphones or news cameras during court trials. It was adopted in 1937 following the circus-like news coverage of the Lindbergh kidnapping trial in New Jersey.

The ABA action took place last week in New Orleans where the association was meeting in annual convention. It followed adoption of the report by the ABA board of governors (AT DEADLINE, Feb. 4).

The decision was made by voice vote, with about 10-15 dissenters, after three speakers attempted to persuade the delegates to refuse adoption of the report.

Speaking in opposition were Douglas Anello, NAB general counsel; Joseph Costa, chairman of the National Press Photographers Assn., and James K. Groves, a member of the Colorado bar.

The ABA action was castigated by NAB President LeRoy Collins and by Bill Small, chairman of the Freedom of Information Committee of the Radio-TV News Directors Assn.

What Now? - Broadcasters will now have to begin working at the local level, Mr. Anello said last week after the ABA action. “It is imperative.” Mr. Anello said, “that broadcasters begin working on the local bar and courts to convince them that tv and radio belong in the courtroom on the same basis as any other reporters.”

The ABA prohibition does not have any legal standing with the courts or state bar associations unless it is adopted by state judiciary. About half of the states have adopted the ABA canon, it is understood.

In its report, the ABA special committee on Canon 35 urged that states adopt the ban.

The ABA consideration of changes in Canon 35 began in 1958 following pressure by broadcasters to eliminate or revise the prohibition. A special ABA committee was established to look into the subject. Chairman of the committee was John H. Yauch, Newark, N.J., lawyer. The committee held an all-day hearing in Chicago in February 1962 and issued an interim report last August.

In its conclusions, the committee urged the retention of Canon 35 “as essential safeguards of the individual’s inviolate and personal right of a fair trial.”

In a bow to the sensitivities of broadcasters, the committee recommended (and the ABA adopted) the deletion of a phrase which referred to broadcasting and televising of trials as degrading to the courts.

In countering media arguments as to why Canon 35 should be eliminated or changed, the committee contended: - Tv and radio reporters are eligible to cover trials but without the tools of their trade. They may attend a trial, observe and report via their medium outside the courtroom, just as a newspaper reporter does when he takes notes and writes his story at his office. - The right of a public trial is to ensure a fair trial to the defendant; it does not mean that a trial must be thrown open to satisfy the curious.

• Although the mechanics of covering a court trial by radio and tv have improved since 1937, there is still serious doubt that a fair trial can be guaranteed, particularly in light of the experience in the Graham trial in Colorado and the Billie Sol Estes trial.

(The Graham case took place in Denver and involved charges that the defendant placed a bomb in an airliner. The Estes case, which took place in Tyler, Tex., involved the Texan charged with fraud in obtaining U.S. government cotton allotments. Both received extensive tv coverage. - To permit trial judges to rule on whether or not tv, radio and photographers should be permitted to cover a trial places an undue burden on the bench because in many states judges are elected and their attitude might be influenced by the possibility of personal publicity.

The committee also quoted the consensus of the Judicial Conference of the United States, as reported by Chief Justice Earl Warren, in opposition to permitting tv, radio and photographic coverage of federal courts.

The committee acknowledged that the industry’s proposal that a test of tv coverage be made using the facilities of 20 tv stations was offered in good faith, but could serve no positive purpose at this time.

Anello Plea - In his plea to the ABA delegates, Mr. Anello charged that the committee had failed to develop “reliable factual data” to back up its conclusions.

“As a matter of fact,” the NAB spokesman said, “the committee turned its back on the one good opportunity that was available to it to base its conclusions on fact rather than opinion, hearsay and supposition.”

He concluded: “Broadcasting is a fact of public life. It is here to stay. It cannot be willed away by sticking our heads in the sand. Bench, bar and media must get together and devise rules and procedures so that this young, graphic medium can serve the administration of justice.”

Mr. Costa, speaking for news photographers, claimed that his medium was being “tarred with the same brush as tv.” He asked that news photographers not be considered in the same category as tv and charged that this was “guilt by association.”

Mr. Groves related the experience

Henry approves coverage, unsure of repeal

There’s one FCC commissioner who’s not entirely convinced Canon 35 should be repealed—although he has nothing but praise for the dignified and unobtrusive manner in which electronic journalists used their cameras and microphones to cover the proceedings over which he presided.

The commissioner is E. William Henry (mentioned as a possible successor to Chairman Newton N. Minow, see page 23). Commissioner Henry made his remarks at a news conference at the close of the Omaha tv hearing when he was asked if the techniques displayed enabled him to comment on proposals to change Canon 35:

“I’d like to see a courtroom trial with such coverage before I make up my mind. I think you always run the danger, though, of distorting the proceedings by having coverage of them, and certainly I think the tendency to cover only those whose interest is more spectacular than others. Let’s put it this way. I sort of come with a feeling that Canon 35 is appropriate and I have not yet been convinced that it ought to be repealed.”

Tubes designed from the user's viewpoint

...use them wherever reliability is essential

When reliability really counts—as it does in industrial control applications—be sure with tubes custom-designed and tested for the job.

Sylvania engineers traveled the country—met with engineers and maintenance groups in broadcasting, public service radio, industry, the airlines—listened to their problems and studied them. From this came GB Gold Brand, a superior line of new and upgraded tubes, each tailor-made to a specific job. A given tube may have, for example, low noise, exceptional stability or vibration resistance. Or a critical parameter may be as much as three times the usual value. In each case, performance and reliability have been verified by actual user experience as well as laboratory testing.

Low blow

American Bar Assn. delegates were treated to a graphic display of television trial coverage when they assembled to vote on retention of Canon 35. In the room were two large bulletin boards, each covered with some 20 photographs of television gear and personnel, at the opening session of the Billy Sol Estes trial. Although the pictures were unlabelled, the bar's special tv study committee had quoted in its report a New York Times dispatch about the Estes trial that read in part:

"A television motor van, big as an intercontinental bus, was parked outside the courthouse, and the second-floor courtroom was a forest of equipment."

KFMU's pay fm is in Japanese

Los Angeles, which has heard much talk about pay television, has missed the opportunity to become the first U.S. city to introduce that service, but it has scored a first in an allied field by the inauguration of a pay-fm service. More than that, the programming received by the subscribers to this new service is entirely in Japanese.

The Japanese pay-fm operation is not a new station, but operates on a subcarrier of KFMU (FM) Los Angeles. Joseph Parsons, manager of KFMU, explained that the new programming is part of the station's multiplex operation. "There are three channels," he said. "The main channel and the stereo channel are receivable by regular fm sets. The subcarrier channel, on which the Japanese programming is broadcast, can be received only by sets specially tuned for it. It's like broadcast background music service for restaurants or offices, except that this programming is in Japanese."

The Japanese programming, which begins at 8 each morning and runs until 11 each night, is largely music, narrative and drama, taped in Japan, plus news of special interest to the Los Angeles Japanese-speaking community. "Our programming is entirely in Japanese at present," said Noboru Shirai, president of Homecasting Corp. of America, operators of the service, "but we expect to become bi-lingual by adding programs in English. The people who came to California from Japan speak Japanese and so do their children, but the third generation does not, although they can generally understand it. So we plan to shift gradually until we are broadcasting about half in Japanese, half in English."

Homecasting Corp. has imported 2,000 receivers from Japan to get its service started. These are leased to subscribers, who pay an installation fee of $5 and a monthly service charge of $6. Homecasting in turn pays KFMU $1.50 a month for the first 1,000 subscribers, $1.25 for those over the number.

Changing hands...

ANNOUNCED - The following sales of station interests were reported last week subject to FCC approval:

- WPOP Hartford, Conn.: Sold by Tele-Broadcasters of Connecticut to Joseph C. Amaturo, Walter B. Dunn and associates for $665,000. Mr. Amaturo is president of WIRE Indianapolis and is associated with Mr. Dunn in the ownership of WFTL Fort Lauderdale, Fla. Tele-Broadcasters, which is headed by H. Scott Kilgore, owns KALI San Gabriel and KOFY San Mateo, both California and KULD Kansas City. It recently bought for $1 million KKTV (TV) and KFMH (FM) Colorado Springs, and KGHL Pueblo, all Colorado. WPOP operates on 1410 kc with 5 kw fulltime.

- WOTT Watertown, N. Y.: Sold by James Johnston and associates to Earl

NAB BOARD ELECTIONS
33 running for 13 vacancies; results expected March 1

It’s NAB Radio Board election time and 33 broadcasters have been nominated for 13 vacancies on the association’s board of directors. Of the nominees, six are seeking reelection to a second two-year term on the board.

Four other board members are not eligible for another term, having served four consecutive years, and three present directors did not seek renomination, the NAB announced.

Ballots will be mailed to member stations Wednesday (Feb. 13) and must be returned to the NAB by Feb. 28, according to Everett E. Revecomb, NAB secretary-treasurer. Results will be announced March 1, he said. To be elected are directors from odd-numbered districts, three at-large and an fm director.

Directors eligible for a new term but who are not seeking reelection include John S. Hayes, Washington Post-Newsweek Stations; B. Floyd Farr, KEEN San Jose, Calif., and James L. Howe, WIRA Ft. Pierce, Fla. The four who are not eligible include John S. Booth, WCHA Chambersburg, Pa.; Hugh O. Potter, WOMI Owensboro, Ky.; Odin S. Ramsland, KDAL Duluth, Minn., and A. Boyd Kelley, KRRV Sherman, Tex. The 33 nominees:

District 5 (replacing Mr. Booth)—Roy E. Morgan, WILK Wilkes-Barre, Pa.; Mrs. Jason T. Pate, WASA Havre de Grace, Md.; Cecil Woodland, WEJL Scranton, Pa.

District 5 (replacing Mr. Howe)—Kenneth R. Giddens, WKRQ Mobile, Ala.; Hugh M. Smith, WCOV Montgomery, Ala.

District 7 (replacing Mr. Potter)—Paul F. Braden, WPFB middletown, Ohio; Gene Trace, WBBW Youngstown, Ohio.

District 9—George T. Frechette (incumbent), WFHR Wisconsin Rapids, Wis.; Edward Allen Jr., WDOR Sturgeon Bay, Wis.

District 11 (replacing Mr. Ramsland)—N. L. Benton, WLOL Minneapolis; Helen S. Duhamel, KOTA Rapid City, S. D.; John H. Lemme, KLTJ Little Falls, Minn.

District 13 (replacing Mr. Kelley)—John J. Coyle, KVIL Dallas; Bill Dahlen, KAWA Waco, Tex.; Wendell Mayes, KBWD Brownwood, Tex.; David H. Morris, KNUZ Houston.

District 15 (replacing Mr. Farr)—Ellsworth Peck, KWIP Merced, Calif.; Ned Richardson, KPAY Chico, Calif.; Hugh Turner, KTIM San Rafael, Calif.

District 17—Ray Johnson (incumbent), KMED Medford, Ore.; Lee Bishop, KORE Eugene, Ore.; Hale Bondurant, KIXI Seattle; Lester M. Smith, KKL Portland, Ore.

Class A Markets (over 500,000 population, replacing Mr. Hayes)—Daniel W. Kops, WTRY Troy, N. Y.; Jack Lee, WPRO Providence, R. I.

Class B Markets (100,000-500,000) —William Schroeder (incumbent), WOOD Grand Rapids, Mich.; Merrill Lindsay, WSOY Decatur, Ill.

Class C Markets (less than 100,000) —Ben B. Sanders (incumbent), KICD.

Women’s clubs have announced a new awards program to honor managers of local radio and tv stations “for their outstanding job in serving the best interests of their local communities.”

The project is being undertaken in cooperation with the NAB. Awards to broadcasters will be made on the local level by individual women’s clubs affiliated with the national organization, according to Mrs. Dexter Arnold, GFWC president.

GFWC will provide upon request certificates for presentation to honored broadcasters. The national organization said that its program is not a “show business” award for announcers, disc jockeys or entertainers but is intended to honor managers of stations which do an outstanding local job.

ATTRACTIVE WESTERN BUYS!

Excellent power, daytime-only radio station serving marketing area of 200,000. Heavy fixed assets. Grossing $75,000.00 monthly and capable of doing much better. Priced at $175,000.00 with $50,000.00 down and balance over years. Another H & L Exclusive!

Daytime-only radio station with excellent coverage of one of the top 65 markets of America. This beautifully-equipped facility needs aggressive owner-operator to realize potential. Priced at $155,000.00 with 29% down and balance out over ten years. Another H & L Exclusive.
Seven to eight weeks after they started, the newspaper strikes in New York and Cleveland were having "little or no effect on total shopping," according to an independent study being released by the Radio Advertising Bureau today (Feb. 11).

In both cities, RAB reported, surveys of adult women—the main targets of most retail and much national advertising in newspapers—showed their spending in newspaperless January of this year equalled or exceeded that of January a year ago, when the newspapers were in full operation.

This buying pace was being maintained, RAB pointed out, even though most major stores—except those normally heavy in radio and other media—diverted only a part of their newspaper budgets to non-newspaper media when the newspapers closed.

"The real questions advertisers might ask about the newspaper strikes," RAB asserted in a brochure reporting the survey findings, "are these:

- "What if major retailers had advertised as heavily in several other media as they normally do in newspapers?"
- "What if they had not cut back on their total advertising pressure?"

The surveys, RAB continued, showed that "on just part of the normal budget" radio and other media "managed to help maintain the economy of both cities" by keeping the strike's economic impact to "minor" proportions.

No Ghosts • RAB commissioned the study, made by the independent market research firm of Richard Manville Research Inc., New York, to counterbalance newspaper suggestions that New York and Cleveland had practically become ghost towns since the papers closed.

Miles David, administrative vice president of RAB, said:

"We would prefer to make no comment on the strikes other than to deplore the fact that any communications medium is blacked out. But claims made for newspaper 'indispensability' in a manner derogatory to other media made it necessary that we provide a balanced analysis.

"We believe that all media play a vital role in the economy of any market. We believe the major advertiser who uses a 'media mix'—several media—advertisers most wisely. Such advertisers are far more effective under normal conditions. And they are in a far better position when newspaper strikes occur because they do not have to rush in uncertain media under emergency circumstances."

The surveys found that, comparing January 1963 with January 1962, in New York 29% of the women questioned said they were spending more this year, 52% said they were spending as much, and 19% said they were spending less. In Cleveland, 21% said they were spending more, 58% were spending the same, 21% were spending less. Thus, RAB observed, "New York women were, on balance, spending more during the strike, and Cleveland showed no total decline."

Listening Patterns • The study also investigated listening patterns. Compared to a national average of 2 hours 49 minutes of daily radio listening by adult females, RAB reported, the women in New York said they were averaging 3 hours 54 minutes each day during the strike, and those in Cleveland reported 4 hours six minutes a day. (The average female readership of daily newspapers, according to RAB, is about 40 minutes a day.)

Not only were they listening more but they appeared to be getting the heart of the news. In Cleveland 58% of the women and in New York 56.8% felt they were getting most of all the news despite the newspaper strikes.

To doublecheck, Manville interviewers questioned them about four specific major news stories—the freeing of Cuban prisoners, federal income tax cut plans, the newspaper strike itself and Moise Tshombe in Katanga—and found that 87% of the Clevelanders and 80% of the New Yorkers were up to date on those developments.

(in New York 11% were not aware that the newspapers were on strike: in Cleveland 3% did not know.)

Limited Figures • RAB's brochure noted that Federal Reserve Bank figures on retail sales are often quoted as a measure of the strikes' effects. But FRB figures, it maintained, "have a certain built-in limitation," including the fact that they cover department store sales only and that department store sales are subject to a variety of factors.

Even so, RAB noted, Cleveland and New York made good showings in the FRB figures when they are studied in context. In January both cities fell behind their previous year's levels—but, RAB added, "other areas which did have newspapers fell even further."

For example, the brochure reported, during the second week in January Boston's FRB figures were down 133% more than Cleveland's, and during the third week in January metropolitan Milwaukee was down 160% more than New York and Birmingham was down 240% more than New York.

These conclusions were the opposite of those reached last week by the Bureau of Advertising of the American Newspaper Publishers Assn. The Federal Reserve Board figures, the Bureau of Advertising said, "give a clear and unmistakable indication that the absence of New York newspapers has been costly for the city's retailers."

Cleveland radio-tv pool for strike debate

Radio and tv in Cleveland operated through a pool arrangement last Wednesday (Feb. 6) to present a one-hour debate and question and answer period on the Cleveland newspaper strike, then in its 68th day. Program participants were Louis B. Selzer, editor of the Cleveland Press, and Noel Wicai, of the American Newspaper Guild.

The city's six radio stations KYW, WDPK, WERE, WGAR, WHK, WJJ and WMJO (Cleveland Heights) carried the program from the Cleveland City Club live 7-8 p.m. KYW-TV, WEWS (TV) and WJJ-TV showed an unedited video tape of the debate later that night.

The pool arrangement was handled by KYW-TV, and the debate was moderated by Bart Claussen, editor-manager for the station.

Time and production costs for the broadcast over all stations were about $11,000, according to a spokesman for the Cleveland stations.

NAB’S FREE TIME SCHOOL

Washington institute spells out ‘how-to’ of public service programming for help groups

The do’s and don’ts of how to obtain and effectively use free public service time on radio and television were examined from all angles last week for over 50 delegates to the NAB’s first Public Service Institute in Washington.

And the representatives of non-profit organizations most interested in getting their messages on the air heard NAB Executive Vice President Vincent Wasilewski warn that there can be no public service broadcasting if it is forced by rules or laws. “The essence of public service is its voluntary spirit,” he said. “Without it, public service becomes public servitude.”

“The good deed is spawned by free will. It cannot be performed by command. If the broadcasters should ever be told how much or in what fashion public service fare should be programmed, I believe the industry, your good causes and ultimately perhaps the nation, would be the victims of a massive larceny,” Mr. Wasilewski said. “It would be tantamount to robbing us of our right to do good.”

NAB’s second-ranking executive pointed out that broadcasting is licensed to operate in the public interest — and that “license” is a positive word with no negative aspects. “But so many give it a reverse — even perverse — interpretation,” he said. “They seem to believe that license means complete, unrestricted freedom to hem in the licensee and to fashion him in their own mold. License stems from the family tree of liberty.”

John M. Couric, NAB manager of public relations, in keynoting the Thursday-Friday institute, said that the industry can make its greatest contribution to those seeking time on their stations by pointing out the capabilities as well as the limitations of radio and tv. Mr. Couric called on a faculty of 15 professionals to help get both points across.

The producers of public service broadcasts were introduced to the industry’s code to give aids in creating spots and programs; told how to approach the broadcaster: shown the latest in studio equipment, and heard many things—all said before—about the FCC.

John F. Cox, tv coordinator for the National Education Assn., explained the common false attitude he called “FCC-itis” — the attitude that the stations owe us a living or the stations must run what we offer. It is a disease which cripples creative effort before it really starts. This affliction has flared up more recently due to a misinterpretation about a new wonder drug called ‘Newton Minow.’

The delegates toured the facilities of WAVA-AM-FM Arlington, Va., and WRC-AM-FM-TV Washington. The institute was held in cooperation with American University and classes were conducted in the university’s fully-equipped classroom studio.

CBS shuffling 3 newsmen; Schoenbrun key to move

Changes in assignment of CBS news correspondents David Schoenbrun, Eric Sevareid and Harry Reasoner were announced in part last week.

The reassignment of Mr. Schoenbrun, who is expected to leave Washington, where he is chief correspondent, for Paris to become CBS’s chief European correspondent, had not been confirmed by CBS as of Feb. 7.

Underlying the expected shift is Mr. Schoenbrun’s first-hand knowledge of Europe, and particularly Gen. Charles de Gaulle’s rise to power.

Announced by CBS News President Richard S. Salant: Harry Reasoner replaces Eric Sevareid in the CBS-TV Sunday Night News program on Sunday, 11 p.m., to enable Mr. Sevareid to take increased assignments—a series of four additional Great Challenge broadcasts and participation in next season’s weekday evening, half-hour news broadcast on Mon.-Fri. (Walter Cronkite will be anchorman and managing editor on the show).

In addition, Mr. Salant said that Mr. Sevareid will be involved with a “major two-years series of special broadcasts” that will be announced soon for a start this fall.

Mr. Reasoner continues on the weekday Calendar on CBS-TV at 10-10:30 a.m., and will have added assignments for the new half-hour news broadcasts next season. He continues with another news show that is seen Mon.-Fri., 12:25-12:30 p.m.

GAB plans to hold editorial workshop

An invitation has been issued by the Georgia Assn. of Broadcasters for news directors and other station personnel involved in editorial production to attend a “how-to-do-it editorial workshop” at U. of Georgia this summer.

GAB announced plans for its workshop, in conjunction with the university’s Henry Grady School of Journalism, following a survey of association member stations which showed that 75% now are editorializing or will begin to do so early this year. GAB President Charles C. Smith of WDEC Americus said the seminar would not be for general managers or station owners who attend the annual NAB session on editors but for news, editorial and public affairs directors involved in the daily writing, production and delivery of opinion statements.

The workshop has been tentatively scheduled for July 25-27, with Dick Mendenhall, WSB-AM-FM-TV Atlanta editorial director, chairman. Mr. Smith said the sessions would deal with such subjects as how to conduct research, how to write an editorial and how to make it sound right on the air.
Now, a solid-state video distribution amplifier with four outputs at less than the price previously paid for two outputs. The new VDA4-S is a compact plug-in module that is completely solid state — with resulting long life, high reliability and low power consumption. Drawing only 3½ watts of power, the VDA4-S features less than 1° differential phase and less than 1% differential gain. Frequency response is within ±0.5 db to 10 mc. Each unit has an adjustable gain control on the front panel. Yet, eight of these amplifiers, each with its own built-in power supply and supplied with their own mounting frame, require only 3½" of standard 19" rack space.

With all these features the new VDA4-S saves you money — in original price and in maintenance and operating costs. Compared to most tube type amplifiers the multiple savings of the VDA4-S enables it to actually pay for itself within a year.

Also available is the new PAT-4, a four output pulse regenerating distribution amplifier with the same basic features as the VDA4-S.

Find out for yourself — write now for complete details.

Windup of Omaha probe: just reprise

FCC HEARS ECHOES OF PRAISE FOR LOCAL PROGRAMMING

The second phase of the FCC’s probe of local live television in Omaha—the direct testimony of the stations themselves—took on the aura of anti-elimax last week.

The state portion dedicated to WOW-TV, KETV (TV) and KMTV (TV) concluded Tuesday, earlier than expected. It served chiefly to echo in detail what a parade of more than 130 public witnesses had already told the commission the previous week: That Omahans, with a few exceptions, overwhelmingly love their local television stations and highly commend their local live program efforts (BROADCASTING, Feb. 4).

Once again, FCC’s presiding commissioner, E. William Henry, held a post-hearing conference with newsmen and told them it still was too early for him to judge, irrespective of how much Omaha liked its local television, just how well the three stations have exercised their affirmative duty as conceived by FCC to seek out and serve local needs over and above what the local people have asked (see story, page 52).

Among highlights of the station phase of the Omaha tv inquiry:

• Contentions by the three stations that their local live programming performance and efforts to serve local needs far exceed the narrow limits of the FCC’s statistical definitions and analysis.

• Close questioning by FCC attorneys of station executives concerning the commission’s analysis of October 1962 logs. The FCC lawyers wanted explanations as to why—depending on station or instance—so little or no local live shows turned up in such categories as religious, children’s agricultural or controversial issue shows. At one point a station lawyer protested that the repetitious interrogation looked like efforts to impeach his witness.

• Replies by station officials to Commissioner Henry that they believe it is just plain “good business” to seek out and anticipate local needs and to make a superior effort to satisfy them. They indicated they would do this anyway, even though they admitted that the FCC’s present programming attitude has had its impact, and they try to balance out programming to fill application statistical quotas.

• Explanations by station officials to Commissioner Henry that even if antitrust waivers were obtained they would not want to get together to cooperate on “improving” children’s programming. The stations are just as competitive in public service areas as in fighting for sponsors, they said, and they feel this system assures the best performance all around.

• Broadcaster feeling that FCC places too much emphasis on station role as outlet for local self-expression because this function can be served well in normal programming, including news, without special “show case” type shows. Perhaps overcooked: The station as training ground for regular professional staff and on-air talent.

• Suggestion by WOW-TV’s Frank Fogarty that FCC re-examine its programming “folklore” and improve local live definition and statistical accounting concepts.

• Contention by KETV’s Eugene Thomas that the “quality” of public service programming is much more important than the “quantity.”

• Belief of KMTV’s Owen Saddler that appraisal of tv’s performance should be kept within framework of community as whole and all the varied institutions and mass media serving its diverse needs. TV supplements home, church, school etc., doesn’t supplant them, he said.

No Patsies • During cross-examination by commission attorneys, Mr. Saddler related instances of KMTV’s pre-emption of network prime time programs to present local in-depth documentaries which the station considered important. “We’re not network patsies,” he remarked, also pointing out occasions when KMTV turned down both network and local advertising for adults-only movies. “We’re going to run our own operation and keep it as clean and as fine as we know how,” Mr. Saddler asserted.

He said KMTV doesn’t believe in advertising adults-only movies and this is something the station does for children that doesn’t show in the FCC’s statistics on KMTV’s performance. He said KMTV turned down network spots for “Lolita” and refused to carry a good hunk of local business offered by an Omaha drive-in theatre to advertise a movie called “Cheap White Trash.”

Contradictions • Mr. Saddler contended the record contradicts some of the critical remarks made the previous week by a few of the public witnesses.

He noted Rev. Walter Daniels, Omaha Area Council of Churches, had testified he felt certain religious programs could be enhanced if his cooperation were obtained. Mr. Saddler said KMTV has sought out council cooperation since 1956 on a children’s show idea but every time the council was not prepared to help so the station used other religious shows.

Mr. Saddler challenged AFM and AFTRA witnesses’ statements that not enough opportunity for local talent had been provided. Answering Lad Tesar, AFM local 70, Mr. Saddler said that if the local musicians “need a transfusion, it should not be at the expense of our red ink.” He explained that “when anyone appears at our station for an audition, he gets it,” but “good talent in any field is really scarce.”

As for the program study for the week of Oct. 21, 1962, reported by AFTRA’s national executive secretary, Donald Conaway, which found “insignificant” local live programming in Omaha, Mr. Saddler reported, “Why these so-called program experts picked the week of Oct. 21 baffles me.” It was the Cuba crisis week, he said. “Maybe they want to be like Nero, fiddling away at trivia while the world explodes around us,” he said.

Biggest laugh during Tuesday’s windup came when Mr. Saddler told Commissioner Henry that in spite of some compliments, more viewers objected to KMTV’s pre-emption of NBC-TV’s “Price Is Right” the previous week to
present the live remote of Commissioner Henry's opening statement in the Omaha probe. KMVT got 34 complaints, Mr. Saddler said, including one who warned, "You better watch out. The FCC is here to stop these interruptions."

Frank P. Fogarty, executive vice president of Meredith Broadcasting Co. in charge of broadcast operations and vice president-general manager of WOW-AM-FM-TV Omaha, expressed concern about the FCC's efforts to regulate programming during testimony Feb. 1 (At Deadline, Feb. 4). He testified following S. Payson Hall, Meredith president, who was the lead-off witness for the stations' portion of the inquiry.

FCC 'Folklore' Mr. Fogarty addressed himself to "what might be termed 'folklore' of the commission's attitudes toward industry programming practices and problems" and said his views came in the wake of what the three Omaha tv stations went through last year in obtaining their license renewals from the commission.

He pointed out that all filed extensive programming information required in the renewal applications. "They were further required to advertise in the local newspaper and on the individual stations that such applications had been filed and were available for public inspection," he continued.

"Thus," he said, "the stations thereby were actually required to invite the public to file complaints or comments with the commission."

In spite of this "extensive publicity," Mr. Fogarty said, as the public witnesses in the inquiry have shown, "television service as the Omaha area is singularly devoid of complaints from the viewing public." These and other facts, he argued, "afford bases for thoughtful consideration of the justification of an inquiry such as this... one must also give thoughtful consideration to the wisdom which may be derived from the facts adduced from the public witnesses and from the industry."

Mr. Fogarty urged the FCC to revise programming regulations, definitions and guide lines "to be more realistic and thereby convey more useful information." As an example he pointed out that "it is unrealistic to impose arbitrary restrictions on the accounting of local live programs, such as barring from the local live classification productions largely composed of film, video tape or in some cases network programming."

He cited the Methodists' Talkback program which consists of 15 minutes of film and equal time for a local panel to discuss the film. "When this program became available," Mr. Fogarty recalled, "we didn't wait for the Metho-

**BROADCASTING, February 11, 1963**
Henry still thinks FCC knows best what people should see on tv

It may have been another Omaha news conference but Commissioner E. William Henry quickly made it apparent that he hadn't changed the views he expressed at a similar session a week earlier.

A broadcaster's performance, he said then, is judged by the FCC's standards rather than by the approval or disapproval of the public. (Broadcasting, Feb. 4, 1963.)

Questioned again as the Omaha TV program hearings closed the Kennedy-appointed commissioner reaffirmed this belief and elaborated his views under questioning:
- Parts of the new program report form referring to local live programming "will be made more flexible...that is it will be broadened."
- One reason Omaha was chosen for the program hearings was that "the stations were financially able to produce local live programs that would not be necessarily commercially successful."
- Speaking of TV coverage of the hearings the commissioner complimented stations, then made clear his doubt that Canon 35 of the American Bar Assn. should be erased with the remark "I sort of came with the feeling that Canon 35 is appropriate and I have not yet been convinced that it ought to be repealed." (See story page 42).

Here are the highlights of Commissioner Henry's news conference.

Asked to what extent he feels the FCC has authority for actual regulation of programming, Commissioner Henry replied: "I think first of all we certainly have authority to investigate the manner in which television stations are producing programs of local interest. That is the area of this inquiry and I think we have jurisdiction to study that area of responsibility."

Requirements? Could he further define the basis for this in terms of what the FCC can require stations to do in local programming?

"Basically I think we can determine if they are serving the public interest in this area," Commissioner Henry replied, "and that when so determining we direct our interest as to how they are seeking out or attempting to determine the needs and interests of the local community and how they are meeting these needs in a general sense."

FCC has jurisdiction to study, but does FCC jurisdiction go so far as action? What action can the commission take against a broadcaster who may not be serving the public interest by commission standards?

"I do think that our jurisdiction extends to action," Commissioner Henry replied. "It extends to action in the sense that any policy making is action, any rule making is action," he continued, because this affects "the manner in which broadcasters operate."

How well did Commissioner Henry feel the three Omaha stations came through the hearing?

"It would be premature for me to come up with any specific conclusions as to the operations of these three stations," he replied. "I do feel however that I can make a conclusion now that the hearings made an impact on Omaha and probably on the broadcasters of the television industry."

Definitions • Will the FCC revise its program definitions? The commission explained that the FCC is presently considering revision of its application program report form and since local live programming is one part of this form will come under rather close scrutiny as a result of this hearing.

Asked how it might be changed, Commissioner Henry replied, "I imagine that it will be made more flexible. That is, it will be broadened to include certain...local live aspects that it would not now include."

To a question further pursuing this line he said, "I think the whole area of local live programming and the emphasis which the commission

dists to approach us. We went after them. But the point is that here we have a program which could narrowly be construed as 15 minutes local."

Real Test • However, Mr. Fogarty observed that the local panel is better because of the film and the film is better because of the local panel, hence it should be rated 30 minutes local. "Essentially, the film is only another 'prop.' The real test should be whether the program was produced to meet local needs," he said.

Mr. Fogarty also contended that the FCC should give due weight to the value of public service announcements as distinguished from programs in support of community projects. "Commercial advertisers increasingly are buying participations rather than sponsoring programs," and a one-minute public service spot reaching 30,000 homes "is quite likely to be more useful than a 15-minute panel show reaching 2,000 homes," he noted.

Regarding the FCC's attention to public affairs programming in prime time, Mr. Fogarty felt this concept needed re-examination too. "Prime time for public affairs programming is the time when most people are available for viewing," he said. "If therefore such programs do not rate well, as generally speaking they don't, it is because the people reject them and not because they are offered at an inconvenient hour."

During cross examination of Mr. Fogarty, Commissioner Henry recalled the recent proposal of the FCC chairman to the TV networks suggesting that they get together to improve children's programming and to arrange better scheduling of these programs, such meeting to be with the sanction of the U. S. attorney general. He asked the witness that if anti-trust waiver were provided, would it be feasible for the three Omaha TV stations to get together on children's programming?

Yes and No • "I think it would be feasible but not desirable," Mr. Fogarty replied. "We are competitors for audience, the advertisers' dollars, and we are competitors for public service programming."

Commissioner Henry also observed that he felt a "key question" in the Omaha hearing is the station role in raising the cultural level of the community. He asked the witness if he considered this to be a station duty. Mr. Fogarty said yes and indicated he feels the present system achieves this.

C. Alfred Larson, WOW-TV station manager, gave a brief historical review of the station since its inception in August 1949. He sketched in detail the professional biographies of the executives and department heads of the station and pointed out that all 15 cited "are life-long residents of Omaha and/or the Midwest and thus are the most knowledgeable of the customs, mores, needs and interests of the citizens of the community."

William B. McBride, WOW TV program director, outlined the station's extensive news, documentary and farm programming, as well as sports, editorializing and special projects such as the "farm family of the week" and WOW-TV farm study tours.

Six Points • Eugene S. Thomas, vice president, director and general manager of Herald Corp., licensee of KETV, testified Monday that KETV ascertainment community needs through six principles:

1. By having KETV people work...
places on it will come under careful scrutiny. These comments that we have heard from both the stations and the public witnesses will play a large part in our decision. But I couldn’t say at the moment whether there will be any relaxation or tighten for maintenance of the status quo.”

A reporter recalled Commissioner Henry’s statement at his Jan. 29 news conference that the standards of the community for local live programming may or may not be the same as the standards the commission might have. Would he clarify that?

“I did make a statement along those lines. You are correct,” Commissioner Henry replied. “The commission has no fixed ‘standards’ in this field—those that we referred to at our last conference. [The FCC does] have policies however with respect to local live programming.

“Maybe that helps to call them policies. You could call them time-tested standards of the FCC. I meant those policies or time-tested standards that have evolved over a great many years and which the commission has enunciated as being in their judgment appropriate and pretty well accepted by the broadcasting industry as being a measure of station performance in this field.

“Now it is my feeling that these policies place certain responsibilities on the broadcasters and one of our main efforts is, of course, to make known our policies and regulations not only to the public but more clearly to the stations.

“I felt and still feel that in certain respects the broadcasters themselves and the FCC—through its constant historical dealings with the broadcasters—have a greater awareness of these policies, these time-tested standards, than does the public.

Continuing his explanation, Commissioner Henry then outlined what he believes these policies include:

“They include consideration of such things as the educational aspects of commercial broadcasting. The responsibility of a broadcaster to act as an outlet for the expression and development of local talent. The area of children’s programs and the programming specifically directed at children.

“They include such things as programming decisions. For example, the programming which would be contrary to the FCC’s policy. They include the responsibility to see that conflicting viewpoints are aired and given expression. They include the broadcaster’s responsibility to give some consideration to the timing of programs, to the promotion of programs.

“These are the things that I meant that the public is not aware of as the FCC is aware of or as the stations are aware of,” Commissioner Henry stated in clarification of his Jan. 29 comments.

Ability to Pay • He continued: “I think also that there are certain financial aspects to the operation of broadcasting stations which the FCC is more aware of than the general public. Those include the profits that stations have made over the years and are making and as those profits relate to the ability of a station to put on local live programming.

“One of the reasons, for example, we chose Omaha was that when considered as a market the stations were financially able to program, to put on certain programs that would not be necessarily commercially successful.”

Asked if he could go in this respect is not a controversy gray area. Commissioner Henry agreed that the execution of those responsibilities, “how far the FCC goes in establishing those criteria, is certainly a matter of present debate among broadcasters.” To another similar question he replied: “I would agree that there is disagreement in how far the FCC should go in enforcing its policies and there is disagreement in how those policies should be interpreted as they apply to local live programs.”
stock center. Mr. Thomas said KETV has regular film programs from such sources as universities and the U. S. Dept. of Agriculture which provide information the farmers need in a far better way than local live could do. He also explained weather ranks "very high" with farmers and KETV is on top of this as it also is with farm spot news coverage.

Asked if KETV has actively sought out sources such as local school authorities for the development of educational TV programs, Mr. Thomas said yes, but these sources indicated they needed more time to prepare for such programs as well as more money for staff TV specialists.

Owen L. Saddler, executive vice president of May Broadcasting Co. and general manager of KMTV, also testified as the only witness for his station. He appeared Monday afternoon and Tuesday and took special note of the fact that "the overwhelming majority of the testimony was favorable" to Omaha's three stations.

He pointed out that the KMTV area "is served by 98 newspapers with a circulation of over 6 million, 43 AM radio stations and 8 FM radio stations, 77 motion picture theaters, 55 public libraries with an annual circulation of over 3 million volumes and 12 television stations outside Omaha," all quite apart from many other recreational and cultural facilities throughout the area.

"In short, other agencies and institutions likewise have a role to perform in endeavoring to satisfy the numerous and varied needs of a given community," Mr. Saddler said. "Television can, however, supplement and complement those agencies and institutions. This KMTV endeavors to do."

Commercial Help * Mr. Saddler felt KMTV's commercial campaigns benefit Omaha "by improving business conditions," by providing job security for those working for these firms and by helping boost the number of jobs available. He didn't think Omaha's great number of charitable drives—so extensively supported by local TV out of town—could be a success "unless the people and firms were prosperous enough to make the necessary donations."

KMTV's management feels that television is a creative medium and that the program staff "must not only be alert to, but ahead of, the desires and interests of the audience," Mr. Saddler said. That KMTV has succeeded in this respect, he said, is witnessed by the fact his station has won 43 of the 55 "Gold Frame Awards" made by the Omaha Area Radio-Television Council.

KMTV's mid-day Conversations show Monday-through-Friday, now in its sixth year, has featured 308 separate civic groups in the last three years alone as well as provided a showcase for various local amateur and professionals. Mr. Saddler said. Among other local live shows he also cited Kv Classroom in conjunction with the U. of Omaha for 11 years, Your Doctor and You annual series since 1955 and the third year of the February-March series Great Decisions in cooperation with the Omaha Adult Education Council which sponsors neighborhood talk groups based on the program. He listed numerous specials, including KMTV's role as official information center for the "Sabin Oral Sundays" mass inoculation project last summer.

The FCC attorney, noting KETV's citizen advisory group meets but once yearly, asked how many new programs have resulted from these sessions. Mr. Thomas recalled an education week special about a year ago and community chest feature last fall. But KETV would have done latter anyway, he said.

FCC also introduced revision of its analysis of KETV's October 1962 logs to reduce station's total local live to 7.4% from previous 9.8%. FCC allowed adding of morning-evening devotions but disallowed "Cracker's Animals" show which KETV unsuccessfully contended should have been counted live. FCC's total local live figures of 11.6% for WOW-TV and 14.7% for KMTV in October remained unchanged.

Magnuson rises in Senate and party

The most influential senator in broadcasting matters has added a new dimension to his authority—out space. Sen. Warren G. Magnuson (D-Wash.), who, as chairman of the Commerce Committee since 1955, has been key man in the Senate on broadcasting and communications legislation, will in the future be top man on space communications legislation as well.

As reported last month—and con-
REVISION PROPOSALS FIND FAVOR

Communications Act changes going to FCBA executive unit

Proposals to revise the Communications Act, made in a series of monographs by a special committee of the Federal Communications Bar Assn. (Broadcasting, Jan. 28), have received a groundswell of approval, principally by broadcasters.

Authors of the individual proposals report they have received "overwhelming" comments from broadcasters and some bar members favoring the recommendations.

The first meeting of the 1963 FCBA executive committee is scheduled today (Feb. 11), and its first order of business will be the Communications Act proposals, according to Donald C. Beelar, newly elected president of the law group.

Mr. Beelar emphasized that the outcome of what to do with the proposals will be what a majority of the 12-man executive committee decides.

The accepted method, according to previous plans, is to reprint the four monographs for distribution to FCBA members and interested parties. About two months later, it is thought, a full meeting of the FCBA might be held at which the items could be discussed.

There is some feeling among communications lawyers, including some members of the FCBA executive committee, that the documents should be returned to the special committee for a full-fledged committee report including recommendations as to what the bar association should do. The main objections are that the suggestions for changes are the views of individuals, not a formal committee report.

A few members of the bar, it is learned, oppose the changes suggested in the four reports.

The reports proposed a broad scale reorganization of the FCC, splitting the present commission into a single administrator, a court of review, and a commission of five members for policy making. Also recommended was the deletion of Sec. 315, the political equal time provision; a drastic revision of Sec. 326, the "no censorship" section, to prohibit completely any FCC interest in programming in any form whatever, and a complete overhaul of the common carrier provisions.

The monographs were written by

N.Y. party denied time; asks for probe by FCC

The Liberal Party of New York State last week claimed it had been refused the opportunity to buy program time on three New York radio stations and called for an FCC investigation.

Ben Davidson, executive director of the party, said that WNBC, WQXR and WMCA had declined to sell time for a 15-minute program on alternate weeks, during which the Liberal Party intended to hold educational discussions of current events and problems.

Mr. Davidson told the FCC the Liberal Party was concerned with "the consequences for democracy if radio companies are to have the power to silence political parties through denying them even the right to purchase time on mass communications media . . . ."

R. Peter Straus, president of WMCA, called the Liberal Party's statements "irresponsible, inexcusable and illiberal." He told a news conference in New York that he has written the FCC asking for a hearing on the Liberal Party's charges.

He said the Liberal Party specifically had asked to buy time on WMCA during a weekday, 10:30-11 p.m., and the station had replied that this period traditionally has been public service time which has been sold only rarely on a single program basis.

Spokesmen for WQXR and WNBC both said they sell time to political parties during campaign periods but otherwise have a policy of not selling such time.
The case for aid to translator stations

The Tri-State Tv Translator Assn., representing translator operators in Idaho, Montana and Wyoming, has told the FCC that it should reconsider its decision against WIBW-TV (ch. 13) Topeka, Kan., donating funds to community operated tv translator KO3-BR (ch. 3) in Clyde, Kan. (Broadcasting, Jan. 7).

A proposed $500 donation by WIBW-TV was denied because the commission refused to waive its rule which prohibits vhf stations from extending their normal Grade B contour by owning or contributing to the support of vhf translators.

Tri-State pointed out the position the Canadians take in aiding translator stations. The association noted that in Canada much of the preliminary engineering for new translators is done by tv stations, that they often pay for a small portion of the costs of 1 w translators and aid in translator maintenance. The result is better service to tv viewers, according to Tri-State.

Tri-State said that to its understanding “tv viewers are worth about $3 per thousand to tv stations” and if a community can talk a tv station into contributing to the support of its translators “why not let them?” The public would be better served if stations were allowed to aid translators, Tri-State concluded.

Leonard H. Marks (administration), Phillip G. Loucks (Sec. 315), W. Theodore Pierson (Sec. 326) and Reed T. Rollo (common carrier).

Other members of the committee were Fred W. Albertson, Edward P. Morgan, Harry Plotkin, William Porter and J. Roger Wollenberg.

The FCC last week...

* Received a request by WBMT Black Mountain, N. C., for more time to file a statement with the commission “to mitigate or justify” an alleged deception concerning the ownership of the station and other charges (Broadcasting, Jan. 7). The WBMT statement was due Feb. 8, but by grant of petition would have until March 8. WBMT also waived the right to a hearing.

* Was requested by Monterey (Calif.) Peninsula College to institute a rule-making proceeding looking towards the reservation of uhf ch. 35 at Salinas-Monterey for non-commercial educational use. College said that nearest vhf station is KQED (TV) on ch. 9 in San Francisco, and plans to operate station on ch. 35.

* Received proposed findings from the ten applicants for ch. 13 in Rochester, New York. The applicants, which participate in interim operation WOKR (TV) pending the commission pending a final decision (Broadcasting, July 9, 1962), are: Rochester Area Educational Tv Assn., Federal Broadcasting System Inc., Heritage Radio & TV Broadcasting Co., Star Tv Inc., Main Broadcasting Co., Rochester Telecasters Inc., Genesee Valley Tv Co., Citizens Tv Corp., Community Broadcasting Co., and Flower City Tv Corp. All of the applicants cited their backgrounds and experience in broadcasting, qualifications of management and programming to support their bids.

FCC satisfied, renews WFAA-TV

WFAA-TV Dallas, Tex., received a license renewal from the FCC last week on a finding that the station has fulfilled local programming needs. The FCC staff had questioned the station’s performance.

The commission staff, which had previously sent WFAA-TV a letter questioning to what degree the station had held to its proposals for local programming, had proposed a second such letter because it had not been satisfied by the station’s first response. The second letter was halted by the FCC (Closed Circuit, Feb. 4).

Two weeks ago WKY-TV Oklahoma City was granted a license renewal under similar circumstances. After station refused to bend to commission staff pressure to revise its programming policy, the commission renewed WKY-TV’s license and in a letter stressing the importance the agency attaches to a station’s efforts to determine community needs (Broadcasting, Feb. 4).

Like WKY-TV, the Dallas station did not have set, scheduled local programs, but based its availability of time on a policy of pre-empting regularly scheduled programs during the prime hours. The commission noted that in addition to WFAA-TV’s pre-emption policy it instituted in 1961 a local program, entitled Let Me Speak to the Manager, which was carried every Sunday from 10:30-11:00 p.m. The program specifically concerned itself with the problems of determining and serving the needs and interests of the community, the commission said.

The commission concluded that “these actions are a reasonable measure of your (WFAA-TV) policy for the ensuing license period, and have renewed your license in reliance upon such an understanding.”

As it did in the WKY-TV renewal the commission cited portions of its decision in the KORD Pasco, Wash., case in which it said that “programming proposals are not binding to the very letter.” The commission set its “promise vs. performance” policy in the KORD decision (Broadcasting, July 17, 1961). At that time the commission stated it proposed revision of the programming section of “the basic broadcast application forms” that applicants notify it of any “significant changes in over-all broadcast operations.”

IRS NON-CHARITABLE ON DEDUCTIONS

VOA may pay ‘reasonable’ costs for Cuban broadcasts

The IRS isn’t going to be much help in settling the Voice of America’s IOU to 10 U. S. radio stations.

So the Voice is trying to find a way to pay up out of its— or the public’s — pocket.

The United States Information Agency, the Voice’s parent, and USIA Director Edward R. Murrow failed to obtain a ruling from the Internal Revenue Service that the stations which broadcast Voice programs during the Cuban crisis last fall may deduct their actual and potential losses as charitable contributions. No authority for such deductions exists, the IRS said (Closed Circuit, Feb. 4).

Mr. Murrow last week forwarded copies of the IRS ruling to each of the stations involved and asked them to let him know what they consider “appropriate charges.” The agency will review the statements, and if the requests seem reasonable, they will be paid, said Henry Loomis, director of the Voice, Thursday (Feb. 7).

Mr. Murrow explained that each station’s financial situation was an individual matter. The agency now feels it was wrong to try to find a single universal treatment for all the cooperating stations (Broadcasting, Dec. 10).

Two stations which said they sought no reimbursement were thanked again for their position.

OK to Pay Stations * Earlier reports that the agency has no statutory authority to pay for broadcast time grew from a firm policy the agency has followed not to pay for broadcasts, but the authority exists, Mr. Loomis explained. The issue just had not come up until the Cuban crisis.

Mr. Murrow consulted with Morti-
mer M. Caplin, IRS commissioner, and his staff in some detail when outlining the agency's request for a ruling on the broadcasters' tax problems.

Here, in summary, is what IRS has told the stations:

"Out of pocket expenses incurred in operating a radio station at times the station is normally not operated" may be deducted as charitable contributions (subject to percentage limitations). Operating expenses incurred during normal operating hours are not deductible as contributions, but are considered business expenses.

Following precedents relating to gifts of newspaper space to charitable organizations, the tax agency said "the gift of radio time is, in effect, a gift of the privilege to use the station's facilities" which has been held to be nondeductible.

To allow a charitable deduction for the loss of advertising revenue which stations incurred either because they were unable to fulfill previously signed contracts for advertising time, or because they were unable to accept new contracts for such time, would be permitting a deduction for the fair rental value of the radio time contributed. Such deduction is not allowable.

Looking to the Voice's probable payment to the stations for some of their expenses, IRS said, "Any reimbursed expenditures of the radio stations must be included in their income and these expenses will be deductible."

These rulings do not apply to non-profit stations exempt from income tax IRS said, but do "apply equally to individuals engaged in the trade or business of operating a radio station as sole proprietors or as members of a partnership and profit making corporations."

Paid for Time Before • WRUL, New York, an international shortwave station, contracted with the Voice to produce and transmit Spanish and some Portuguese language programs during the 1950s, but the service ceased in 1960, the Voice said last week.

The Voice is still beaming nine hours of programs daily to Cuba from two mobile transmitters in the Florida keys.

**Proxmire opposes FCC favoring congressmen**

Sen. William Proxmire (D-Wis.) last week re-introduced legislation which would prohibit the FCC from giving special weight in the award of licenses to broadcast properties in which members of Congress hold interest.

"The FCC has in the past justified the award of a lucrative television channel in part on the ground that stockholders of the company were members of Congress," the senator said Wednesday (Feb. 6). "This was held to give the applicant an edge in the 'civic participation' criterion. Specifically favoring an application because it has a congressman participating could turn into a form of payola."

Sen. Proxmire sought to introduce the legislation in 1960 as an amendment to Sec. 315 legislation, but was asked to offer it as a separate bill. He did that toward the end of the previous Congress (Broadcasting, July 9, 1962), but the bill failed to receive a hearing.

The senator's interest was sparked by the FCC's award of ch. 10 in Vail Mills, N. Y., to Capital Cities Broadcasting Co., in which five New York congressmen were then minority stockholders.

**Onondaga favored for Syracuse ch. 9**

**LOCAL OWNERSHIP, GOOD MANAGEMENT CITED**

An FCC hearing examiner has recommended that Syracuse ch. 9 be awarded to Onondaga Broadcasting Inc., one of nine remaining applicants that have been competing for the outlet since the fall of 1961.

The initial decision of Hearing Examiner David J. Kraushaar favored Onondaga because of its local ownership, integration of management and ownership and "the fairly recent experience of a major stockholder in the management of a going television station with a satisfactory performance record."

Syracuse ch. 9 was one of three vhf drop-ins authorized by the FCC in the summer of 1961. The other two are in Rochester, N. Y., and Grand Rapids, Mich. In all three cities, the applicants for the channels have, with the FCC's urging combined to render temporary service pending a final decision by the commission. The Syracuse case was the first to reach the initial decision stage.

"Lines Blurred" • In arriving at his decision, Mr. Kraushaar said that he found the lines of distinction among several of the applicants "were blurred"
and noted that, ideally, the residents of Syracuse could probably best be served "if the three stations of Onondaga, Baker and Six Nations were to be re shaped and combined into a single new applicant."

Onondaga didn't rank at the top in any of the categories in which Mr. Kraushaar judged the applicants. But it did score high, in Mr. Kraushaar's view, in every area considered. In terms of "area familiarity," the hearing examiner ranked Onondaga behind Baker and Syracuse Civic.

In considering "meaningful" integration, to ownership with management, Mr. Kraushaar found that WAGE ranked first, with 80% of its stock owned by management. Onondaga was second, with 42% such ownership.

Although Onondaga had no broadcast experience of its own to point to, the hearing examiner placed great weight on the experience of one of its principals, Vance L. Eckersley, a 10% stockholder and the company's proposed general manager. Mr. Eckersley was vice president and general manager of WDAU-TV Scranton, Pa., from 1956 to 1960.

During that time, the examiner said, "the subject matter of the station's programming was meritorious in character and ... the station ... received awards for outstanding news coverage."

Schreiber, MCA vs. FCC in federal court

FIGHT CONTINUES OVER 'CONFIDENTIAL' RECORDS

Whether Taft B. Schreiber, vice president of MCA Inc., will have to answer FCC questions about the television operations of his organization, and whether MCA will have to submit records publicly as ordered by the FCC, were argued Wednesday (Feb. 6) in Federal District Court of Appeals in Los Angeles, with no immediate decision.

The three judges, Gilbert Jerberg, Roger D. Foley Jr. and James Browning, listened to argument by Max Pinn, FCC general counsel, and Allen E. Susman, of the Beverly Hills, Calif., law firm of Beilinson, Meyer, Rosenfeld & Susman, representing Mr. Schreiber and MCA, in the matter under submission. A decision is not expected for several months.

Last week's argument was the latest installment of an FCC-MCA disagreement that dates back to the fall of 1960, when Mr. Schreiber provided the dramatic highlight of a Los Angeles session of an extended FCC hearing into the control of network television by refusing to answer the questions of FCC Examiner James D. Cunningham or to produce a list of tv network programs for which MCA had acted as selling agent (Broadcasting, Oct. 31, 1960). He and his attorney (Mr. Susman) argued that the hearings rules set by Mr. Cunningham deprived him of "the effective and knowledgeable assistance of counsel." Defying the examiner's order to sit down and testify, Mr. Schreiber left the witness box and the hearing room.

Refuses Again • Since then, many legal documents have been filed by both sides. Mr. Schreiber again refused to testify when the hearing was resumed the following March (Broadcasting, March 12, 1962). It was the legality of that order that was debated last week.

Mr. Susman repeated his former arguments that the FCC questions called for answers that would divulge to MCA's competitors the policies and practices that have given MCA its outstanding success.

Mr. Paglin asserted that the commission was investigating the whole scope of tv programming in order to insure the conduct of this vast enterprise in the public interest; that the commission cannot properly be bound to keep evidence confidential as it must be free to divulge any information it has to Congress as a guide to enact whatever legislation may be required. And, he argued MCA's testimony is needed to fill an important void in the overall picture. He noted MCA's competitors, such as William Morris, had testified freely, without any demand for confidentiality and asked why MCA should be entitled to any preferential treatment.

When Mr. Susman argued that the Administrative Procedure Act required publication of hearing ground rules which he charged the FCC had not done, Judge Foley told him he was talking about abstract matters unrelated to the specifics of this case.

Fair payment offered if applicants win

The top officials of two of WLBW-TV's three competitors for ch. 10 Miami said last week that, if successful in their bid for the channel, they would be willing to pay the station "the fair market price" for its transmitter and equipment.

William B. MacDonald Jr., president and executive officer of South Florida Television Corp., and Charles H. Cran don, president and chairman of the board of Civic Television Inc., made the statements under questioning as the comparative hearing on the channel went into its third week.

WLBW-TV, which has been operating on the channel on a four-month license, contends that the courts and commission rulings have held that a station's investment shouldn't be jeopardized "except for compelling reasons." The station said it spent $722,462 on its equipment.

In addition to Mr. MacDonald, 80% owner of South Florida, that company's case was presented by Walter M. Koeslser, vice president, general manager and 10% owner; Mrs. Eleanor May, secretary, program director and 5% owner; and William R. Needs, chief engineer and 5% owner.

Messrs. Koeslser and Needs and Mrs. May had worked together at WGBS-TV Miami (ch. 23), now dark, and at WPST-TV when that station operated on ch. 10, from 1957 until Nov. 20, 1961. They testified they were brought together with Mr. MacDonald, a wealthy Miami area businessman, by George T. Baker, who had been head of WPST-TV and its parent corporation, National Airlines. The air line lost its grant because of "ex parte" contacts.

Mr. Crandon, who began presenting Civic's case Thursday, is a former chairman of the board of county commissioners of Dade Co. The remaining applicant to be heard is Miami Television Corp.

Verbose senators delay hearings

Hearings on communications legislation and presidential nominations to the FCC and Communications Satellite Corp. may not be acted on by the Senate until late this month or early in March.

Delays caused until last week by a filibuster on rules and the traditional congressional inactivity permitted for Republican speech making during the week of Lincoln's birthday combined to put off Senate committee organization for at least another week or two.

The Democratic Steering Committee meets Thursday (Feb. 14) to thrash out the ratio of Democrats and Republicans in committees and assignments of members. Approval of the Senate on organizational matters is not expected until the following week, and organization of internal committee matters—such as the naming of subcommittees and their chairmen—cannot take place until then.

Directly tied up by the delay is the nomination of FCC Broadcast Bureau Chief Kenneth A. Cox to be a commissioner replacing Commissioner T. A. M. Craven, who was to have been retired Jan. 31, but who is serving until Mr. Cox's nomination may be approved by
the Senate.
Questions which Sen. Strom Thurmond (D-S.C.) said Jan. 31 he wanted to ask Mr. Cox in executive (closed) session (Broadcasting, Feb. 4) might be answered without need for such a proceeding, Sen. Warren G. Magnuson (D-Wash.), chairman of the Commerce Committee which is handling the nomination, said Thursday (Feb. 7).
House Commerce Committee organization was incomplete last week.

Broadcasters scorn FCC's 'reference library' idea

The FCC-proposed rulemaking that stations maintain a local reference library of all applications to the commission for public inspection (Broadcasting, Nov. 26, 1962) met little favor in reply comments last week.
The California Broadcasters Assn. echoed the findings of other broadcaster associations in former comments (Broadcasting, Jan. 24) that keeping public records would place heavy burdens on the stations, particularly in small cities. The Oklahoma Broadcasters Assn. joined a California group in charging the commission has not shown that a public desire to inspect station records has been expressed.
The California association said that the general public is not a party of interest concerning the station and that the financial dealings of the station particularly should not be made public to competitors and creditors. Oklahoma said that the commission's policy to keep financial data confidential at its Washington offices is sound.
Westinghouse Broadcasting Co. turned in the only concurring statement. However, Westinghouse said that records should be maintained for only one year and that provisions allowing stations to discipline use of the records should be added.

Interference computing by FCC called erroneous

A broadcaster seeking to change from daytime only to day and night operation attacked the FCC's method of computing nighttime skywave interference last week in a federal court in Washington.
WLOU Louisville, Ky., now operating on 1350 kc with 5 kw daytime only, asked the FCC to permit operation at night with the same facilities. Last June the FCC denied the request, claiming that the nighttime service would deprieve 2,200 people in and around Cocoa Beach, Fla., of their only nighttime service. WLOU appealed, claiming that the FCC's method of calculating interference was erroneous.
The case was heard by Circuit Judges Wilbur K. Miller, George T. Washington and John A. Danaher.

Uhf advisory committee proposed by FCC

COMMISSION TO SEEK HELP IN FOSTERING UHF GROWTH

The FCC announced last week it intends to create a committee of government and industry representatives to help find methods of stimulating the growth of uhf television.
The commission said the all-channel receiver law, passed last year, is an important step in the development of uhf. But, it added, it is "vital" to follow through with "all appropriate steps to enhance the development of uhf broadcasting."
The government-industry committee—to be called a "Committee for the Full Development of Uhf Broadcasting"—would be composed of representatives of the commission and various industry groups, such as the Electronic Industries Assn., NAB, National Assn. of Educational Broadcasters, NET, the three major tv networks, and uhf broadcasters. Anyone else interested is invited by the commission to participate.
The idea for the committee apparently grew out of a suggestion from officials from EIA that was taken up by FCC Chairman Newton N. Minow and Commissioner Robert E. Lee.

It was understood that Commissioner Lee, the commission's staunchest supporter of uhf television, would be named chairman of the committee, with Commissioner E. William Henry as his alternate. No date for an organizational meeting has been set yet, but Commissioner Lee thought it might be held during the NAB annual convention March 31-April 3 in Chicago.
The commissioner said there are no specific plans for the committee, but that its job would be largely one of stimulating ideas as to how the development of uhf television could be expedited.
The only known dissent to the proposed committee was entered by Commissioner Frederick W. Ford. He said he felt that by sponsoring such a committee, the commission departed from its rightful role as a regulatory body to assume the function of a trade association in promoting a business. "That's not our job," he said. "That's for private enterprise."

Offers an Insight – The commission said that through the uhf committee, as it functions in the "coming critical

The discriminating traveler will find at the newly cosmopolitan Beverly Wilshire Hotel all the concepts of gracious hospitality for which Hernando Courtright is famous: impeccable, personalized service, splendid surroundings, and above all, cuisine par excellence. Classic elegance is the heart of the Beverly Wilshire—amplified by subtle luxury and unparalleled attention to your comfort and privacy. Make your next visit to Los Angeles verify a return to elegance at the Beverly Wilshire—in the heart of fashionable Beverly Hills, where every conceivable convenience is at hand or in strolling distance.

Hernando Courtright's
Beverly Wilshire Hotel
BEVERLY HILLS, CALIFORNIA
years," the commission will be offered insights to the problems of uhf broadcasting as they arise. Where appropriate, corrective measures could be taken through rulemaking or other actions.

A commission example: action might be taken to assure the technical development of uhf broadcasting and reception. The commission said that it feels that it is necessary that there be "continuing forums for face-to-face exchanges between the uhf broadcasters and the television set manufacturers during this critical period."

According to the proposal, the committee also would collect and disseminate (1) useful information concerning practical problems faced by uhf stations in differing market situations, (2) methods with which to meet these problems and (3) information on the effectiveness of these methods.

The FCC noted that "in recognition of the fact that such practical marketing questions are matters for the broadcasters—and not the commission," it would not participate other than in keeping with regulations for "industry advisory committees."

**Tv's value underscored in Kennedy comments**

The Kennedy administration was obliged to use television to convey the "truth" about Cuba to the American people the President said last week. Newspapers, he said, had overplayed rumors about an offensive Soviet buildup in Cuba and underplayed the facts.

"...Now, I remember a story the other day in one of our prominent newspapers which had a report of a congresswoman about the presence of missiles in Cuba)—no supporting evidence, no willingness to give us the source of his information. We are not, after all, a foreign power."

"On page 10 was the statement of the Secretary of Defense, giving very clear details. That was page 10 and the other was page 1.

"So, it is a responsibility of ours, and, it seems to me, also of the press. I would think a good many Americans, after the last three weeks of headlines, have the impression that there are offensive weapons in Cuba. It is our judgment, based on the best intelligence that we can get, that there are no offensive weapons in Cuba.

"I think it is important that the American people have an understanding and not compel, because of these various rumors and speculations, the Secretary of Defense to go on televisions for two hours to try to get the truth to the American people and in the course of it give a good deal of information which we are rather reluctant to give about our intelligence gathering facilities."

**NO PUBLICATION OF MEDIA RECORDS**

Celler says agency information will be kept confidential

The nation's top 100 national advertisers—requested early last month to disclose their advertising strategy and detail their media expenditures to a congressional subcommittee—have subsequently been told the information will be held in confidence.

Rep. Emanuel Celler (D-N.J.), chairman of the House Antitrust and Monopoly Subcommittee, which is investigating concentration of ownership in news media, said in Washington last week he had promised the advertisers that information they provided his staff would not be published.

Only the conclusions which the subcommittee draws from the information will be made public, the chairman said, and that only in the development of testimony from media and advertiser witnesses.

Rep. Celler also announced last week that FCC Chairman Newton N. Minow would be the leadoff witness when the ownership hearings begin March 13. Chairman Minow will be asked to describe the impact radio and television have had on the nation's newspapers, said Rep. Celler. Further, the chairman will be asked what influence newspapers, which own or control broadcast properties, have on radio and television operations.

Adviser Concern • ANA officials met in New York with Rep. Celler when association members expressed their concern at the extent of "inside" information sought by the Celler subcommittee. A questionnaire asking the top advertisers where, how and why they spend their advertising dollars was sent to the top 100 over the signature of Rep. Celler (Broadcasting, Jan. 28). The query failed to offer confidentiality to advertisers who cooperated. It is believed that provision was added after the meeting between ANA and Rep. Celler.

Asked last week if advertisers were providing information sought by his subcommittee, Rep. Celler said that "most advertisers" have cooperated and given the House unit what it asked.

"We're satisfied," Rep. Celler said.

Although selection of Chairman Minow raised questions whether the investigation was placing greater emphasis on broadcasting than previously indicated, Rep. Celler said last week the electronic media were only a part of an examination of the newspaper business. Newspapers remain the focal point of the inquiry, he indicated, and radio and television will be brought in "only collaterally."

Witnesses other than Chairman Minow will be announced "at the proper time," Rep. Celler said. The hearings, the result of more than a year's investigation, were expected to last one to two weeks.

Seminar postponed, no new date set

FCC defense officials have postponed the date of the defense seminar, held annually in Washington. Originally Feb. 28-March 1 was picked, but this has been cancelled indefinitely.

Meanwhile a special National Industry Advisory Committee has been chosen to work on a new alerting system using am, fm and tv broadcast stations (Broadcasting, Feb. 4). Under the chairmanship of John F. Meagher, NAB radio vice president, the committee will seek to draw up a method of using radio and tv to alert the public in the event of a national emergency. NIAC was asked to do this by the Civil Defense office of the Dept. of Defense. The Conelrad system remains in effect, however, until a new emergency broadcast service is inaugurated.

**WMIS 'short' renewal is for 17 months**

WMIS Natchez, Miss., was granted a license renewal by the FCC last week, but only for the remainder of its full term license which runs to June 1, 1964. The commission said WMIS should consider the renewal the "equivalent of a short-term grant" because of its failure to have a first class operator on fulltime duty and several technical violations.

According to the commission, WMIS
licensee, P. K. Ewing, reasoned that the violations occurred because of his own illness and "general derelictions" on the part of station staff. The commission noted that WMIS has since employed a full-time first class operator and operated the station "in full compliance" with commission rules.

The commission told the station that since its past actions had fallen short "of that degree of responsibility" required of it, short-term renewal will allow the commission an opportunity to re-examine the WMIS operation in June 1964.

**Fifth Amendment fight reaches federal court**

Whether applicants for radio operators' licenses from the FCC can take the Fifth Amendment—and refuse to answer whether they have been members of the Communist Party—was argued last week before a federal court in Washington. Last July, the FCC dismissed applications for operators licenses from Stanley Blumenthal, Rudolph William Jones and Wayne P. Paschel. All three had refused to answer completely a questionnaire sent to them by the FCC regarding affiliation with the Communist Party and other organizations aimed at the overthrow of the U. S. government.

In the argument last week, FCC counsel Ruth V. Reel contended that because the questionnaires were not fully answered the commission could not make a judgment on the qualifications of the applicants. Basically, the three applicants refused on Fifth Amendment grounds to reply to the question concerning past membership in the Communist Party. Attorneys for the three applicants argued that the applications must be accepted, and cannot be refused.

All three had held licenses from the FCC; Messrs. Blumenthal and Jones as commercial operators; Mr. Paschel as an amateur operator. Case was heard by Circuit Judges David L. Bazelon, Charles Fahey and J. Skelly Wright.

**INTERNATIONAL**

**CANADA TO STAY BLACK AND WHITE**

U.S. color figures cited; costs prohibitive, according to BBG

There will be no color television for Canadians in the immediate future. This was the decision of the Board of Broadcast Governors announced on Feb. 1 after public hearings at Ottawa.

Canada's regulatory body decided that costs were still too high for broadcasters as well as viewers. Its decision was in part based on public demand in the 1,000,000 Canadian homes near the border where U. S. color telecasts are received. Of these million homes only 4,500 had color TV receivers, the BBG pointed out. Cost of cheapest color TV receiver in Canada is $700, BBG stated. It also pointed to the slow sale of color TV sets in the United States, where sets are cheaper and slightly over a million are in use.

BBG would not set a target date for the start of color telecasting in Canada nor for the setting of color telecasting standards by the Department of Transport in Ottawa.

Demand for color telecasting had been strongly urged by most members of the Electronics Industries Assn. of Canada. Canadian Assn. of Broadcasters had recommended that those broadcasters who wanted to use color television should be allowed to do so. But the Canadian Broadcasting Corp. and the CTV Television Network had urged a go-slow policy as they were not prepared financially to enter the field.

**CJLR loses to CBC for Quebec City outlet**

The Canadian Broadcasting Corp. has been recommended by the Board of Broadcast Governors for a new French-language television station at Quebec City with 173 kw video and 87 kw audio on ch. 11. An application by CJLR Quebec City, for a TV station on ch. 11 was turned down.

CBC was also recommended for a ch. 5 TV satellite station at Fort Frances, Ont., with 20.5 kw video and 10.2 kw audio, to rebroadcast programs of CBWAT Kenora, Ont., itself a relay station for CBWT (TV) Winnipeg, Man.

CJLR Kenora, Ont., has been recommended for construction of a daytime satellite radio station on 900 kc with 1 kw power.

CJBQ-FM Belleville, Ont., had a

**NBC-RKO hearing resumes Feb. 25**

Hearing on the NBC-RKO General station transfers will resume Feb. 25, according to an order issued last week by FCC Chief Hearing Examiner James D. Cunningham.

The hearing has been in recess since the agreement between Philco Corp. and RCA, which provided among other things for Philco to withdraw its application for the ch. 3 facility in Philadelphia now owned by NBC (BROADCASTING, Jan. 7). The issue of reimbursement to Philco for its out-of-pocket expenses in prosecuting the Philadelphia application, opposed by the FCC's Broadcast Bureau, is now under consideration by the FCC commissioners.

The NBC-RKO General exchange involves the network's WRCV-AM-TV Philadelphia and RKO General's WNAC-AM-TV and WRKO (FM), all three in Boston.
power boost recommended on 97.1 mc from 3.43 kw to 17.4 kw.

CBC was authorized for a tv satellite station at Sheet Harbour, N.S., to rebroadcast programs of CBHT (TV) Halifax, N.S. New satellite will have 660 w video and 330 w audio on ch. 11.

CFWH Whitehorse, Yukon, has been recommended for a power boost from 250 w to 1 kw and change of frequency from 1240 kc to 570 kc.

CHRC-FM Quebec City, Que., has been authorized for one year to program separately from CHRC-AM, after which there will be a review of operations on a proposed enactment of new regulations for fm stations.

BBG ruled that henceforth stations requesting authority to make changes in existing station equipment and new applicants for radio or television stations, must start construction within three months and complete construction within 12 months from date of granting of authority. The Minister of Transport is to be allowed to extend these times where circumstances beyond the applicant's control have delayed work.

A new limitation has been placed on total commercial time permitted radio stations. Daily limit, between 6 a.m. and 12 midnight, is placed at 250 minutes, and during the week from immediately after midnight Monday to immediately prior to midnight the following Sunday, the limit is 1,500 minutes. Daytime stations are limited to 200 minutes of commercials daily, 1,000 minutes weekly.

Abroad in brief...

Liquor commercials • ZFB-1 Bermuda has been given permission to broadcast liquor commercials between 10 p.m. and 7 a.m. Ruling by the local Board of Broadcasting Commissioners came Jan. 21 following a petition by the station, according to ZFB-1.

License increase • During November 1962 the number of combined radio-tv set licenses in Britain and Northern Ireland increased by 57,125, bringing the total to 12,224,303.

BBC-SESAC agreement • SESAC Inc., New York music licensing firm, has signed an agreement giving the British Broadcasting Corp. rights to its long-playing record service. The BBC order represents several thousand recordings including concert, "pops," jazz and country and western music. SESAC foreign activity includes business in Europe, South America, Asia, Australia and Africa.

U. S. rep • EMT Wilhelm Franz GmbH, Wettingen, Switzerland, and its West German parent company located at Lahr in the Black Forest region, have appointed Gotham Audio Corp., New York, as their exclusive sales and service representative for the U. S. and territories. EMT manufactures broadcast reverberation units, studio turntables, Studer model C-37 professional tape recorders, and electronic test equipment.

500-kw outlet planned

Next Oct. 1 will signal the start of operation for what is claimed to be the world's most powerful Protestant radio station, according to Dr. Paul E. Freed, president of Trans World Radio. Trans World, with international headquarters in Chatham, N. J., presently operates a 100 kw station in Monte Carlo. The new station, on the Caribbean island of Curacao, will have a short wave transmission with a power of up to 500 kw. The transmitter is being built by Continental Electronics, Dallas.

---

**EQUIPMENT & ENGINEERING**

**Home viewers may see Cooper in orbit**

3 GROUND STATIONS PLANNED TO RECEIVE PICTURES

When astronaut Leroy Cooper makes the third U.S. plunge into space this spring—for a possible record 22 times around the earth—American home tv viewers may see him in flight.

Aboard the Cooper spacecraft will be a small, 4-in. vidicon tv camera, transmitting on slow scan pictures of the astronaut during his orbits. Three ground stations a projected for receiving these tv pictures: Mercury Control at Cape Canaveral, the Coastal Sentry, a tracking ship stationed in the South Pacific, and possibly the Canary Islands, off the coast of Africa in the North Atlantic.

If the pictures are usable, space official say, it will be possible to feed them to U.S. television networks from the Canaveral receiving point. This would be similar to the practice in previous manned space flights when excerpts of voice conversations were fed to radio and tv networks.

**Technical topics...**

New SCA products • The Sound Corp. of America has announced the marketing of two new products—a continuous tape transport and a lightweight tape cartridge. The tape transport, featuring heavy duty drive to alleviate maintenance problems, is available with manual, semi-automatic or automatic operation and with ½ or ¼ track play. The new cartridges have been engineered for radio and tv (model S) and for the background music industry (model L). Bendix c-c system • A closed circuit television system that is expected to have "widespread commercial applications" will be placed on the market shortly by the Bendix Corp., Baltimore. Originally created for military and space operations, the system holds promise for use including scrutiny of manufacturing processes, underwater search in oil drillings and astronomy study of X-ray and operation procedures in hospitals, according to a Bendix spokesman.

**Tests of Federal tube undereway at WLW**

A lifetime service test of a new Federal tube which holds promise of permitting standard radio powers up to 750 kw is underway at WLW Cincinnati.

With the permission of the FCC, the Crosley station is running Federal's D-1060A super power vacuum tube for four months in its regular transmitter, but only at 50 kw output.

The new tube, developed by IT&T, has already been tested in the main WLW transmitter at 125 kw into a dummy antenna.

The operation of the new tube, 12 of which are being used in the Crosley-operated Voice of America facility, is under the supervision of R. J. Rockwell, Crosley engineering vice president. The tube will be subject to modulation and other conditions during normal 12-hour-per-day program operation.
DENVER TV FACES NEW TAX

City seeks levy on film rentals; if successful, it may lead to other assessments on radio-tv

Local governments, hungry for revenues, have begun to fix their eyes on tv stations and their film rentals.

Latest move in this direction is taking place in Denver. There, municipal tax collectors have engaged in preliminary moves which would bring under the city's use tax laws the gross amount of rentals paid yearly by Denver tv stations. It's estimated by Jim Moore, KBTV (TV) Denver, that this could amount to something in the neighborhood of $700 per month for each station—figuring a monthly average of $35,000 spent on film rentals.

City tax men have indicated also that they feel tv stations' payments to ASCAP and BMI and other licensing organizations should come under the use tax.

If successful, it was indicated, the city expects to blanket in radio stations' rental payments for records and transcriptions as well as license payments.

The four Denver tv stations have turned over the problem to their tax attorneys. Meetings with the city's tax department are underway.

Last April the city's 1% sales tax was amended to include rental items as well as those purchased outright. In June the tax was raised to 2%. The state of Colorado also has a 2% sales tax.

Several years ago the state of Maryland instituted a tax on rental payments made by tv stations for films. This was not challenged. A similar move in Kansas was compromised after meetings between state tax officials and television broadcasters so that payment is made on the value of the raw film.

RKO '62 billings show 15% increase over '61

RKO General in 1962 set records in both billings and earnings, it was reported last week by M. G. O'Neill, president of its parent, General Tire & Rubber Co. Billings, he said, were 15% above the previous year.

The RKO General figures were not included in the General Tire consolidated annual report for the year ended Nov. 30, 1962 and announced last week. Consolidated sales totaled $959,769,316, up 18.6% from the previous high in 1961 of $809,020,262. Net income for the 1962 year was $26,744,802 ($1.55 per share), down $27,343,341 ($1.62 a share for 1961 year).

MPO Videotronics' net income down

MPO Videotronics Inc., New York, producer of tv commercials, sponsored and industrial films, reported net income after federal taxes of $102,631 (22 cents a share) for the fiscal year ended Oct. 31, 1962. This compares to net revenues in 1961 fiscal year of $210,688 (50 cents a share). Total operating revenues for the 1962 year totaled $8,231,-917, compared to $8,328,662 for the same period in 1961.

Not included in 1962 figures were the company's operation in Detroit. This is now a joint venture operation with the Hafod Kerbury Co. of that city, with MPO owning 51% interest. This business had a volume of $672,215 for the seven months ended Oct. 31, 1962.

Working capital at the end of the fiscal year equaled $1,954,283, which included cash and U.S. government securities of $1,077,482.

Annual stockholders meeting is scheduled to be held in the company's offices in New York on Feb. 25, with the following current directors nominated for election: Jud L. Pollock, president; Marvin Rothenberg, vice president-secretary; Gerald Hirschfeld, vice president; Arnold Kaiser, vice president; Gerald Kleppel, vice president-assistant secretary, and Morris Goldstein, partner in Francis I. duPont & Co. Messrs. Pollock, Rothenberg, Hirschfeld and Kaiser, each owning 11% of Class B stock, are the principal stockholders.

Each received $41,600 aggregate direct return during the 1962 fiscal year.

FINANCIAL REPORTS

TRANSCONTINENT SHOWS INCREASE

1962 net up 22% over 1961 figure

Transcontinental Television Corp reported a net income of $1,620,583 (92 cents a share) for the year ended Dec. 31, 1962—an increase of 22% over the net income of $1,331,179 (75 cents a share) for the 1961 year.

The 1962 results exclude a non-recurring charge of $218,000 (12 cents per share) covering losses on the sale of land and the establishment of a reserve for abandonment of property, principally the vhf transmitting equipment for KERO-TV Bakersfield, Calif. KERO-TV is scheduled to change to uhf ch. 23 from ch. 10 under FCC orders.

Included in the 1962 report are operations of two station properties not included in the 1961 tallies. WNEP-TV Scranton/Wilkes-Barre, Pa., and WDKO-AM-FM Cleveland. TTC acquired the remaining 40% interest for full ownership of WNEP-TV last Feb.; the Cleveland stations were purchased last May. The 1961 figures include revenues and income from WROC-TV Rochester, N. Y., which was sold by TTC last November.

TTC owns in addition to the Bakersfield, Scranton/Wilkes-Barre and Cleveland stations: WGR-AM-FM-TV Buffalo, N. Y.; WDAF-AM-FM-TV Kansas City, Mo. and KFMB-AM-FM-TV San Diego, Calif.

CBS executive wins Cooper Union's highest award

Louis Dorfsman, creative director of sales promotion and advertising for CBS-TV, has won the highest award to an alumnus of Cooper Union, New York.

The award, the Augustus St. Gaudens Medal for Professional Achievement, will be presented to Mr. Dorfsman by the Cooper Union Alumni Assn. Feb. 16 at a dinner at Hotel Biltmore, New York. The medal was only awarded once prior to its presentation to Mr. Dorfsman.

Mr. Dorfsman, who graduated with honors from Cooper Union in 1939, has received eight Gold Medals and nine Awards of Distin- tive Merit of New York Ad Directors Club, the 1963 Gold Medal of the Printing Industries of Philadelphia and many awards from the American Institute of Graphic Arts and Type Directors Club.

Prior to his present post with CBS-TV, he was vp in charge of advertising and promotion for CBS Radio.

THE MEDIA

Jack Dunn promoted to general manager of WDAY Inc. (WDAY-AM-TV Far-go, N. D.), Norman D. Black Jr., firm's president, announced last week. Thomas Barnes, who had combined duties of executive vp and general manager for last 2½ years, will continue as executive vp. Mr. Black stated that continued growth of radio-tv business there necessitated separation of two positions. Mr. Dunn, who has been with WDAY since 1931, started as an engineer. For past several years he has been assistant general manager. Mr. Barnes has been with WDAY since 1938, starting as salesman and announcer. He became sales manager in 1944, general manager in 1954, and was elected executive vp in 1960.

James K. Kuser, former lighting consultant for Kliegl Bros., New York, appointed general manager of WTOA (FM) Trenton, N. J.

Robert D. Vieno, former account executive with WVEC-AM-FM Hampton, Va., and CBS sales representative, appointed general manager of WTVI Newport News, Va. Other WTVI appointments: Bob Koolage, program director; Bruce Wright, news editor and...
director of special events; Glenn Allyn, sports director-air personality; Eric Jantzen and Johnny Sherwood, air personalities.

Albert Christy, vp and director of radio-tv operations for Potts-Woodbury, Kansas City advertising agency, joins WHB, that city, as general sales manager, effective Feb. 15. Mr. Christy was also member of P-W’s board of directors. Prior to joining Potts-Woodbury in 1954, he served as program director of WDAF-TV Kansas City.

Ed Shaughnessy, formerly with Concert Network in Boston, appointed managing director of WLIP (FM) Kenosha, Wis.

Larry Zeman, account executive in Chicago office of KTTV (TV) Los Angeles, promoted to midwest sales and marketing manager. He succeeds Frank Browne, who now heads station’s New York office, as head man of Chicago operation.

Bruce N. Bauman, head of his own advertising agency in Harrisburg, Pa., appointed station manager of WBFD Bedford, Pa.

Bob Sprouse, national sales service manager of WBNS-TV Columbus, promoted to national sales manager.

Ron Maines, account executive at WBAL-TV Baltimore, appointed general manager of WTAP-AM-TV Parkersburg, W. Va. Prior to joining WBAL-TV, Mr. Maines served as WTAP-TV sales manager and as operations supervisor of WJBF-AM-FM-TV Binghamton, N. Y.

James Nathan appointed sales manager of WINN Louisville, Ky.

A. Victor Sylvia, member of sales staff of WPRO-AM-FM Providence, R. I., since December 1960, named to local sales staff of WPRO-TV as account executive.

Morton L. Jaffe appointed account executive at WXYZ-TV Detroit.

Macey I. Schaffer, director of advertising and promotion for WLBW-TV Miami, Fla., resigns to join WQAM, that city, as account executive.

Rudy B. Wissler Jr. joins Los Angeles office of Blair Television as account executive.

Marian Stein, former account executive with Simons Michelson Co., Detroit, joins ABC-TV as sales presentation writer.

Eric Mart, formerly with sales planning division of NBC-TV, New York, appointed assistant research director for tv division of Edward Petry & Co., that city. Earlier, Mr. Mart served for five years in various research and sales development posts at ABC-TV.

Nancy Hurd, former assistant sales service manager of WCBS New York, joins staff of KTAC Tacoma, Wash.

Bob Fields, former technical director of The Mike Douglas Show for KYW-TV Cleveland, promoted to engineering management staff of Westinghouse Broadcasting Co. as tv technical operations supervisor.

Herb Evans, chief engineer of eta outlets WSEC-TV (ch. 17) and WTHS-

NBC’s Rash sworn in at National Press Club

Bryson Rash (1), NBC News Washington correspondent, was sworn in as president of the National Press Club by Chief Justice Earl Warren at the club’s inauguration dinner Feb. 2. Mr. Rash, broadcast newsmen in Washington for 25 years, succeeds George Cullen as head of the journalists.

Press Club presidents are usually presented with mock copies of their publication when they are inaugurated, but in honor of his broadcast status, Mr. Rash and other members of the club received a long-playing record, called “Is Bryson Rash?,” featuring a humorous account of his career.

tising and promotion for WLBW-TV Miami, Fla., resigns to join WQAM, that city, as account executive.

Rudy B. Wissler Jr. joins Los Angeles office of Blair Television as account executive.

Marian Stein, former account executive with Simons Michelson Co., Detroit, joins ABC-TV as sales presentation writer.

BROADCASTING, February 11, 1963
Chauncey helps United Fund drive over top

With the aid of a veteran broadcaster, the Greater Phoenix-Scottsdale (Arizona) United Fund topped its goal this year for the first time in a decade.

With three days remaining and $60,000 to be raised, Tom Chauncey, president of KOOL-AM-TV Phoenix, ordered an intensive spot and editorial campaign on both stations. Mr. Chauncey also took to the telephone and received additional contributions from those who had already given. The result was $1,727,954.50 for the fund, a little more than $1,000 over the goal.

For his efforts, Mr. Chauncey (above, !) received the first annual Tom Chauncey Award, a silver bowl. The award is a permanent one through a special grant set up by the United Fund chairman, Herman Chanen (c), and a Phoenix investor, Col. Louis Himelstein (r).

TV (ch. 2) Miami, named technical director of learning resources at Florida Atlantic U.

Bob Terry named program director of WLAV Nashville, Tenn. Adelaide Waller and Roger Scutt join outlet as station coordinator and news director, respectively. WLAV plans to go on the air March 1.

Joe Murray, former air personality and music director of WALT Tampa, Fla., appointed program director of WQUA Moline, Ill.

John M. Fouts, sales director of WHAS Louisville, Ky., joins Henry I. Christal Co., New York-based station representative firm, as manager of Detroit office. Mr. Fouts will begin his management duties at Christal in March. He joined WHAS in 1950 and was named sales director in 1952.

Dick Fain appointed director of newly created special programs unit of

WCUE-AM-FM Akron, Ohio, responsible for formulating and producing local documentaries and in-depth news reports. Fran Pettay joins WCUE announcing staff.

George Diab, operations manager of WTRF-TV Wheeling, W. Va., promoted to assistant general manager. Mr. Diab joined WTRF in 1953 as director of news and sports departments.

Peter V. Taylor, former promotion manager of KPEN (FM) San Francisco, appointed program director of KFOG (FM), that city. Currently KBAY (FM), the station expects to begin operation with new call letters on March 1.

Harvey Boyd, former program director of KASE Austin, Tex., joins WBAP-AM-FM Fort Worth as program manager.

Richard Orkin, news director and chief announcer at WLAN-AM-FM Lancaster, Pa., joins KYW Cleveland as production supervisor. Ron Beach, former promotion director, will assume Mr. Orkin's responsibilities at WLAN and perform in capacity of production supervisor. Kenn Allan will share some of this responsibility as news director.

Bob Harrington named WLAN's promotion director.

Dan Markham, sales manager of KTVR (TV) Denver, promoted to general manager. Mr. Markham was at one time sales manager of KIMN Denver and served for three years as sales manager of KXLY-TV Spokane, Wash., where he was also manager of KXLY-AM-FM for some time before returning to Denver six months ago.

Jack Stockton, program director and air personality at WJKF (FM) Chicago, joins WBBM-AM-FM, that city, as producer of station's new Composite program.

Robert L. Simmons, formerly on sales staff of WJZ-TV Baltimore, joins WVAJ, Chicago, as salesman. He succeeds Patrick J. Devlin, who has been transferred to rep firm's New York sales staff. William A. Morris, account executive in TVAR's New York office, rejoins WBCS-TV, that city, in similar capacity. Mr. Morris originally joined WBCS-TV in 1958 as sales promotion manager and was made account executive in 1959.

Fred Cusick resigns as news director of WEEI Boston, effective Feb. 18, to devote more time to free-lance sports activities. Mr. Cusick will remain, however, as WEEI sports director and continue his nightly sports programs.

Mike Powell, afternoon and evening news editor of KSFO San Francisco, promoted to assistant news director.

While continuing his position with VFW, Gen. Hittle will analyze and interpret world military developments for network.

Robert W. Matthews appointed news director of WEBB Baltimore, Md.
NASA cites staffer

Morton J. Stoller, 45-year-old scientist-engineer who has directed government's efforts in space communications and meteorological fields, has been awarded National Aeronautics & Space Administration's medal for outstanding leadership. Mr. Stoller is chief of NASA's Office of Applications, where he has been in charge of such U.S. space efforts as Echo, Telstar, Relay, Tiros and the soon-to-be-launched Syncom.

Paul D. Droste, formerly with WHAK Rogers City, Mich., joins WFCJ (FM) Miamisburg, Ohio, as news director and director of special production programs.

Bob Bruce and Tom Brown join WOKW Brockton, Mass., as news director and disc jockey, respectively.

Wayne Farrar, staff announcer with WDBJ-AM-FM Roanoke, Va., since July 1961, promoted to news editor.

Bob Woodel, news editor-public affairs director of WLBW Carrollton, Ga., resigns to join staff of WLAG-AM-FM La Grange, Ga.

Ron Hall joins news staff of KXOL Fort Worth, Tex., replacing Russ Bloxom, who leaves for active duty with Air Force Reserve.

Dr. Thomas Belviso, manager of music and literary rights for NBC, retired last week. Dr. Belviso joined NBC in April 1930 as program builder and music director and conductor. In 1932 he was appointed manager of music division and assigned to reorganize and coordinate music functions. Dr. Belviso was among first to apply original compositions to individual radio programs. He conducted first American Symphony, "Sinfonia," in its first radio performance.

Pat McCarthy named farm director of KBAT San Antonio, Tex.

Mrs. James (Mary) Spencer, since 1945 executive vp of Nat Gavender Inc., resident buying organization, St. Louis, joins staff of KSD-AM-TV, that city, for special community interest assignments.

Dick Porter, account executive for past two years with KONO San Antonio, Tex., promoted to director of merchandising.

Betty Quadt, production assistant with NBC News, appointed coordinator of public service announcements. Miss Quadt will act as network liaison with and consultant to Advertising Council, national welfare organizations and government and civic agencies. She succeeds Hilda Watson, who retired last month.

Carl J. Tutera, former air personality with WCVS Springfield and WEAW-AM-FM Evansion, both Illinois, joins WGSB Geneva, Ill., in similar capacity.

Don Steele, formerly of KOIL Omaha, joins KXLY Spokane, Wash., as disc jockey.

Shirley Dunham named promotion-publicity director of WRFD-AM-FM Columbus-Worthington, Ohio.

Howard C. Hosmer, assistant managing editor of Rochester (N.Y.) Times-Union, named managing editor of news department of WHEC-AM-TV, that city. The appointment, to be effective Feb. 15, was announced by John L. McClay, manager of broadcast division of Gannett Co. and vp and general manager of WHEC stations. In newly created post, Mr. Hosmer will be responsible for news and all other information services for both stations. He joined news staff of Times-Union as reporter in June 1936.

In 1950 Mr. Hosmer was named city editor, a post he held for seven years until his promotion to assistant managing editor.

Dave Hamer named assistant news director of KMTV (TV) Omaha, Neb.

Ron Cochran, ABC-TV newscaster, has signed with General Artists Corp., New York, for representation in all fields. Mr. Cochran is currently anchorman on network's ABC Evening Report (Mon.-Fri., 6:15-6:30 p.m. EST).

INTERNATIONAL

George Harper named general sales manager of CHFI-AM-FM Toronto.

Gordon Hatton, local sales director of CKKW Kitchener, Ont., promoted to sales manager, Bill Stoltz, announcer, named promotion manager.

Sue Haggarty, promotion director of

United Press International news produces!
British broadcast electronics pioneer dies

Sir Isaac Shoenberg, 83, who led the team of scientists and engineers which developed the 405-line system used by BBC in 1936 for the world's first regular public high definition television service, died Jan. 25 at his home near London.

Sir Isaac was born in Pinsk, Russia, and studied mathematics, mechanical engineering and electricity at the Kiev technological institute. After graduation he joined a Russian firm and was responsible for research, design and installation of the earliest radio transmitters in Russia. In 1914 he settled in Britain and worked for the Marconi Co., becoming a British citizen in 1919. He joined the Columbia Gramophone Co. as general manager in 1928 and when that company merged with the Gramophone Co. in 1931 to form Electric & Musical Industries Ltd., he became research director.

In 1954 Sir Isaac was awarded the Faraday Medal, highest award of the Institute of Electrical Engineers, for his pioneer work in television. He became a director of EMI in 1955 and was awarded a knighthood in 1962 for his services to sound recording and broadcasting.

CFPL-AM-FM London, Ont., joins Standard Broadcast Sales Ltd., Toronto, in similar capacity.

ALLIED FIELDS

Mary G. Dooling, organizer of Talent Inc., Chicago, and more recently with her own agency in New York, joins Lauren-Finger Agency, Hollywood, as director of commercial department. Miss Dooling will specialize in building select clientele to perform in radio and tv commercials, and also focus on supplying talent for industry, documentary and educational pictures.

PROGRAMMING

James Marshutz, recently resigned as commercial sales manager of Paramount Teleproductions, joins VPI Productions, New York, as vp in charge of sales and production.

Bill Vidas, former independent film representative, joins Independent Television Corp., New York, to cover sales territory in central states from headquarters in Chicago.

Harry E. Jenkins, planning and merchandising manager of RCA Victor Records, New York, elected to new post of division vp for marketing. Mr. Jenkins joined RCA Victor as quality control supervisor in 1941.

Don Medford, who directed episodes of MGM-TV’s Dr. Kildare, Sam Benedict and Eleventh Hour series during current season, has been signed to exclusive directing contract by company for both tv and motion pictures. He has also directed segments of U. S. Steel Hour, Alfred Hitchcock Presents, Twilight Zone, General Electric Theatre and Kraft Theatre.

Frank McGrath, co-star of Revue’s Wagon Train series, has been signed to new seven-year exclusive contract by studio, calling for his services in theatrical motion pictures as well as on tv.

Gil Cates, former producer of ABC-TV’s Camouflage daytime series, named director of International Show Time on NBC-TV (Fri., 7:30-8:30 p.m.).

Mr. Gillespie
Mr. Ringlep

Don Taylor, actor-turned-director, has become writer as well. His original teleplay, “Gym in January,” has been sold to Four Star Television for use on The Lloyd Bridges Show. He will direct episode he wrote, with filming started Feb. 6.

Buck Houghton has been signed to produce new Goodson-Todman series of hour-long original dramas which will be seen on NBC-TV next fall. Series, as yet untitled, will have Clifford Odets as contributing author and editor of all scripts.

EQUIPMENT & ENGINEERING

Lorin C. Weiss, senior sales engineer in western region of Sylvania Electric Products, appointed western district manager in Los Angeles for semiconductor division. He succeeds Roger A. Swanson, who was recently named divisional product-manager-transistors.

David K. Elwell, director of procurement and facilities services for Sylvania in New York, appointed director of new product planning.

William A. Rinefelder appointed chief engineer of product development department of Ameco, cat equipment manufacturing division of Antennavision Inc., Phoenix, Ariz. Mr. Rinefelder, who will be responsible for research and development programs, comes to Ameco from Motorola’s semiconductor products division in Phoenix, where he was applications consultant and solid state circuit design specialist for past six years.

John S. Chamberlin, manager of product planning and market research for tv receiver department of General Electric, Syracuse, N. Y., appointed marketing manager for radio receiver department. He succeeds William B. Clemmons, who has been named distribution sales manager for GE’s major appliance division.

Alvin Barshop, sales manager for tape recorder division of Emerson Radio, Jersey City, N. J., named sales manager for company’s phonograph division.

William S. Hepner Jr., manager of information office of Electronic Industries Assn., Washington, promoted to association’s marketing services department in dual role of manager of industrial electronics marketing services and manager of special projects and publications. Mr. Hepner joined EIA as head of information office and editor of association’s weekly news publication in early 1960 after four years as information officer for business and defense services administration of Commerce Dept.

Francis J. McCarthy appointed technical marketing manager for Williamsport (Pa.) operations of microwave device division of Sylvania Electric Products. He succeeds Forrest E. Gehlke, who resigned. Mr. McCarthy joined Sylvania in 1946.

Charles T. Lee, manager of market development for Philco International, promoted to marketing and sales manager for that division. Mr. Lee will be in charge of division’s New York City
office and overseas sales and export activities, both from U. S. and from foreign factories. He came to Philco in 1956 from Aveo Manufacturing Corp., where he was marketing and advertising manager of Aveo's international division.

John P. Prymak, former advertising and merchandising manager of industrial, receiving and cathode-ray tubes for Westinghouse Electric Corp., Elmira, N. Y., appointed advertising manager for five product lines of Du Mont Labs, division of Fairchild Camera & Instrument Corp., Clifton, N. J.

Henry J. Bechtold, staff writer with public affairs department of RCA, New York, appointed product news manager. Mr. Bechtold will be responsible for supervising and coordinating news and information of RCA's divisional product operations. Benjamin I. French Jr., manager of press and information for RCA Sales Corp., named trade news editor.

William J. Demorest Jr., account executive, promoted to scientific instrumentation sales manager for Honeywell's midwest region. He joined company in 1950.

DEATHS

Mr. McDonald

Services were held Tuesday, Feb. 5, at St. Catherine's Catholic Church, North Pelham, N. Y., for Joseph Albert McDonald, partner in Washington communications law firm of Hennessey & McDonald, who was killed Feb. 1 when he fell from a bridge near his Bethel, Md., home. In 1951 he was at Woodlawn Cemetery. Mr. McDonald, former NBC vp who has been in private practice in Washington since 1958, is survived by his wife, Louise Muth, one son and two daughters (At Deadline, Feb. 4).

Cecil McGivern, 55, executive of Granada TV Network Ltd., died Jan. 30 from burns following an accident at his home in Chalfont St. Peter, Buckinghamshire, near London. Mr. McGivern was formerly deputy director of BBC-TV. He joined BBC as drama producer in 1936. Beginning in 1950 Mr. McGivern helped develop Eurovision tv network.

Roland Pamler, 57, former resident of Chicago Heights and co-owner of city's first radio station, died Jan. 22 at his home in Glen Ellyn, Ill. Mr. Pamler, along with three other persons, was responsible for putting WCBZ on the air in May 1924. Three years later, station license was sold to WOK Homewood, Ill. He had also been employed as engineer for WHO Des Moines and WJJD Chicago.

Willie Donald Brooks, 20, engineer and chief announcer at WACR Columbus, Miss., was killed Feb. 3 in automobile accident near Aberdeen, Miss. He joined station six months ago.

Raphael Fleming (Mac) McGuire, 43, host of early morning show on WPEN-AM-FM Philadelphia, died Feb. 2 of stroke. Mr. McGuire, WPEN in 1955, was band leader and musician and in recent years owned and managed Town House Supper Club in Gloucester City, N. J.

James E. Rennie, 60, account executive at KGNU-TV Tucson, Ariz., for past 14 years, died Jan. 29 at his home in that city.

Includes 3 stations operating on unreserved channels.

a By order, commission granted motion by Santa Maria Telecasting Corp. and extended time to Feb. 18 to file exceptions to initial decision in proceeding on its application and that of Central Coast TV for new tv stations to operate on ch. 12 in Santa Maria, Calif. Dec. 18, 1962, initial decision favored Central Coast. Action Feb. 6.

b By memorandum opinion & order, commission denied petition by Reliable Best Co., applicant for new ch. in Calhoun, Ga., for reconsideration of Sep. 12, 1962, grant to Gordon County Bestco, Inc., for short-term renewal of license of WGA Calhoun. Re- quired petitioned commission to set aside renewal grant and to designate it for hearing on character qualification of licensee in consolidated proceeding with Reliable's application and that of Blue Ridge Mountain Bestco. Inc. for new station in Ellijay, Ga. On Jan. 18, WGA was made party to Calhoun-Ellijay proceeding and issues were enlarged to include so-called "strike issues" as to applicant Blue Ridge. Commission noted that current license of WGA will expire Sep. 1, 1963, and feels it more proper to confer with BHC party respondents, in light of likely litigious nature of proceeding, for purposes of (a) determining if, and under what terms, if any, new ch. will be assigned in Blue Ridge, and (b) protecting party respondents' interests in the Calhoun proceeding. Action Feb. 6.

c Commission gives notice that Dec. 10, 1962, initial decision which looked toward granting application of Smith Radio Inc. to change facilities of WNEP Fort Walton Beach, Fla., from 950 kc., 1 kw.-LS, 250 w.-N. in, to 1,400 kc., 1 kw.-LS, 250 w.-N. in, effective Jan. 20, pursuant to Sec. 1.135 of rules. Action Feb. 5.

Routine roundup

a On own motion, postponed Feb. 4 oral argument in proceeding on am applications of Simon Geller, Gloucester, and Richmond Brothers Inc. (WMEX), Boston, both Massachusetts, pending disposition of petition by Geller for leave to amend and return application to processing line. Action Feb. 1.

b Granted petition by KFKN West, Corp. (KFKN), Sherdon, Iowa, and extended to Jan. 29 time to file replies to exceptions to initial decision in proceeding on its application for new ch. in Sherdon. Action Feb. 5.

c By memorandum opinion & order in consolidated proceeding on applications of Northfield & Hastings Bestco. Inc. and Reliable Bestco. Inc. for new am stations in Northfield and Hastings, Minn., to increase daytime power of KATE Albert, Lsa, all Minnesota, In Docs. 14684-6, granted petition of Northfield and waived a filing fee of $35. In Docs. 1316 (b) (2) of rules to permit publication of its intended dismissal order once a week for three weeks in weekly newspaper of general circulation in Northfield since there is no daily newspaper in city. Action Jan. 31.

d By memorandum opinion & order (1) denied untimely filed petitions by Broadcast Bureau and Finley Bestco. Inc. (KSKO), Santa Rosa, Calif., party respondents, to enlarge issues in proceeding on application of Bay Shore Bestco. Inc. for new ch. in Hayward, Calif., in Doc. 144444: (2) on own motion, enlarged issues to include financial qualifications of applicant; and (3) dismissed as moot Bay Shore's related pleadings and motions. Action Jan. 31.

e Granted petition by Carol Music Inc. and extended to Jan. 31 time to respond to opposition to Broadcast Bureau to petition for review filed by Carol in proceeding on re-visions of license and Sec. 2 of WCLM (FM) Chicago, Ill. Action Jan. 31.

f By memorandum opinion & order in consolidated proceeding on applications of L. B. Wilson Inc. for renewal of license of WLBC, Inc. for new ch. in Miami, Fla., and Civic TV Inc., South Florida TV Corp. and Miami TV Corp. for new stations on that channel in Docs. 14738-8, denied petitions by South Florida and Civic TV to delete certain requirements and by Miami TV and L. B. Wilson for enlargement of issues. Action Jan. 30.

g By memorandum opinion & order in consolidated proceeding on applications of The Prattville Bestco. Co. and Billy Walker for new daytime stations at Prattville, Ala., in Docs. 14767-8, granted in part motion of Prattville for enlargement and clarification of issue of record and enlargement of issues to determine whether Walker's proposal would cause interference to existing operation of WGWC Selma, Ala., or any other station within range of WKIU and extent thereof, areas and populations affected thereby, and availability of other primary services to such areas and populations. Action Jan. 30.

h In proceeding on applications of Carlson Bestco., Inc., and Barcelona Bestco., Inc., for new am stations in San Diego and La Mesa, respectively, both California, granted their joint request for additional time to file joint petition requesting approval of agreement looking toward possible acquisition of Cabrillo's application. Action Jan. 30.

i Corrected in various respects transcript of oral argument on application of 1240 Radio Inc. Richmond, Va., Ellijay, Ga., and Hope- well, both Virginia. Action Jan. 30.

j By memorandum opinion & order in proceeding on applications of York-Clover Bestco. Inc. to change facilities of WYCL York, S. C., from 1530 kc., 250 w.-D, to 1540 kc., 2 kw.-D, and to WYCL-Lex for new daytime station at 1540 kc., 1 kw., in Charlotte, N. C., granted (1) joint request for approval of amendment to WYCL-WCL application would be dismissed, and (2) petition of Lyon & Healy to dismiss of Lyon petition to dismiss agreement whereby Lyon will forgo incorporation and thereby acquire 40% of stock; dismissed with prejudice WYCL application; and retained in hearing status Lyon application. Action Jan. 29.

ACTIONS ON MOTIONS

a Commission on Feb. 4 granted request by Sarks Tarzan Inc. (WTTV), Bloomington, Ind., and extended from Feb. 4 to Feb. 23 time to reply to opposition of Indiana Broadcasting Corp. (WISH-TV) Indianapolis, to Tarzan's petition for reconsideration of Oct. 16, 1962, report and order denying motion of ch. 4 from Bloomington to Indianapolis.

b By Chief Hearing Examiner James D. Cunningham

(1) Granted petition by Broadcast Bureau and extended from Feb. 4 to Feb. 18 time to file proposed findings in proceeding on am application of Storer Bestco. Inc. (WJKB), Dearborn Mich., pending, from Jan. 24.

(2) Granted petition by Continental Bestco. Inc. and dismissal of its application for new ch. in Wren, S. C., and dismissal of order for rehearing, with prejudice and retained in hearing status remaining applications involved in matter. Action Jan. 29.

(3) By memorandum opinion & order, granted petition by Broadcast Bureau and extended to Feb. 18 time to file reply to opposition of WCCB Calif., Blythe, Calif., on evidence hearing on application of Geoffrey A. Lapping for new am station in Elk Grove, Calif., and continued hearing to March 4. Action Feb. 1.

(4) By Hearing Examiner Basil P. Cooper

(2) By Hearing Examiner Charles J. Frederick

(1) Pursuant to agreement reached at Feb. 1 prehearing conference in proceeding on am application of KASY Bestco. Inc. for renewal of license of KASK, Inc., and extended to Feb. 15 time to file reply to opposition to renewal application for hearing on Feb. 28. Action Feb. 4.

(3) By Hearing Examiner Walter B. Guenther

(1) In proceeding on application of Triangle Publications Inc. (WNIC-TV), New York, N. Y., to add four television stations in New York City to compel respondents Connecticut TV Inc. and Springfield TV Bestco. Corp. to furnish information regarding their true and exact costs and requests for subpoena duces tecum and subpoenas, each directed to Walter N. Arnesberg, president and controlling stockholder of Triangle. (2) Denied Triangle's motion to quash subpoenas issued on Apr. 2, 1963, and continued hearings on subpoenas to be held April 11, 1963. Action Jan. 14, 47 (3) Granted Triangle's motion to quash subpoenas issued on Apr. 11, 1963, and continued hearings on subpoenas to be held April 11, 1963. Action Jan. 14, 47.
discharged Annenberg from compliance with that agreement. The grantee motion to quash subpoena duces tecum is without prejudice to respondents' right to file contempt proceedings on applications for new license to cover new installation and operation of new transmitters.
